Milo Page, an old prospector, found rich gold rock some time ago in the Panamint range. He prospected the ground enough to know that the find was of considerable extent. Recently he bought a mill in San Francisco and had it shipped by way of Daggett. The machinery has since been hauled to the mine.

CARSON & COLORADO.

It having been rumored that the directory of the Carson & Colorado railroad contemplated the extension of their line from its present southern terminus on the eastern shore of Owens lake, Inyo county, to Los Angeles or some point connected by rail with that city, a *Call* reporter called on D. O. Mills and questioned him regarding the accuracy of the information. In reply to the interrogatory Mr. Mills said that there was a very decided desire manifested by the people of Los Angeles, as well as those living north of Keeler, to have the road extended southward, and that he was in correspondence with several parties in the southern metropolis regarding the matter. It had, he said, been discussed by the directors, but nothing had been decided upon.

MR. MILLS FAVORS THE PROJECT.

Individually, Mr. Mills said he was in favor of extending the road either to Mojave, where the connection would be made with the Southern Pacific and the Atlantic & Pacific roads, or of building down to Los Angeles. Some of the other directors did not feel like incurring the necessary expense just at present. The Carson & Colorado road had been built by a few men and was an independent line, not under the control of the Southern Pacific by lease or otherwise.

OWENS RIVER VALLEY.

The Owens river valley, Mr. Mills said, is very fertile. South of Keeler, he said the country is barren and very similar in appearance to the Mojave desert, and it is for this reason that the road has not been extended beyond that point. But it is, he said, only a question of time when the road will be extended. There is no very great engineering obstacle in the way, and the road will either be built direct to Los Angeles or to some point either on the Atlantic & Pacific or the Southern Pacific. The route from Keeler to Mojave, where the two roads form a junction, would not, he thought exceed 110 miles, while to Los Angeles it might be 175 to 200 miles, according to which course presents the greatest advantages.—*Call.*

New Land Owners

It is a significant fact that most of the recent investors in real estate in Owens valley are from other parts of California. These people came here because they found lands of great fertility and at cheat prices. They are well to do, some of them owning large properties on other counties; but here they found lands in which money could be invested to better advantage than anywhere else in the State. When they first came their only object was to invest their money and hold their land as a speculation; but after a brief stay in the valley they became so well pleased with the climate and many attractions that they decided to bring their families and make their homes here. The action of these parties proves that Owens Valley is not a country of so few attractions that none would come here to live but settlers who are too poor to buy land in older settled localities. Far different from that; these men, who are familiar with the best soils of the State, find here lands equal in fertility to any they know, and so cheap that a man of very moderate means can buy land enough to make him as handsome a home as would now cost him a handsome fortune to buy in other parts of the State. Farm produce of all kinds brings higher prices here than in any other part of the State; the market is never glutted with any product and the demand is steadily increasing.

A Pretty Home.

At Camp Independence there is no prettier place than the home of Mr. C. A. Walter. As time rolls on many a person who passes there will be grateful to the man who planted the trees that make such pleasant shade along the road as far as his lands extend. Large stacks of hay, fields of oats and barley and wheat waving like molten gold are proof alike of the good quality of the soil and the care with which is cultivated. Trees laden with many kinds of fruits; flowers of rare beauty; shady, vine-clad arbors, all these attractions are found at this pleasant place. The impression in the minds of many who have never been in Inyo county is that it is a region of desert wastes and bare, rocky mountains. A visit to the home of Mr. Walter would at once remove such a notion. Stretching nearly one hundred miles from north to south Owens valley only waits for industrious hands to make hundreds of such handsome homes as Mr. Walter has made; he and a few others have shown what can be done and their example should not be lost.

The State Fair.

Inyo county has never yet been represented at the State Fair. We could easily get up such an exhibition as would be a credit to the county and a suprising revelation to the public. Two years ago an exhibition of our products was made at the State Fair of Nevada, and the beauty and excellence of those products excited general admiration. That display is to-day producing substantial improvement among us. Since it was made the country is better known and much more interest is taken in it by people who are able to improve it. Another display made this year both at Sacramento and Reno—and both could be easily accomplished—would do a great deal more for us than was accomplished two years ago.

Ranch for Sale.

At Black Rock, twelve miles north from Independence, 520 acres of land for sale. Black Rock is one of the very best parts of Owens Valley. Four hundred acres of this land is held under U. S. patent; the remainder is located under the timber culture Act. One hundred and eighty acres are enclosed by a fence of cedar posts and barb wire. Sixty acres are now under cultivation, mostly wheat, oats and barley. A large amount of hay can be cut; blue joint, red clover etc. Several large springs of pure water on the place and good water rights additional. House, outbuildings and corrals. C. & C. railroad half mile distant from east line of land. Owens river eighty rods distant. This is a fine place for an energetic man to improve and will be sold at a bargain. Apply to

C. MULHOLLAND,

At Virginia City

The *Enterprise* says that many men, a small army, are digging a deep trench on Taylor street for the new water pipe that is to carry water to run the mill for the C. & C. shaft. The pipe will carry a great deal of water. When the wheels start the people below Dayton will think Tahoe has "busted." The "old bonanza" mines are becoming new bonanza mines. They are showing up ore everywhere. On the 1500 foot level of the Con. California and Virginia they now have a drift that is in ore of the highest grade a distance of 30 feet and is not yet through it. However, the more ore is shown up the greater the effort to crush down stocks.

Railroad Survey.

The Chicago and Rock Island railroad company have had surveyors out looking for a route into California. The party returned some time ago and reported a route beginning some distance from Fort Wingate N. M., crossing the Colorado river some distance above Grand Cañon, passing through Pioche, Tybo and Owens river valley, crossing the Sierras through Walker's pass, emerging in the vicinity of Tulare lake, California, and following the San Joaquin valley to the Coast.

Malicious Meddling.

In the issue of this paper of May 14, 1887, the following was published. The reference explains itself.

"An order has been made requiring the county officers to furnish a schedule at each meeting of the Board of Supervisors of the amount of supplies needed for the ensuing quarter.

Jake Sharp schemed and stole until he became a millionaire. He is now likely to die in jail wearing the garb of a felon. Gold can be got too dear; it is precious but it costs too much when stolen.

Mr. G. W. Parish has a three-year-old colt that is a beauty. The horse is a glossy black; broad chest, round body, limbs straight and powerful. Eyes full and clear, muzzle small, nostrils wide and full. This fine animal is admired by all lovers of horse flesh who see him. The horse is of Hamiltonian—Planter stock and is now 16 hands 3 inches high.

Mr. Janvier and Phil. Cartier are prospecting a quartz ledge about seven miles west from Big Pine. The ore is low grade, carrying about eight dollors and a half per ton; but the ledge is six feet wide and within a few hundred feet of Big Pine creek. An abundance of water can thus be had, so that the ore could be very cheaply worked.

The various governments of Europe are at their wits ends to meet current expenses and pay the interest on their enormous public debts. One of the most important problems our own statesmen have to deal with is what to do with the enormous surplus revenue the government is receiving. All of which goes to show that the taxpayers themselves make better use of public money than emperors and kings.

Arrangements are nearly completed for a very extensive addition to the works at the marble quarry. This is made necessary by the rapid accumulation of orders that now far exceed the capacity of the works to fill. An order for fancy marbles for the new Hotel Del Monte is now being filled. Mr. Luce says that inside of two years large quantities of the marble will be shipped to New York. Some of the varities are of such beautiful and peculiar markings as if the figures had been designed and the colors laid on by a painter.

On his place down at the river W. J. Lake has corn standing from seven to eight feet high. It is quite common to find two to three ears to each stalk. Ground broken last spring and planted with oats and alfalfa is bearing a heavy crop. It is worth mentioning that this ground is where "nothing at all would grow;" at least "everybody" said said so, except Billy Lake. What a pity it is that Columbus wouldn't listen to "everybody" and give up his foolish attempt to cross the western ocean; if "He had to gude advice but harkit," Mr. Lake would not have had a chance to prove once more that "everybody" is a meddlesome lazy ignoramus.

HAYTIAN SOLDIERS.

Valorous Sentries Who Are Considerately Provided with Chairs.

The Haytians are an intensely vain people, and the thing they most pride themselves on is their army. Nothing will convince them as a military power they are not vastly superior to any nation, either in the Old or New World. Even those who have lived in European capitals are addicted to this extremely ridiculous "balderdash;" but when the real facts are presented, the state of affairs disclosed is simply sublime in its absurdity. The Haytian army must present to European beholders a spectacle of grotesqueness, the equal of which it would be difficult to find anywhere, either in fact or fiction. Imagine a battalion on parade consisting of thirteen privates, ten officers and six drummers! the rest of the men—as the author quaintly puts it—thinking it unnecessary to present themselves except on pay day. The staff officers are clad in the most gorgeous uniforms procurable, while the men are habited in a motley array of tatters. Some have coats wanting one arm, the collar or the tail; the headgear may consist of a dilapidated shake, a straw hat, wideawake or in many cases merely a handkerchief tied around the head. The officers hold their swords in either hand as suits them, and the men march past in admirable confusion, each one carrying his musket in the position he finds most convenient. The populace look on with admiring looks and gravely ask if finer troops can anywhere be found. The Haytian black, however, thoroughly detests military service, and consequently the sentries, lest they should be over-fatigued, are considerably provided with chrais!—*Chambers' Journal.*

WHAT BAKING POWDER SHALL WE USE?

This plain question comes home to every housekeeper. We all desire pure and wholesome food, and this cannot be had with the use of impure or poisonous baking powder. There can be no longer a question that all the cheaper, lower grade of baking powders contain either alum, lime or phosphatic acid. As loth as we may be to admit so much against what may have been some of our household gods, there can be no gainsaying the unanimous testimony of the official chemists. Indeed, analysts seem to find no baking powder entirely free from some one of these objectionable ingredients except the Royal, and that they report as chemically pure. We find some of the baking powders advertised as pure, to contain, under the tests of Profs. Chandler, Habirshaw and others, nearly twelve per cent. of lime, while others, are made from alum with no cream of tartar. This we presume accounts for their lack of leavening power as sometimes complained of by the cook, and for the bitter taste found in the biscuits so frequently complained of by ourselves.

But aside from the inferiority of the work done by these powders, the physiologists assure us that lime and alum taken into the system in such quantities as this are injurious. They are not decomposed by heat, nor dissolved in mixing or baking. They go with the bread, therefore, into the stomach, where their physiological effects are indigestion, dyspepsia, or worse evils.

The question naturally arises, why do these cheap baking powder makers use these things? Alum is three cents a pound, lime still cheaper, while cream of tartar costs thirty-five or forty. The reasons for the chemical purity of the Royal Baking Powder were recently given in the New York *Times* in an interesting description of a new method for refining argols, or crude cream of tartar. It seems that it is only under this process that cream of tartar can be freed from the lime natural to it and rendered chemically pure; that the patents and plant for this cost the Royal Baking Powder Company about half a million dollars, and that they maintain exclusive control of the rights.

Prof. McMurtrie, late chief chemist of the Department of Agriculture at Washington, D. C., in the interests of commerce, made an examination of this process, and reported upon the results attained in the refined cream of tartar. The following extract from his report would seem to answer the question repeated at the head of this article, and which is so frequently propounded by the housekeeper:

"I have examined the cream of tartar used by the Royal Baking Powder Company in the manufacture of their baking powder, and find it to be perfectly pure, and free from lime in any form. The chemical tests to which I have submitted the Royal Baking Powder prove it perfectly healthful, and free from every deleterious substance."

A Railway Tie Nursery.

A notable phase of railway industry is a railway tie nursery, situated near the little town of Farlington, Kas., in the southern part of that State. It is said to be the largest artificial plantation of forest trees in North America, and is owned by the Southern Pacific. The different sections have been planted, respectively, two, four and six years, one-fourth being planted with the ailanthus, the rest with the catalpa, together with a few of white ash. Those first planted are now about twenty-five feet in height, the last about twelve, and some of the taller are seven inches through the stem. There are in all about three million trees, in full vigor, on the plantation; all were planted four feet apart each way, to shade the ground, though eight feet is the ultimate intention, this plan allowing three-fourths of the trees to be cut when they are fit for fence posts. When rather larger it is expected the trees will make excellent railway ties in great numbers—that is, after a thinning-out process, there will be some nine hundred thousand trees to come to maturity. The area of this vast railway tie nursery is to be still further increased.—*N. Y. Sun.*

Cowboys' Cure for "Loco" Poisoning.

Dr. Wilcox, of Washington, D. C., says in The Medical Record that the cowboys of Idaho treat animals affected with "loco" poisoning by amputating the tails of the affected animals. The paralysis is due to congestion of the spinal chord, the posterior parts of the body being first affected. The plants which are charged with producing this poisoning are oxytropis lambertii, astragalus mollirimus, and possibly others of the leguminosae. The cowboys call these plants "larkspur," although, according to science, true larkspur is not found in their line of march, nor at the season when loco poisoning occurs.

THE BLUE HEN'S EGGS.

An Old Fellow Who Was Much Taken With a New Species of Chickens.

"Wall, fur mercy's sake, look thar, pap," said a woman, dressed in faded calico and dim gingham. The old fellow stopped and the woman pointed at a lot of colored eggs which had been left over from Easter, and which the grocer had temptingly arranged in front of his store. "Look thar," the woman repeated, pointing at the eggs.

"They air a new wrinkle on my ho'n," said the old fellow, taking up one of the eggs and examining it. "These here," he added, addressing the grocer who approached," muster been laid by one uv the ole blue hen's chickens."

"They are direct descendants from the old blue hen, sure enough," the grocer replied, who showed an accomodating quickness to tell a lie, either through courtesy or with an eye to business.

"You don't say so."

"Yes, sir, and I bought them for Mr. Garland, who sent me word some time ago to get him a few if I possibly could."

"Wall, Gus ought to know whut good chickens air."

"He undoubtedly does."

"Wall, I've heard about the old blue hen's chickens all my life, but this is the fust time I ever seed any uv the aigs."

"They are not very plentiful now," said the grocer. "In fact, they are bought up by the agents of monopolies and sent North for the use of rich railroad men."

"The chickens, I reckon, lay over the common run of fowls."

"As much, sir, as day lays over night."

"Whut special advantage have they got?"

"Well, they lay three times a day, for one thing."

"Now, look here, you don't mean that."

"I reckon he do, pap," the woman declared. "I know in reason that he do, fur Aunt Caroline Welsh that had some in No'th Kliny, told me jest befo' she died that they wuz the outlayenist things she ever seed, an' says she: 'Evcrline, I do b'lieve that the aigs is fresher than the aigs uv these here common chickens.'"

"She was right," said the grocer. "Mr. Garland tells me that the eggs will keep for years without spoiling, but," he added, laughingly, "if he don't mind he will find that they don't keep so well after all, for if he doesn't come after them pretty soon I'll sell them. A business man can't afford to let his money lie idle, you know."

"That's a fact," the farmer replied. "Now, whut mout they be wuth?"

"Well, I hardly know. Where do you live?"

"On Saline river, about two days' ride from here."

"Do you come to town very often?"

"Fust time I wuz ever here."

"I thought that if you came to town very often I might engage you to bring me a lot of the chickens when they hatch. Tell you what I'll do. I'll let you have all six of them for sixty cents."

"Ain't that a putty heavy price?"

"O, no, pap," said the woman. "Jest think uv chickens that lay aigs—fresh ones at that—three times a day."

"All right," said the old fellow, hauling out the toe of an old sock and shaking a few dimes from it; "I'll take 'em. Shore they'll hatch?"

"Hatch! Why you can cover them up with an old straw hat and they'll hatch. Much obliged. Well, call again."

When the grocer went back into the store, he slapped himself, laughed uproariously and then said:

"It may be wrong to cheat this way, but I don't believe that we are called upon to have sympathy for such ignorant people; and, besides, honest old farmer as he looks, he d cheat me in a minute if he could."

Several weeks later an old fellow drove up to a grocery store and asked a man who came out to the curbstone if he wanted to buy any guinea chickens. "Fresh as they ken be an' already cleaned," said the old fellow.

"What do you ask for them?"

"Wall, I don't know whut they air wuth. You see they air mighty big ones."

"Yes, I see. How many have you got?"

"Fifteen."

"There is not much sale for guineas."

"They oughter be wuth ten cents a piece, oughtent they?"

The grocer, with shrewd hesitancy, replied: "I don't know. Well, drive round to the back door and put them out."

Immediately after receiving his money the old fellow drove down town, and, with a woman who seemed to be his wife, was standing on a street corner, when the grocer who had bought the guineas rushed up and exclaimed:

"You are a lying old wolf, that's what you are?"

"Whut's the matter?"

"You sold me a lot of buzzards, you old wretch, and I am going to have you arrested if you don't give me back my money. One of my best customers bought one and then, discovering what it was, struck me over the head with it and then left the store."

"W'y, pap, that was too bad, wan't it?" said the woman.

"I recognize you, now," said the grocer, stepping back.

"Yas," said the old fellow, "an'—but don't be in a hurry. Didn't know the blue hen's chickens when you seed 'em, eh? W'y I thought you knowd all about the breed. Say, whenever you want any more, jest let me knew. They lay three times a day, you know, but I'm sorry that the chickens ain't as fresh as the aigs. When you come out my way, drap in to to see me."—*Arkansaw Traveller.*

A Wreath of Primroses.

When Benjamin Disraeli was a young man he bet a pair of gloves with a friend on the question whether a wreath of primroses worn by a young lady were natural or artificial. They proved to be natural, and he not only won the bet, but the young lady gave him one of the flowers, which he preserved carefully as a souvenir. That incident was the beginning of his love of primroses, and now the Primrose league, founded in memory of him, is one of the most potent factors in English politics.—New York Tribune.

AN EXCITING EXPERIENCE.

Nerve and Skill of the Canadian Voyageur—The Fur Hunter.

Running a rapid is one of the most exciting experiences of a boatman's life. Yet the risks habitually taken by the Canadian voyageurs accustomed them to face death in this way without hesitation. When descending an unknown stream, an ominous roar would suddenly announce the danger from below, from which retreat was impossible. Then coolness and action quick as thought alone could guide the boat through the foaming waters, when rocks on every hand threatened destruction.

There was excitement enough in shooting a rapid when the adventure was made deliberately. If the pass were a dangerous one, the boats were commonly lightened of part or all their load. Then, as the current began to quicken, the bowman and the steersman would rise from their seats, and quickly seizing their short paddles brace their knees against the gunwale of bow and stern to steady themselves and the boat. Immersing the blades of their paddles deep in the water so that the edges cut along with little resistance, they awaited the moment of action, while the oarsmen redoubled the force of their strokes that the boat might have an impetus of its own swifter than the current. Thus the frail bark plunged downward into the seething waters, with the merry boat song of the Canadian voyageur mingling with the voice of the waters, while his Indian companion was silent and stern as death. Into the midst of the fierce currents, whirled here by an eddy and thrown with a crash against a bowlder there, the boat was steered from side to side out of the way of the obstructing rocks by the united, daring action of the bowman and steersman, until at length, if wreck was escaped, they emerged into the quiet waters below.

Upon the skill and nerve of bowman and steersman the safety of life and cargo depended, and their pay was often two or three times as much as that of the oarsmen, who merely propelled the craft. It was the custom of the merry boatmen, as they lustily plied their paddles, to strike into a Canadian barcarole. And at length the Indian so far forgot his taciturnity as to take up the custom of singing, which enabled him to keep better time and to paddle more steadily. It became the settled custom among the natives of British Columbia for the steersman to lead the song and for the crew to join in the chorus only.

When the streams were frozen over, the boats, of course, were laid aside, and then the fur hunters would bring in their packs on snowshoes or with sledges drawn by dogs. The dogs' sled was usually about nine feet long and sixteen inches in width, made of thin oak or birch boards turned up in front, and lashed together with deer thongs. From 200 to 400 pounds on one of these could be drawn by four dogs twenty-five or thirty-five miles a day.

The voyageurs loved to decorate any part of their dress with plumes and many colored ribbons, with the ends floating gayly in the breeze. Leggins were frequently worn, and when the cold was intense two or three suits would be put on at once. Ornamental moccasins covered their feet, while brilliant cotton handkerchiefs were tied sailor fashion around their swarthy necks, and from the scarlet belt was suspended knife and tobacco pouch. Some wore coarse cloth caps, while others wound around their long black hair a colored handkerchief in the shape of a turban. Occasionally black beaver hats were seen among the more foppish, and bonnets, bound with gold and silver tinsel cords, almost hidden under feathers and tassels.

For food the fur hunter took what he could get, and as a rule his chief dependence was his rifle. Meat was his chief food, and was eaten fresh or dried. Sometimes for months and even years he tasted neither bread, salt nor vegetables. Fish, flesh or fowl was all his larder contained, and he was well contented to have it full even of his sole sustenance. A voyageur's rations varied in the several parts of the fur hunting region. Thus, in New Caledonia a dried salmon or eight rabbits might be given him for his day's food; at Athabasca it would be eight pounds of moose meat; on the Saskatchewan ten pounds of buffalo flesh; while in the far north his fare would be half fish and half reindeer.

Pemmican was the great staple preserved food, and the fur trader learned how to prepare it from the Indians. The flesh commonly used was that of the buffalo, elk, deer or antelope, and for long keeping it was prepared with fat, spices and raisins. It was prepared by cutting lean flesh into thin slices, which were cured by partly cooking, by exposing to sun or frost, or by placing on a wooden grate over a slow fire. When dried it was pounded between two stones until pulverized, and then it was placed in a bag made of the animal's hide. After being mixed with about equal proportions of the animal's fat the bag was sewed up, and after it had cooled and hardened it was ready for storage or transportation. A 100 pound bag, three feet long and ten inches square, would comfortably sustain four men a month.—Compiled from Hubert Howe Bancroft's History of the Northwest Coast.

The Princess' Half Crown.

A crowd thronged King Cross station, London, the other day to witness the departure of H. R. H. the Prince of Wales and his family for Sandringham, and were gratified by a little unrehearsed effect, as well as a proof that royalty is not altogether exempt from that frequent failing of the masses—a penchant for "goodies." The mysterious automatic box which yields up sticks of chocolate in return for the insertion of a penny was the object of special attention from H. R. H. Princess Maud of Wales, whose approaching confirmation a few days after may have accounted for the abstraction which led the young lady to pop a half crown into the fatal slit in place of the humbler copper.

The mistake was discovered as the coin slipped from her fingers, and so genuine and unaffected was the horror expressed in the exclamation, "Oh! my half crown!" that the appreciative bystanders were sympathetically silent till the Prince of Wales, with a twinkle in his eye, gravely advised his youngest daughter to square matters by the insertion of the now unpassable French pennies on future occasions. A burst of hearty laughter and cheering ensued, during which young Princess Maud, blushing furiously, retreated to the railway carriage.—Manchester Guardian.

An Important Discovery.

A Hyde Park young lady has made an important discovery. To prevent other ladies from borrowing her newest music she just writes the name of her best admirer on the margin. She says the borrowers are afraid of the effect the sight of the name would have on their own young men and don't ask for the "marked copy."—Chicago News.

Been There Before.

Omaha Man—What was that fool Jinks gassing about?

Confidential Clerk—He says the firm owes him $1,000 for attracting customers by looking in the window.

"Great Snakes!"

"I told him he stood there on his own accord, was never hired by the firm for anything at all, and he would only make a bigger laughing stock of himself than he was naturally. Then he said he wanted $500 more for that insult. Of course he can't do anything. There's neither law nor justice in any such claims as that."

"What lawyer has he got?"

"Lawyers De Smartle, De Wise and De Bigg."

"Pay him the money."—Omaha World.

An Average Seance.

Omaha Medium—The spirit who is now here tells me you are not an American by birth.

Omaha Man—He vas right.

"He says you were born in another country."

"Dot is drue."

"He says the name of that country is Germany."

"Dot vas so; it vas Shermany."

"I am tired now. Two dollars."—Omaha World.

A Matter of History.

Deacon Jones—Now, Brudder Jones, it am shua dat de culled pussens war white; kase de Bible do say dat dey are de descendants ob Ham, an' he war a white man; now de question am, how did dey get black an' when?

Elder Jones—Well—er—um, de zact date I doan' recomember, but I er'spect it must hab been durin' de time when de hist'ry speaks ob de dark ages.—Judge.

Humor in Signs.

Isaac Came, a rich shoemaker, of Manchester, who left his property to public charities, opened his first shop opposite to the building where he had been a servant, and put a sign which read: "I. Came—from over the way." Somewhat like this was the sign of a tavern keeper named Danger, near Cambridge, who, having been driven out of his house, built another opposite and inscribed it: "Danger—from over the way." The successor retorted by putting up a new inscription: "There is no Danger here now."—Living Church.

Familiar with the Market.

Wealthy Husband—Money? Why, my dear, you said you drew $1,000 of your own from the bank this morning.

Petted Wife (who had bought a few things and invested the rest in real estate)—Well, I stopped in at Mrs. De Ribbon's and bought a bonnet and"——

"Here's my purse, dear."—Omaha World.

NINETY THOUSAND DOLLARS.

The Haul Made by Lucky San Franciscans—A Ladies' Pool.

Ever since the result of the May drawing of the Louisiana State Lottery at New Orleans became known in this city, rumors have been current all over town that the bulk of the capital prize of $150,000 had been won here by a number of lucky resident shareholders in the winning number, 15,766.

To ascertain if there was any truth in the tale, a *Call* reporter went on a prospecting tour yesterday among the banking houses, thinking some of them might have managed the collection of any prizes drawn at New Orleans. His inquiries met with signal success. Henry Wadsworth, cashier of Wells, Fargo & Co.'s bank here, made the following statement to the *Call's* representative. He said: "Yes, it is a fact that we have done the collecting of a large sum of money drawn in The Louisiana Lottery on May 10th last. We have so far collected and paid over to patrons here $90,000 out of the big prize of $150,000. The tickets which we handled were six one-tenth coupons, and each represented an interest of $15,000 in that big sum."

The matter of locating the lucky winners was more difficult. After following a large number of clews, the reporter succeeded in discovering not one alone of fortune's favorites, but twenty of them. They were all ladies. In a cosy room at the Colonnade House, 1220 Market street, was found Mrs. Kelly one of the winners. The lady told the story of how she had made the venture as follows: "For a long time I was as much interested in the lottery drawing as if I had the lucky numbers, but some how or other I never could get up courage enough to invest in the scheme. I was afraid that I was too unlucky to get anything. But a little while back I gave a party to my friends—there were about twenty-five of us, all ladies—and during the evening the question of lottery tickets came up. More out of fun than anything else, we proposed to get up a pool and buy some tickets. We were not all willing to join, but after some talk we made up a pool of $20 and bought twenty one tenth coupons. This was in March, just before the drawing. When the list came out, we found our tickets had won only $10. This was better than nothing, and we again made made up another pool of $20. Well, the April drawing won us $20. We put it all in again, and in May we got the tenth of $150,000. This gives us $750 apiece, which, I think, is a big return for our investment. You ought to see those of the ladies who were at the party, and who laughed at us for buying lottery tickets. They are just as mad as mad can be. We are going to keep on and try our luck again in June, as we are now sure that there are prizes to be won."

Mrs. Kelly declined to give any of the names of her fortunate friends who were in the pool, on the ground that they did not desire any mention of themselves.—*San Francisco, Cal., Call, June 1.*

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

About the worst examples a boy meets with are in the arithmetic.

A PITIFUL SIGHT.

What sadder sight can be imagined than that of a noble man, whom the world can ill-afford to spare, stricken down in the prime of a useful life by consumption. Thousands are yearly filling consumptives' graves who might be saved by the timely use of Dr. Pierce's "Golden Medical Discovery," which is a positive cure for consumption in its early stages. It is the best alterative and pectoral in the world. All druggists.

Higgins—How's this old boy; off for the West? Thought you were going to Europe. Wiggins—So I am; via Pacific Ocean and Suez Canal. The Atlantic's getting too crowded for safe travel.

TROUBLE AHEAD.

When the appetite fails, and sleep grows restless and unrefreshing, there is trouble ahead. The digestive organs, when healthy, crave food, the nervous system, when vigorous and tranquil, gives its possessor no uneasiness at night. A tonic, to be effective, should not be a mere appetizer, nor are the nerves to be strengthened and soothed by the unaided action of a sedative or a narcotic. What is required is a medicine which invigorates the stomach, and promotes assimilation of food by the system, by which means the nervous system, as well as other parts of the physical organism, are strengthened. These are the effects of Hostetter's Stomach Bitters, a medicine whose reputation is founded firmly in public confidence, and which physicians commend for its tonic, anti-bilious and other properties. It is used with the best results in fever and ague, rheumatism, kidney and uterine weakness, and other maladies.

A musician in Europe is trying to set Tennyson's Jubilee Ode to one of Wagner's compositions. Siberia yawns for that man.

Man's inhumanity to woman makes countless thousands mourn, would be an applicable rendering of Pope's line, in view of the indignities she has suffered and pains undergone at the hands of unskillful physicians and quacks. Naturally modest she suffers on until forced to consult a physician regarding some female difficulty which she well knows is sapping her strength. All this embarrassment can be avoided and a cure effected by purchasing Dr. Pierce's "Favorite Prescription" of your druggist, and taking as directed. Price reduced to one dollar.

The Collector at Bombay has among his curiosities a Chinese god marked "Heathen Idol," and next to it a gold dollar marked "Christian Idol."

For Coughs, Sore Throat, Asthma, Catarrh, and other Diseases of the Bronchial Tubes, no more useful article can be found than "*Brown's Bronchial Troches.*"

TRULY A HOUSEHOLD REMEDY.

240 Bedford Av., Brooklyn, N. Y., March 12, 1884.

I have used Allcock's Porous Plasters for the last twenty years. They are truly a household remedy. If one of my children has a cold and wheezes, I put on Allcock's Porous Plaster on the chest and one between the shoulder blades. If any of the children have croupy coughs, or coughs of any kind, I place the Plaster close up around the throat; the soothing effect is apparent almost always in two hours. If they have a disordered stomach, a Plaster placed just below the chest bones makes digestion perfect in half a day. If there is any looseness of the bowels, accompanied by coldness of the skin, two Allcock's Porous Plasters applied over the stomach cure in from two to five hours. I notice particularly that these Plasters never abrade the skin or cause the slightest irritation. From my own experience I know they never fail for rheumatism, pains in the back or lumbago. C. Middlebrook.

NORTHWESTERN MASONIC AID ASSOCIATION OF CHICAGO.

Organized 1874. Has 40,000 members. Paid to beneficiaries over $3,250,000. No annual dues and no expense after joining except to pay assessments as deaths occur. The benefits of Life Insurance furnished at actual cost. The average expense for last four years to members 40 years of age to carry $2,500 only $16.15; $8,500 cost $62.46 per year. A limited number of Non-Masons between 21 and 45 years of age will be received when recommended by two Masons, members of the Association. C. A. Bond, Gen'l Agent Pacific Coast, 323 California St., S. F.

John Ruskin has an unaccountable aversion to all wheeled vehicles. He would probably rather walk to Heaven than go as Elijah did.

* * * * Confidential advice, to either sex, on delicate diseases. Book 10 cents in stamps. Address, World's Dispensary Medical Association, 663 Main St., Buffalo, N. Y.

Phobibitionists are investing all their money in Western Union. There is almost enough water in that corporation to suit them.

Relief is immediate, and a cure sure. Piso's Remedy for Catarrh. 50 cents.

Try Germea for Breakfast.

BABY'S SKIN & SCALP CLEANSED PURIFIED AND BEAUTIFIED BY CUTICURA.

For cleansing, purifying and beautifying the skin of children and infants and curing teething, disfiguring, itching, scaly and pimply diseases of the skin, scalp and blood, with loss of hair, from infancy to old age, the Cuticura Remedies are infallible.

Cuticura Remedies are absolutely pure, and the only infallible skin beautifiers and blood purifiers, free from poisonous ingredients.

Sold everywhere. Price, Cuticura, 50c.; Soap, 25c.; Resolvent, $1. Prepared by the Potter Drug and Chemical Co., Boston, Mass.

☞ Send for "How to Cure Skin Diseases."

BABY'S Skin and Scalp preserved and beautified by Cuticura Medicated Soap.

For Weak Women.

Mrs. Lydia E. Pinkam, Lynn, Mass.: "About the first of September, 1881, my wife was taken with uterine hermorrhage. The best styptics the physician could prescribe did not check it and she got more and more enfeebled. She was troubled with Prolapsus Uteri, Leucorrhœa, numbness of the limbs, sickness of the stomach and loss of appetite. I purchased a trial bottle of your Vegetable Compound. *She said she could discover a salutary effect from the first dose.* Now she is comparatively free from the Prolapsus, Stomach's sickness, &c. The hermorrhage is very much better and is less at the regular periods. Her appetite is restored, and her general health and strength are much improved. We feel that we have been *wonderfully benefitted* and our hearts are drawn out in gratitude for the same and in sympathy for other sufferers, for whose sakes we allow our names to be used."

C. W. EATON, Thurston, N. Y.

The Compound is put up in Pill, Lozenge and Liquid form. All sold by druggists. The Pills and Lozenges sent by mail on receipt of price.

STEINWAY KRANICH & BACH Gabler, Keenish Pianos; Burdett Organs, band instruments. Largest stock of Sheet Music and Books. Bands supplied at Eastern prices. M. GRAY, 203 Post Street, San Francisco.

GOLDEN MEDICAL DISCOVERY

CURES ALL HUMORS, from a common Blotch, or Eruption, to the worst Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin, in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. Great Eating Ulcers rapidly heal under its benign influence. Especially has it manifested its potency in curing Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Disease, White Swellings, Goitre, or Thick Neck, and Enlarged Glands. Send ten cents in stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections.

"THE BLOOD IS THE LIFE." Thoroughly cleanse it by using Dr. Pierce's Golden Medical Discovery, and Good digestion, a fair skin, buoyant spirits, and vital strength, will be established.

CONSUMPTION, which is Scrofula of the Lungs, is arrested and cured by this remedy, if taken before the last stages of the disease are reached. From its marvelous power over this terribly fatal disease, when first offering this now celebrated remedy to the public, Dr. Pierce thought seriously of calling it his "Consumption Cure," but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption, but for all Chronic Diseases of the Liver, Blood, and Lungs.

If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flushes, low spirits and gloomy forebodings, irregular appetite, and coated tongue, you are suffering from Indigestion, Dyspepsia, and Torpid Liver, or "Biliousness." In many cases only part of these symptoms are experienced. As a remedy for all such cases, Dr. Pierce's Golden Medical Discovery is unsurpassed.

For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy.

Sold by Druggists, at $1.00, or SIX BOTTLES for $5.00.

Send ten cents in stamps for Dr. Pierce's book on Consumption. Address, World's Dispensary Medical Association, 663 Main Street, Buffalo, N. Y.

$500 REWARD is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure, if you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption. Dr. Sage's Catarrh Remedy cures the worst cases of Catarrh, "Cold in the Head," and Catarrhal Headache. 50 cents.

SCHOOL AND CHURCH.

—The Moody Birthday Endowment Fund for the schools at Northfield is growing slowly toward the desired limit of $40,000.

—A little girl in the primary school was asked to tell the difference between the words "foot" and "feet." She said: "One feet is a foot, and a whole lot of foots is a feet."—*Bazar.*

—The Presbyterian Synod of India is composed of five presbyteries, fifty-four ministers, eighteen candidates, twenty-eight churches, 712 communicants and 2,328 Sunday-school scholars.

—The home Sunday-school of Mr. Spurgeon's church has 108 teachers, all members of the church, and 1,428 scholars. In all the schools connected with the Tabernacle there are 7,677 scholars.—*Indianapolis Journal.*

—During the past three months the Baptist churches of Baltimore have received nearly 600 additions by baptisms—530 to the white churches and 270 to the colored.—*Golden Rule.*

—The *Foreign Missionary* reports ten Protestants converts in all Canton Province forty years ago; now there are 4,000. The increase of the past seven years is double that of the previous seventy.

—Missionary Richards writes from the Banza Manteke mission on the Upper Congo: "This is no longer a heathen country. The 'Nkimba,' the 'Nkises,' the poison-giving, the throat-cutting, the demoniac yells, the diabolical dance and witchcraft, are things of the past here. Of the 1,000 converts, 870 are grown people."

—Mr. Ira D. Sankey, the evangelist, has given to the First Methodist Church, of Newcastle, Pa., a building-lot valued at $4,000, on condition that the congregation will erect a church to cost at least $25,000. Mr. Sankey, some years ago, gave the Young Men's Christian Association in Newcastle a $50,000 building.—*Chicago Advance.*

—Jonas G. Clark, founder and president of the new Clark University to be established at Worcester, Mass., has given for the institution the sum of $2,000,000, to be divided as follows: $300,000 for the erection and equipment of buildings; $100,000, the income of which shall be devoted to the maintenance of a library; $600,000 for an endowment fund; real estate, books, works of art, to the value of $500,000; and $500,000 for a professorship endowment fund.—*Public Opinion.*

—The Governor of South Carolina, and other State officials, recently visited Claflin University, a Methodist Freedmen's institution at Orangeburg, S. C., and examined carefully all its departments and was most favorably impressed. "This," he said, "is a great revelation." He addressed the students in the chapel and said that he was surprised and delighted with what he had seen, and that henceforth Claflin University would find in him a friend and an earnest advocate.—*N. Y. Independent.*

TEACH OBEDIENCE.

The Royal Road to Virtue, Prosperity and Good Citizenship.

Many a passionate child rules the household. The little baby on his mother's knee goes into a passion because his dinner is withheld from him, or some toy denied him. He shrieks, and strikes his mother, and the mother says: "Poor little boy, he has such a passionate nature; he can't be crossed," and yields to him. She ought to spank him—spank him hard—for being in a passion, and give him nothing till his passion had cooled. The child, though he be so young that he can not speak, if he is old enough to lift his fist and strike a blow, deserves punishment, needs to have a lesson of repression taught him. The mother who neglects this increases the chances of her son's going to the gallows. When the child is older, there are better disciplinary punishments than spanking; but when the child reaches such an age that they are useful, it may be too late, his temper may have grown into a dominating force in his character that can not be eradicated. Mothers sometimes say when a child shows a vile temper and shrieks a good deal, that it would endanger his life to punish him; perhaps so, but you still more endanger his future if you don't punish him. Many a gallows tragedy has had its beginning on the mother's lap.

Day by day I see criminals, hundreds of them—thousands of them in the course of the year. I see scores of broken-hearted parents wishing rather that their sons had never been born than they had lived to bear such burdens of shame and disgrace. I hear the wailing of disappointed mothers, and see humiliated fathers crying like children because of the sins of their children. I see mothers growing gray between the successive visits in which they come to inquire about the boy in prison. And seeing these dreadful things till my heart aches and aches, I say to those mothers and fathers whose boys have not yet gone astray, to those mothers and fathers whose little families are the care of their lives, teach your children obedience. I want it written large. I wish I could make it blaze here in letters of fire. I wish I could write it in imperishable letters, glowing letters on the wall of every home—obedience, obedience, obedience! Obedience to law—to household law; to parental authority; unquestioning, instant, exact obedience. Obedience in the family; obedience in the school! Wherever, from the beginning, from the first glimmering of intelligence in the child, there is expression of law, let there be taught respect for it and obedience to it. It is the royal road to virtue, to good citizenship; it is the only road.—*N. Y. Independent.*

FACTS ABOUT RATS.

Interesting Information Gathered by an Ardent Admirer of the Rodent Family.

The rat is finely equipped for the peculiar life he is ordained to lead. He has strong weapons in the shape of four long and very sharp teeth; those teeth have a fine edge, the upper working into the lower, so that they meet in the act of gnawing; while the soft part is being worn away, the hard part keeps its chisel-like edge all the time, and at the same time the teeth are constantly growing up from the bottom, so that as they wear away a fresh supply is ready. Should one of these teeth be removed, the opposite tooth will continue to grow, and there being nothing to wear it away, it will project from the mouth and be turned upon itself, and if it be an under tooth it will grow so long as to penetrate the skull.

There are curious facts connected with the habits of the rat which warrant a close observation of them on the part of those who may have the opportunity. A lady at one time missed several eggs from her store closet, and naturally concluded that they had been stolen by the servant. She questioned the girl, who denied any knowledge of the eggs, which continued to disappear in the same mysterious manner, when one day the thief was unexpectedly discovered. The lady observed one morning, on entering her storeroom, a singular sight. A little rat was upon his back upon the floor and hugging an egg, while a larger rat was hauling him round by the tail. In this way, undoubtedly, all the missing eggs had been carried away.

Rats have two motions of the jaw in biting. The first is soft and delicate, and the teeth just scratch the object they have hold of. Then follows a quick, powerful action of the jaw, and the slender teeth sink up to the gums and stay there. This bite is dangerous. If the teeth have gone deeply into one's hand it is well to suck the wound. This seems to keep the swelling down, but always a good deal of pain follows. There is no harm in the bite of a well-fed rat. A frightened rat will fight if cornered, and viciously, too. The way to grab rats so that they can not bite is to seize them with a strong grip just back of the neck. They will howl like stuck pigs, but can not get away, and are entirely under control.

Rats have a fine scent for finding out where there is any thing nice to eat, and it has ofter been a subject of wonder how they manage to get on board ships laden with sugar and other attractive cargoes, but the mystery has been solved, for they have been seen to come off shore to the ship by means of the rope which moored her to the wharf. By the same means they will leave the ship when she gets into port, particularly if they find their quarters filling with water.

A gentleman's house was once infested with rats, and he got completely rid of them by catching one of them alive, and covering it with coal tar, and allowing it to return to its hole. At another time a trap was set at night in a house where rats were numerous, and in the morning the trap was found sprung, with a long tail inside. Its owner had vanished, and, perhaps, after relating his narrow escape, and how he had lost his beautiful tail, took all his rat friends and left the house forever.

It has been told by M. de St. Pierre, that when the man-of-war Valiant returned from Havana, in the year 1766, the rats increased to such an extent that they destroyed a hundred weight of biscuit daily. The ship was finally smoked between decks and six hampers were, for some time, filled every day with rats that had thus been killed.

When the atmospheric pumps were in use at the terminus of the Corydon railway hundreds of rats lost their lives there in this way; At night they used to get into the large exhausting tube to lick the grease off the leather valve. As soon as the pump was put in order to work for the early train, out these rats were sucked.

The rat, though naturally a savage creature, is capable of being tamed and made obedient to the will of man. Some of the Japanese tame rats, and teach them to perform many tricks; then they exhibit them.—*Chicago News.*

How Paper Type Is Made.

Type made from paper is the latest novelty. A process has been patented by which large type used for printing placards can be made from pulp. Such letters are at present cut on wood. The pulp is desiccated and and reduced to a powdered or comminuted state, after which it is thoroughly mixed with a water-proofing liquid or material—such as paraffine oil or a drying linseed oil, for instance. This mixture is then dried, and subsequently pulverized. In its pulverized state it is introduced into a mold of the requisite construction to produce the desired article, type or block, and then subjected to pressure to consolidate it, and heat to render tacky or adhesive the water-proofing material. Finally, the type is cooled while in the mold, so as to cause it to retain its shape and solidity.—*Leslie's Illustrated Weekly.*

—A new form of amusement, now in vogue at Beaver Falls, Pa., is for a number of young men to gather round a natural gas torch and catch the June bugs or beetles, then put them on their hands and beat the cigars as to which will fly away the quickest. The bugs fly directly for the gas torch, and another plan is to bet on the one who will get in the flames first and be burned to death. It is a very exciting game, and the boys say it beats base-ball all hollow.

A MATERNAL DUET.

Two Fashionable Mothers Throw Some New Light on Nursery Management.

Louise—Oh, Helen, how your baby grows! He is quite catching up to Rupert.

Helen—Yes; you know he's quite four months old now. I wish he would wake up.

Louise—So he is—aren't they too sweet any way? Rupert has two teeth, you know.

Helen—Oh, has he? I am crazy for Baby to show one. I thought I felt one yesterday, but nurse says I didn't.

Louise—Oh, of course not. Rupert was six months old before he cut his first tooth.

Helen—Was he? I'm sure Baby will do better than that; his gums feel really hard.

Louise—Oh, Rupert's were hard, too, for fully two months before the tooth appeared.

Helen—Were they? How disappointing!

Louise—Oh, yes; it was such an event the day we discovered the little white pearl sticking through! I had been out, and—

Helen—Oh, I do so hope I shall find Baby's tooth first—

Louise—And when I came in, the dear little fellow looked up and cooed so sweetly.

Helen—Baby is beginning to know me, too.

Louise—That I couldn't wait to lay aside my wraps, but snatched him up, and began, as usual, to—

Helen—Baby just loves to bury his nose in my seal-skin sacque. I put it on sometimes in the house just to let him enjoy it.

Louise—To feel in his mouth for the tooth—

Helen—My nurse has me rub my thimble over the gums every day—

Louise—And fancy my delight to encounter a hard substance—

Helen—Baby seems very restless when I am giving him his bath. I think it is his teeth.

Louise—Very likely. Rupert never cries when I bathe him. I give him a good meal, and—

Helen—Oh, Louise—why Baby is never bathed until half an hour after he is fed.

Louise (impressively)—My dear, you must stop that at once! My book, "Advice to Young Mothers," says a child should never be bathed while hungry.

Helen—Oh, but you know Doctor Mollycoddle, in his "Nursery Talks," expressly prohibits bathing a child on a full stomach—

Louise—Experience is the best teacher, and Rupert is nine months old, and is always fed before his bath.

Helen—Oh, I could never think of such a thing. Baby might have a convulsion!

Louise—I should be much more afraid of Rupert's going into a convulsion from over-fatigue and restlessness if he were bathed when hungry—

Helen—Oh, I don't think so. Baby is as good as a little kitten, always.

Louise—So is Rupert. Oh!—I have got to change my nurse!

Helen—What a pity! Mine is an excellent one.

Louise—Well, Margaret is good about a good many things; but so careless, I can not put up with her.

Helen—Elizabeth needs watching, of course; she forgot to put back the crib sheets half an hour before Baby was put to bed last night—

Louise—Why, I found the temperature of the nursery seventy-one degrees on Monday. I never allow it above or below seventy degrees.

Helen—Don't you? Doctor Mollycoddle favors sixty-eight degrees.

Louise—My book recommends seventy degrees. Margaret is careless about other things, too; she—

Helen—Elizabeth, on the whole, suits me very well.

Louise—Margaret didn't take the temperature of Rupert's bath yesterday. I was so afraid it was too warm or too cold, and—

Helen—Oh, yes, indeed, I am so particular about that!

Louise—But I must go. Rupert's next feeding time is twelve o'clock, and it is half-past eleven now—

Helen—Oh, but Baby has not waked up.

Louise—I never vary a minute.

Helen—I wanted you to see how much darker Baby's eyes are—

Louise—You must bring him over, Come in the afternoon. Rupert only goes out in the morning this weather, and you must see him.

Helen—Oh, Baby could not be in the air after one o'clock!

Louise—Oh, true, I forgot. Well, come and see me soon. I think Rupert's hair is going to curl beautifully.

Helen—Baby has very little hair yet—but Dr. Mollycoddle says, in his book, it will be all the thicker by and by—

Louise—Good-bye, dear! I saw Kate Dillingham the other day.

Helen—Did you? She sent Baby a lovely pap-spoon.

Louise—How nice! She gave Rupert a set of dress buttons.

Helen—Poor girl—I pity her!

Louise—Oh, so do I—such a dreary life—no baby!

Helen—Of course, her husband worships her—

Louise—And she is popular with every body.

Helen—But that doesn't make up—

Louise—Oh, no, indeed! Good-bye! I'm so afraid I shall be late for Rupert—

Helen—Good-bye! Baby will be awake in another fifteen minutes if you could only stay.—*Philip H. Welch, in Puck.*

LITTLE LAUGHS.

A Vassar instructor is getting the girls to agree not to wear corsets. Stay, lady, stay!—Lowell Courier.

The story that a man in Florida has a wart on the back of his neck which he uses for a collar button must be received with some grains of allowance.—Philadelphia Call.

Young Man (to stationer)—I want you to print on these cards, "At Home to Baseball Managers on Wednesdays and Fridays only." Stationer—All right, Mr. Stagg; how are things up at Yale?—New York Sun.

Little Eddie, 3 years old, had an attack of croup one night. The next evening when he kneeled down to say his prayers his mamma told him he must thank God for making him well. So he said: "I thank thee, O God, for making me well; but my nose goes this way yet"—here he sniffed several times to show that he still had a cold in his head.—New York Tribune.

Jeff Davis is developing such a blooming ignorance of the rebellion that we fear he is about to write some war articles for the magazines.—Pittsburg Chronicle.

Rev. Dr. McGlynn asked, in his Boston lecture, "Where is the hippophagi?" We don't know what that is, but we know we haven't got it.—Philadelphia Call.

Gordon Cumming likened an African jungle to a forest of fish hooks relieved by an occasional patch of penknives.—Philadelphia Call.

Sometimes a man gives a most expressive definition of a thing without perceiving himself the full significance of his words. It was so with a poor old colored man who came to Wayland seminary saying that no one had been to his part of the country to "widen out the colored people," and so he had come to the seminary for help.—Gospel Age.

An Arkansas paper puts it vocks popalari, and perhaps it's just as well. The people would get nothing, anyhow.—Detroit Free Press.

The New Hampshire girl who had a piece of flag root stuck in her windpipe finally managed to hoist it.—New York Commercial Advertiser.

"I religiously use this delightful preparation," says Mrs. Langtry in a cosmetic testimonial. Puts it on when she goes to church, we suppose.—Syracuse Herald.

A Conspiracy.

"Hey, Chimmie, you holler yer papers an' run inter him wile I roll de bar'l up."

"Yere's yer evenin' papers! Full account of der"—

"Och, Gott in Himmel! I bet you I fall on sometings soft, tink it?—Life.

Two Big Blows.

A Dakotan and a Texan who met in Chicago were disputing about the greatness of their respective districts, and among other things traded marvelous stories about the wind in each locality.

"How fast does a Texas norther blow?" asked the Dakotan at last.

"How fast? Well, the only thing that will measure it is lightning. When a Texas norther is coming they telegraph ahead, so that people can get under ground, but when it gets under good headway it will just about run a neck and neck race with the telegram. How fast's a Dakota blizzard?"

"Oh, you can't measure a blizzard. There's nothing like it. I've seen a blizzard skin a telegraph message right off the wires and carry it on ahead. I never saw but one the speed of which could be measured. There seemed to be something the matter with that one. It went rather slow, only about 1,000,000 miles a second, and we couldn't tell what was the matter with it until it went by, when we found it was dragging one of those infernal Texas northers along behind."—Chicago Tribune.

Too Full for Utterance.

A clerk in a banking house celebrated the twenty-fifth anniversary of his connection with the firm. Schmul, the principal, hands him in the morning a closed envelope inscribed: "In memory of this eventful day." The clerk gratefully receives the envelope without opening, but on a gracious hint from the head of the firm he breaks the cover and finds—the photo of his master.

"Well, what do you think of it?" inquired Schmul, with a grin.

"It's just like you," was the reply.—Fliegende Blaetter.

Business is Business.

"Father," he said, as he ceased dusting off some of the garments hanging at the door, "I see dot der treasury department has called in all der outstanding threes."

"Moses, you look at me," replied the father, as he came to the door. "If der treasury calls in some bonds we can't help it. If you let a man go by dot wants some second hand pants you doan' get some oafercoat nor undershirts next winter."—Wall Street News.

ARSENIC-EATING.

A Habit Whose Victims Belong Almost Exclusively to the Female Sex.

The Board of Health has received several letters from people who complain about the sale of arsenic wafers to unwary young women who want to beautify their complexions. One mother in Harlem wrote that her daughter had been using the wafers without her knowledge, and she feared that if the wafers contained as much arsenic as their makers claimed they must be strongly impregnated with poison. She also raised the point that if the wafers contained no poison the manufacturer was an impostor. Dr. Cyrus Edson analyzed the articles and found but slight traces of the poison in them. The principal danger from the wafers, it is said, is that those who use them think that it is not dangerous to eat arsenic, and are thus tempted to try a cheap solution of the poison. Death is likely to result from the slightest overdose.

Dr. William A. Hammond talked freely the other day about arsenic. He regarded arsenic-eaters in the same light as cocaine-eaters—that is, he had yet to see one. "It is not a habit in this country," said Dr. Hammond, "though arsenic is often prescribed. We often have to use large quantities of bromides for curing epilepsy or other troubles of the nervous system, and one effect is to produce pimples, especially on the face. Arsenic is used conjointly with the bromides to prevent these pimples and also to cure them. But I would no more think of allowing women to use arsenic at their own sweet will than cocaine or any other active agent. Arsenic is useful in depraved states of the system, such as are produced from malaria, and physicians constantly prescribe it in these cases. I have never known or heard of a case in which it was taken to produce exhilarating effects such as opium causes, any more than I have heard of cocaine used for such purposes. Arsenic is poisonous in small doses, and consequently differs from cocaine. In medicine it is generally used as arsenious acid. Two and a half grains killed a healthy, robust girl of nineteen years in thirty-six hours. Under circumstances favorable to the poison from two to three grains will kill an adult. The doses used in medicine vary from one-fiftieth to one-twentieth of a grain. These arsenic wafers contain much less than that, and consequently have no effect. They, therefore, are a fraud, and the man who makes them ought to be arrested. The Syrian peasants use arsenic—the men to improve their wind so they can climb mountains more easily and the women to improve their complexions. They have been known to take six grains in one day. They begin by taking extremely small doses. Arsenic has no effect on a horse. In one instance a horse took 550 grains without any result."

Another doctor said it was impossible to estimate the number or arsenic eaters in this city, because they are a class that do not often come under a physician's observation. "Yet," said he, "the number is large, though you can not say that it is growing. The population of this city is increasing, whereas they are simply maintaining their proportion. That is about the case with the arsenic-eaters; they are keeping up their proportion of the other idiots. Some actors, a low class of women, and even some members of the best society eat arsenic or use it in some form to improve their complexions. It gives them a certain pallor that they consider desirable. They begin by taking small doses, and gradually work up to large amount, and then when they think it is time to leave off they gradually lessen the dose—or, rather, they try to, for the habit, once formed, is extremely difficult to abandon. Those who take arsenic say that it has a pleasant effect, though not like opium, morphine or bashish, and the system's demands for it are not so imperative as in the case of either of these drugs. I have seen arsenic-eaters shut up in prison who did not complain as bitterly as the morphine or opium users would have done under the circumstances."

The reporter visited a number of East Side drug stores and talked with the proprietors about their experience with arsenic-eaters. One druggist in a ten by fifteen shop said that his arsenic customers were not confined to one class of society; they embraced people in all walks of life, though almost all were women. "We don't want to sell it," said he, "and won't sell it without a prescription; but they will have it. Just now there is a demand for these wafers, and we have to put them on the counter. There is not enough arsenic in them to hurt anybody, but people ask for them, and if you don't have them they say: 'Oh, well, we can get them at another store.' We have perhaps twenty customers here every week who are habitual arsenic-eaters. They begin using it to improve their complexions, but once acquired the habit is hard to break off.

"We don't sell it without a subscription, and the dodges that some of these people play make me weary. There is one fashionable woman who drives down here once in awhile for the stuff, and always has some new excuse to offer for asking for it. I have to ask her name and the use she intends to put the stuff to, and then record all in my poison book."—*N. Y. Tribune.*

—The average age of European girls when they marry, according to a German statistician, is twenty-six years, while that of men is twenty-eight years.

STYLISH MILLINERY.

Pretty Bonnets and Moderately Small Hats Coming Into Fashion.

Although in a general view the millinery on exhibition in the retail houses of the trade repeated the styles in the shapes of bonnets and hats, materials and trimmings, there were certain fancies and features observable that were not very conspicuous in the earlier importations.

As a rule, the bonnets are small, a poke occasionally giving variety to the headdress for out of doors wear, while the large hats seem somewhat larger in the circumference of the brim than the hats of the last season and the crowns a trifle less tall, the larger shapes varied by turbans and toques. In the bonnets the shapes which obtain are variations of the little French cottage bonnets, the English capote and the Manon, the last a special favorite with young ladies, and for wear in visiting toilets.

The large hat which seems at present in favor is that with the moderately tall, slightly tapering crown, and the brim very narrow, or forming only a shallow scallop at the base of the crown, widening out to about two inches at the right side, projected at the front, and widening out until almost as broad as the crown is tall, and curved up at the left side. A rival to this particular shape has a similar crown (or the same crown), with the brim wider at the right side and curved up at each side.

New shapes in turbans have a medium tall, slightly tapering crown, and the round or dome shaped crown, and the brim wide and pressed up quite closely all around, though the shapes in turbans are frequently lost or negatived by the drapery, which smothers the crown completely and gives the hat an entirely different aspect.

Pretty, small bonnets with drapery of plaited taffetas, surah and gauze, velvet over the crown, have the brim of plain velvet, completed by a bow of some one or two of the most destinctive or the grounding colors in the plaid, sustaining a heron aigrette to match, a bunch of currants or strawberries, or a cluster of zinnias, verbenas or other flowers of similar character. There is, indeed, for this season a fureur for mixtures of high colors; and varying the fancies alluded to are the hats and bonnets made of the braids woven in intermixtures of colors. These braids have been produced in great qualities, and form a conspicuous factor in milinary.

Hats made of them are either self-faced in the turning of the work of making on the outside, or are faced with velvet, the trimming consisting of a band of ribbon or velvet of the darkest color in the braid around the crown, completed by bows set at the left of the front, made of ribbons in all the colors that are introduced in the braid; a bunch of ostrich tips posed on the edge of the crown, the tips in two or three shades of color, or shaded in dyeing, in some models being supplementary.

The bonnets of the braids in mixed colors are faced with velvet and trimmed with a bow made of ribbons in two distinctive colors, or in all the colors seen in the braid, completed by strings of ribbon in the darkest color employed.

The bows which trim hats when of the several colors understood are generally of ribbon about three inches wide, and made of flat butterfly fashion, and massed in a great cluster at the left of the front or at the left side, while the bows are still stiff and upright on bonnets, formed of loops of the several colors. It is scarcely necessary to say, after what has been said, that ribbon bows are again a distinguishing feature in millinery garnitures.—*N. Y. Herald.*

ADVICE TO OLD MEN.

How They May Secure Contentment and Attain Great Age.

In the matter of advice, old men have been neglected. Young men, girls, married women and boys have all received the philanthropic attention of newspaper writers, but it seems that no one has the time to drop a few useful hints to the man who has done so much for the world. The following suggestions are freely given:

Old men should be careful of their health. They should not go to the theater in damp weather without a shirt. It is also advisable to wear something on the feet.

Old men will find it to their interest not to remain on a railroad track until after a train has passed. Well-read physicians now generally agree that heavy freight trains, especially late at night, are hard to digest.

Old men, especially in a cold climate, should not go in swimming until after the first of January, nor recline on ice in the evening.

An old man should marry a very young woman. It teaches him that there is nothing in life after all, and reconciles him to death.

By observing these and other rules, some old men have attained great age. —*Arkansaw Traveler.*

—A teacher in Massachusetts was speaking of the difficulty of defining some very common words. "Now there is the verb 'to be.' What does it mean when I say 'I am?'" Maggie's hand was waved frantically around, and her whole body seemed to be in the throes of a mighty and startling thought. "Well, Maggie, what does it mean?" "It means—it means that when any body says as how y' ain't, an' thin y' are."—*Harper's Bazar.*

—Gray—"Say, Black, why is the moon like a city attic window?" Black—"Why?" Gray—"Because it's a sky light, of course."—*Boston Budget.*

HUNTING OSTRICHES.

Methods Employed by the Arabs of the Desert to Catch the Huge Birds.

With the Abrabs of the desert the chase and capture of the ostrich is the most attractive and aristocratic of the many diversions in which they indulge. The first thing attended to when a hunt is contemplated is the preparation of the horses. They are entirely deprived of grass and fed on barley for seven or eight days before the intended hunt. They are allowed to drink only once a day, and that at sunset; at that time they are also washed. They take long exercises, and great attention is paid to the arrangement of the harness. The Arab says that after seven or eight days the stomach disappears, while the chest, the breast and croup remain in flesh. The animal is then in condition to endure fatigue. This training is called "teehaha." The harness used in this hunting is much lighter than that in ordinary use, especially the saddle and the stirrups, and the martingale is dispensed with. The bridle also undergoes many changes, the mountings and earlaps being taken away, as they are considered too heavy. The bit and frontlet are made of rope, without throatband, and the reins, though very strong, are extremely light.

The time most favorable for ostrich hunting is when there is the greatest heat. The higher the temperature the less is the ostrich able to defend itself. The Arab says that when a man stands upright and his shadow is only the length of his foot is the exact time to hunt. Each horseman is accompanied by a servant called "zemmal." He is mounted on a camel carrying four goat skins filled with water, and barley for the horse, wheat flour for the rider, some dates, a kettle in which to cook the food, and every thing which can possibly be required for the repairing of the harness in case of accident. The horseman wears a linen vest and trousers, and covers his neck and ears with a light material called "havuli," which is tied with a strip of camel hide. His feet are protected with sandals, and his legs by light gaiters, called "trabag." He has neither gun nor pistol, his only weapon being a wild olive or tamarind stick, five or six feet long, with a heavy knot at one end.

Before starting off the hunters ascertain where a large number of ostriches are to be found. They are generally met with in the places where there is a great deal of grass, and rain has recently fallen. The hunters commence their journey early in the morning. After one or two days' traveling, when they have arrived near the desired spot and begin to see traces of their game they halt and camp. After settling, two intelligent slaves are sent out to reconnoitre. They carry a goat skin at their side and a little bread. They walk on until they find the ostriches, which are generally on elevated places. As soon as the game is in view one lies down to watch and the other returns to convey the information to the camp. The birds are found in troops, consisting often of as many as sixty. The horsemen, guided by the scout, travel cautiously toward the game. The nearer they approach the spot the greater is their caution, and when they reach the last ridge which hides them from the ostriches they dismount and creep forward to ascertain whether the birds are still there. If such is the case, a moderate quantity of water is given to the horses, and each man mounts again and proceeds. The servants and camels follow a little distance behind, carrying with them corn and water.

The horsemen divide and form a circle around the ostriches at such a distance as not to be noticed by them. The servants halt when the horsemen separate, and as soon as they see their masters in position, they walk below their prey. The ostriches flee, but are met by the hunters, who at first only drive them back into the circle. They are made to run around the ring, and in this way their strength is exhausted. At the first sign of fatigue in the birds the horses dash in, and the flock separates. The affrighted birds open their wings, which is a sign of great exhaustion, and the hunter, now feeling sure of his prey, selects his bird and runs it down, and finishes it with a blow on the head with the olive stick.

The moment the bird falls the man quickly dismounts and cuts its throat, taking care to hold the head at some distance from the body, so as not to soil the plumage. It is said the male bird utters loud moans while dying, but the female dies in silence. When the ostrich is on the point of being taken by the hunter, if he does not wish to kill it he can easily drive it with the stick to where the camel is, it is in such an exhausted condition. After the birds are bled to death they are carefully skinned, so that the feathers may not become injured, and the skin is stretched upon a tree or a horse, and salt is well rubbed into it. Then a fire is built and the fat of the bird is boiled for a long time. When it is very liquid it is poured into bottles made of the skin of the thigh and leg and strongly fastened at the bottom. The fat of one bird is generally sufficient to fill two of these cases, and it is said the fat would spoil in any other vessel. After the drying out process the flesh is prepared and eaten by the hunters, who dress it well with pepper and flour. While all this is going on the horses are carefully tended, watered and fed with corn, and the party remains quiet for forty-eight hours to rest the animals. After that they return to the camp or seek more game.

To the Arab the chase of the ostrich has a double attraction—that of pleasure and of profit. The price obtained for the skin well compensates for the expense. Not only do the rich enjoy the pursuit, but the poor, who know how to arrange for it, as well. The usual plan is for the poor Arab to bargain with some one who is well to do for the use of his horse, camel, harness and two-thirds of the necessary provisions. The borrower furnishes the remaining third, and the result of the chase is divided in the same proportion. —*Cor. Boston Herald.*

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY AUGUST 6.....1887.

SUPERVISORS' PROCEEDINGS.

On Tuesday, Aug. 2d, 1887, the Board of Supervisors met pursuant to adjournment at 10 a. m.

Present, J. D. Harger, Chairman, J. R. Eldred, E. Robinson and J. C. Eddy. Absent, Thomas Boland.

The minutes of last days regular meeting and the minutes of last day's session as a Board of Equalization read and approved.

The petition of the citizens of Bishop Creek for a branch jail building at that place granted and $300 to be appropriated out of the Gen. Exp. Fund for that purpose when there is sufficient money in the fund to erect same.

Whereupon the Board adjourned until 1 p. m., at which hour it reconvened, the same members being present.

Ordered that on all bills allowed at this meeting of the Board in which items occur charged in each of the fiscal years ending June 30, 1887 and June 30, 1888 respectively the Auditor be instructed to draw warrants for the amount drawn in each fiscal year, the aggregate of which shall equal the amount of the bills allowed.

The following bills were allowed:

L. Wood, merchandise	$ 4 50
I. J. Woodin, medical service	6
H. H. Howell, Board of Education	28 00
J. J. Moore, postage	1 6
P. H. Mack, transcribing indexes	120 00
W. F. Matlack, blacksmith work	15
J. W. P. Laird, Board of Education	10
Daniel Crough " " "	10
Chalfant & Yancy, Printing	12
C. Mulholland "	256 50
R. L. Peeler, Board of Education	10
Mrs. Lewis, care of sick	15
A. Stecker, work in Court House	20
H. Levy, boarding prisoners	70
J. H. Shannon, Board of Education	29 25
Mrs. A. Stewart, County Hospital	150
A. W. Eibeshutz, merchandise	10 15
I. J. Woodin, examining insane	5
Hartshorne Bros., boarding prisoner	12 33
Walter James, labor on roads	61 90
S. J. McMurry, labor on bridge	263
G. W. Parish, 6th Road Dist	33 00
J. C. Eddy 7th " "	72
Thos. McLeod 2d " "	67
M. S. McLeod 3d " "	109 28
Henry Evans 1st " "	97 50

The bills of C. Mulholland and Mrs. M. Lewis were reconsidered.

Transfers were made from the Gen. Road Fund to the following road district funds:

Road Dist No. 2	$ 32
" " No. 4	158 83
" " No. 7	15 21

The reports of Road Overseers were accepted and approved as follows: Walter James, S. J. McMurry, M. S. McLeod, Thos. McLeod, Henry Evans, G. W. Parish and J. C. Eddy.

Whereupon the Board adjourned till 10 a. m., Aug. 3d. J. D. HARGER,
Attest: P. H. MACK, Clerk. Chairman.

WEDNESDAY, Aug. 3, 1887.

On the above day the Board met at 9 a. m. All the members present except Mr. Boland. Minutes of preceding day read and approved.

Claims were allowed as follows:

H. G. Plumley, Constable fees	$ 15
I. P. Yany, Justice of Peace	12
Irrigation Dist. No. 1	9
" " " 2	12
" " " 3	15
" " " 4	15
" " " 5	15
H. P. Cartier, labor on chairs	6
C. S. Swan, labor on Courthouse	34

The claims of Margaret Lewis and C. Mulholland, reconsidered, were allowed as originally passed.

Board adjourned until 2 p. m., at which hour it reconvened, the same members being present.

The following claims were allowed:

P. A. Chalfant, making mile'y roll	$ 45 50
A. Carlisle & Co., books for Clerk	29 75
A. L. Bancroft & Co., blanks	7 50
N. Rhine, furniture and mdse	1308 29

Board adjourned till 10 a. m. Aug. 4.
J. D. HARGER,
P. H. MACK, Clerk. Chairman.

THURSDAY, Aug. 4, 1887.

Board met at 10 a. m., all the members present except Thos. Boland.

J. F. Hawley, Justice of Peace fees, allowed, $6.

John Wilson, Constable, rejected for informality.

Ordered that a revolving fund be created and the sum of $100 be transferred from the Unapportioned Property Tax Fund of 1887 to the said fund for the purpose of paying for the new course of school text books.

The following transfers were made from the various funds named to the Gen. Exp. Fund:

Hospital	$584 96
Interest and Building	6 78
Contingent	150 19
Unapportioned Property Tax	920 96

The object of these transfers being to meet the claims allowed in last and present fiscal years.

The sum of $925 was ordered tranferred from the Unapportioned Property Tax Fund of 1887 to the Salary Fund.

The reports of the County Auditor and County Treasurer were accepted and approved.

Whereupon the Board adjourned until 2 p. m., at which hour it reassembled.

In the matter of issuing school district bonds the Board ordered that bonds be issued for Independence school district to the amount of $5,000.

Ordered that the Clerk insure the furniture of the Court-house for $2,000 with A. W. Eibeshutz.

Ordered that John S. Gorman be appointed a Director for Division No. 2 of Irrigation District No. 1, of Inyo county.

Whereupon the Board adjourned till Friday, August 5th, at 10 a. m.
J. D. HARGER,
Attest: P. H. MACK, Clerk. Chairman.

Card of Thanks.

For the very generous support given at the entertainment for the benefit of the brass band, for the kindness of the young ladies of the National Guard, for the very acceptable service rendered by all who took part in the entertainment, and for the liberal aid given by the townspeople the members of the band tender their heartfelt thanks. The band return special thanks to Mr. E. Robinson for a liberal donation.

C. A. THURSTON,
W. H. HUFF, } Com.
JULIUS ROEPER.

OLANCHA CORRESPONDENCE.

OLANCHA, July 30, 1887.

EDITOR INDEPENDENT:—For the past two or three years I have been monarch of all Olancha, but it was getting quite monotonous. I was beginning to exclaim, "O solitude, where is thy charm!" and wish I was a boy again. I was sitting in one of those moods when who should drop in but the Hon. Judge Conklin and his amiable wife. To say I was surprised or pleased would not express my feelings; I was just able to grasp the Judge's hand and whisper gently in his ear, "Judge, have you got a bottle?" He said "No," then he smiled a sad, sweet smile and whispered, "My wife has, for snake bites, you know; no one but Pap can ever draw the cork unless he is bitten." Knowing Mrs. C.'s temperance proclivities my drooping spirits fell; but the bottle was forthcoming, passed over, and in just five minutes by the Olancha chronometer we were singing "We won't go home till morning." All things on earth, they say, must fail; I know that bottle did, and at four sharp, the time the Judge always starts when on a journey, Pap was looking like a relic of bygone days. The Judge observed my heavy head, my languid eye, and exclaimed, "Be comforted; relief is near, for all your friends are in the rear; the Boom is coming." I thought, is this a prophecy? I believe in prophecy and spirits, especially when they are in a bottle and the cork is tight.

Noon, and the arrival by the Keeler stage of innumerable boxes, bundles and sacks made me think that the Government was about to establish a supply post for Indians; but on examing them they were all found marked, "J. Irwin." Johnny soon arrived with pack mules laden with fishing tackle, cigars, whisky, etc.; and such whisky! he must have got it from Dan Williams for Independence never kept anything like it; at least they never put it in sight. Johnny declared that he was on a fishing excursion to Menache and the big trees of Tulare county; but from the display of eatables and drinkables I would have believed him had he said he was on a trip to the Arctic Ocean for a two years cruise. Well, it captured Billy Grant. Bill started to make hay and had been raking fifteen minutes; but when he saw Irwin's supply Billy threw up the sponge; he works no more and the last seen of them they were at the Springs, four miles west by south, taking Lunar observations or trying to discover a shorter route to Menache; I guess they got there.

The next comer was the noted Billy Smith, of Darwin, with a broad smile on his countenance and a large demijohn in his hand filled with Keeler's best, not extra at that. Billy passed over the little jug in good style; said he had come over to get sober and I thought the chances very much in favor of it if he stayed long enough.

Then we had a pack train from Saline laden with the chief product of that valley, salt, and destined for Menache and a train of emigrants from Oregon seeking homes in the Sunny South.

Mr. Jiggens arrived from the metropolitan city of Los Angeles; he had all the city styles and sayings and did not forget to give them to us. Jiggens forgets nothing; not even the bottle, if was only half full.

Mr. McKnight then arrived on a surveying expedition. He was very reticent about the survey, and as the party was composed of a Dutchman, a Greaser and an Indian, who couldn't speak any language but their own and that poorly, there was no chance of their giving things away; but from the way they took we came to the conclusion that they intended taking in Owens lake with all its dips, spurs and angles.

Then came Mr. Diaz, who has been sojourning at Los Angeles for the last month or two, and ye gods, didn't he have them! The genuine masher was nowhere with the tonsest of buggies and a three minute team. If there is a whole heart left in Lone Pine three days after Diaz arrives I miss my guess.

And we have had lady guests; they praised Olancha and its surroundings, its fruit and its stock. From the way they spread the Honey on I thought they must have visited the Emerald Isle, God bless her green shores; the isle I mean, not the ladies. Come again, ladies you are always welcome.

Yes, the boom has struck Olancha, and I think the whole county will concede with me, from the way lands and stock have increased in value, especially since the meeting of the Board of Equalization.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons in every county, with or without Steam.

JOHN C. EVANS, Sweeney, Mo., writes: "I sent up and got a Washer some days back and money is coming along my car. Enclosed find money for which you put on my form with less than 30 acres in cultivation. If you will get machines that will take at least hours of time off in Washer takes off the labor and are as much superior to others as does and cost no more, I could sell one every hour. If they fail to take the feathers from under their wings and labor to pay for it." JOHN S. DODGE, Jr., writes: "You ask what I think of the Washer I bought last summer. Yes, it is far beyond my expectations. It is the best machine ever invented by men." Yes. We have just stepped ahead of Monitor or every other fan. Ed. If you want to know how you can make money enough to get one free, write for particulars.

I will ship a sample to all those desiring an opportunity to work on liberal terms. A thousand per cent profit on washer in the world for saving labor, clothes and soap. Responsible agents big money. Write for particulars.

J. WORTH, 1719 Franklin Ave. St. Louis, Mo.

FOR SALE.

A ranch of 320 acres, within three miles of Independence, the County Seat; nearly all enclosed by a three-strand barbed wire fence, and subdivided; a small dwelling house and a number of outbuildings; 10 acres set out to fruit trees, a portion of which are bearing, consisting of choice varieties of Apples, Pears, Apricots, Plums, Prunes, Nectarines, Cherries and Quinces, also, about two-thirds of an acre of bearing grape vines. Nursery stock enough on hand to set out from 10 to 15 acres of orchard. Received six first premiums on Apples, Pears, Plums, Prunes and Grapes, exhibited at the Eastern Slope Agricultural Fair, held in Sept., 1886. For price and terms apply to

J. W. SYMMES.
On the Ranch.

Independence, May 7, 1887.

BISHOP CREEK ACADEMY.

BEGINNING OF SPRING TERM.

The Spring term of the Academy, at Bishop Creek, will begin on Monday, March 28th, 1887.

Full Literary and Classical Academic Courses

Have been arranged, in accordance with which classes will be formed. Classes will also be formed in STUDIES PREPARATORY to those of the Academic Course.

Two prizes will be given during the year for excellence in declamation, also a prize for the highest rank in scholarship.

The Fowler Literary Society,

Formed during the last term, will offer to students of the Academy excellent advantages for literary culture, in addition to the regular work of the school.

TERMS:

The expense of tuition for the term will be $12. This is lower than for institutions of a similar character in other parts of the State. Instructions in music and book-keeping will be extra.

Board and rooms will be furnished to students from abroad. Particulars can be obtained by addressing the Principal.

For any further information address the Principal.

Calendar for the Term.

Spring Term begins March 28.

Exercises of the closing week June 19 to 23.

Sunday, June 19—Special sermons to students.

Tuesday evening, June 21—Declamation contest for prizes.

Wednesday, June 22, 2:30 P. M.—Annual meeting of the Board of Trustees.

Wednesday evening, June 22—Lecture before the Fowler Literary Society.

Thursday, June 23, 10 A. M.—Closing exercises of Academy.

Thursday evening, June 23—Reception of Principal to students and friends of the Academy.

Railroad Time Table.

GARSON & COLORADO, R R.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, AUGUST 6.....1887.

District Attorney Forbes returned to Independence on Tuesday.

Charley Swan showed the light of his countenance in town a few days ago.

Governor Foraker, of Ohio, has been nominated by the Republicans to succeed himself.

A new assay office, a boarding house and other buildings are being put up at the Defiance mine.

The trial of Aaron Hood is set for next Tuesday; he is accused of shooting at David Stubblefield.

Mike Lasky stopped over at Independence last Monday on his way home from a visit to the Bay.

There was a run on crackers this week: for several days not a sack of flour was for sale in the town.

Dave Pitman, of the C. & C. R. R., is taking a lay-off at Independence and seems to be enjoying himself.

Week before last real estate transactions in Los Angeles county aggregated over two and a half million dollars.

Joseph Haggerty, a carpenter, fell from a building at the Defiance mine last Saturday and dislocated his shoulder.

Mr. and Mrs. J. J. Gunn left town for Darwin yesterday. Mr. Gunn will attend to mines in which he is interested.

Mr. and Mrs. Frank Fitzgerald spent some days at Independence this week; they returned to Lone Pine Wednesday.

Mrs. Dr. Woodin and her brother, Mr. Graham have gone to take a few weeks vacation on the headwaters of Big Pine Creek.

Mrs. Julia Welsh, Mr. A. Plumley and Mr. Wm. Lent, of Bishop Creek, were at the Land Office last Saturday on business.

Mrs. N. Rhine, accompanied by her daughters, Misses Alice and Emily, left town on Thursday morning for San Francisco.

Messrs. Gould and Silva are making a shipment of ore from their mine near Darwin. Some of this ore goes over $400 per ton.

Mrs. T. J. Goodale, of Fish Springs, was reported to be alarmingly ill a few days ago. Nothing further has since been reported.

Mr. C. A. Walter, at Camp Independence, was the first to deliver new wheat at Bell's mill; flour from this is now ready for market.

Brown Bros., of San Francisco, propose to build a woolen mill at Reno. A large amount of wool could be supplied from Owens valley.

To-morrow [Sunday] at 8 o'clock in the evening, there will be praise service at the M. E church. Sunday school at 11 a. m. Every body welcome.

Joe McLane was at Independence some days this week. Mr. McLane was a mine foreman at Candelaria for several years. He has gone to Darwin to engage in mining.

John Erwin and his partner, Fuller, have got out eleven tons of ore from a claim on the east side of the Inyo range, east from Independence station. The ore will net one hundred dollars per ton.

Mr. and Mrs. T. C. Boland, of Keeler, have gone to Los Angeles. From there they will go to San Francisco before returning home. Mr. Boland expects to meet his brother at Los Angeles.

Tourists from Kern and Tulare are among the mountains in the Mount Whitney region. One party had killed six deer and two bears before John Irwin came down a few days ago.

Johnny Reddy came in from Darwin last Saturday to make a visit of a week or two with friends at Independence. Johnny has been having a jolly good time here and gets more interested every day he stays.

The Committee appointed last Saturday to solicit subscriptions for the Fair reported to the Secretary during the week. The amount secured is ample for present needs, and work will be pushed as rapidly as possible.

The old Promontory mine, at Darwin, in years gone by yielded some high grade ore carrying horn silver. Recently a vein of the same kind has been struck and Richards and Callinan are now making a shipment.

J. C. Irwin got back from his excursion in the mountains last Thursday. The only drawback to the enjoyment of the trip was want of fun in fishing; the trout were so plentiful all that could be used were caught in an hour or two each day.

William McDonald, partner of J. R. Eldred in the blacksmith business at Bishop Creek has sold out his interest to Milburn C. Hall. The firm now stands as Eldred & Hall. Mr. McDonald has gone upon a farm owned by him near the town of Bishop Creek.

Surveyor McKnight came up from Olancha last Tuesday. He has been doing some work down that way. Mr. McKnight expects to start in a few days for Dakota; he intends bringing his daughter back with him and placing her in the Academy at Bishop Creek.

A teamster who is hauling ore for Mr. Fitzgerald from the mines at Lookout, was driving in the canyon near the mines last week when the tongue of his wagon broke, a large splinter plunged into a valuable horse and killed him instantly. Another horse in the team was badly hurt. The man escaped injury.

Somebody is suplying the Indians around town with whisky. Citizens complain that squaws are not infrequently seen lying in the streets drunk. This should be stopped; the parties who buy the liquor and convey it to the Indians are well known and no difficulty should be experienced in getting such evidence as would secure conviction.

Billy Hedge came in from Panamint on Tuesday. He says the new mill is nearly completed as far as the machinery is concerned; engine and boiler, shafting, pans and settlers are all ready for work; but the carpenter work on the building is not quite completed. So little remains to be done, however, that it need not take long to finish.

Through the Sierras.

Messrs. J. W. Bledsoe, J. Hitchcock and L. B. Robinson, of Traver, Tulare county, arrived at Independence last Sunday night. The party left Traver some weeks ago to take a vacation in the mountains. Mr. James Purcell, wife and two daughters are also of the party; but these remained in camp at the south fork of Kings river. The party will not return to Traver for some time yet; they are having a very pleasant time. The first stay made after leaving Traver was at Comstock's mill, distant fifty miles. In the neighborhood are some gigantic trees; one of these measures 104 feet in circumference, another near by 96 feet. These are dead trunks standing upright but without bark. Seven miles further a stay was made at Big Meadows; this is a fine stock range, full of cattle. In the same neighborhood a man named Shepherd has an excellent dairy; the visitors speak warmly in praise of his kindness to strangers. Thence to Boulder creek, 5 miles, the trail passes over a rolling country with plenty of little grassy ravines by the way. Horse Corral is 2½ miles further; this is a lovely green meadow and a good camping place. Summit Meadows is distant 3 miles and is another pretty, grassy plain. In this neighborhood the party found game plentiful; deer, a few bear and mountain quail. One bear was killed but none of the party had any ambition to go after more. Deer meat, quail and trout were good enough but they hadn't lost any bears. From the summit the trail runs down a steep mountain 7 miles to the south fork of Kings river. The party traveled 9 miles up the stream between very high cliffs; here a fine camping place was selected and the stakes fixed for a stay. This region is in the very heart of the Sierras, the loftiest summits of the whole range towering around; snow fields are near on every side; streams dash down the mountain or leap over precipices of great height. There are cañons that rival Yosemite in the height of the cliffs and surpass it in the grandeur of the surrounding mountains. Trout abound in the streams and can be taken in any desired quantity. On Saturday morning Mr. Bledsoe, Mr. Hitchcock and Mr. Robinson left the camp at Kings river and came to Independence. They crossed a ridge to Babbs creek and camped at a little meadow and next day came into town. Mr. Bledsoe carries along a complete photographing outfit and takes views of the country. He brought along a large number of views taken on this and on a previous trip. These pictures give a better idea of the trip than can be conveyed in words. While in town he took a number of views of prominent buildings and the surrounding scenes. From the negatives many copies will be taken. Our visitors stayed in town a couple of days and then returned to their friends at Kings river.

A Success.

The band boys are delighted with the success of the benefit given them on Monday evening. A crowded audience proved how strong an interest the citizens take in the band; and frequent and hearty applause demonstrated that the programme itself was highly pleasing. The National Guard drill, by Misses Minnie and Anna Thompson, Misses Luella and May Shepherd, Misses Alice and Sophia Rhine, Miss Ada Lewis, Miss Maud Cook, Miss Maggie Conklin, and Miss Katie Mulholland was decidedly interesting. The singing of Miss Conklin; the piano solo by Miss Rhine; the songs of little Paul Mairs; the recitations by Miss Lewis and Mr. Peeler, all were greeted with hearty applause. But nothing in the entertainment stirred up the audience like the "Three Little Maids From School." The little girls, Emily Conklin, Rose Elleshutz and Lizzie Thompson sang their parts with such spirit, such evident enjoyment of the fun, that the audience cheered them heartily and kept it up till a repeat was given. Henry Rhine sang with power and good effect "Rocked In The Cradle Of The Deep." The ball that followed the entertainment was a grand success; the fun kept up till near morning. The entertainment netted $125, which amount was turned over to the band.

Narrow Escape From Death.

Last Saturday Mrs. J. V. Skinner, of Lone Pine, had a narrow escape from a terrible death. A cow that had a young calf was confined in the yard back of the house, the calf being with her. Mrs. Skinner went into the yard to tie up the calf and while trying to fasten the rope the cow attacked her furiously. The only chance Mrs. Skinner had to save herself was to seize the cow by the horns and hang on; this she did, while the animal plunged and dragged her around till at length she was dashed to the ground. The animal then went back a little way to make a rush at her, but at the same time Mrs. Skinner rolled over and over and got out of reach. During the struggle the cow plunged her horn into the neck of Mrs. Skinner a little on one side of the windpipe, making a terrible wound. The hurt was dressed by Dr. Long and the lady is now doing very well.

Lookout Mines.

At Lookout Mr. Frank Fitzgerald has fourteen men at work in the mine. The ledge of horn silver struck in the mine some time ago is improving daily. Some days ago twenty tons of this ore was shipped to Selby & Co., San Francisco, the average value per ton being $525. This is the kind of ore to have. Horn silver only is being shipped. Lead ores taken from the mine will be saved for the furnace. It is intended to start the furnace again about September 20th. At the Minietta mine five men are at work getting out ore; the mine is improving and the men are doing well.

Fair Meeting

The meeting called for last Saturday to consider matters in relation to the Agricultural District Fair met at Mairs' Hall. It was called to order by the Secretary of the Association and S. A. Densmore was chosen chairman. Addresses were made by Messrs Rhine and Laird, and others. A committee to solicit subscriptions was appointed, consisting of John Shepherd, John Link and S. A. Densmore. It was resolved to make an exhibition at the State Fair at Sacramento. The committee named above were instructed to report to the Secretary and the meeting adjourned.

The Reno *Stockman* says: "The prediction is made that cattle will be shipped from Reno direct to Los Angeles within a year." This prediction is based upon the assurance that the C. & C. railroad will be completed to Los Angeles within the time specified. Of course the stock raisers of Owens valley being about three hundred miles nearer to Los Angeles would have a great advantage in supplying that market.

Since District Attorney Forbes returned from Sacramento it has been learned that the rumors in reference to his purpose in going to the Capital had no foundation in fact. His business had no connection with the holding or location of the Agricultural Fair; that is a matter he considers the Directors responsible for; it was outside of his official duties and he had no inclination to meddle with it.

Child-like and Bland.

As usual, there was a woman in it. Ah Dak and Jim quarreled about her in China town last Tuesday. Jim wanted her to go down cellar; Ah Dak told her not to go; Jim seized a cleaver and Ah Dak grabbed and axe and both sailed in. The Sheriff was called and brought the combatants into Court. They were a ghastly looking sight; so was the axe; helve and blade were covered with blood. The cleaver had been washed. The Justice prospected carefully and sized the pile of each at twenty-five dollars. He was right, that being about as much as either could raise and the county is that much ahead. "The little brown man" is a fraudful, ferocious savage.

Ranch for Sale.

At Black Rock, twelve miles north from Independence, 520 acres of land for sale. Black Rock is one of the very best parts of Owens Valley. Four hundred acres of this land is held under U. S. patent; the remainder is located under the timber culture Act. One hundred and eighty acres are enclosed by a fence of cedar posts and barb wire. Sixty acres are now under cultivation, mostly wheat, oats and barley. A large amount of hay can be cut; blue joint, red clover etc. Several large springs of pure water on the place and good water rights additional. House, outbuildings and corrals. C. & C. railroad half mile distant from east line of land. Owens river eighty rods distant. This is a fine place for an energetic man to improve and will be sold at a bargain. Apply to

C. MULHOLLAND.

A Rich Dead Beat.

A few days ago a man boarded the south bound train at Bishop Station; when the conductor came around to collect tickets the man said he had none and offered a thousand dollar check and asked for change. The conductor had deposited with the agent at Bishop the fares collected up to that station and didn't have change enough, consequently told the man he must pay in coin or be put off at the next station. When the train was about to leave Alvord the conductor again asked the man for his fare and again the big check was offered. Satisfied that the fellow was trying to beat his way the conductor sized him by the neck and started for the door; then the fellow weakened, pulled out his purse and paid his fare from Bishop Creek to Lone Pine. No doubt is entertained as to the check being a good one; the fellow was a rich bilk.

Horse Thief

Last Monday a stranger arrived at Independence who gave his name as L. B. Robinson. He said his home was in Tulare county and that he had been in the mountains some weeks for the benefit of his health. Next day he got a mare and saddle from Henry Levy and said he wanted to go to Lone Pine and would be back next day. He has not been seen or heard from since. Thursday night a warrant was issued for his arrest and Under-Sheriff Thurston went to Lone Pine. The man had not been there nor could anything be heard from him. The man is aged about thirty-five years; height about five feet nine inches; slender build; weighs about 145 pounds; dark, keen eyes; small sore on right cheek; can speak Spanish. He wore striped pants; black hat; no coat; laced shoes. Carried Winchester rifle with copper lining around lock. The mare he took away is a light sorrel; weight about 950 pounds; aged seven years; branded circle-dot on left hip; is a nice looking animal, sound in every part. Saddle of common pattern, with buckles on stirrups.

In 1850 Will S. Green of the Colusa *Sun* settled in Colusa county. For thirty-seven years he has never ceased to write and labor for the interests of the county. He has advocated the building of irrigation works and the division of the land into small farms. His labor has not been quite successful: he says in a recent issue of the *Sun*. "It is somewhat strange, but in all these transitions Colusa has remained the richest county in the United States, according to population. Is this a matter for congratulation or for regret? It is an indication of immense resources, but is also an indication that in some way we have not the requisite amount of population. That is the trouble. Each transition has left large areas of land under the control of a few persons. That keeps out population, and of course makes the wealth great according to population. The hold that small wheat growers got in the county at the start when prices were high and a different mode of putting in and harvesting grain were in vogue, is gradually being lessened. School districts were made and have had to be discontinued. The school census is going back notwithstanding a natural increase. Another transition must come or else there will be no room in the county for merchants, manufacturers, printers, school teachers, preachers, mechanics, or for anybody except the few men necessary to run the gang plows and the combined harvesters. All the other transitions must come by means of the irrigation canals. The great wheat growers are as much opposed to this as were the cattle men to the introduction of sheep, and as were these two to the introduction of wheat. In each case they were doing well enough if the general community was not. It is now so." It is only three years since the INYO INDEPENDENT began to make known to the world the resources of Inyo county. Enough has already been accomplished to encourage a continuance of the work. At the end of thirty-seven years, and after many disappointments, Mr. Green is as hopeful and is working as vigorously as ever. We will not have to wait so long for the prosperty of Inyo.

NOTICE OF SPECIAL ELECTION.

Office of Board of Supervisors, Inyo county State of California.

WHEREAS, At a special election held in Division No. 2, of Irrigation District No. 1, of Inyo county, on July 2, 1887, it appears from the returns of said election that the vote cast for Director of said Division resulted in a tie vote between S. A. Densmore and J. S. Gorman and no Director was elected therein.

Now, therefore, notice is hereby given that an election will be held in such Division on Saturday, August 20, 1887, for the purpose of electing one director for said Division.

For the purpose of holding and conducting such election the following voting place and the following officers are hereby appointed, to wit: At the residence of S. A. Densmore. Inspector S. A. Densmore; Judges, L. A. Anger and B. Aguirre. Polls will be open from one hour after sunrise till sunset. J. D. HARGER Chairman.

Attest: P. H. MACK, Clerk.

Dated August 5, 1887.

YOU can live at home and make more money at work for us, than at anything else in this world. Capital not needed; you are started free. Both sexes; all ages. Any one can do the work. Large earnings sure from the first start. Costly outfit and terms free. Better not delay. Costs nothing to send us your address and find out if you are wise you will do so at once. H. Working Classes ATTENTION!
We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

FREE TRIAL PACKAGE. FOR MEN ONLY.
PROF. HARRIS' Pastille
A RADICAL CURE FOR NERVOUS DEBILITY Organic Weakness, PHYSICAL DECAY, In Young & Middle Aged Men.
TESTED FOR SEVEN YEARS BY USE IN MANY THOUSAND CASES.
TREATMENT. One Month, - $3.00 Two Months, - 5.00 Three Months, 7.00
HARRIS REMEDY CO., Sole Proprietors 506½ N. Tenth St., ST. LOUIS, MO.
NERVOUS DEBILITY Or, HAD WEAKNESS, Decay, and numerous obscure diseases, baffling the skill of physicians, result from youthful indiscretion, too free indulgence, or over-brain work. Avoid the imposition of pretentious remedies for these troubles. Get our Free Circular and Trial Package, and learn important facts before taking treatment elsewhere. Take a SURE REMEDY that has CURED thousands, does not interfere with attention to business, or cause pain or inconvenience in any way. Founded on scientific medical principles. By direct application to the seat of disease its specific influence is felt without delay. The natural functions of the human organism is restored. The enfeebling effects of life, which have been wasted are given back, and the patient becomes robust, full and fully equipped with strength and animal vigor.
UPTURED PERSONS! Not a Truss. Ask for terms of our Appliance. WE GIVE FREE TRIAL.

BEES & HONEY

I am making a specialty of comb honey in one pound sections and will be in town once a week to supply my customers.

Extracted honey in cans for sale, as usual, at the stores. Honey and comb foundation always kept in stock at the Apiary, at Oak Creek above Camp Independence.

W. M. MUTH-RASMUSSEN,
Bee Keeper.

Vividly Recalling the Incident.

They were over in the camp last evening, talking about military matters and war and so on, and the talk drifted around to personal bravery, and finally some one brought up the subject of presence of mind in danger.

"That reminds me," said the colonel, "of an incident that happened when I was but a lad. I was very fond of crows' nesting. One day I discovered a nest in the very top of a lofty bull pine, fully 100 feet high. Up I swarmed. In the nest were four young crows and one egg. It was the work of a minute to wring the young crows' necks and throw them out. Then placing the egg in my mouth for convenience, I commenced my journey down. It seems but yesterday," said the colonel softly. "I looked up; the beautiful blue sky was above me, and the crows, whose nest I had despoiled, were wheeling in short circles, uttering angry cries. Suddenly, without an instant's warning, the limb on which I was resting broke and I fell—ninety feet from the top! I lived a hundred lives in that one moment!" The colonel's voice trembled. He brushed his hand across his eyes.

"What! you fell ninety feet, colonel?" exclaimed a young subaltern.

The colonel gazed on him compassionately. "No, you young ignoramus. I was ninety feet from the top when I fell; consequently I fell about ten feet. But the jolt I got broke that egg. Bah! I can taste it yet."

The colonel gazed around suggestively, and he got something to take the taste out of his mouth. And they all had some.—Washington Critic.

Growth of a Uniform.

Col. Ingersoll was at a dinner the other day where a New Yorker, who has a wide reputation as an after dinner speaker, was somewhat disappointing to the guests. Col. Ingersoll had a neighbor at the table who leaned over and said: "Colonel, how in the world did Blank come to have such a reputation as an after dinner speaker? It does not seem warranted by what he has done tonight." "That reminds me," said the colonel, "of a Georgian who came up to Illinois after the war and wanted to sell his uniform. He asked around at several places, 'Do you want to buy a uniform?' Finally some one asked him what grade of uniform it was, when he said, 'it war a private's uniform in Georgia, but I reckon it mout do for a colonel in Illinois.'"—New York Tribune.

A Bright St. Paul Youth

A well known St. Paul artist has a 5-year-old boy who is given to cute sayings. Yesterday, viewing a picture of Liberty Enlightening the World, he asked who it was—the big lady. "Liberty," was the reply. "Oh, yes," he responded, "I know—Liberty, America's wife." Not bad, that. The other day he was telling a rather tall yarn to a gentleman, who interrupted him with: "Do you know George Washington?" "No," said the youngster." "Well, he was a very good man, who could not tell a lie." "What was the matter?" was the quick retort; "couldn't he talk?"—Pioneer Press.

BREAD WITHOUT YEAST.

It is a well known fact that bread made with yeast, if eaten before it becomes stale, ferments again in the stomach, producing indigestion and numerous other complaints. Bread raised with Royal Baking Powder, instead of yeast, is entirely without this defect; but on the contrary, is one of the most effectual preventives of indigestion or dyspepsia. By the use of the Royal Baking Powder the saccharine properties of the flour, which are destroyed by fermentation with yeast, are preserved and the bread is made more nutritious. Ten per cent. more bread is baked—because of this saving—from the same quantity of flour.

The Royal Baking Powder will also make sweet, white bread from an inferior quality of flour, a property possessed by no other leavening agent. Thus, much flour that is dark in color, or from other cause is considered below the finer grades, and therefore much cheaper, can be utilized and turned into a perfectly sweet and wholesome bread. Nor can bitter bread ever result from the use of too much, or more than the required quantity, of Royal Baking Powder; as, whether used in small or large quantities, its proportions are in such exact equivalents that they always neutralize each other. Bread made in this way does not require mixing over night, but may be prepared ready for the oven in a few minutes; an advantage that will be readily appreciated by every housekeeper.

A Truly Self Made Lady.

"You seem to be much attached to your wife," said the governor of Arkansaw addressing an old negro who had just paid a tribute to the ruler of his household.

"I is, sah, powerful. Dat lady is one ermong er thousand, an' does you know dat she's self made lady?"

"A self made lady?"

"Yes sah, she's a self made lady. When we fust maird, she was a sort o' helpless critter. Been raised roun' de house 'mong de white folks, an' didn't gin much o' promise dat she would eber 'mount ter much, an' I wuz sorter slow 'bout mairn her, I wuz, 'case I'se putty much o'er bizness man mersel'. An' fust it was erbout ez much ez she could do ter draw er bucket o' water, but 'stead o' flingin' stumblin' blocks in her way, I 'couraged her, I did."

"How? By drawing the water yourself?" the governor asked.

"Oh, no, sah; by gittin' er smaller bucket dat she could han'le. Ef I had er drawed de water merself she neber would er been er self made lady. She'd er tied er red han'kerchuk 'round her head an' sung er lonesome song in de back yard, an' I does think, sah, dat de song o' er 'oman dat has dun gin up hope is de lonesomest thing in de worl'. Yas, sah, I got de lady er smaller bucket, an' ter show her how fur I wus frum throwin' stumblin' blocks in de lady's way, I greesed de win'lass. I let it run erlong dis way erwhile, an' den I put on de big bucket."

"Then she went right along, I suppose?"

"Ez sweet ez er pie, sah. An' ergin, at fust she made er mighty bad out at choppin' wood. She didn't take kin'ly ter de ax, but I wa'n't de man ter fling stumblin' blocks in de way o' mer own wife."

"You relieved her of that laborious duty, then, I suppose?"

"Yas, sah, I 'liebed her might'ly. I got her er axdat wa'n't nigh so heaby. Den she dun powerful well; 'prubed so fas' dat it wa'n't long till she could han'le de heaby ax monstrous fine. But yer outer see dat lady now, gub'ner. She ken fetch in er log o' wood ez well ez any pusson, an' out in fiel' she ken make er mule powerful tired 'fore de sun goes down. Oh, yas, she's er se'f made lady, but I 'knowledges dat she wouldn' be sich er fine pusson ef I had acted mean an' flung stumblin' blocks in her way."—Arkansaw Traveler.

A Practical Englishman.

In a first class carriage in Germany an Englishman was observed to be constantly putting his head out of the window. The train was going fast, and a sudden gust of wind blew his hat off. With a frightful oath he reached down his hatbox and hurled it after the hat. Then he sat down and smiled on his fellow passengers, but of course did not speak. The Germans roared with laughter, and one of them exclaimed: "You don't expect your hatbox to bring your hat back to you, do you?"

"I do," said the Englishman. "No name on the hat, full name and hotel address on the box. They'll be found together, and I shall get both; d'you see now?"

Then those Germans subsided and said they had always considered the English a great and practical nation.—Paris Morning News.

DIFFERENT IN TEMPERAMENT.

The Happy, Sunshiny Disposition—Lincoln's Apprehension.

It has been my good fortune in a long, unbroken life of work to be thrown much in contact with men of affairs. Every presidential candidate from the time of Buchanan and Fremont, through the stormy periods of our nation's struggle, and in the happier days, when contests were ended, I have seen, I have known. Political leaders of the great parties I have met and talked with. The leading divines, the chief orators, our best lawyers, and men who grace and others who disgrace the bench, I have seen and met in close communion, and my sober judgment is that not ten per cent. of them were graced with this happy, sunshiny disposition, which goes so far toward making their own lives sweet, while radiating comfort, happiness and good cheer in the circles of which they are so often the center.

One of the greatest sufferers in that way was Abraham Lincoln.

To be sure he had upon himself from 1860 until the day of his death responsibilities, anxieties enough to break down any man this side of a hero, but imagine for a moment Abraham Lincoln with all his grand qualities permeated by a vein of sunshine. Men will tell you that he was a great story teller. So he was. He told stories for the purpose of illustration, not for the sake of amusement, not to entertain, not to raise a laugh. He was solemn, grave, weighted always with a brooding apprehension long before he was president of the United States. After he became the head of the nation, and when civil war plunged the country into what many feared was a bottomless abyss, he became more gloomy—not morose, but apprehensive—and matters vast and tremendous in proportion assumed proportions vaster and more tremendous as hour after hour he paced in sleepless night his chamber of horrors.

Grant had, I think, the selfish, the indifferent quality of good nature.

He was good natured if he was "let alone." No man with a well spring of kindly feeling could go through what Grant was forced to endure. Ten thousand killed, twenty thousand killed, fifty thousand killed, in the Wilderness; it makes no difference; the end was to be gained, and, to his everlasting glory it will be said, it was gained.

But put Lincoln in that place.

Put Lincoln, with his intense sympathy. Put Lincoln there, with his desire to save everybody, even to the extent of taking it upon his own bent shoulders. He couldn't have lasted in the Wilderness an hour.—Joe Howard's Letter.

The Thermometer Was Off.

There is a suburb of Montgomery called "Vesuvius," and the population, as may be supposed, is all colored. Three or four of us were driving out around the fair grounds when we came upon two colored men who were wrangling. One had an open razor in his hand, and the other a club, and they seemed ready to fight. We drove around for half an hour and then returned to the same gate. They were still there and still wrangling. We took another direction, drove two or three miles, and again came back to that point. There was no change in the situation. They still stood in the middle of the road facing each other, and their high pitched voices were still hurling anathemas at each other's heads.

"Say!" called the colonel, as we drove up, "is there going to be a fight here?"

"Yes, sah," called both men in chorus.

"When?"

The query puzzled them for a minute. Then the older one shut up his razor, put it in his pocket and replied:

"Kurnel, dar's sunthin' wrong wid de weather. Ize bin callin' him a liar an' he's bin callin' me a thief for moas' two hours, but we dean' seem to git mad about it. Did you notice anythin' out o' kilter wid de thermometer dis mawnin'?"—Detroit Free Press.

American Against Russian Petroleum.

United States crude petroleum oil is to Russian crude as cream to skim milk. United States crude yields about 75 per cent. of the finest illuminating oil the world produces. Russian crude yields only about 29 per cent. of an inferior illuminating oil. United States crude yields about 12 per cent. naphtha or spirit of such a valuable character that it readily sells for 20 per cent. per gallon more than the oil. Russian naphtha is unmarketable, and it is mostly burned to get rid of it. United States lubricating oils, another product of crude, are now so low in price that Russian lubricating oils are practically debarred from competition in many of the European markets. United States crude yields a considerable percentage of scale, used for candle making, and this is a product of great value; weight for weight it is worth four times more than refined petroleum oil. The Baku crude yields no scale. Thus the United States, in the surpassing richness of its crude, has an enormous and unapproachable advantage over Russia.—Pall Mall Gazette.

Identifying Criminals.

A new method of identifying criminals has been adopted in the prisons of France, Russia and Japan. It consists in taking the exact measurement of the person upon his coming to the jail.

His waist, the length and width of the head, the left middle finger, the left foot, the outstretched arms, the three other fingers of the left hand, the left arm from the elbow to the wrist, and the length and width of the ear are measured, and the color of the eyes and any peculiarities are noted down.

A photograph is also immediately taken, and by these means the many mistakes which have been made by trusting to a photographer only are avoided.

It is stated that habitual criminals, particularly English pickpockets, are so convinced of the infallibility of the method that they will on no account submit to the measurement, and offer violent resistance whenever the attempt is made to measure them.—Youth's Companion.

A Hint to Correspondents.

Among hints to correspondents recently printed by The Philadelphia Times was this admirable direction: "Never address an article for publication to any particular person connected with a newspaper, unless it requires his personal notice before it goes to the printers." Even old writers are liable to carelessness on this point, and the occasional contributor generally shows ignorance of the rule. The most common blunder is to address news packages to the managing editor, using his name and that of his position. If the paper prints both morning and evening editions the chances are even that the news will be delayed twelve hours, for no managing editor is on duty more than half of the twenty-four. The envelope should be marked "News," and then it is best not to put the managing editor's name on it, for, if he ought to look it over, it will get to him anyway, and if there is no need of his seeing it, chance of delay will be avoided.—Robert Luce in The Writer.

Beginning of a Career.

Of the late Samuel Cousins, the great English engraver, The Exeter Post of June 3, 1813, contained this item: "We are happy to hear that Samuel Cousins, a poor boy, 12 years of age, belonging to one of the charity schools in this city, has been rewarded with a silver palet by the Royal Society of Arts in London for his ingenuity in the execution of an admirable pencil drawing of the portrait of Ben Jonson."—Chicago Tribune.

Detectives of New York.

At 9 o'clock in the morning the fifty detectives, a motley throng representing all nationalities, gather at the inspector's office. Some of them who work in the aristocratic parts of the city are fashionably dressed, and others who explore the slums and docks are apareled like coal heavers. One is a Bohemian, another an Italian and another a Hebrew. They make their reports to the inspector, and if one has been derelict in his duty he is pretty apt to find that somebody's eyes have been on him and that the inspector knows about his movements. The inspector is the court to try his case, and no outsider hears it. He may be reprimanded or quietly dropped from the force, but there is no appeal from the inspector's decision.

When a new detective is needed a patrolman is sometimes flattered with an invitation to put on citizen's clothes and report to the inspector. He may have been patrolling a forlorn beat in the outskirts of the city, but the inspector, who watches the record of every promising policeman, has heard of his making a clever arrest and wants to give him a trial. The inspector has his truisms, one of which is that a man who is to make a good detective will show some of his fitness in his face, and another being that he must first possess a great ambition to be a detective. Ambition is the mainspring and secretiveness and perseverance the balance of a good detective. The inspector has also a tradition that no woman makes a good detective. "They are too apt to fall in love," he says, "and a woman in love will tell all she knows. I sometimes have to employ a woman, but I tell her no more about the case than is absolutely necessary."—Amos J. Cummings in Kansas City Times.

One view of Indian Advancement.

I have lived in the Indian Territory for a number of years and have carefully watched the condition of the Indians, both of the wild and civilized tribes, and must say that I cannot see the smallest signs of advance or improvement in their condition. I have heard on all sides when in the east the condition of the Creeks, Cherokees and Choctaws quoted as an instance of what the wild tribes are capable of when placed in proper environment and surrounded by civilizing influences.

This argument is specious, and one calculated to deceive those unfamiliar with the subject. When the facts of the case are clearly stated the fallacy of this argument is at once apparent. The Indians of Georgia and Alabama never were nomadic, always lived in villages, and raised crops. Today they are exactly the same Indians they were when they left their homes. They have not made one step in advance, and show not the smallest sign of ever attaining any higher degree of civilization than they now possess. Although on a higher plane, they are as immovably fixed in their present condition as the plains and the mountain tribes, and instead of furnishing evidence of the susceptibility to civilization of the Indians, are cited as proof to the direct contrary. As far as advancement is concerned, the Indians are hopeless, and those well meaning but misguided philanthropists who are endeavoring to make white men of them are utterly wasting much valuable time and energy.—George N. Wilson in Globe-Democrat.

Seth Green Tells How to Fish.

"In the first place, when I go fishing, I go fishing. I don't hear the babble of the brook. I don't see the fluttering bird, nor the silvery leaves, nor the beautiful sky. Neither do I fish anybody else's line. I fish my own and I don't watch my companion, if I have one, to see when he gets a bite or not. I don't care whether he gets a bite or not. I am attending to my own business and looking for a good place to cast. I am looking for the fly that is on the water, and to see if there is a rise. If I see one, no matter if it is ten rods away, I mark the place and make for it. I don't run, but go quietly along and keep fishing, and when I get within casting distance I drop my fly a little short, and if I don't get a rise the next cast is made exactly on the spot on which the fly lit. My fly does not go with a thud as though I wanted to hit the bull's eye, but it touches the water as lightly as a fond mother's hand touches the brow of a lovely, coaxing child that she loves better than I can find words to express. I am just as sure of a rise, too, as the fond mother is that the child will roll its loving eyes up to the face with an expression which says to her, 'I am yours.' I feel when my fly drops so gently on the water that it does not make a ripple, that the fish is mine. That is the secret of fishing."—Rochester Democrat.

The Untutored Mind in English.

One day, bright day, and a little bird happy and stood on a log and sang all day long. That bird doesn't know anything about cat. She thinks nobody is near to her. But behind the near log one sly old cat is watching. She want to eat for supper, and she thinks about stealing all the time. The old cat came very slow, and by and by she go after the little bird, but she does not see him, and sang aloud again. She sang just like this: "I always try to do what is right; when I ever died I go to heaven." That bird said these all words, and I never shall forget the bird what it said, and these all words it said and after two three minutes go died; that cat jumped and catch and kill, eat all up except left little things from bird, wings, legs, or skin, and that bird is glad to die, because she is very good bird. That little bird has last time sang, and very happy was the little bird after that. I think the old cat have good dinner and happy just the same as bird was at first time.—Indian Scholar in the Hampton School Record.

An Indignant Customer.

In one of Boston's prominent dry goods establishments, while a lady of the Saunterer's acquaintance was making some purchases, her attention was called to the following colloquy between a prospective purchaser and a saleman. The party desiring the goods asked to be shown what she required, and being accommodated in that particular examined the article deliberately and carefully and expressed the greatest satisfaction, saying it was just exactly what she wanted. Then, turning to the salesman, she said: "What did you say is the price per yard?" "Twenty-five cents," came the reply. "Why!" indignantly exclaimed the aroused customer, putting the goods from her with a gesture of contempt, "I don't want it, then: I want to pay fifty cents a yard," and she tossed her head in the air, inquiring, "Where can I get what I want?"—Boston Budget.

Out of a Broiled Chicken.

The Hotel Kaaterskill grew out of a broiled chicken. George Harding, the wealthy Philadelphia patent lawyer, while in the Catskills years ago with an invalid daughter, desired a broiled chicken for her. He couldn't get it. He vowed on the spot that he would build a hotel where broiled chicken and every other known delicacy could be had. He has spent upward of $1,000,000 in keeping his pledge.—New York Tribune.

The Son of a Swineherd.

When the 10-year-old son of an Indiana hog raiser can count and check off 1,700 hogs as they rush out of a lot in a body the neighborhood settles down to the belief that he will some day be president of the United States.—Detroit Free Press.

A FATAL DELUSION.

The Fancied Security and Appalling Perils of People Revealed.

The eminent scientist and author, Dr Joseph F. Edwards of Philadelphia, relates the following wonderful experience:

"During my term as resident physician in the medical wards of the Philadelphia Hospital, it was a common occurrence for an ambulance call to be received from one of the down town station houses. Upon reaching the place designated, we would be shown a man or woman who has been found unconscious on the street and supposed to be intoxicated. He would be removed to the hospital, where he would linger unconscious for twenty-four or twenty-six hours and then die. In a majority of these cases a post-mortem examination would reveal a most horrible state of affairs which I will explain hereafter."

AN AMBULANCE CALL.

"A lady in apparently good health, who rarely complained and then only occasionally, of some slight and transient ill feeling, as nearly every one does at some time or other, took a long walk with her husband, and upon returning home, feeling particularly well, went to her room to remove her bonnet, and, while standing in front of the mirror, fell to the floor in a convulsion, followed by twenty-four hours of unconsciousness and death without a return to consciousness. A post-mortem examination revealed the true cause in a most horrible form."

"A young married man for years suffered from dyspepsia, for which he consulted many physicians. After suffering in this way, and having no other symptoms of disease, he awoke one morning to find a very slight swelling, scarcely more than a puffiness under one eye. In less than a month he was dead.

Now the real and terrible cause of all these deaths was Bright's disease of the kidneys, and they might all have been avoided had the unfortunate victims known what a horrible malady was fastened upon them. But Bright's disease has no symptoms of its own. It steals into the system like a thief, and deceives its victim by showing the symptoms of nearly every other disease.

But what can be done?

Take it in time.

If you feel unaccountably tired; if you have peculiar pressing pains; if your appetite is uncertain; if your head aches occasionally; if your sleep is irregular; if the fluids passed are profuse or scanty, do not delay, but use the best known means for escaping agony and death before it is too late. For this purpose there is a remedy, and the only one that has ever proven absolutely certain. Hunt's Remedy has never been equaled, and it is the only absolute one known to the medical profession. There are thousands of men and women to-day who enjoy perfect health who would be in their graves had it not been for this wonderful remedy, and there are thousands of others who require it without an hour's delay. This is no idle statement, but truth drawn from cases which are beyond question.

LIKE A THIEF.

—John Cline, once a celebrated rope dancer, died at the Forrest Home recently. He came to this country from England in 1828. He danced at the Bowery Theater in New York for four years under contract with Charles Gilbert for $10,000 a year. Once in Philadelphia he proved too great an attraction for such stars as Wallack and Forrest, and they played to empty benches while Cline danced at the Chestnut Street Theater. He was very popular with theatrical people, and they succeeded in placing him in the Forrest Home in 1880. Cline earned a great deal of money in his prime, but lost $60,000 by the failure of the United States Bank.—*Philadelphia Press.*

—Two young crooks in New York succeeded in getting possession of a check for $19,700 by surreptitious means, but the largeness of the amount frightened them and they tore it up.—*N. Y. Mail.*

THE BEGINNING OF THE END.

The beginning of disease is a slight debility or disorder of some of the vital organs, the stomach, the liver or the bowels usually. There are dyspeptic symptoms, the liver is troublesome, the skin grows tawny and unhealthy looking, there are pains in the right side or through the right shoulder blade. The climax is often an utter prostration of the physical energies, perhaps a fatal issue. But if the difficulty is met in time with Hostetter's Stomach Bitters, which is always effective as a remedy, and it should be resorted to at an early stage, there will be no reason to apprehend those injurious subsequent effects upon the system often entailed by entirely cured diseases. Far better is it, also, to employ this safe remedial agent in fever and ague, and other malarial complaints, than quinine and other potent drugs, which, even when they do prove effectual for a time, ruin the stomach and impair the general health.

ENGLISH AS SHE IS SPELLED.

One day the Grand Old Man of Hawarden
Went out to fell trees in his gawarden;
He fired a big chip
'Gainst a church wawarden's lip,
And said most politely, "Beg pawarden."

A POOR, WEAK SISTER,

who is suffering from ailments peculiar to her sex, dreading to go to a physician, but knowing she needs medical help, will find, in Dr. Pierce's "Favorite Prescription," a preparation which will give her strength and new life through the restoration of all her organs to their natural and healthy action. It is the result of many years of study and practice by a thoroughly scientific physician, who has made these troubles a specialty. To be had of all druggists.

Two men in Maine recently walked twelve miles to see a theatrical company. Men with such ability in walking ought to belong to the company.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

The name of Chicago should be changed to Dublin. There were 262 pairs of twins born in that city in 1886.

To break up colds and fevers, use early Dr. Pierce's Extract of Smart-Weed.

Quarrel in a cafe—"I know you. You are a loafer!" "And you are a liar!" "You appear to know me too!"

Try Germea for Breakfast.

ALWAYS SAFE AND SURE.

It is safe to take BRANDRETH'S PILLS at any time, but to get the best results they should be taken on an empty stomach before going to bed. For Constipation or Dyspepsia one or two taken every night will, in a short time, perform an absolute cure. It is well to take a purgative at least once or twice a month as a preventive of disease. BRANDRETH'S PILLS are entirely vegetable, and the safest and most effective purgative ever introduced to the public. They have been used in this country for over fifty years.

Of course it is hard to find a needle in a haystack, but how about finding a dude in stylish trousers?

IS DEATH PAINLESS?

A Philadelphia Doctor, after years of careful observation, says that our demise is as painless as our advent to the world. This is certainly reassuring; yet notwithstanding these great inducements, we still do not count death, and shall continue to use Dr. Pierce's infallible remedy, the "Golden Medical Discovery," for consumption, spitting of blood, shortness of breath, weak lungs, coughs, bronchitis, and kindred affections of the throat and chest. It is unequaled. By druggists.

Alma Tadema, the artist, has a staircase in his new London residence made of brass. Although a Dutchman by birth, he has acquired a brazen British stare.

Sufferers from Coughs, Sore Throat, etc., should try "*Brown's Bronchial Troches.*"

The best cough medicine is Piso's Cure for Consumption. Sold everywhere. 25c.

Send for "How to Cure Skin Diseases."

TINTED with the loveliest delicacy is the skin bathed with CUTICURA MEDICATED SOAP.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Has stood the test of twenty years as a Remedy for Female Diseases, relieving periodical pains, promoting a healthful regularity of seasons and curing weakness, back-ache and consequent nervous distress.

IT ITS PURPOSES SOLELY FOR THE LEGITIMATE HEALING OF DISEASE AND THE RELIEF OF PAIN. ITS PROMPTNESS IN ACTION.

SEE WHAT ONE WOMAN'S FEATS OF PEN REALS.

Pittsburg, Pa., Nov. 5th, 1883. Mrs. Lydia E. Pinkham: "As is frequently the case with mothers who have reared large families, I have been a great sufferer for years from complaints incident to married life. I have tried the skill of a number of physicians and the virtue of many medicines without relief, and as an experiment I concluded to try yours. I can assure you that the benefits I have derived from it came not because of any faith I had in it, for I had but slight hope of any permanent good. I am not a seeker after notoriety but *I want to tell you that I have been wonderfully benefited by your medicine.* I am now using my fourth bottle and it would take but little argument to persuade me that my health is *fully restored.* I should like to widely circulate the fact of its wonderful curative powers." PHEBA C. ROOP.

THE NEAREST DRUGGIST WILL SUPPLY YOU. PRICE $1.00.

HALL'S SARSAPARILLA

Cures all Diseases originating from disordered state of the BLOOD or LIVER. Rheumatism, Neuralgia Boils, Blotches, Pimples, Scrofula Tumors, Salt Rheum and Mercurial Pains readily yield to its purifying properties. It leaves the Blood pure the Liver and Kidneys healthy and the Complexion bright and clear.

OVERWORKED Women

For "worn-out," "run-down," debilitated school teachers, milliners, seamstresses, housekeepers, and overworked women generally, Dr. Pierce's Favorite Prescription is the best of all restorative tonics. It is not a "Cure-all," but admirably fulfills a singleness of purpose, being a most potent Specific for all those Chronic Weaknesses and Diseases peculiar to women. The treatment of many thousands of such cases, at the Invalids' Hotel and Surgical Institute has afforded a large experience in adapting remedies for their cure, and

Dr. Pierce's Favorite Prescription

is the result of this vast experience. For internal congestion, inflammation and ulceration, it is a specific. It is a powerful general, as well as uterine, tonic and nervine, and imparts vigor and strength to the whole system. It cures weakness of stomach, indigestion, bloating, weak back, nervous prostration, exhaustion, debility and sleeplessness, in either sex. Favorite Prescription is sold by druggists under our *positive guarantee.* See wrapper around bottle.

PRICE $1.00, OR SIX BOTTLES FOR $5.00.

Send 10 cents in stamps for Dr. Pierce's large Treatise on Diseases of Women (160 pages, paper-covered). Address, WORLD'S DISPENSARY MEDICAL ASSOCIATION, 663 Main Street, Buffalo, N. Y.

Dr. Pierce's Pleasant Purgative Pellets. SIZE OF PELLETS. LITTLE LIVER PILLS.

ANTI-BILIOUS and CATHARTIC.

SICK HEADACHE, Bilious Headache, Dizziness, Constipation, Indigestion, and Bilious Attacks, promptly cured by Dr. Pierce's Pleasant Purgative Pellets. 25 cents a vial, by Druggists.

THE YOUNG MAN WITH THE NEW COLUMBUS BUGGY,

Takes the good looking young lady to the picnic on the glorious 4th this year, and it will run so smooth with its fine steel axles, ride so easy on its soft oil tempered springs, and she will be so delighted with the COLUMBUS that she will gladly accept another invitation. She will at the same time hear all that John and Samantha have to say as they follow in their "cheap rattle trap" in their efforts to make each other hear. We sell no shoddy vehicles, but sell you those awarded the Gold Medal at New Orleans Exposition, for only a little more than asked by dealers for the "Cheap John" buggy. Some of our styles are very snug and will afford an excellent excuse for one to hold the other in while she drives.

We also have styles wide enough for couples who have been married five years. We have "one man wagons" for old bachelors. Write for Illustrated Catalogue to

COLUMBUS BUGGY CO., PACIFIC COAST BRANCH,

THE MARCH OF FASHION.

Marvels in Costumes and Materials for the Summer Season.

Every season brings a "rage" for some articles of dress, and the favored one for this summer is a home waist in the form of a loose blouse, Garibaldi or habit shirt, is cool and trim on a slender figure, and admirable for home, seaside, mountain, boating or tennis wear. They have already been prepared for exclusive persons in plain or striped surah, having a belt of the same fastened with a handsome buckle.

Lawn tennis cottons, striped flannel, checked ginghams, plain, plaid or striped silk, piece embroidery or lace, Chinese silk or pongee are excellent fabrics to work up into blouses, and, if a contrast is desired the shirred blouse may be selected and the second material used for shoulder *pattes*, wrist bands, belt and collar.

A short, pointed cashmere basque buttons on the left, has a short velvet rever on the right side, and the center cut out in V shape and filled in with plaitings of red moire. White, of a creamish tinge, moire is considered very *chic* for a chemisette on dark green, blue or black woolen or silk basques. The collar, cuffs and revers are usually of velvet.

Corded edges are appearing on basques again. The dress fabric is used on woolen costumes, though silk may be corded with velvet. Basque fronts may be in one, two or three points or cut in a U shape. They are cut very short on the hips, and the backs arranged to suit any fancy in jabot plaits, shortest in the middle, showing the facing, two tabs and two points, two narrow box plaits separated up the middle or slightly pointed, with an inserted fan of trimming fabric.

A dressy India silk basque has a long, slender point in front and jabot back; the upper part buttons over on the right nearly to the bust, is then cut out to leave a V from the bust to the point, which is filled with crepe in narrow plaits; a revers of velvet is on the right side of the V; the collar, cuffs, jabot facing and band from the point to the back is of the same material.

A plainer basque has an oval-shaped piece cut out between the neck and bust, filled in with plaited silk and outlined with revers rounded in the center to follow the oval plastron. Another pretty style is to button the fronts slightly on one side with three large buttons and then to continue the fastening down the middle with small buttons.

Shirt sleeves are frequently seen in woolen or cotton basques, and always on the blouse waists; the cuff may be five inches deep or only an inch wide band. Puffs above a narrow velvet wrist-band are stylish; these are set upon a narrow coat sleeve lining and the lower part of the sleeve either falls over the cuffs in points, or has a turn-over cuff of the velvet. The puff is two inches and a half wide when done, cut bias, and thickly gathered top and bottom.

Coral pink surah, cream lace and silver embroidery forms a ravishing tea gown. One of pale blue and pink brocade, outlined with gold threads, on a cream ground, opens in front over a fablier of Brussels lace over pink satin, the opened fronts showing a facing of blue satin. The Brussels lace collar was tied with pink and blue ribbons that fell to the waist, to be notted there again; the sleeve ruffles were also caught with ribbons.

Draperies must give an idea of being totally unlike on both sides. Small, bouffant paniers are draped over one hip and the other side ornamented with long, pointed apron, shawl point or flat panel, something long to contrast with the short effect on the other side. Short, round aprons are plaited into a narrow space of the belt, showing the skirt, generally of a striped fabric, on both sides of the belt.

Long wings are worn in the back over a plain, full width, and must also be plaited into a small space, though they are bouffant over the tournure from the catching up the middle. A plaited apron or scarf is laid in kilt plaits, brought from the left hip to the right side low on the skirt, and held there by an immense rosette of the dress material.

Bands of velvet, soutache or passementerie are greatly fancied across the front and sides of dresses. New violet, fawn and green cloth dresses are embroidered in silk cord and silver for visiting and church wedding toilets. Bouffant draperies and irregular arrangement are the especial features of trimmed skirts, and shawl points are decidedly popular.—*N. Y. Herald.*

A Drummer Taken In.

"Will I have time to stop off and get some refreshments?" asked a drummer on a Texas railroad of the conductor, as the train stopped at a station.

"You will have plenty of time."

The drummer stepped off, and the train went off without him. The next time the drummer saw that conductor he took him to task severely for his conduct, complaining that he had to lay over at that lonely place seven hours.

"Well," replied the conductor, "you asked me if you would have time to get some refreshments, and if you couldn't get all you wanted in seven hours, it seems to me you are a hog."

Verdict for the conductor, and no papeal.—*Texas Siftings.*

—It costs forty-seven thousand dollars a year to run the New York Metropolitan museum. Forty-seven persons are employed in the institution.

HOME AND FARM.

—A dish of hot water set in the oven prevents cake from scorching.

—A glass of salt water, warm or cold, taken on rising in the morning, will cure constipation.

—To drive away ants, scrub the shelves or drawers that they frequent with strong carbolic soap, after which sprinkle red pepper in every crevice.

—While the hens may not protect an orchard from insects, it has been demonstrated that when poultry are confined around the trees they will prove very serviceable in preventing the attack of insects.

—Leg weakness in fowls is the result of rapid growth, and is best met with animal food and tonics. A little meat of worms should be added to the food every day and a little tincture of iron dropped in the drinking water.—*Cleveland Leader.*

—The necessity of keeping the sheep on dry footing should not be forgotten. A yard in which sheep are kept should be one where there is plenty of drainage. Wet fotting is the one thing that sheep will not stand.—*Cincinnati Times.*

—Good blood is appreciated more and more each year by those who purchase horses for city purpose. The famer who has the best bred animals generally fares the best—a good thing to think about as breeding time approaches.—*Montreal Witness.*

—An effective and easily-made decoration to break a space upon a barren wall is an eighteen-inch square board, quite thin, and covered smoothly with plush. After hanging it diamondwise, by means of loops screwed to the back, nail in the center a carved and gilded bracket, large enough to hold a vase or figure.—*Indianapolis Journal.*

—Blue grass has the advantage of not running out as long as it receives a top dressing of manure annually. It does best on lime-stone soils, but is grown in nearly all sections. Orchard grass is a variety that gives early pasturage, and can be grown where many other grasses will not flourish.—*St. Louis Republican.*

—At the meeting of the Kansas Horticultural Society, as reported in the *Rural World*, Prof. Lantz stated that he found that hawks and blackbirds richly earned the little corn and the few chickens they consumed, by their consumption of mice, rabbits and English sparrows by the hawks, and many insects on the part of the blackbirds.

—There is great danger in wearing damp clothes, because when a liquid passes into a state of vapor there is great absorption of heat. In the animal economy heat is generated in the system and given out by the body. If the clothes are damp, this heat is abstracted faster than a new supply is formed by the process of respiration and the result is what is termed a cold.—*Troy Times.*

—The way to begin bee-keeping is to begin small. If one procures a single colony, in a modern, movable comb hive, and by the aid of one of the standard works cares for that colony and its increase during the season, he will have a knowledge of bee-keeping that will enable him to manage many hives, and which will enable him, if he should so elect, to keep bees for profit.

POTATO CULTIVATION.

Work Necessary to Obtain a Profitable Crop of Tubers.

To a considerable extent the yield of the potato crop depends upon the cultivation. Good seed, good soil and thorough preparation are also necessary, yet we may give all these, and if we let the crop take care of itself, the result, to a considerable extent, will be a failure. While each are in a measure necessary, yet, at the same time, they are dependent upon each other in securing the largest yield. Having the soil thoroughly prepared before planting is an important aid toward making the cultivation easier. It also enables us to commence earlier than we otherwise could.

Clean cultivation is very essential. We can not secure the best growth of potatoes and at the same time allow a good growth of weeds and grass. I find it much easier to destroy the weeds when small. Not only can the work be done much easier, but the crop will be able to derive a larger amount of benefit. Taking an average season, I prefer to keep the soil reasonably level. If the season is wet more hilling can be used to a good advantage, because it is necessary to secure good drainage.

How often and how long the crop should be cultivated depends largely upon condition. No rule can be given that will hit all seasons, or be applicable to all conditions of the soil. It is essential that the soil should be kept loose and mellow and the weeds be destroyed as thoroughly as possible. The nearer these conditions are observed, provided, of course, that during the dry season the soil is not disturbed too deep, the better will be the yield both in quality and quantity. If one good harrowing and three good cultivations with the cultivator will secure these conditions, that is all that will be necessary. I usually consider it necessary to hoe over the rows, as, unless the soil is very clean, it is somewhat difficult to kill out the weeds between the hills in any other way. Usually harrowing once, hoeing twice after the first two cultivations and then giving a thorough cultivation to finish up this, will be all that is necessary unless the soil is very foul with weeds. Give the most of the cultivation during the early stages of growth.—*Cor. Farm, Field and Stockman.*

LIVE-STOCK NOTES.

Eight Points for the Consideration of Farmers and Dairymen.

The owner knows his cows and can breed them intelligently and by selecting and rearing the best in the most careful manner will soon build up a better herd than he can buy. He has a sympathy and affection for the animals nursed from early calfhood, and if he be a kind and gentle master his cows have an affection for him which not only renders them docile and good-natured but more profitable. At times a dairyman or stockman must get new blood into his herd, but this is best done by procuring a bull, and a young calf is the best to have, as it is reared with the herd and becomes acquainted with it, so that there is no disturbance or quarreling when the bull is introduced.

2. In buying new stock beware of the hippodrome or so-called "combination sales." No man sells off his best stock. The poorest goes to the sale. There it is boosted by all the arts of the professional auctioneer, and the bidding of agents who are not buyers, but "teasers," as it were, to lead on the too-hesitating purchasers. Many a man has rued his "bargains" thus procured, but to save appearances he bears his cross in silence, or makes his sad complaints—like the song bird—to the silent moon.

3. One can rear calves with much economy. A calf does not need cream; sweet skimmed milk, or whey, with linseed and pea meal to replace the caseine removed from it, will feed as good calves as one need have. Bone and muscle and a large capacity for digestion are required for dairy cows, and, indeed, for beeves if the fattening propensity can be put on to these. But sweet milk and sweet whey are indispensable. These may be secured by a little good management. Deep setting of the milk will secure the one and heating and carrying from the factory in closed cans made perfectly clean will secure the other.

4. Fancy points do not pay. It is the broad backs, deep sides and round hams which make profitable pigs, and not the short necks and turned-up snouts, which seem to be running away for want of a body to be rooted upon that make the prime bacon, pork and ham for market or family.

5. All kinds of stock should have summer shelter. Sheep suffer exceedingly from heat, and the loss of milk tells the story as regards the cows. A simple roof supported upon posts, if one has not a few shady trees for the purpose, will be a great comfort to our domestic animals.

6. Every young thing about the farm goes to grass naturally, the first thing. A two-weeks-old colt is eating grass alongside of its dam; some three-weeks-old calves are nipping the young grass in the orchard, and a brood of chicks only three days old are picking the tender blades here and there. Then let farmers provide grass in abundance for young animals. It is the cheapest food.

7. Properly equipped for their work, veterinary surgeons may be true "helpbearers." It would pay a stockman, dairyman or farmer feeding ten head to give a dollar for each one to have a competent veterinarian visit his herd once a month and be within call on emergencies, and for this sum contract to attend upon and treat all the sick animals of the herd or farm. If swine-breeders and dairymen were to act upon this principle, there would be a sudden end of hog cholera and "pleuro-pneumonia," for the surgeons, interested in preserving health of their charges, instead of "breathing out slaughter" would put in practice the abundant precautionary methods to avoid and evade these diseases.

8. When not shorn of their rightful endowments, agricultural colleges afford the best opportunities for young men who have a liking for live-stock, and a desire to learn how to care for them and treat their ailments, to pursue this purpose to a successful end. It is best for every student to seek out the college in his own State and demand that his application be properly met. This will be a sharp spur to laggard States to put their agricultural colleges in working order to meet in a sufficient manner the requirements of their citizens.—*Cor. N. Y. Tribune.*

Keep But One Kind.

No one but a fancier should keep several breeds of fowls. Let the farmer choose that breed which gives him the most pleasure to care for, and, as a rule, the money received goes far toward that end. The breeds that are exhibited in the largest numbers and in accordance with the popular demands are Light Brahmas, Wyandottes and Plymouth Rocks, with an increasing interest for Dark Brahmas and White Plymouth Rocks. A farmer makes no mistake if his taste leads him to select either of the five kinds named; all lay dark, desirable egg for the market, and all are good, genuine poultry. Remember, in these days, the specialists are the ones that get a reputation and make money; but, in this case, the grand secret is that with one kind the breeder soon finds out the possibilities of the breed, soon learns it thoroughly, the breed improves in his hands, his strain becomes noted, he derives an added pleasure in handling and his pocket-book grows fat.—*Our Country Home.*

—The autographiometer is an instrument lately devised in Paris for automatically recording the topography and difference of level of all places over which it passes. It is carried about on a light vehicle, and has only to be dragged over the ground of which a plan is desired.—*Springfield Times.*

A Slanderous Joke.

"Going aboard this steamer, sir?" asked the captain of a gentleman who was delaying the boat as she was making ready to leave the wharf in Buffalo.

"That depends. Captain, what is your boat insured for?"

"Sixty thousand dollars, sir."

"Ah! Sixty thousand, and she's worth about $35,000. Captain, you needn't wait on my account. I'll take the railroad."—Wall Street News.

Wanted.

An immediate opening for a talented young man who is at present somewhat embarrassed.—Judge.

Burdette.

Do you know, we get tired to death with the measureless conceit of some people? Some other people, that is. Now, here is a lawyer of our acquaintance; he is an atheist; for years he has been going round declaring that no man could understand a page of the Bible; that no man could reconcile its conflicting statements of doctrine or history; that it was all a muddle that no living man could make clear. Well, now, we met that same man only last week, and he says he can understand the interstate commerce law. Oh, come off!

A PLACE OF REST.

"Where shall we go this summer, dear?" asked Mrs. Flyaway. "Well, let's see," replies her husband, "last winter we got malaria in Florida." "Yes, and the alligators got your pointer dog." "And the preceding summer we got the rheumatism in the mountains." "We did, and the bears got my little Skye terrier." "And the summer before that we went to the sea shore and got bled by the mosquitoes and the landlord." "Yes." "And the summer before that we went into the country and the children were laid up all summer with ivy poison." "I remember." "Well, if I felt as strong as I used to, I'd like first rate to take a vacation this summer, but I'm feeling kind of weak and listless, and I'm afraid I couldn't stand it. Let's stay home and rest this year."

RECOMMENDED FOR PROMOTION.

"You will find the service one of great hardship," said the examining officer to the recruit who wanted to enlist in the Arctic expedition; "of more suffering than profit." "I'm used to that," replied the recruit; "that's the kind of service I've been trained to." "But your duties will increase little by little, until you will be doing two or three men's work." "That's just what I've been doing," was the confident reply. "But you will only get one man's pay, and it isn't very large pay at that." "All right; that's my present salary." "And cold—you have no idea how cold it will be; cold all the time; fearfully, killingly, freezingly cold." "That's right in my line, all of it," said the recruit, with strange enthusiasm. "I've been assistant pastor in a fashionable church in Chicago for two years." He was promptly enrolled and offered command of the expedition.

ANOTHER FIND IN EGYPT.

A learned German professor has discovered—at least he says he has—that the ancient Egyptians invented beer long before the time of Moses. Oh, well, that might be. The ancient Egyptians were mean enough to invent anything, and we know they must have had some kind of tipple, for a great many of them were slewed in the time of Moses. The fact that they were beer drinkers is also further attested by their peculiar handwriting. Any intelligent compositor who has had occasion to set up the copy of the reporter whose assignment compelled him to tarry long at the schuetzenfest has recognized a strong family likeness between his manuscript and the hieroglyphics on the obelisks and mummy cases.—Brooklyn Eagle.

What He Did.

An Alabamian who is worth $100,000 today was asked how he got his start when the war closed.

"Do you mean what was the first thing I did?" was the reply.

"Yes."

"Well, I headed across the country for Selma. When I got within ten miles of the town I stopped at a house for dinner. It was a place owned by an old chap who did a heap of blowing to egg the Confederacy on, but had not gone to war himself. He wanted to charge me a dollar greenback for the meal. I offered him $20,000 in Confederate money. He got mad, and I said:

"'Here, old man, is the money you helped to make, and I'm carrying around two bullets shot into me in the war you helped bring on. Now come out here!'

"He came out and I set to and gave him the durndest licking an old fire eater ever got, and when he hollered 'enough' I threw the money into the fire and walked off. That's the first thing I did after the war, and that's what I date my prosperity from."—Detroit Free Press.

Unprepared.

"Let's see, you're a witness in that case which comes off to-morrow, aren't you?" queried Wigwug.

"Yes," replied Filtrip.

"Which side summoned you?"

"I don't know."

"Don't know! Why, man alive, how are you going to testify then?"—Detroit Free Press.

Crime Must Not Go Unpunished.

Kansas Judge (to prisoner)—What was your reason for murdering the man in such a cold blooded way?

Prisoner—Yer honor, he pronounced depot "daypo."

Kansas Judge—Ten dollars or thirty days.—New York Sun.

Appearances Against Him.

"Is Smith a man of general intelligence?"

"I have never met him, but I fancy not."

"Why?"

"Because I've seen him occasionally in the jury box in the court of general sessions."—New York Sun.

His Full Share.

"Did you have all your lessons at school to-day, little boy?"

"Yes, sir, an' more, too."

"More than all your lessons?"

"Yes, sir—a lickin'!"—Golden Days.

THE USE OF COCA.

Its Marvelous Effects Upon the Natives of South America.

Consul du Pre transmits from San Salvador an interesting report on the use of coca, in that country and its effects upon the inhabitants. He says:

"I have seen so much recently written of coca in newspapers and in medical publications, that I am impelled to report what I have learned of the virtues of this product of South American forests. With leathern straps passing around their foreheads to sustain burdens of 150 or 200 pounds on their backs, I find these lithe, slender natives traversing plains and mountains with greater celerity than the mule I bestride, which travels through the livelong day, six miles an hour. Native physicians, eleves of the schools of Paris, concur in assuring me that this extraordinary capacity for endurance of toil and hunger is to be ascribed to the use by these viageros of coca.

It is administered freely to infants, and is the chief intoxicant of men and women. Youths, through many days, are entrusted with the care of valuable flocks of llamas, having no other sustenance than that to be found in little leathern purses containing coca and its compounds. Indians chew it constantly. They, like the maxillary movements of tobacco chewers, are incessant. From thirty to fifty gramas are consumed daily, serving, unlike tobacco, both as food and stimulant. Without coca habitual chewers can not digest food; without it they are unable to ascend mountains, with long, rapid strides, never slacking their wonderful speed through the livelong day. They will not toil without it; without it they enjoy nothing; without it, practically, they cease to live. The immediate effect of chewing coca is perfect insensibility of the interior of the mouth. The immediate sensation is that which one would experience when finding that his mouth had become a great void in somebody else's head. I had a dentist apply it when extracting the roots of a molar tooth, and the effect was as described. Indians constantly using coca finally lose the senses of taste and smell. They can eat, without repugnance, most disgusting food and drink most nauseating draughts. The sensitiveness of the mucus membrane has been destroyed. When one goes further and swallow the saliva impregnated with the juice of to coca leaf, a delicious sensation of warmth and perfect blessedness prevades one's whole being, intellectual, nervous and physical, and he is lapped in the joys of an elysium.

In doses of fifteen to sixty grains, coca produces delightful intoxication. Its joys transcend in perfect blessedness all known human delights. A sensation of lightness first supervenes; the air inhaled is zephyrs from angels' wings; there are wild imaginings and fantastic hallucinations and georgeous visions, and then complete insensibility. It is intoxication without drowsiness, without congestion of the brain, involving a sense of perfect rest. The law of graviation is suspended and the conqueor drifts bodily among the stars. Meanwhile the muscular system is stimulated to an extraordinary degree. An intellectual excitement supervenes, enabling the "possessed" of this demon to watch and toil through sleepless days and nights. No dreadful headache or more intolerable nervous prostration follows.

"It is the most potent nervine, almost, at man's disposal. Its hygienic properties are disclosed from its physiological properties," says a Spanish M. D., who adds that in hot infusion it is the one useful and healthful beverage one can use after dining. Especially is it commended to the feeble, to those who have transcended limits of sobriety in using alcohol. Its virtues should be tested, therefore, in inebriate asylums. It surely calms nervous excitability of many, and, taken in small quantities, enables one to endure cold and rain and snow, and it enables one to defy great fatigue and restores the forces lost by excesses. It is popularly used for indigestion, for disordered stomachs, for hysteria, flatulency and colic, and all forms of intestinal disorders. It is used constantly by toilers in mines, and when one reaches the mines after marching several days through forests and over mountains, sustained only by the use of coca and maize, he is permitted to eat at discretion through four days and have perfect rest. Then he is in perfect health and "fresh and fat," says the writer above quoted.

Cocaismo—habitual intoxication by use of coca—more easily becomes habitual and incurable than alcoholism or addictiveness to opiates. Its consequences, however, are not yet wholly measured or comprehended. excessive or constant use of the intoxicant begets rapidly moral and intellectual degradation and decay; steady decline is interrupted at intervals by resistless impulses to do most violent and brutal acts. The nature of the father, as perverted by the drug, is transmitted to the child, and the inveterate vice, operating through generations, is said to account for the brutality of races of Indians, the Quichas and Aimaras of Bolivian fastnesses.—*N. Y. Sun.*

—A merino ram at Middlebury, Vt., produced a weight of twenty-nine pounds and eleven ounces of fleece from 376 days' growth, although the carcass weighed only 100 pounds, the wool being nearly thirty per cent. that of the carcass. Another ram, which was sheared of his sixth fleece, gave thirty-eight and one-half pounds of unwashed wool.—*Troy Times.*

THE LIMEKILN CLUB.

Good Advice Presented Free to a Young Swell Head.

"If Lord John Buckhorn ar' in de hall tonight I should like to hev him come for'd," said Brother Gardner as the dust settled down and the members got their feet drawn in.

Lord John, who is a young man and a young member, made his way up the center aisle and as he reached the president's desk the latter continued:

"Brudder Buckhorn, I h'ar dat you ar' talkin' 'bout a tower to Yurup, an' you is sayin' you is gwine to rent a box in de pos' offis, an' you has bin talkin' considerable 'bout ownin' some pine lands down in Alabama."

"Yes, sah."

"Ar' you gwine to tower to Yurup?"

"N-no, sah."

"Got yer box in de pos' offis picked out?"

"Not yit, sah."

"An' I spose dem pine lands in Alabama ar' all in your eye?"

"Y-yes, sah."

"I reckoned so. You ar' a young man, an' you has de swell head an' want to swell out. You want to be tooken fur a milyonaire, when you doan' ai'rn but seben dollars a week and you am wearin' a hat of de style of three y'ars ago. Brudder Buckhorn, I want to spoke a few plain words to you.

"When dat disease called de swell head keeps a grip on a young man arter he has passed his twenty-fo'th birthday, he am purty sartin to eventooally bring up in de lunatic asylum or de poo' house.

"De pusson who goes aroun' purtendin' to be what he ain't, he's laid out to hoe de hardest kind of a row. He may fool a few ole women an' young chil'en, but de rest of de world will tumble to him fur what he is. Not only dat, but dey will dispise him fur his hypocrisy. Samuel Shin, who airns about fo' dollars a week, could circulate aroun' an' tell de people dat he was gwine to open a nashunal bank or build an elevator or organize a steamboat line. He might git a dollar's worf of credit at some co'ner grocery, an' some shoemaker might put a lift on one of his heels an' chalk it down, but in a few weeks Samuel would take a powerful drop, an' when he came down de concussion would jar de buttons off his shirt.

"'Spose'n, Brudder Buckhorn, dat Jay Gould should go aroun' claimin' dat he writ de works of Shakspeare, or dat de mayor of Buffalo should bob up an' declar dat he writ 'Paradise Lost?' Can't you h'ar de dull thud with which dey would strike de airth in about ten days?

"Jist sot yerself down some day an' cmagiae what would hev happened had Horace Greeley claimed that he was George de Fourth, or had John Jacob Astor asserted that he was Capt. Kidd!

"I say to you, Brudder Buckhorn, drap it! Be who you ar' an' what you ar'. If you git up to $8 a week, let de world know it. If you drop back to $5, don't lie about it. An' about your disease. It doan' kerry a person off, like gallopin' consumpshun or typhoid fever, but it holds him up to de ridicule an' contempt of all sensible men. It might help you to soak your head in a pail of warm water. If it doan', you'd better put yer head between two freight kyars an' let 'em come together on ye. You may now resoome yer seat, an' if the ailment continers to grow on ye I'll look about for some remedy which de club kin apply."—Detroit Free Press.

An Unexpected Suggestion.

"Say, Gaddersby," said Mr. Smith, as he came into the fish store with a lot of tackle in his hand, "I want you to give me some fish to take home with me. Kind o' fix 'em up so that they'll look as if they've been caught today, will you?"

"Certainly, sir," said the grocer. "How many?"

"Oh, you'd better give me three or four bass. Make it look decent in quality without appearing to exaggerate, you know."

"Yes, sir. But you'd better take white fish, hadn't you?"

"Why? What makes you think so?"

"Oh, nothing, except that your wife was down here early this morning and said if you dropped in with a fish pole over your shoulder and a generally woebegone look, to have you take white fish if possible, as she liked that kind better than any other."

Mr. Smith took white fish.—Merchant Traveler.

Rapid Transit.

Hotel Clerk—Look at my new diamond. It's a darling, ain't it?

Guest—It's a fine stone. May I ask where you got it?

Hotel Clerk—It's one of the French crown jewels that's just been auctioned.

Guest—See here, that auction only began two days ago. From Paris to Omaha is quite a stretch.

Hotel Clerk—Guess everybody knows that. Do you suppose I'd risk such a stone on shipboard? No, sir. It came by cable, that stone did.

Guest—Take something with me.—Chicago Times.

A Preliminary Report.

A youngster of the mature age of 10, captain of the Boomer club, a baseball nine in an adjoining city, recently received a challenge from a rival club to play, which he accepted. Before the game took place, however, he prepared two reports for the local papers, either one of which could be used as occasion demanded. One set forth in glowing terms a victorious result for the nine. The other merely left a space for his score, with this concluding comment: "The game was lost to the Boomers through bad umpiring." This was taking time by the forelock, indeed.—Boston Gazette.

Of No Interest to Him.

Mrs. Guzzleheimer, the wife of the eminent brewer, was reading the evening paper:

"Vat vas der news mit dot paper?" asked Mr. Guzzleheimer, who drops into English occasionally.

"I see der hop crop vas going to be a bad failure this year already," replied the lady.

"Vell," said the eminent brewer, "off you can'd find more interesting news as dot, den I goes to schleep mit myself ouid."

And in five minutes he was snoring.—New York Sun.

It Runs in the Family.

Smith—I hear your son Patrick is about to take the vows of the church. I trust he will bear them well.

O'Rourke—Ah, that he will, no doubt. One of them, especially, will give him no trouble at all.

Smith—And what is that?

O'Rourke—The vow of poverty, sure. Patrick was always brought up that way; not one of our family could ever get a cent ahead. It will come naturally to him, do you see?—Lowell Citizen.

A Change of Station.

"I was not always in this station of life," said the hack driver plaintively as he reached for his fee.

"Indeed?"

"No, sir. At one time I was a well known and promising lawyer."

"Well, how do you feel over your promotion?" was the unfeeling rejoinder.—Merchant Traveler.

BAILING AND BUILDING.

A Little German Story Which Contains a Moral For British Politicians.

In German story books an edifying story is told of two men who were desirous of visiting America. The one thought it would be dangerous to traverse the ocean in a ship. He began, therefore, to bail the sea out of its bed, in order that he might cross over on dry land. Meanwhile the other betook himself to a dock yard and had a proper vessel built, and while his friend was still vigorously at work bailing, he set sail and accomplished the journey back and forth, without the ocean being appreciably reduced by even a drop in its volume. The British and Russians, respectively, in their Asiatic policy remind us of those two travelers. While England is striving to consolidate her Indian Empire by impracticable methods, Russia is quietly pursuing the most efficacious measures to develop her supremacy in the east and southeast of Asia. Her trans-Caspian railroad has been quietly extended through desert steppes lying to the northeast of Merv, and trains are now running regularly as far as Charjui, on the Oxus. This river, whose waters supplied the victorious hordes of Timour and of Ghenges-Khan, has been bridged over, and the laying of the rails through Bucharis as far as Samarcund and Taschkend will soon begin. Two steamers are making regular trips on the Oxus and are engaged in the transport of articles of commerce between the railroad terminus and Khiva. When we remember that scarcely ten yeare ago no European could have ventured into those regions without imminent danger of life, while now one can fly at railroad speed and in a saloon carriage across this country, we are able to estimate the magnitude of this Russian enterprise in its influence on civilization. The Emir of Bokhara, who is doing every thing in his power to encourage the construction of railroads in his dominion, is the grandson of the great Asiatic potentate who less than thirty years ago caused to be executed the ambassadors of Queen Victoria, Colonel Stoddard and Captain Conolly. Merv, the original Tartar capital, was chiefly made known to the world by Marco Polo's descriptive travels, until it was revisited a few years ago by the bold Irishman, O'Donovan. Now it is only a station on this immense Russian railway system, and Khiva, which can at present be reached on the wings of steam in boats plying regularly with Moscow, when Vambery explored it, five and twenty years since, in the disguise of a dervish, was wholly unknown to Europeans. When Russia shall strike her final blow for sovereignty over India, this road will serve as a bridge, while England will find that its whole Oriental policy since the days of Lord Palmerston—her acquisition of Cyprus, her occupation of Egypt, etc.—will prove as impracticable as the attempt of the traveler above mentioned to bail out the ocean and cross over on dry land.—*Public Opinion.*

PREPARING WOOL.

The Condition in Which It Should Be Offered for Sale.

It makes a considerable difference in the price received for the wool whether it is put upon the market in good condition or not. The good condition it is in largely determines the value or price, and the price we receive determines the amount of profit realized from the sheep. When good, common wool, such as we may expect to secure from the average farmer, is selling at twenty cents, dirty, taggy, burry wool sells at twelve to thirteen cents, and from that up, depending largely, of course, upon the condition it is in.

There is no excuse for tags. They can be taken off before the sheep are turned upon the pasture, in the spring, or if neglected at that time it can be done when you shear. There is no possible gain in leaving them in. The dockage more than overbalances the increased weight, because the buyer takes into consideration the labor of taking them out, and is sure to overestimate their weight. The farmer can better afford to take them out than to let them remain on.

Sheep should, by all means, be kept away from burrs. Any one who has ever tried picking them out is generally well satisfied that it is something of a task, and it only adds to the cost; there is no possible benefit. Burrs are a loss, and that against our interests.

Again, it is necessary to keep each fleece separate. Roll tight together, and tie with the side next to the skin out. Do the shearing in a clean place, so there will be no unnecessary trash. Clean wool, properly tied up tight and snug, that when opened out shows no tags, burrs or trash, will sell at the best market prices always.

Every sheep breeder realizes that generally this kind of stock has paid a very small profit; many, in fact, have not been able to realize any profit, and others have abandoned the business on this account. Much of this is no doubt due to a want of proper care and feed, and to a failure to send the wool to market in a condition that will insure the highest price. Even with low prices, those who keep their sheep in a good condition, so that a good growth of wool is secured, and also take proper care in marketing, find they have been able to realize at least a small profit.

A difference of five cents per pound on a fleece may make the difference between realizing a profit and sustaining a loss. And in very many cases the greater portion of this difference is based upon the condition in the preparation of the wool for market.—*Farm, Field and Stockman.*

—Destroying weeds on the roadside is now made compulsory in New York.

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY AUGUST 13.....1887.

SUPERVISORS' PROCEEDINGS.

On Friday, Aug. 5th, 1887, the Board of Supervisors met pursuant to adjournment at 10 a. m.

Present, J. D. Harger, Chairman, J. R. Eldred, E. Robinson and J. C. Eddy. Absent, Thomas Boland.

The appointment of John S. Gorman as Director of Division No. 2, of Irrigation Dist., revoked and a special election ordered to be held in said Division No. 2 on the 20th of August for the purpose of electing a Director for said Division.

Ordered that bonds be issued to the amount of $1,500 for building a school house in Warm Springs District.

Claims were allowed as follows:

J. D. Harger, mileage	$14 10	
Service 1 day	6	
Service 4 days	24	
Mileage	14 10	
Total		$58 20
J. R. Eldred, mileage	13 80	
Service 1 day	6	
Service 4 days	24	
Mileage	13 80	
Total		57 60
E. Robinson, mileage	30	
Service 6 days	36	
Mileage	30	
Total		36 60
J. C. Eddy, mileage	16 80	
Service 5 days	30	
Mileage	16 80	

Whereupon the Board adjourned.

J. D. HARGER,
Chairman.

Attest: P. H. MACK,
Clerk.

Martin's Victims.

William H. Martin, the San Francisco land swindler, continues to find victims and perpetrate robberies. The following two letters are among the latest received from the victims of the swindler. The writer of the first was a tourist, caught by Martin in San Francisco.

SROWHEGAN, ME., July 21, 1887.

J. W. P. LAIRD, Esq.—*Dear Sir:* Yours of the 11th inst. received and am somewhat surprised at the contents. I made a regular entry through W. H. Martin, of San Francisco, of Section 8, Township 12 South, Range 35 East, M. D. M., paying $330 as entrance fee, he giving me written agreement at the time to refund the amount to me at any time within six months or my transferring said section to him. He represented the same to be good land, with the railroad running through it; also the river cut one corner. He said that they were building a canal down the east side of the river and he thought they would have it completed before the three years limit. * * * I went with Martin before the Clerk at the Courthouse and made oath and the next day I asked Mr. Martin something in regard to the entry and he said he had deposited or sent the paper to the proper office. What is Mr. Martin's standing with you? He seems to have a map of the valley and to be selling off some sections. What would you advise me to do?

Yours very truly,
F. R. STEWARD.

Mr. Laird informed Mr. Steward that the tract described above had not been entered for him by Martin or any one else. The money paid in this case is a total loss. The writer of the second letter is an aged Minister of the Gospel, who thought he was securing a home where he could end his days in comfort.

TOPIAS, NEB., July 20, 1887.

MR. C. MCHOLLAND:—*Dear Sir:* I wish you could give me information about land I bought in Owens valley, whether it has any value, and if any such location has been made. Martin made out the papers for the land and I paid him $320. The description is as follows: The South half of Section 28 and the North half of Section 33, Township 13 South, range 35 East M. D. M. I find it is outside of the boundaries of the canal. * *

Yours truly,
S. MESSER.

The Land Office records contain no such entry as is described in this letter. This is another swindle, like the first. Martin has never invested one cent in a canal in the county, nor has he any interest in such canal, other than a thief has in the property of his neighbors. Commissioner Sparks has been written to in regard to the practices of this man but nothing appears to be done to stop him.

The Crimes Bill now in full force in Ireland leaves to Irishmen in their native land scarcely one single right freemen value. This infamous law sweeps away all that should be called law, and makes the will of petty tools of despotism the law of the land. Byron in angry sorrow mourned over Athens governed by a slave of an eunuch of the harem of Constantinople. The fate of poor Ireland may well excite equal sorrow and anger in every generous breast. When Sheridan and Burke thundered in Westminster against the tyranny of Warren Hastings in India they had nothing worse to tell of the acts of that oppressor than are now practiced daily in Ireland by the tools of the Queen of England. The common sense and justice of the great body of the English people themselves condemn this vile law. Late elections in England prove that the people there are ashamed of the bigotry, not to say barbarism, of the present ministry, and will gladly get rid of them at the first opportunity. Such monstrous laws as the Crimes Act defeat themselves; though many a man must suffer and many a heart must ache before public indignation is aroused to have them swept away.

So far from thinking the California boom has reached its highest culmination it is evident that capitalists think it has only begun. All the great railway companies who have pushed their lines as far west as the Rocky mountains are either building or planning continuations of their roads to the Pacific Coast. The flood of immigration is steadily increasing; every one who comes and desires to stay can find a home or suitable employment, and the volume of business increases so rapidly that as fast as new roads are built there is business for them. The vast improvements already effected in this State are only indications of what will yet be done.

Keeler Correspondence.

KEELER, Aug. 9, 1887.

EDS. INDEPENDENT:—Some time past the inhabitants of this flourishing burgh have been on the tiptoe of expectation in regard to the probable success or failure of a sailboat which was in process of construction. The boat which caused all of this excitement is of the catamaran order and is sloop rigged. On Sunday last the finishing touches were put on the "Lady of the Lake," and a large number of people gathered at the wharf to witness the launching, which was successfully accomplished. A large company immediately boarded her, and under the influence of a gentle southern breeze the "Lady" glided along her chosen element like a thing of life. Just here the genial John Barnes fished a small refrigerator from some unseen place, and toasts were proposed and drank to the projectors of the boat and to her future use in contributing to the pleasure of the Keelerites and their friends. At 7:30 a select party embarked and spent a pleasant evening with music and song. Among those present were Mr. and Mrs. John Barnes, Mr. and Mrs. John Marshall, Mr. and Mrs. Ernest Hall, the Buelna sisters, Messrs. C. B. Snow, N. G. Fairman, A. G. McGovern, E. B. Rowell, August Stultz, W. H. Walker, John Fichman, D. C. Grunow and others. The success attendant upon the building and subsequent performance of our "Lady" reflects great credit upon her builder, the genial and whole-souled C. B. Snow, and last but not least, our worthy Boniface, John Barnes, whose energy in any undertaking is a by-word in Keeler. Ch.

New Railroad.

A new railroad is projected across the Sierra. A number of San Francisco capitalists have the matter in hand. The road would run from Oakland to Sonora, Tuolumne county. The *Call* says: "Their next move will be to Columbia and thence along the south fork of the Stanislaus River into the very heart of the Sierras, through which exit will be found by way of the Sonora Pass, one of the few outlets through the Sierra Nevadas. The immediate destination of the road is Bodie, in Mono county, near Mono Lake. From there it will be constructed through Nevada, crossing the Carson and Colorado at Candelaria, thence across the Snake Mountains by a pass found there to an ultimate connection either with the Utah Central at Frisco on the Denver and Rio Grande at a point southwest of Salt Lake City. So many false rumors of projected railroads have been afloat of late that there is a good deal of skepticism regarding all such statements. In this instance, however, the announcement is made on the best authority and there is no doubt either of the intention of the company or their financial ability to construct a transcontinental road." The building of this line would give a new outlet from Owens valley to San Francisco.

NOTICE.

AGRICULTURAL DISTRICT NUMBER 18.

Notice is hereby given that all parties are invited to send for exhibition at the Fair of Agricultural District No. 18, of California, all kinds of manufactured articles of American production; all products of the soil; mineral products; objects of a curious nature, or such as are of interest to science; collections of native insects; fossils, rare books, or other printed matter or manuscripts. The Directors desire to make an interesting display and will welcome everything that will be likely to instruct or entertain the public. Full guarantee will be given for the safe return to the consignor of any article sent for exhibition at the Fair, which will begin at Independence October 4th and continue through the week. Anything consigned for exhibition should reach Independence not later than Saturday, October 1st and should be addressed to the Secretary.

C. MULHOLLAND,
Secretary Agricultural Dist. No. 18.

TAKE
SIMMONS
LIVER REGULATOR

For all Diseases of the
Liver, Kidneys, Stomach and Spleen.

This **purely vegetable** preparation, now so celebrated as a **Family Medicine**, originated in the South in **1828**. It acts **gently** on the **Bowels** and **Kidneys** and **corrects** the action of the Liver, and is, therefore, the **best preparatory medicine**, whatever the sickness may prove to be. In all common diseases it will, **unassisted** by any other medicine, **effect a speedy cure.**

The **Regulator** is safe to administer in any condition of the system, and **under no circumstances can it do harm.** It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance, will **promote digestion, dissipate headache, and generally tone up the system.** The dose is small, not unpleasant, and its virtues undoubted.

No loss of time, no interruption or stoppage of business while taking the Regulator.

Children complaining of **Colic, Headache,** or **Sick Stomach,** a teaspoonful or more will give relief.

If taken occasionally by patients exposed to MALARIA, will expel the poison and protect them from attack.

A PHYSICIAN'S OPINION.

I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system. L. M. HINTON, M. D., Washington, Ark.

SEE THAT YOU GET THE GENUINE.
PREPARED BY
J. H. Zeilin & Co., Philadelphia, Pa.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, SHOUSAND, MO., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 140 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and saves as much money as it does and cost no more, I could sell one at every house. If they had to take the feathers from under their wife and husband to pay for it."

JOHN R. DODGE, JR., jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. Yes, it is the best machine ever invented by man. Yes, we have just as good dinners on Monday as on any other day. Yes, if you run short, you can not buy ours for $100."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

J. WORTH, 1710 Franklin Ave., St. Louis, Mo.

FOR SALE.

A ranch of 320 acres, within three miles of Independence, the County Seat; nearly all enclosed by a three-strand barbed wire fence, and subdivided; a small dwelling house and a number of outbuildings; 10 acres set out to fruit trees, a portion of which are bearing, consisting of choice varieties of Apples, Pears, Apricots, Plums, Prunes, Nectarines, Cherries and Quinces, also, about two-thirds of an acre of bearing grape vines. Nursery stock enough on hand to set out from 10 to 15 acres of orchard. Received six first premiums on Apples, Pears, Plums, Prunes and Grapes, exhibited at the Eastern Slope Agricultural Fair, held in Sept., 1886. For price and terms apply to

J. W. SYMMES,
On the Ranch.

Independence, May 7, 1887.

BISHOP CREEK ACADEMY.

BEGINNING OF SPRING TERM.

The Spring term of the Academy, at Bishop Creek, will begin on Monday, March 28th, 1887.

Full Literary and Classical Academic Courses

Have been arranged, in accordance with which classes will be formed. Classes will also be formed in STUDIES PREPARATORY to those of the Academic Course.

Two prizes will be given during the year for excellence in declamation, also a prize for the highest rank in scholarship.

The Fowler Literary Society,

Formed during the last term, will offer to students of the Academy excellent advantages for literary culture, in addition to the regular work of the school.

TERMS:

The expense of tuition for the term will be $12. This is lower than for institutions of a similar character in other parts of the State. Instructions in music and book-keeping will be extra.

Board and rooms will be furnished to students from abroad. Particulars can be obtained by addressing the Principal.

For any further information address the Principal.

Calendar for the Term.

Spring Term begins March 28.

Exercises of the closing week June 19 to 23.

Sunday, June 19—Special sermons to students.

Tuesday evening, June 21—Declamation contest for prizes.

Wednesday, June 22, 2:30 P. M.—Annual meeting of the Board of Trustees.

Wednesday evening, June 22—Lecture before the Fowler Literary Society.

Thursday, June 23, 10 A. M.—Closing exercises of Academy.

Thursday evening, June 23—Reception of Principal to students and friends of the Academy.

Railroad Time Table.

INDEPENDENCE, CAL.

SATURDAY, AUGUST 13 .....1887.

Charley says there is nothing like driving a pacer in a cart.

A meeting of Fair Directors was held Wednesday evening.

Water melons are coming into market. Now for melon-colic puns.

Mr. O. I. Mairs got back from Los Angeles on Monday last.

James A. McKenzie, of Darwin, has gone on a trip to Los Angeles.

Mr. Thomas Williams, of Round Valley, was in town a day or two this week.

Johnny Reddy, of Darwin, has gone to attend a business college at San Francisco.

Mr. C. Hampton is engaged to teach the Irving District school, at West Bishop Creek.

Cartier and Stecker are at work on the new building for John Hughes at Lone Pine.

Mr. J. S. Gorman has gone to Keeler to take charge of the business of T. C. Boland during the latter's absence.

Michael Harley dropped dead a week ago in the Con. California, at Virginia City. Heart disease was the cause.

Mr. W. H. Russell arrived at Independence on Thursday from Benton. He will stay here a few days looking after the San Carlos mine.

Daley, Mitchell and Jack Lavalle are taking out rich gold ore from the Hope mine, at Chrysopolis. If it holds out they have a good thing.

Mr. Gustave Lepper, of Carson, arrived at Independence last Monday. He has made a land location on the lower end of the Eastside canal.

The Board of Education will meet at Independence next Tuesday to examine applicants for teacher's certificates. See the notice given by Sup't Shannon.

The first of a fleet of pleasure boats for sailing on Owens Lake was launched last Sunday. This supplies "a long felt want." Commodore Barnes will now be the proper address.

The Supervisors reconsidered their action in the appointment of Mr. J. S. Gorman as a director for the Irrigation District and have ordered a special election to fill the vacancy.

Mrs. Prairie and Miss Mary Cartier arrived at Independence from Canada last Monday. The former is a sister and the latter a niece of H. P. and Philip Cartier, of Independence.

Rapid progress is made in digging the trench for the pipe for the town water works. A lot of the pipe is already on the ground and the rest will be delivered faster than it can be laid.

From nineteen acres of land at Camp Independence Mr. C. A. Walter has just gathered and threshed twenty-three tons of grain. The tract was sown about equal parts in wheat and oats.

The anniversary of the Mexican Independence will be duly celebrated at Lone Pine on September 16th. A programme for the day is in preparation and will be published in due time.

A tract of land near Visalia containing thirty-six acres was recently sold for $12,000, or $333⅓ per acre. A very few years ago the whole tract could have been purchased for the price of one acre now.

Fremmore Coffin, Esq., of Carson, arrived at Independence last Monday. Mr. Coffin is heavily interested in the Eastside settlement and will push along the canal as rapidly as work can be done.

Mr. C. Kepler and wife have come to Independence to live. Mr. Kepler is aged over eighty years and is ailing; his wife is almost as old as himself. They have been living at Bishop for some years past.

Mr. Findley McIvor has just bought from Mr. Sanger four fine horses to be added to the force now at work on the Eastside canal. Men and horses will be added to the force as rapidly as machinery can be got ready.

A small bunch of keys were lost at or near town a few days ago. There is a brass tag attached bearing the name of C. Mulholland. The finder will confer a favor by leaving same at post office or any of the stores.

Keefe, Rowell and Nixon recently shipped a lot of ore from Saline valley that returned $150 per ton. The richest lot in the shipment went $240 per ton. The mine belongs to Mr. W. Grant and was leased by the miners.

Charles E. McDougall, formerly of Virginia City, was killed recently in Denver. About nine o'clock at night he was walking along the street, being tipsy at the time; an unknown man streck him and he fell, his neck being broken.

Mr. Patrick Clinton who had been at Independence several weeks has gone to Darwin. He will look around with a view to become interested in mining. Before leaving Independence he invested some money in town water works stock.

Mr. and Mrs. W. S. Enos and Mr. John McSweeney have gone for a vacation to the Long valley country. They intend to be gone about three weeks. The lady's health has been very poor for some time and it is to be hoped that the trip will benefit her.

There is strong talk of a new railroad from Oakland across the San Joaquin valley to Sonora, Tuolumne county. Thence across the Sierras to Mono lake and on east, crossing the C. & C. road near Candelaria and going on to join an Eastern road in Colorado.

Mr. W. S. Morton, of Black Rock, has a colt aged two years on the 29th day of May last. The animal now stands sixteen hands high and weighs 1,300 pounds. Mr. Morton says he has been offerred and refused $500 for the colt. The sire is a full blooded Norman belonging to William Rowan, of Bishop Creek, and the dam is Planter stock.

Among the fine horses recently brought into Owens valley is a colt belonging to Mr. Gustave Sanger, at Alvord. The animal is a full blooded Hamiltonian, four-years-old; stands seventeen hands nigh and weighs 1,600 pounds; in color he is a bright bay. This fine animal is without flaw or blemish; he is in every way a noble specimen of a horse. Mr. Sanger has a large number of fine horses of various breeds.

The Sanger Ranch.

The grain crop on the Sanger ranch, at Alvord is now gathered. No finer wheat or barley is grown in the State. This grain was sown in May and everybody but Mr. Sanger predicted that it would be a failure. The ground was covered with sage brush at the beginning of the year. The alfalfa is coming up rapidly since the grain was cut. A few acres of alfalfa now in its second year is kept for seed. Mr. Sanger is confident that it will yield 1,000 pounds of first-class seed per acre. Men who have settled on the heavy timber lands of Ohio and Indiana will appreciate the character of land where a man can clear 300 acres, plow, seed and harvest a fine crop in a single year. The method adopted by Mr. Sanger for clearing sage brush land is as follows: Two pieces of railroad rail, each sixteen feet long, are bolted together, the flange of one piece lapping the head of the other piece. An eye-bolt is in each end, to which a team of horses are hitched, making a team of four. This simple machine is dragged over the ground, the horses going at a brisk walk. One trip is made each way, in opposite directions and this is usually enough to clear the heaviest growth of brush. The taller the brush grows the better it clears. The return trip over the ground gathers the brush up in bunches ready for burning. One four horse team can clear about fifteen acres in a day. The drag also smoothes the ground. This iron rail implement is practicably indestructible. Mr. Sanger has now started in to clear more land ready for seeding this fall. The main ditch is eight miles long and twelve feet wide on the bottom; it will easily carry water to irrigate 3,000 acres of land and this is all Mr. Sanger cares to handle. In all his work of making ditches, clearing land and preparing it for seed Mr. Sanger has found the simplest machines the best.

Inyo Marble Wanted in Texas.

The following letter was received a few days ago:

MOUNT MORO, TEXAS, Aug. 1, 1887.

INYO INDEPENDENT:—I see by an extract from your paper an account of the marble found in Inyo county. I would like to get a sample of each kind you mention, especially yellow and moss-agate. I do not know any one in the county to whom I could apply for the same, so thought I would trust to your consideration and venture to ask a favor of a stranger.

Yours &c.,
E. B. PRESCOT.

It is always a labor of love to spread the fame of Inyo county, and by the co-operation of the Superintendent of the quarry, Mr Luce, we will try to accommodate this Texas gentleman.

The Reno Fair.

Two years ago the Editor of this paper made an exhibition of Owens valley productions at the Nevada State Fair. That exhibition was a very valuable advertisement for Inyo county, and it is now bearing good fruit in the way of settlements and improvements. The President of the Nevada State Fair, the Secretary and several of the Directors have written to us urging in the strongest terms that an exhibit be made this year. Mr. Stoddard, the Secretary, says: "The Society has, by a unanimous vote, extended a special invitation to the people of Inyo and Mono counties, to attend and exhibit this year." We certainly ought to respond to this invitation and make an exhibit. A display at Reno would be of more real value to the county than would a display at Sacramento.

Meteorological Summary for June, 1887

Keeler, Cal.

Mean actual barometer	26 169 inches.
Mean temperature	74°
Highest temperature on 22 h	99°
Lowest temperature 14th	44°
Monthly range of temperature	55°
Mean relative humidity 31 per cent.	
Mean Cloudiness 17 per cent.	
Prevailing direction of wind, West.	
Maximum velocity of wind, direction and date, 44 miles N. W. 13 h.	
Precipitation	0.04
Number of clear days	21
Number of fair days	9
Number of cloudy days	0
Number of rainy days	0

Observer, Sig. Corps, U. S. A.

The Fair.

The Fair Directors met at Independence last Wednesday. The date fixed for holding the Fair was from October 4th to 8th inclusive. A premium list is in preparation and will be published as soon as possible. The aim of the Directors will be to offer such liberal premiums for all animals exhibited at the Fair that owners will be induced to come long distances. This will also apply to farm produce of all kinds, and to manufactured articles, and to displays of mineral products. The Directors will give a proper guarantee for the safe return to the owners of all articles consigned to the Secretary of the Association for exhibition at the Fair. This not to apply to any animal but only to what may be exhibited at the pavilion.

Child Hurt.

Last Saturday the nine-years-old daughter of Mr. and Mrs. J. W. Symmes sustained a severe hurt. The child was standing on a scaffold at the home of her parents, near Independence; she lost her balance and fell backward to the ground, a distance of over twelve feet. Dr. Woodin was called and did all in his power for the child. No bones were broken but the shock and bruises were so severe that she may not recover for many a day.

A Treat for Bishop Creek

Last Tuesday Mr. John Baxter took a large load of peaches from his orchard at Independence to Bishop Creek. Mr. Baxter has a heavy crop of very fine peaches. Strangers who come here say they do not find such fine fruit in other parts of the State as they do at Independence.

G. A. R.

A meeting of Veterans will be held at Independence on Saturday, August 20th—one week from to-day—for the purpose of organizing a Post of the G. A. R. All Union Veteran soldiers and sailors are invited to attend.

The curse of opium smoking is steadily spreading into every corner of the State. Independence has one or two white victims who seek the dirty Chinese bunk to stupify themselves with the drug. The law for the punishment of smokers and the keepers of dens is a dead letter; the violation of the law is open and notorious but no one cares to take the trouble to make complaint and have the parties arrested and so the evil is permitted to spread. While the Chinese are among us there will be whites to learn and practice their vices.

Bids have been received for the bonds for Independence school district. Premiums have been offered for the bonds: but no bid has yet been accepted, as the Trustees believe higher premium can be got than any yet offered.

HALE BROS. & CO'S. ADVERTISEMENT.

Moving Rapidly Forward.

No single Department of our House has shown such remarkable gair as that of our Country Order. We are highly gratifiee with this result and will use all the means at our command to still further merit the reward of your confidence.

If perchance, you have any grievance or complaint make a plain statement and address Your letter to our Mr. E. W. Hale. The matter will receive prompt attention and satisfactory adjustment, for it is ever our aim to deal justly by all.

Ordering by mail is a specialty with our house and we think we can serve you Better, Quicker and more Satisfactorily *and at the same time give you more value for your money than any firm on the Coast.*

Will it not be to your interest to trade here?

HALE BROS. & CO.

Sacramento, Cal.

829, 831, 833, 835 K St. and 1026 Ninth

The Reno *Gazette* says the Carson and Colorado and Virginia and Truckee railroads will transport all animals exhibited at the Nevada State Fair at Reno free of charge. Freight being paid on them to the fair will be returned upon reshipment by the same owner and exhibition of certificate of Secretary that same has been exhibited.

The Aaron Hood case was called for trial on Tuesday. The venire was exhausted when eleven Jurors had been secured. A special venire was ordered and the first man called was accepted. The same witnesses were examined and the same testimoney given as on the first trial. On Thursday evening Mr. Laird finished his argument in favor of the defendant. Friday morning the District Attorney presented to the Jury the case for the People, instructions were read and the case given to the Jury at noon.

Hon. P. Reddy went north last Tuesday on his way to San Francisco. He is returned on several important law suits that will prevent his return to Darwin sooner than toward the end of October. Mr. Reddy reports the Defiance mine to be in fine condition. The ore body is now well opened up and its full extent is not yet ascertained. At least two hundred and fifty feet of backs are now opened and ore is taken out as fast as teams can be got to haul it away.

The two trials of Hicky Hood will cost the county not less than eighteen hundred dollars. A disinterested looker on at the first trial could not avoid the conclusion that there was no good reason why twelve men of ordinary common sense should not find a verdict. Trial by jury serves mainly to defeat the ends of justice; but there is only one Court where a strictly just trial is certain without it, and no one is anxious to appear in that Court, as it is not of this world.

The assessment roll has been footed up and as compared with last year shows an increase of $147,688. With the general improvement in the valley just begun this increase in value is gratifying. Now it is certain that the rate of taxation may be materially reduced. Works in progress and others that will soon be undertaken, together with increased population certain to come before another assessment of the county can be made, will show a much larger increase in the assessment roll next year.

Before adjournment last week the Board of Supervisors of Inyo county reconsidered their action in the appointment of a Director for Division No. 2 of the Irrigation District. It was held that under the general election laws of the State the Board had no power to appoint when there was a tie vote; and for this reason ordered a special election to fill the vacancy. The election will be held August 20th and in order to make certain that a tie will not be repeated it would be best for the voters of that division to hold a caucus and choose but one candidate.

Here is an instance of public spirit: Mr. Wolfskill, of Los Angeles, has donated thirteen acres of land in that city for a new depot to the Southern Pacific R. R. The gift is valued at $200,000. Constant mention is made of the liberality of the railroad companies whose roads reach Los Angeles. No one need doubt but that it is the liberality of the people that begets liberality on the part of the companies. There is a great deal of human nature about a railroad manager; and "with whatsoever measure you mete, it shall be meted to you again."

Ranch for Sale.

At Black Rock, twelve miles north from Independence, 520 acres of land for sale. Black Rock is one of the very best parts of Owens Valley. Four hundred acres of this land is held under U. S. patent; the remainder is located under the timber culture Act. One hundred and eighty acres are enclosed by a fence of cedar posts and barb wire. Sixty acres are now under cultivation, mostly wheat, oats and barley. A large amount of hay can be cut; blue joint, red clover etc. Several large springs of pure water on the place and good water rights additional. House, outbuildings and corrals. C. & C. railroad half mile distant from east line of land. Owens river eighty rods distant. This is a fine place for an energetic man to improve and will be sold at a bargain. Apply to

C. MULHOLLAND,

The District Fair will give a good opportunity to all who are interested in the lands and products of Owens valley. Parties leaving Reno on Sunday morning after the close of the Nevada State Fair will arrive at Independence in time for the opening of the Fair here. A better knowledge of what Owens valley will produce can be got in one day at the Fair than can be had by two weeks travel over the valley.

BOARD OF EDUCATION.

A regular meeting of the Inyo County Board of Education will be held in Independence commencing on Tuesday the 16th inst., at 10 o'clock a. m. Examination to commence on Wednesday at 9 o'clock a. m. Candidates are required to send in the application at least one day prior to the commencement of the examination.

J. H. SHANNON,
County Sup't.

161 acres well improved with good dwelling and out-houses, farming machinery, horses, cattle, etc. Located in the most desirable portion of the valley. Good water title. For further particulars inquire of

C. A. LEVY, Bishop Creek.
P. W. Forbes, Independence.

NOTICE OF SPECIAL ELECTION.

Office of Board of Supervisors, Inyo county State of California.

WHEREAS, At a special election held in Division No. 2, of Irrigation District No. 1, of Inyo county, on July 2, 1887, it appears from the returns of said election that the vote cast for Director of said Division resulted in a tie vote between S. A. Densmore and J. S. Gorman and no Director was elected therein.

Now, therefore, notice is hereby given that an election will be held in such Division on Saturday, August 20, 1887, for the purpose of electing one Director for said Division.

For the purpose of holding and conducting such election the following voting place and the following officers are hereby appointed, to wit: At the residence of S. A. Densmore. Inspector S. A. Densmore; Judges, L. A. Anger and B. Aguirre. Polls will be open from one hour after sunrise till sunset. J. D. HARGER

Attest: P. H. MACK, Clerk. Chairman.

Dated August 5, 1887.

YOU can live at home and make more money at work for us, than at anything else in this world. Capital not needed; you are started free. Both sexes; all ages. Any one can do the work. Large earnings sure from the first start. Costly outfit and terms free. Better not delay. Costs you nothing to send us your address and find out if you are wise you will do so at once. H. HALLETT & Co., Portland, Maine.

Working Classes ATTENTION!
We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

BEES & HONEY

I am making a specialty of comb honey in one pound sections and will be in town once a week to supply my customers.
Extracted honey in cans for sale as usual, at the stores. Honey and comb foundation always kept in stock at the apiary, at Oak Creek above Camp Independence.
W. M. MUTH-RASMUSSEN.
Bee Keeper.

Old People Playing Quits.

There is an old couple living in this vicinity, each one past sixty years of age, who have! for some reason best known to themselves, agreed to play quits. His business is such that, although a wealthy man and doing business in this city, he only goes home once each week, on Saturday evenings, and remains until Monday. When she expects the arrival of her unloved lord, the old lady hies herself to another house on the same premises, first providing the transient visitor with an abundance of food within reach and a change of raiment. Last Christmas the old lady stated to a friend that as the old gent liked rum she would make him a present of a bottle of choice, which she accordingly did, leaving it upon the table where he would find it. On Monday morning, as soon as her liege departs, the lady takes possession for another week, living entirely alone. The cause of this strange conduct is known only to themselves.—*St. Louis Globe-Democrat.*

Liability of Railroads.

A new ground for suit against a railway company has just been established in France. A painter named Board, while traveling on the Paris-Lyons road, was attacked by a robber and seriously wounded. He sued and got damages, the company being held responsible because the construction of the cars did not afford sufficient protection. The judges decided that there was a genuine contract between the passenger and the company, the ticket constituting the written instrument, and that the railroad people were bound by it, not only to bring the man to his destination, but also to afford him protection during his journey; and they refused to entertain the question that the company were as obliged to conform to the rules of the administration in regard to the model of the cars.—*N. Y. Sun.*

BAKING POWDER VS. CREAM OF TARTAR.

It will not help the matter any, if, to avoid the impurities and poisons in the cheap baking powders, the housekeeper returns to the use of cream of tartar and soda. The cream of tartar of the present day as found on sale at the grocers, is quite as impure as many of the baking powders. Tests made by the Massachusetts and New York State Boards of Health have developed the most astonishing venality on the part of cream of tartar manufacturers and venders. Twenty-seven samples, claimed by dealers to be pure, were analyzed. They were found to contain from three to ninety-three per cent. of alum, lime, etc. Samples of soda analyzed showed the same extent of adulteration. Not only is it unsafe to use such leavening agents in bread, biscuit or cake, because of their deadly effects upon the system, but they cannot be relied upon to produce light food. The result of their use will be heavy bread, yellow or bitter biscuit and cake.

Most of the baking powders and bread preparations of the market are made from the very cream of tartar above described, or from alum, which is poison, or from phosphates derived by disgusting processes from the solution of old bones in sulphuric acid, so that their use and the use of the adulterated and impure cream of tartar are attended with the same dangerous or unsatisfactory results.

The only way to overcome all difficulties attendant upon the use of a leavening agent would seem to be in the selection of a baking powder or a thoroughly well established reputation, whose absolute purity, wholesomeness and effective power as a leavening agent have been confirmed beyond contravention. The Royal Baking Powder unquestionably meets the mark. Indeed, it has been found to be the only baking powder upon the market that is free from lime, alum and phosphates, and chemically pure. Prof. Mott has explained the reason for this absolute purity. It exists in the new methods of refining cream of tartar, owned and employed exclusively by the Royal Baking Powder Company, by which only can the chemically pure article be produced. A portion of Prof. Mott's report is worthy of reproduction in this connection:

"The Royal Baking Powder is absolutely pure for I have so found it in many tests made both for them and the U. S. Government. I will go still further and state that because of the facilities that Company have for obtaining perfectly pure cream of tartar, and for other reasons depending upon the proper proportions of the same, and the method of its preparation, the Royal Baking Powder is undoubtedly the purest and most reliable baking bowder offered to the public.

HENRY A. MOTT, Ph. D., etc."

Get Along with Economy.

"You know, of course," said the old man to the young man, "that my daughter has $100,000 in her own right?"

"Yes, sir."

"And you are not worth a cent."

"I'm poor, sir, but, great Scott, $100,000 is enough for two! Why, I'm economical to meanness."—New York Sun.

Feminine Diplomacy.

"I can't understand, my dear, why it is that you, who have such an excellent man for a husband, should quarrel with him so often."

"Don't you? Well, it is because he always brings me home a present at night to make up. See?"—French Fun.

An Object Lesson at the Park.

Mr. Hogan—Save me, Eileen; thim's the same kaind ov rats Oi seen the mornin' afther Kelly's christenin'!

Mrs. Hogan—John, it's me t'inks the howly mother'll absholute yez from the furnichure yez broke."—Judge.

Got Away Safe.

Bunko Steerer—Isn't this Mr. Smith, of Smithville?

Stranger—No; I'm Mr. Keely, of Philadelphia.

Bunko steerer moves off in great haste.—New York Sun.

He, She and It.

She (parrot in one hand, dog in the other)—Yes, Edward, we've got everything, I believe—but, where's the baby?

He—Why, I gave it to you.

She—I know; and I gave it back to you.

He—Well, by thunder! if I haven't gone and left it in the parlor car.—Exchange.

HEALTHFUL SLEEP.

How to Overcome the Evils of Excessive Labor and Anxiety.

Sleep, like many other functions, is merely a matter of circulation and of diminished supply of blood to the brain. When we go to bed with our brains still active, and worry over the day's work and excite ourselves over the day's pleasure, we do not go to sleep, and shall not until by some means we have driven or drawn the blood from the brain to some other part of the body.

The worst possible thing is to keep the head hot by wrapping it up or using very soft pillows. A hair pillow is often better than a pillow of feathers. A warm foot bath or hip bath is a common expedient, and the yet simpler one of plunging the hands and wrists into hot water is often efficacious; a towel or handkerchief wrung out of eau de Cologne and water every one has tried; and an ice bag to the head is the same idea more thoroughly carried out.

Robust persons, whose circulation is quick, recommend a cold water or cold air bath, on the principle that the blood driven from the skin by the shock will come back presently with redoubled vigor. A hot bottle or hot brick is a safer and pleasanter remedy for weak people and for children, who, when they worry about their lessons after they go to bed, generally have a burning head and ice cold feet.

The surest way to get a bad night is to eat an indigestible supper; but, on the other hand, a small quantity of light food taken just before bed time often promotes sleep, especially in those who have been exercising their brain since the last meal. A cup of hot milk or cocoa, or, better still, a cup of beef tea or beef extract, sends many a person to sleep who without it would have lain tossing for hours.

Hot lemonade answers the purpose in many cases, and is besides a food that is often wanted. Little children who have tea early often sleep better after a bit of bread and butter or a biscuit and a drink of milk; and, sometimes, if they wake up and lie awake for an hour or so, they sleep again quickly if they are fed. Many bad sleepers might pursue the same plan with advantage. The remedy depends on the very simple fact that nothing can be in two places at once, and that if the blood is called to the stomach for aid in digestion it can not remain in the head to be wasted in worrying.—*N. Y. Herald.*

PARISIAN NOVELTIES.

New Ways of Making Charming Tea-Gowns and Stylish Bodices.

Some of the newest Parisian teagowns for elegant summer wear are made of India silk muslin, figured in gay but small Watteau designs, flower-striped crepe lisse, silk canvas goods, and also of fine, softly-draping surah in solid shades of primrose, heliotrope, sea-green, pearl-gray, cafe-au-lait and hedge-rose pink. These are fashioned in princesse style—that is to say, a glove-fitting gown, with skirt and bodice cut in one. These dresses open all the way down the front, and tacked to each side is a graceful crape or lace boa, which reaches in many cases from throat to skirt hem. A twisted crepe lisse rope also serves the same purpose. An airy finish of this kind was noted upon a tea-gown of peach blow surah, embroidered in delicately shaded peach blossoms. The front parted over a simulated petticoat and blouse of white surah sprinkled with moss-rose buds, and down each side ran a dainty coil of cream-white crepe lisse, with the same cloud-like twist around the throat and elbow sleeves, the latter having an additional garniture of double frills of cream-colored Spanish blonde lace as a finish.

A new art is followed in many of the French bodices, which consists in omitting the usual darts on the fronts. This manner of cutting the corsage is successful only in the use of certain elastic fabrics, being specially advantageous in making up stripes or checks, which often prove such failures at the seams even when subjected to the most careful manipulation. The under arm seams are set slightly forward, and somewhat bias, and the edges of the fronts are curved in and out to fit the figure. This style of corsage is not at all becoming to forms overly stout, but is highly advantageous to slender women, as it imparts a certain roundness to the form, which the usual dark lines destroy. The corset-bodice is a boon to stout figures, as it gives additional length to the waist, produces a slender effect by its many seams, and is boned on each one of them, even to the double side seams in the back. This bodice is cut extremely high under the arms, and in some cases measures but four inches on the shoulder seam.—*N. Y. Post.*

Clipping, Filing, Sweating Coin.

"Milling" the edge of our gold and silver coins, termed also "graining" and "crenating," first employed in 1646, to prevent their being injured by wear, and more especially by being clipped by rogues, is a hint taken from the ancient Syrians and Romans, who treated their coins similarly and for like reasons, by cutting out regular notches round the border, so as to show the inside of the metal. But the old forgers were not to be so easily beaten, and made corresponding incisions in their copper imitations, plating them over with silver. Clipping, filing and sweating coins—that is, immersing them in some strong acid that will eat away the surface, thus causing them to lose their weight, and consequently their value—are among the clumsier dodges; while the plan of covering pieces of iron, lead, copper, or other metal, cut to the size and shape of the coin to be imitated, with a thin plate of gold or silver neatly stamped and soldered at the edges, which can only be detected by weight and sound, calls for a greater degree of skill and manipulation.—Chambers' Journal.

Toilets of the Princesses.

A correspondent at Ems, where the German crown prince has been using the waters lately, writes: "The toilets of the crown princess and the three princesses are of astounding simplicity, and many ladies of the higher circles would not dare to allow their daughters to appear in equally plain, though tasteful, dresses on the promenade. A pity that so few imitate the good example."—Kansas City Times.

THE RECORDS OF SUICIDE.

Queer Reasons for Self Murder—Individual Cases of Particular Interest.

If we look at some of the individual cases we shall find a very interesting record. I remember a case in Chicago in which a man shot himself because Cleveland was elected president, and another in which a girl was made so miserable by getting a scolding from her mother that she took Paris green. Out in the country a few miles from here an Illinois boy took poison in a sleeping car because he had been expelled from college. Another Chicago boy, who had lost an eye by the explosion of a toy cannon, immediately shot himself. A Pennsylvania mother drowned herself and her two children because the world is wicked. An Ohio German hung himself on his 28th birthday, thereby carrying out an intention that he had long expressed.

A crazy Kentucky German, who was afflicted with the hallucination that he could live under water, drowned himself because he wanted to forsake the world and live with the fishes. A sensitive New York hotel keeper drowned himself in the afternoon because his wife scolded him in the morning. A Pittsburg woman committed suicide because her mother had done so six weeks before. An Arkansas man preferred death to matrimony, and swallowed poison. A wealthy Ohio farmer imagined that he was beset by thieves, and shot himself. A Pennsylvania girl shot herself on hearing that her lover had given a ring to another girl. A Maryland postmaster lost a registered letter, and being at the same time accused of offensive partisanship, was overcome with a fear of removal from office and hung himself to the dashboard of a buggy. A New York farmer whose crops had been destroyed by the Hessian fly took his life by drinking poison.

A Pennsylvania boy, 10 years old, hung himself because his father refused him money with which to buy wheels for a toy wagon. A New York man killed himself to do good to the rest of mankind. A Pennsylvania woman hung herself after reading of the similar act of another lady. A California farmer lost his right hand in a threshing machine and swallowed poison. A grief stricken German hung himself to a tree over his wife's grave. A North Carolina young man accidentally stepped into a sleeping apartment occupied by young ladies, and was so overcome with chagrin and modesty that he immediately committed suicide. A West Virginia young lady, whose parents refused to permit her to become a Mormon, took a fatal dose of poison. A Montana Chinaman hung himself because he suffered from rheumatism. A New York man shot himself because he had no money to put in the contribution box at church.—Chicago Herald.

The Saving of the Louvre.

I withdrew to the Louvre, where I established my headquarters. The Commune had been charged with having tried to burn the Louvre. I affirm that this is a falsehood. Here is the truth: My men, overexcited by the disproportionate fight they had gone through during three days in the Tuileries, wanted to burn also the old haunt of royalty. From 11 o'clock at night till 1 in the morning there was an indescribable struggle between them—they anxious to destroy and myself bound to prevent it. Furious beyond all measure, these men, who had so heroically shared my perils and who would have died for their chief, now called me a traitor and threatened me with their guns. Finally I jumped upon an artillery locker, abandoned in the cour of the Louvre, and, though worn out by fatigue, but reconforted by a sentiment of which I am proud, I succeeded in having the National guards listen to me. I told them that the Louvre had been, indeed, during long centuries, the sojourn of kings, that its walls were permeated with monarchical crimes, and that each of its stones represented the gold and blood of the people. But I added that the Louvre, transformed into an artistic sanctuary, had morally purified itself and that it was sacred for ever. The Louvre had come to be the palace of artists, those great and foremost workmen in the world. Instead of destroying it, the duty of the workmen was to defend it. The National guards understood and applauded these words, and passing from their former rage to enthusiasm they almost carried me in triumph. They spontaneously placed themselves as sentinels in order to preserve the palace and the Louvre was saved.—Gen. Jules Bergeret's Letter.

A German Restaurant in New York.

There is an old German restaurant in New York which is celebrated among the Germans, but probably not one out of a hundred know of its existence. It is away over on the east side of New York in an ancient, dilapidated looking house. After climbing a short flight of broken stone steps I entered a long, spacious apartment filled with fully fifty Germans, all talking together and keeping up a lively accompaniment with the rattle of their knives and forks. Several active waiters shouted out the orders in German, and the numerous dishes on the bill of fare were all written in the same language. Not an American face could be seen in the entire gathering, and the waiter, in addressing a customer, took it for granted that the latter understood the language of the fatherland.

A German friend who was with me did the ordering and some astonishing dishes were placed before us. A very highly seasoned soup, containing a quantity of diminutive, flat, imported peas, opened the fray. Then came a mysterious fish salad flanked by an equally problematical dark brown sauce, strongly seasoned with garlic. After the fish three kinds of meat, accompanied by half a dozen different vegetables, were plumped down upon the table along with a bottle of excellent red wine. Roast turkey was then served, with a salad made of thinly sliced celery root. A dish made of imported sausage, cabbage and potatoes was one of the luxuries of the repast. The dinner came to an end with the usual black coffee and brandy. After dinner the tables were cleared, cigars lighted and those who wished to could pass the balance of the evening in drinking beer and playing cards. When I left the atmosphere was blue with smoke and the din of voices louder than ever.—Brooklyn Eagle.

Blackest of Literary Crimes.

Self admiration is the blackest of all literary crimes. You might far better always distrust yourself. Both, truly enough, are unwholesome, if not unhealthy; but the latter is by far the least deplorable. Do not read your own work, except for the purpose of revision, for at least ten years. By that time you will find out that the wisest people on earth—yourself included—are only fools; and then, reading your own books, as books, will not harm you. Then you will have discovered that you are not the axle upon which the book world turns, and, very likely, nothing else will be so distasteful to you as reading your own books.—George Sand.

A Novelist's Delicacies.

Mr. Charles Reade's favorite evening delicacies in the summer of 1877 were shrimps and novels; but his reading of other men's novels was usually disturbed by indignation at the failure of their dramatic situations.—Harper's Bazar.

THE INSECT WORLD.

Upwards of One Hundred Thousand Species Recognized by Scientists.

Were it possible to take a census of the individual insects upon the globe, the result must be an array of figures of whose meaning we could form little conception. Members of each species multiply in countless millions, yet even the number of distinct species is so great that we can hardly do more than guess at it. Entomologists generally concede that upwards of 100,000 species of insects have been recognized, and some authors place the number as high as 150,000, while it is probable that these may represent not more than a tenth of the number actually inhabiting the earth's surface. "Probably not less than one-half of the indicated forms," says Prof. Heilprin, "belong to the order Coleoptera, or beetles, which is by far the most numerously represented of all the orders. The Lepidoptera, or butterflies, have thus far yielded some 15,000 species—or about one-thirteenth of the total number (200,000) estimated by Speyer for the world at large—and an equal number may, perhaps, be credited to the Hymenoptera (bees, wasps and ants), the Hemiptera (bugs) and Diptera (flies). The Orthoptera, or straight-winged insects, which include the locusts, grasshoppers, etc., are considerably less numerous, while the species of netted forms (Neuroptera) probably number only about 2,000. The insects are most numerously developed in the tropics, but they are by no means rare in the coldest regions reached by man. Sir George Nares brought home no less than forty-five species of true insects from beyond the seventy-eighth parallel of latitude in Grinnell Land, and more than 300 in Iceland. Many of the insects of earlier geological ages are known to us as fossils from the rocks, these being found by Mr. S. H. Scudder to embrace at the present time at least 2,600 species.—*Arkansaw Traveler.*

LOST PUBLIC MEN.

What the Death of So Many Great Men Means—Are We As a Nation in Danger.

"America is losing its prominent men very fast," was the remark of a well known Englishman who is now visiting this country, and he was right. Sumner, Wilson, Phillips, Washburn, Carpenter, and a host of others have departed, and John A. Logan has just passed away. But has it never occurred to the reader that the cause of the deaths of these public men was in every case the same? And has it occurred to you that Manning, Butler, Blaine, and a host of others are treading the same road? The great American scourge, today, is kidney disease, and it is by no means confined to public men. Thousands of men whom we see every day have inherited it from their parents and do not know it. Innumerable women who are delicate are afflicted with it at this moment, and think it is simply "weakness." Little children whose kidneys have been injured by scarlet fever are suffering from it, usually unknown to their parents. Its symptoms are a tired feeling and a desire to sleep; a pale complexion; uncertain appetite; faintness at the pit of the stomach; shifting pains, sometimes in the back, sometimes in the limbs, and again in the head; plentiful or scanty urine, with the scum on top or a sediment and brickdust in the bottom; a burning sensation in passing and skin hot at times and clammy at others. Any one of these things indicate disordered kidneys, which are the first stage of Bright's disease. They must be checked.

AMERICA'S LOSS.

Captain Greenwood, of the steamer Kanawha, had these troubles in an aggravated form; he used Hunt's Remedy and is in perfect health to-day.

CAPT. GREENWOOD.

Rev. Charles Pike, of Waterbury, Conn., was greatly reduced in the same manner and was "suffering severely." He used Hunt's Remedy and was cured.

Mrs. Alexander L. Nichols, of Phenix, R. I., after passing through all the suffering which any woman was cured by Hunt's Remedy.

The son of Cornelius B. Smith of the State Department at Albany, N. Y., was given up to die by no less than four physicians, but was cured by Hunt's Remedy. These instances could be prolonged indefinitely.

Two things are certain. First—Kidney troubles, which always end in Bright's disease, unless checked, are fearfully prevalent. Second—They can be cured by using the remedy above named. With these truths in view, why men and women will be so heedless and allow symptoms to run along until they end in agony or death we cannot understand. We certainly advise all to think carefully on this subject, and act without delay.

A FORTUNATE BRAKEMAN.

It was reported last week that Mr. Frank Corcoran, in the employ of the Illinois Central R. R. at the stone depot, in this city, had drawn a prize of $10,000 in The Louisiana State Lottery, and many being incredulous about it an *Argus* reporter interviewed him on the subject, with the result of finding the report strictly correct. He drew it on two-tenths of ticket No. 75,866, which took the second capital prize of $50,000 in the drawing of May 10th. Mr. Corcoran takes his good fortune as a matter of course, not being unduly elated thereby. Although a man of modest pretensions, he was well off financially before getting the prize, and, as he remarks, "a little money does not bother him." He expects to continue right along in his present position as long as the road wants him. He is, and has been for many years, brakeman on the steam trucks at the stone depot. He is a quiet man and very attentive to his duties, never being absent except when ill. He is a bachelor, about 48 years of age. Is of Irish parentage and came to Cairo from Pennsylvania in 1852. He has no relatives living here, but has two brothers and two sisters in Scranton, Pa., all in easy circumstances. By exercising prudence in expenditures and investments he had accumulated a larger property than his prize in the lottery amounts to before meeting with that piece of good luck. Such a prize would completely turn the head of many a man, but it does not disturb Mr. Corcoran's ordinary course of life in the slightest.—*Cairo* (Ills.) *Argus*, May 23.

Mrs. Cleveland caught two fish last Thursday week. She caught the biggest fish in the puddle about a year ago.

THE BEGINNING OF THE END.

The beginning of disease is a slight debility or disorder of some of the vital organs, the stomach, the liver or the bowels usually. There are dyspeptic symptoms, the liver is troublesome, the skin grows tawny and unhealthy looking, there are pains in the right side or through the right shoulder blade. The climax is often an utter prostration of the physical energies, perhaps a fatal issue. But if the difficulty is met in time with Hostetter's Stomach Bitters, which is always effective as a remedy, and it should be resorted to at an early stage, there will be no reason to apprehend those injurious subsequent effects upon the system often entailed by entirely cured diseases. Far better is it, also, to employ this safe remedial agent in fever and ague, and other malarial complaints, than quinine and other potent drugs, which, even when they do prove effectual for a time, ruin the stomach and impair the general health.

The first mass in the present limits of the United States was said on the spot recently occupied by the old Cathedral at St. Augustine, Fla., which was destroyed recently by fire.

THE "FAVORITE PRESCRIPTION."

Dr. R. V. Pierce, of Buffalo, N. Y., whose name has become known over the world through his success as a physician, and especially through the reputation of his "Golden Medical Discovery," has done a good work in preparing an especial remedy for the many distressing troubles classed as "female weaknesses." It is known as the "Favorite Prescription." Under its administration all the pelvic organs are strengthened, and the woman becomes that embodiment of health and beauty which God intended her to be.

Wife (returning from church)—"How beautiful the choir sang 'One More River to Cross?'" Husband—"Yes; that reminds me that I have an engagement in Hoboken this afternoon."

Sudden Changes of the Weather often cause Pulmonary, Bronchial, and Asthmatic troubles. "*Brown's Bronchial Troches*" will allay irritation which induces coughing, giving immediate relief. *Sold only in boxes.*

The total number of wage-workers who went on a strike during April was 31,072. In very few cases the strikes were for more wages. Wages are generally satisfactory, but other causes of complaint are numerous.

GREATEST DISCOVERY SINCE 1492.

For coughs, colds, sore throat, bronchitis, laryngitis, and consumption in its early stages, nothing equals Dr. Pierce's "Golden Medical Discovery." It is also a great blood-purifier and strength-restorer, or tonic, and for liver complaint and costive condition of the bowels it has no equal. Sold by druggists.

It will be a serious problem what to do with the crowds of people who will be in St. Louis during the President's visit to that city. Every Colonel and Major in Missouri will be there.

TESTIMONIAL FROM ASSEMBLYMAN EDWARD A. DARRAGH.

STATE OF NEW YORK, ASSEMBLY CHAMBER, ALBANY, April 16, 1884.

Some years ago I was thrown from a wagon and fractured two of my ribs. I was so badly hurt that I had to sit up in a chair for four days and nights. The fourth day my mother placed two Allcock's Porous Plasters over my broken ribs. The next day my sufferings diminished and I was able to lie down. I continued to improve every day. Two weeks after the accident I got up and attended to business. I renewed the plasters twice, and found myself almost entirely well in a month, when I sailed for England.

My wife is subject to periodic pains in the back that give her rest neither day nor night, but in two hours after applying two Allcock's Plasters she experiences relief, and in two or three days she is well. She also finds them effective in neuralgia and rheumatism.

EDWARD A. DARRAGH.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

Some one has written a poem on "Helen's Cheek." He probably used a pencil. To write a poem on the cheek of some men would necessitate the use of a glazier's diamond.

Weak lungs, spitting of blood, consumption, and kindred affections, cured without physician. Address for treatise, with two stamps, WORLD'S DISPENSARY MEDICAL ASSOCIATION, Buffalo, N. Y.

"Charlie!" she called across the car, "did you ever see a king?" "Of course," replied the young man. "And were they grand?" "Not very—not near as grand as four aces."

Best, easiest to use and cheapest. Piso's Remedy for Catarrh. By druggists. 50c.

Try Germea for Breakfast.

BEAUTY of Skin & Scalp RESTORED by the CUTICURA Remedies.

NOTHING IS KNOWN TO SCIENCE AT ALL comparable to the CUTICURA REMEDIES in their marvelous properties of cleansing, purifying and beautifying the skin, and in curing torturing, disfiguring, itching, scaly and pimply diseases of the skin, scalp and blood, with loss of hair.

CUTICURA REMEDIES are absolutely pure, and the only infallible skin beautifiers and blood purifiers.

Sold everywhere. Price: CUTICURA, 50c.; RESOLVENT, $1; SOAP, 25c. Prepared by the POTTER DRUG AND CHEMICAL CO., BOSTON, MASS.

Send for "How to Cure Skin Diseases"

HANDS Soft as dove's down, and as white, by using CUTICURA MEDICATED SOAP

Quaker Testimony.

Mrs. A. M. Dauphin of 1939 Ridge Ave., Philadelphia, has done a great deal to make known to ladies there the great value of Mrs. Pinkham's Vegetable Compound, as a cure for their troubles and diseases. She writes as follows: "A young lady of this city while bathing some years ago was thrown violently against the life line and the injuries received resulted in an ovarian tumor which grew and enlarged until *death seemed certain*. Her physician finally advised her to try Mrs. Pinkham's Compound, she did so and in a short time the tumor was dissolved and *she is now in perfect health*. I also know of many cases where the medicine has been of great value in preventing miscarriage and alleviating the pains and dangers of childbirth. Philadelphia ladies appreciate the worth of this medicine and its great value."

Sent by mail in Pill and Lozenge form on receipt of price, $1. Mrs. Pinkham, Lynn, Mass. Also in liquid form, all at Druggists.

STEINWAY KRANICH & BACH Gabler, Roenish Pianos; Burdett Organs, band instruments. Largest stock of Sheet Music and Books. Bands supplied at Eastern prices. M. GRAY, 206 Post Street, San Francisco.

WARREN'S FEATHERBONE DRESS STAY! Soft, pliable and absolutely unbreakable. Standard quality 15 cents per yard; Cloth covered, 20 cents; Satin-covered, 25 cents. For sale everywhere. Try it. WARREN FEATHERBONE COMPANY, Three Oaks, Mich.

Dr. PARDEE'S REMEDY is The Greatest Blood Cleanser. Cures Spring Humors, Salt Rheum, Scrofula, Sciatica, Rheumatism, Constipation AND Regulates The Kidneys & Liver.

One bottle taken according to directions will give better results than a gallon of Sarsaparilla, or any of the so-called Blood Purifiers with which the market is glutted. At Druggists, price $1.00 per bottle.

$500 REWARD

will be paid for any case of Rheumatism which Dr. Pardee's Remedy, properly administered, fails to relieve.

GOLDEN MEDICAL DISCOVERY

CURES ALL HUMORS, from a common Blotch, or Eruption, to the worst Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin, in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. Great Eating Ulcers rapidly heal under its benign influence. Especially has it manifested its potency in curing Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Disease, White Swellings, Goitre, or Thick Neck, and Enlarged Glands. Send ten cents in stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections.

"THE BLOOD IS THE LIFE." Thoroughly cleanse it by using Dr. Pierce's Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, and vital strength, will be established.

CONSUMPTION, which is Scrofula of the Lungs, is arrested and cured by this remedy, if taken before the last stages of the disease are reached. From its marvelous power over this terribly fatal disease, when first offering this now celebrated remedy to the public, Dr. PIERCE thought seriously of calling it his "Consumption Cure," but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption, but for all Chronic Diseases of the

Liver, Blood, and Lungs.

If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flushes, low spirits and gloomy forebodings, irregular appetite, and coated tongue, you are suffering from Indigestion, Dyspepsia, and Torpid Liver, or "Biliousness." In many cases only part of these symptoms are experienced. As a remedy for all such cases, Dr. Pierce's Golden Medical Discovery is unsurpassed.

For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy.

Sold by DRUGGISTS, at $1.00, or SIX BOTTLES for $5.00.

Send ten cents in stamps for Dr. Pierce's book on Consumption. Address, World's Dispensary Medical Association, 663 Main Street, BUFFALO, N. Y.

$500 REWARD is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure. If you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption. Dr. Sage's CATARRH REMEDY cures the worst cases of Catarrh, "Cold in the Head," and Catarrhal Headache. 50 cents.

NATIONAL SPORTS.

The Love of the Anglo-Saxon Race for Sturdy Out-Door Exercises.

It is a striking fact that, of all European races, those inhabiting the British Isles, with their branches scattered over the world, are the only ones which prefer athletic and open-air games to all others, and practice them with the zest of true enthusiasm. Both in England itself, and in the remote English colonies we find that the most popular pastimes are those which exercise the muscle, and which test physical skill and endurance; and this is true of the recreations of both sexes, and of persons of mature age as well as of young people. Cricket in England, "golf" in Scotland, and base-ball in the United States, may be called, from the extent to which they are played, national games. Foot-ball is practiced in the schools and colleges of both countries; and boat-rowing has become in both a regular and established custom of effort and rivalry. A new out-of-door game—like polo or lawn-tennis—is eagerly taken up by English and Americans, and soon becomes a popular habit. The English are too conservative to borrow base-ball from America, but the Canadian game of lacrosse is rapidly becoming popular in "the States." The chief sports of adult Englishmen—hunting and shooting—are also practiced in this country, especially in the regions of the far West.

If we turn our eyes to the European continent, we find that the out-of-door games so popular in England and America have scarcely a foothold there at all. Such recreations as cricket and base ball are almost, if not wholly, unknown to the boys and young men of France, Germany and Russia. Indeed, the favorite pastimes of the young people of the continent are sedentary ones. Instead of romping after balls in open spaces, they prefer to stay in-doors, and to play billiards, chess or dominoes. Even horse-racing and boat-racing are regarded by the French and Germans as foreign customs, and are not pursued with any thing like the zest that they are in English-speaking countries. A favorite exercise with the French and Germans is that of fencing with small swords and rapiers. But this is not practiced merely as an amusement. The custom of dueling still survives feebly in those countries, to such an extent, at any rate, that it is regarded as a desirable, if not an important, part a man's education to be expert with the sword.

Perhaps the most popular of all out-of-door pastimes with continental peoples, and especially of those of Southern Europe, is dancing, in which all classes of people take part, and which is resorted to on all festal occasions. The Italians, Spaniards, Roumanians and Hungarians all have a great variety of dances, accompanied by music especially adapted to each. The Italians have their "tarentella" and "saltarello;" the Spaniards their "boleros" and "cachucas," and the Hungarians their "czardas." The principal open-air recreation of the Spaniards is the barbarous "bull-fight;" but the physical exercise is, of course, confined to the actual performers. The vast audience sit in indolence, watching the cruel sport.

Here and there, in Europe, indeed, we find athletic games practised. But they are of a milder character than those of the English. For instance, the Italians have a game called "pallone," which is played with a big, light ball and heavy gloves; and the Southern Germans play a game called "kegelspiel," something like skittles, and are also fond of target-shooting and wrestling. The Russians skate and go sleighing; but it can scarcely be said that any vigorous out-of-door pastimes are generally practiced in Russia, despite the cold temperature of its more northerly regions.

It may well be that the more sturdy pastimes of the English race have had their share in imparting that national vigor which has peopled so many regions of the earth with thriving and powerful colonies.—*Youth's Companion.*

OCULAR ADVICE.

How the Human Eyes May Be Kept in Serviceable Condition.

Do not walk with your eyes on the ground; the gravel is apt to wear the sight off.

Never get up in the morning until you have first opened your eyes, if it takes you until noon.

Many a young man has a young woman in his eye, who will effectually impair his sight the remainder of his life.

Never throw your eyes suddenly to the hard pavement; you are likely to cripple them.

Do not try to look too far into the the depths of the eyes of the young lady; it is certain to make you near-sighted.

When people tell you they see mischief in your eyes, you should go to an oculist and have it removed.

In keeping one eye on your neighbor, you should frequently change the eye.

I know a young man who permenently injured his eyes by trying to see the bald spot coming on top of his head.

Some men have glass for an eye. That is bad, but it is worse to have an eye for the glass.

It is said to be a good thing to "keep an eye out," but it is better to keep two eyes in.

Never strain your eyes in trying to see the good you have done in the world.

Other great oculists, besides myself, have asserted that the best thing for eyes is never to call another man a liar.—*A. W. Bellaw, in Tid-Bits.*

THE FALKLAND ISLES.

An American Official's Chat About a Prosperous British Colony.

Colonel Henry S. Lasar, United States Consul at the Falkland Islands, and his wife passed through Chicago recently. Colonel Lasar has been Consul at that point over six years and has a fund of valuable information concerning the islands. In appearance the Consul is somewhat below medium height, with a gray beard and piercing eyes, and although a native German has been a citizen of the United States over forty years and is as pronounced an American in sentiment as could be found, a charming talker, and full of rare courtesy.

Speaking of the island Colonel Lasar said: "The Falklands is a crown colony of the most severe type. Its Governor is from Downing street, London, and the strongest English prejudices prevail, almost to the exclusion of an impartial consideration of other nationalities. The Government consists of Governor, executive council and legislative council, appointed by the Crown, although the latter, which consists of two persons, has but little independent power, as the executive council sides always with the Governor and easily vots down any measure distasteful to that individual. The population consists of about sixteen hundred, nearly all of whom are English and Scotch, the latter predominating numerically, but the former ruling by force of government and capital. The only industry is sheep-raising, for which purpose all the islands are fully occupied, and I have known many cases in which would-be settlers were unable to obtain land. The annual wool clip is about two million pounds, and there are throughout the islands nearly a million sheep and cattle. The shepherds are Scotch, sent over by the Falkland Company, and are a stubborn lot of men. Some of them live on the smaller islands completely alone with their flocks. In reference to the care of sheep they are most jealous, refusing to give the slightest information as to their methods of handling flocks.

"Along the beaches of many of the islands are vast numbers of penguins and other water fowl. The former are so tame that the sailors knock them down with clubs and secure their oil, which is quite valuable. In early days they were so numerous that the Governor of the islands was called the 'King of the Penguins.' The climate is pleasant, varying from twenty to fifty the year round. Carpenters do a very good business in the islands owing to the number of vessels which come to the islands in distress after passages around Cape Horn from the Pacific. The wages paid carpenters are four dollars per day, and they are careful not to work very hard, some times keeping ships in the port three months at a time.

"It has been a source of regret to me ever since I have known any thing about the Islands that the first steps toward the commercial settlement of the islands were not taken by Americans. The English have no idea of progress, their motto being: 'As it was in the beginning, is now and ever shall be.' Strong in their prejudices they effectually chill all attempts at material improvement save in their narrow channel of investment. There is one feature of the colony well worth noticing, and that is the fact that there is absolutely no poverty. We have not a pauper on the islands. That the morality is good is proven by the fact that in the last six years the jail has had but one inmate who was a native, and he was put there for beating his wife. Of course sailors who attempt to desert from their ships are often lodged in jail until their vessels are ready to sail, but that can not be counted against the islands. Altogether the colony is doing fairly well, and I hope to see more extensive relations existing between it and America. A short while ago William Walter Phelps visited the Islands in his yacht, the Brunchilde, and before him Lord Brassey came in the Sunbeam. The fact that we get but one mail in about five weeks rather cuts us off from current affairs in other parts of the world, but the inhabitants are generally well satisfied with their condition, and all of them are making money. The things we lack are a dentist, a drug store and a photographer—wants which we hope soon to have filled."—*Chicago News.*

Silk from New England.

Though the moth family of Bombycidæ includes upwards of forty fiber-spinners, most of the world's silk is still obtained from a single species, the product of the common silkworm *(Bombyx mori)* being superior both in quality and in quantity to that of any other yet tried. The fiber of *Samia cieropia*, a species that feeds on the apples and kindred plants throughout the United States and Canada, has lately attracted attention, and seems to be finer, softer and more abundant than that of any other American silk-worm. Prof. Carl Braun, a German entomologist now located at Bangor, Me., has received from Lyons manufacturer an order for five hundred cocoons of this moth, and hopes to supply them this season. This investigator is confident that the experiments to be made with these cocoons will be successful, and predicts that Maine will produce its own silk a quarter of a century hence.—*Arkansaw Traveler.*

—Not our public conduct only, and what we reckon the momentous parts of our life, but the indulgence of our private pleasures, the amusement of our secret thoughts and idle hours, shall be brought into account.—*Blair.*

HOWLING FANATICS.

Fearful Sights in Stamboul at a Wild Religious Celebration.

The Ambassador, his secretaries and suite, and some of the leaders of the Persian community, with a sprinkling of foreigners, invited like ourselves, filled the reserved seats and were courteously informed by the secretaries of the Embassy, in perfect French, of all the circumstances and incidents connected with this national celebration, says a writer, describing the celebration of Hassan and Hussein in Stamboul. Shortly after we were seated we heard the wild shouts and clamors outside, and presently saw a band of wild-looking men bearing aloft flaming maschallahs. They entered in marching time, and announced the approach of a numerous procession of "the faithful." In they poured, preceded by the Persian priests, lugubriously chanting with nasal melody a kind of funeral song, reciting the tragic death of Hassan and Hussein, with maledictions of their assassin, Yezid, doomed to an immortality of infamy. Then suddenly appeared at the termination of the chant a ghostly looking crew of men, clad in long white robes, with uncovered heads and naked swords in their hands. These men numbered many hundreds and were termed Nazirs—a Persian name signifying those consecrated to God, being dedicated by their parents from infancy to observe the ceremonial and the fasts commemorating the deaths of Hassan and Hussein. They flourished their naked swords, clashed them wildly together, and occasionally turned the points on themselves or their companions, gashing heads, faces and breasts until the blood flowed and discolored their white robes. They then dragged each other by the hand, passed round and round, hoarsely reciting mourning hymns, with wild invocations of the names of the martyrs, Hussein and Hassan. These men looked really like demons under the red glare of the torches borne by their companions, who, to the number of several thousands, passed in after the singers, often wiping the bloody brows of the fanatics.

The horror of this fearful scene was magnified by the dull, thumping sound made by the self-flagellations of another band of fanatics who accompanied the swordsmen. These men belabored their broad backs with scourges made of iron chains, the blows resounding with a sickening sound. The secretaries told us that the backs of these men, from the annual repetition of this scourging, and from their daily habit of carrying heavy burdens, as hamals or porters, were actually more like iron than flesh.

After the Nazirs came a typical procession of the flight of the martyrs' families, with the tents, the banners and household goods, and even the children perched up on horses which formed part of the show. While wailings of "Oh, Hassan! Oh, Hassan!" accompanied these, as though the incidents commemorated had occurred not six hundred years but six hours ago.

One of the most curious and at the same time one of the most repulsive features of the spectacle was the appearance in the procession, with the fanatical Nazirs, of a large school of boys of ten to fourteen years of age, some of whom gashed themselves with knives and were thus prepared for fanaticism.—*The Epoch.*

GOETHE'S BALD HEAD.

Mrs. Carlyle's Unfortunate Request of the Great German Poet.

In the collection of the Goethe-Carlyle correspondence just published there is one episode of ludicrous interest, not altogether without its pathetic side. It is that in which Mrs. Carlyle, in the year 1829, sent Goethe a lock of her hair—"concerning which I am to say," writes Thomas, "that except to her husband she never did the like to any man." In exchange she begged for a lock of Goethe's hair, and this "for a heart that honestly loves you." "I, too," wrote the husband, "hope that you will do so much." Goethe, who was then in his eighty-first year, found himself in a painful predicament, which he thus explained:

"The incomparable look of hair * * * almost alarmed me. The contrast was too striking, for I did not need to touch my skull to become aware that only stubble was left there; nor was it necessary for me to go to the looking-glass to learn that a long flight of time had given it a discolored look. The impossibility of making the desired return smote my heart and forced thoughts upon me which one usually prefers to banish. In the end, however, nothing remains for me but to content myself with the reflection that such a gift was to be most thankfully received without hope of any adequate requital."

Poor Mrs. Carlyle, how she must have bit her lip at the thought of her blunder.—*Pall Mall Gazette.*

—A recent issue of the Arizona *Howler* contains the following editorial paragraph: "Attention is called to the fact that in the news columns of this morning's *Howler* there appears the first and only account of the elopement of our wife with 'Thumbless Billy,' the monte sharp, which occurred yesterday. Thus we score another one on our dead contemporary across the street. Look for some spicy inside developments to be published exclusively in this paper to-morrow morning."

—Mamie (five years old)—"What is your business, uncle?" Uncle Fred—"I am a steel-merchant, Mamie." Mamie (after a pause)—"Uncle, will they send you to prison?"

DRUGGED TO DEATH.

The Incalculable Harm Wrought by Injudicious Consumption of Medicine.

There can be no doubt that could the opinion of medical men of every school be obtained, the universal verdict would be that the people are taking too much medicine. All classes of physicians who meditate at all give far less medicine than they did twenty years ago, and yet much more medicine is taken. Self-medication is carried on extensively, if not alarmingly. Morphine and quinine, cathartic pills and bitters are staples among a large class of citizens who prescribe for themselves, and then comes the patent nostrums whose name is legion, and in this line alone probably more than ten times as much medicine is consumed as all the physicians in the country prescribe.

The public would be surprised to know the number of those addicted to the opium habit, and it should be remembered that this habit is one from which the victim is rarely extricated. It is one, too, that embitters not only the life of the victim but also of friends and relatives, and not unfrequently impresses upon the unborn inclinations and tendencies that make life a burden. The prevalence of the malarial influence has given to quinine a popular use beyond all precedent in the past, and thousands are swallowing this drug without regard to medical advice, and are thus endangering the organs of hearing, deranging the stomach and confusing the intellectual operations. Improper food and a rash mode of taking it, insufficient exercise and over-straining of the nervous system, have made a constipated habit the rule rather than the exception and a great variety of catharics are popularly resorted to and persistently employed notwithstanding the fact that the remedy must not only be persisted in but the dose steadily increased. And then come the great army of weak and feeble ones who want an appetite, a tonic, a stimulant or something to give renewed vitality or an increase of strength, and here the patent nostrums flow in an ever increasing stream, in many instances each to be followed by some other in a series of experiments to be ended only when death claims his victim.

It is not surprising in view of all this that Dr. Holmes should have declared that the world would be better off if all the drugs were cast into the sea, though it might be very bad for the fishes; yet few candid men will deny that drugs are important and valuable when judiciously employed. It is their improper and indiscriminate use that proves objectionable and dangerous.

Two facts should be impressed upon the public mind—first, that the practice of self-prescribing has wrought and is working incalculable harm; and secondly, that advice from the medical attendant respecting diet, exercise and management in the sick room is often far preferable to medicine.—*Farm and Home.*

CURIOUS COINCIDENCE.

Meeting of Two Strangers Who Had Traveled Over the Same Ground.

He was an exile, poor fellow, and glad to meet a man who knew of the parts from whence he hailed.

"Yes, sir," he said, "I lived in New York myself for four years."

"And then you went to Milwaukee?"

"Yes, sir; that's where I landed next."

"Strange to say, it was that city I struck myself after leaving New York. Fine town, Milwaukee."

"Yes; I was quite sorry to leave there, but business ere long called me to—"

"Denver."

"Yes sir, you're right, Denver. Now there's a booming city—a regular stem-winder. Ever been to Denver?"

"Yes, siree. Denver is a pretty slick sort of a place. Didn't stay there long, eh?"

"Just a few days, but long enough to become quite in love with the city. I went to Kansas after leaving there."

"Kansas?" (Referring to his note book.) "Yes, that's right, you were just twelve hours ahead of me there."

"Well, seems to me, stranger, we have traveled pretty much over the same ground. Curious coincidence, ain't it?"

"Ye-es, 'tis a trifle funny, mate, but the best of the joke has to follow. We now go to New York. After all, New York is the only place worth living in. Any objections to exchange cards? There's mine."

It reads:

JACK PHIPPS,
Detective,
New York.

"This is my warrant for your arrest. Embezzlement; that's it. Curious coincidence, ain't it?"—*Detroit Free Press.*

—A Newburg girl went to a grocery for a pound of saleratus, the other day, and, after making the purchase, stepped upon the scales with the package in her hand. "Why, I've gained a pound!" was her delighted exclamation, and then, remembering that she had the saleratus in her hand, she dropped it in her pocket, and then attempted to adjust the weights so as to show the difference of a pound. After several minutes' effort she gave it up as a bad job, and left the grocery satisfied that no reliance was to be placed in its scales.—*Middletown Mercury.*

—Voice from Inside the Egg—"Say, some of you fellers that's had experience, give a friend a hand, will yer? I'm stuck."—*Tid-Bits.*

Things One Would Rather Have Left Unsaid.

She—No! I can't give you another dance. But I'll introduce you to the prettiest girl in the room!

He—But I don't want to dance with the prettiest girl in the room. I want to dance with you.—Punch.

The Limekiln Club.

The secretary of the state board of health of Illinois wanted to know what progress, if any, the colored people of Michigan were making in sanitary matters. Brother Gardner said he would like a general discussion of the subject, and Sir Isaac Walpole arose to remark that he was making progress. Up to a year ago he didn't know that seven persons and a dog sleeping in an 8x10 room with all the windows down and the doors closed was injurious to the human system. He supposed the feeling of languor was brought on by non-circulation of blood in the feet.

Whalebone Howker had also progressed. He had now learned the difference between the smell of gunpowder and sewer gas and the lives of his thirteen children were no longer in peril.

Pickles Smith used to wash his feet once in six months. Now he felt conscience stricken if a week passed over his head that he didn't heat up a boiler of water and soak up his pedals. His five dogs used to sleep in the house. Now they either made their beds in the doorway or stood up against the woodshed door.

Judge Chewso had slept in a room with six other persons, a barrel of soft soap, three dogs, an old codfish and a limburger cheese, but he had progressed. He used to wake up in the morning and charge politicians with seeking to poison him, but now he realized that it was his ignorance of sanitary precautions.

Several other members spoke in the same strain, and related vivid personal experiences, and the president finally said:

"De Seckretary will answer to de effeck dat we ar' improvin' in sanitary matters in de rapidest manner, an' dat de time am purty nigh at hand when a black pusson sleepin' in de garret of a house doorin' de hot nights of July an' August will werry probably remove de feather bed an' dispense wid about fo' comforters."—Detroit Free Press.

Filial Scruples.

On the avenue—"Know him?"

"Who?"

"Old chap in the queah clothes that just passed."

"Of cawse I do."

"Go you a big fizz I can guess who he is inside of faw guesses."

"Go you."

"Tailaw?"

"Naw."

"Bootmakaw?"

"Naw."

"Hattaw?"

"Naw."

"The dayvil; then he must be the haws dealaw."

"He isn't."

"Who the dooce is he, then?"

"He's my fathaw."

"Oh, the dayvil. You awtn't to take advantage of a fellaw like that; how the dooce was I to know he was youah fawthaw?"

"Cuss me if I know; fact is, I don't know the govnaw meself, in public, when he's got his cussed vulgaw togs on; a fellaw can't affawd to be ind scwiminate, don't chew know."—Town Topics.

Poetry and Prose.

She—What a lovely summer afternoon. How resplendent the bright orb of day hangs in the blue vault above.

He—Yaas, nice day for a feller to get his hair cut.—Texas Siftings.

Plantation Philosophy.

I b'lieb dat ef I wuz on er race hoss an' had two hours de start, debt could jump on er cow an' obertake me. I dean un'erstan' how it is dat some folks dat ain't got half de sense nur nigh de jedgment dat I is ken run right erlong outen debt, while de cut throat mortgage has allus got its bad eye on my crap. I uster 'low dat it wuz 'caze I was too hones', but sence I kotch merse'f wushin' dat I had Mr. So-an'-So's farm, widout stoppin' to think what would 'come o' Mr. So-an'-So's chillun, I'se sorter come ter de 'clusion dat ef I goes ter do po'house it won't be my honesty dat takes me dar. You'll fin' mo' honesty 'mung well-ter-do folks den yer will 'mung people dat has ter lib frum han' ter mout.—Arkansas Traveler.

A Pleasant Feature.

"I am afraid, madam," said a gentleman who was looking for country board, "that the house is too near the station to be pleasant."

"It is a little noisy," assented the landlady, "but from the front veranda one has such a fine view of people who miss the trains."—New York Sun.

An Enemy He Has Made.

"The first mosquito of the season visited me last night," observed the snake editor, "and I made him my enemy."

"How was that?" asked the horse editor.

"Well, he landed on my hand, and I mashed him, and now he is dead against me."—Pittsburg Chronicle-Telegraph.

A Fatal Delay.

Young Man (to magistrate)—I want a marrage license.

Magistrate—What's the young lady's name?

Young Man—Miss Lulu Smith.

Magistrate—You're too slow, my boy. I wrote that name in a license this morning for young Brown.—New York Sun.

STREET-CAR HORSES.

Their Days of Usefulness in Cities Limited to Four or Five Years.

Few people stop to think under how severe a strain the horses that draw our street-cars labor. They are generally driven at a brisk trot, and the frequent stops are too brief to afford them any rest. In fact, the oftener a horse with a heavy load stops simply to start again the worse off he is.

"A good horse will last in this business four or five years," said a Broadway car-driver the other day. "Unusually good ones may stand it longer, but they are much more apt to give out in a shorter time. Sometimes they go all to pieces in two or three months. That gray horse there has been working to the cars for three years, and he seems just as good as ever. A match to him, bought at the same time, didn't last two months."

"How do they usually become affected?" was asked.

"Very often the fore-feet give out. Sometimes the shoulders become diseased. Of course you know that a horse strikes his fore-feet much harder than he does his hind ones. So when he is driven at a lively gait, with little time to rest, these hard stones wear the fore-feet to the quick or cause a tenderness in the shoulders. If the shoulders go lame first we drive the horse awhile at night, when the people don't see him limp. When he gets too bad he is sold. If his feet go, the company gets rid of him as soon as possible.

"A great many horses seriously injure themselves by slipping and falling in the winter. Sometimes these have to be killed. Colic takes off a great many. The deaths of a very large majority of street-car horses may be traced to the accidents and necessities of the service. They must be driven pretty fast or people wouldn't ride. So the weak ones soon fall victims, and the strongest are lucky if they live long enough to be sold to some farmer, and go to the country to end their days in comparative peace."

"Then that's where the broken-down horses go, is it?"

"Yes. Many horses that are useless on our paved streets do very well on a farm. Their sore feet and shoulders improve very much when they are driven over soft ground.

"Hundreds of horses are sold to farmers every year by the street car companies. They are nursed and doctored up by their rural purchasers until they become very respectable looking animals again. Thus the farmers get much work out of horses that couldn't earn their oats here, and they buy them cheap, too. I have heard that some of these countrymen make a business of buying up broken-down street-car horses, doctoring them, and reselling them to other companies at a high price. Of course it is only a short time before a doctored horse is again worthless here, and then the farmer comes around and buys him back at his own price. This is kept up as long as the poor beast can be made to put on a respectable appearance. There 're some queer doings in this world of ours," said the driver, as he whipped up the poor beasts so as to get to the city hall on schedule time.—*N. Y. Commercial Advertiser.*

A PECULIAR CASE.

How an Apparently Dull Witness Bewildered an Austin Judge.

A man named Gobing was up before an Austin police judge the other day, charged with committing assault and battery upon the person of another individual named Gobang. A rather stupid witness was sworn, and the following dialogue took place:

Judge—Did you see the quarrel?

Witness—Yes, I seen it.

"Who struck the first blow?"

"Gobing. He hit the other fellow, go bang!" smiting his right fist into the open palm of the other hand with a loud report.

"Did Gobang hit him back?"

"No, he didn't hit him in the back."

"Where did he hit him?"

"He hit him in the face, go bing!" Another fist pantomine.

"Was that all?"

"All of Gobing?"

"No, all of the fight?"

"With Gobang?"

"I'll go bang you if you don't answer my questions properly. Now tell a straight story of this affair."

"Well, your Honor, I stood talking with him"—

"With Gobing?"

"No, with Gobang; and the other fellow came up and hit"—

"Gobang?"

"No. Gobang was the fellow that came up, and then it was go bing! and go bang! (more pantomine) first one and then the other. They then clinched and went down, the other fellow on top."

"Gobing?"

"No, Gobang. Then the police come, and your Honor, that is all I know about it."

"Well, it seems to have been a draw game, anyhow, from your account of it. You can go home, Gobing, and you, too, Gobang."

"And where shall I go?" asked the witness.

"Go hang!"—*Texas Siftings.*

—She (at the ball game)—"What a fine-looking set of men the players are, George!" He—"Do you think so?" She—"Oh, my, yes, perfect Apolos! Why, George" (suddenly struck with another curious idea), "that must be where the name is from! Apolo grounds."—*Harper's Bazar.*

—No, John, lady-bug is not so called because of her quiet, modest ways, but of the chromatic gorgeousness of her bonnet.—*Life.*

THE BRAZILIAN PEOPLE.

What Lieutenant Barnes, U. S. N., Saw in Rio de Janeiro.

Two things will particularly attract the notice of a visitor to Rio, the street illumination and the street cars or bonds, as they are called, because the bonds issued to pay for them have never been redeemed. The gas lamps are unusually numerous in all parts of the city, and their lines extend even to the most remote suburbs. The Santa Theresa walk, which has not a building upon it save an uncompleted hospital, has gas lamps at intervals of about fifty yards for its whole length. This seemed so surprising I made inquiry in regard to it, and received a satisfactory explanation. The contract for establishing the plant for illuminating the city by gas was given to an American, and he was to be paid a certain amount per lamp, therefore he put in as many lamps as an elastic conscience would permit. The result is Rio is one of the best lighted cities in the world. The street cars are noticeable for their number, their long routes, their different sizes, the rapid rate at which they travel and the fact that they are drawn by mules instead of horses; mules are used for all draught purposes, horses only for riding. Mules draw the heaviest trucks and the finest carriages. I saw a long funeral procession in which every vehicle, hearse included, was drawn by mules, and they did not look ungainly either. The mule when well kept and groomed makes a very good appearance. The eradication of a little prejudice makes a great difference in an appreciation of animals, and even of our fellow men. I have known many instances of people who were neglected and shunned by others in the community, and who went to the dogs, but might have made worthy, respected citizens had they received a little attention and encouragement—good feed and careful grooming. The street cars are all open like our summer cars, and have the same arrangement for ringing up fares, and signal gongs. They are of two widths, one that to which we are accustomed, the other very narrow, not more than two-thirds as great. On some streets both kinds of cars run on the same route, a third line of rails being laid for the purpose. I noticed one feature which might perhaps be advantageously introduced into some of our cities, cars for transporting freight, some closed and some a mere platform. I could not see that they interfered with travel at all, but they seem to be well patronized, and are regarded as a great convenience.

The Brazilians seem to be a badly mixed people. The Portuguese, negro and Indian elements have been shaken up together until each has lost its individuality by absorbing characteristics of the others. I did not see an individual of either race that I could unhesitatingly pronounce of pure blood. The universal custom of gathering at the windows and in the balconies toward evening afforded an excellent opportunity for observing these peculiarities. In many a family group I observed the characteristics of each race plainly marked. One child with thick lips, full nose, black complexion and kinky hair; the next, coarse, black, straight hair, thin face and brown complexion; and a third, perhaps with fair features and red hair. There seems to be no race distinctions. All associate together upon terms of perfect equality. The line of caste is rather between the sexes. Women are regarded as inferior, and are greatly hampered by social usage. Boys cease to show any respect for their mothers or regard their authority before they reach their teens, which destroys family discipline. In fact, I am told there is no such thing as family discipline. Children are never governed or punished, though girls are kept secluded, and until married are never permitted to meet gentlemen except once in a while at a public entertainment. There is no courtship or love-making between young people, and no marriages which are the result of mutual attachment. Such things are arranged by the parents, and the parties most interested may perhaps have never seen each other previous to the wedding. After marriage women are somewhat less restricted. The Brazilians have the reputation of being very immoral. I can not say they are not, but I saw nothnothing to support the reputation. One would see far more evidence of vice and immorality in New York in the same time.—*Cor. Christian at Work.*

Superseding the Horse.

In the German army the experiment is being tried of mounting the aides and messengers, as well as some members of the staff, upon bicycles and tricycles. The roads and fields on the continent are in such excellent condition that these wheeled vehicles can be easily used. As is well known a bicycle can, in time, run down the swiftest horse, and then it is cheap to keep. Of course, horses would have to be used for dragging heavy artillery and for cavalry purposes. Horsemen can no longer be used for charging upon lines of infantry. The magazine rifle has put an end to all such exploits. But for raids, tearing down telegraph poles, cutting off detachments, a regiment of wheelmen might be quite as useful as a troop of horse.—*Demorest's Monthly.*

—A unique modern improvement is a stairway which will accommodate children and aged people as kindly as it does those of full physical ability. It is divided into halves, and the middle is broken so that it has double the number of steps as the sides.—*Chicago Times.*

INYO INDEPENDENT.

County Official Paper.

C. Mulholland, EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY AUGUST 20 ..... 1887.

Transfers of Real Estate.

The following transfers of real estate have been entered upon the Record.

George Duly, of Panamint to Mrs. Elizabeth M. Monroe, of Tehichipa, Kern county, interest in mining claims at Panamint.

T. A. Hyde to J. W. McMurry, lot at Keeler.

J. W. McMurry to John Barnes and John Fishman lot in the town of Keeler.

J. S. Brown and Sophia Brown to Rhoda L. Kelty, lot in Bishop Creek, sixty one feet front.

P. W. Forbes to Trenmore Coffin, interest in water right taken from Owens river near San Carlos.

Trenmore Coffin to J. F. Hollack, T. R. Hofer and A. M. Ardeny, interest in water right taken from Owens river near San Carlos.

Trenmore Coffin to S. L. Lee interest in same water right.

John C. Irwin to Independence Water Company, four inches of water from Little Pine Creek.

Mollie Conklin to same company four inches of water from same source, reserving to herself and heirs sufficient for domestic use and for irrigating lots in Independence.

John Baxter to same Company, four inches of water from same source.

Elijah Robinson to same Company, same amount of water from same source.

J. D. Mairs to John Welsh, interest in True Blue mine, Beveridge district.

J. C. Eddy to James Harry, lot and buildings in Darwin.

S. G. Gregg, tax collector, to J. W. P. Laird, 160 acres of land near Bishop Creek, and occupied by Nancy D. Bowman.

George Duley to George T. Folsom, lot in Panamint and interest in mine.

A. K. Briggs to Mrs. Eliza Smith a tract of land near Bishop Creek.

Frank C. Parker to Eunice M. Johnson, lots in Independence and improvements on same.

Maria N. Morales to Patrick Reddy, interest in Keynot mine, and other claims adjoining.

E. G. Biddleman to John Baxter, lot north of Independence.

William H. Russell to Lone Pine Mining Company. interest in three mining claims at San Carlos.

Mrs. Annie Stewart to John R. Hughes, lot on Main street, Lone Pine, 25 feet front.

J. J. Moore to J. W. McMurry, lot and improvements at Big Pine.

Jack Lavelle to J. I. La Grange, interest in mine at Fish Springs.

John A. Hannah to Thomas Parker, lot and improvements at Independence.

John A. Hannah to C. Mulholland, lot at Independence.

United States to J. W. Stoutenborough, patent for 520 acres of desert land near Bishop Station.

George M. Gill to A. C. Freeman, lot at Bishop Creek.

Trustees of Odd Fellows Lodge to Trustees of Masonic Lodge at Independence, half of Cemetry lot.

Henry Grover to James Lane, parcel of land near Alvord.

Rudolph W. Swyers to Mrs. Jane Clark, parcel of land and improvements at Bishop Creek.

Andrew Clark to J. H. Shannon, lot at Bishop Breek.

H. J. Jackson to John Kewley, 160 acres of land near Bishop Creek.

L. Case and C. L. Logan to Jacob Koch, two lots in Bishop Creek.

Treatment of Farm Hands.

I think rescimen and all others having men in their employ make a great mistake in not treating them more humanely than most of them do, and in not providing more wholesome and comfortable quarters for them. The impression with many employers seems to be that a common laborer is of importance mainly as he posesses more or less the muscle and patience of the mule. Brawn and muscle are at a premium, while brain, experience and judgment are of but little account. In fact, many seem to think a hired man has no use for brains and that he has no business to know anything. A stream never rises higher than its fountain. If you wish to make a man bruitish, treat him like a brute. Treat a hired man like a human being; give him clean, comfortable quarters, a clean, comfortable bed, clean, wholesome, well-cooked food, associate with him, take an interest in his welfare, ask questions and observe his methods of working; for no one is so stupid and ignorant but some information may be obtained from him, and he will be far more likely to be faithful and do good service than if treated as a brute.

At the East all farm help are treated with the same social equality as members of the employer's family. All eat at the same table, and sleep in good beds with clean sheets and pillows. Such a thing as a person carrying his own blankets and other bedding with him is not known. It is related of one of earlier Governors of Massachusetts, Gov. Biggs, I think, that he was in the habit of having all of his hired help eat at the same table with himself and family. Some of his aristocratic neighbors took exception to this and remonstrated with the Governor's wife about the matter. On representing the case to him, he remarked, he had been "thinking about the matter, and had come to the conclusion that as the hired help did all the work they ought to eat at the first table," and so ordered.—*Rural.*

The obituaries with which Stanley was so generally honored not long ago seem to have been wasted. The explorer appears to be in good health, and his death has been indefinitely postponed. The native who carried the good report was evidently "filling" the good missionaries and the holy men swallowed his story with an avidity that could hardly been surpassed by the sensational press. We are glad that Stanley is alive, and trust that he will not die any more for some time.

In Maine, where prohibition is strictly enforced, the sale of "nervine" is being largely increased. The stuff is sold by the druggists, one town having the record of disposing of 3.000 pint bottles per day. Nervine is simply a bad quality of whisky.

A meeting was held at the Courthouse yesterday afternoon for the purpose of organizing a club of the American party. W. T. Grant Esq. of Olancha, member of the State Central Committee was present. The meeting was well attended and the club promises to be quite a factor in Inyo county politics.

NOTICE OF SPECIAL ELECTION.

Office of Board of Supervisors, Inyo county State of California.

WHEREAS, At a special election held in Division No. 2, of Irrigation District No. 1, of Inyo county, on July 2, 1887, it appears from the returns of said election that the vote cast for Director of said Division resulted in a tie vote between S. A. Densmore and J. S. Gorman and no Director was elected therein.

Now, therefore, notice is hereby given that an election will be held in such Division on Saturday, August 20, 1887, for the purpose of electing one Director for said Division.

For the purpose of holding and conducting such election the following voting place and the following officers are hereby appointed, to wit; At the residence of S. A. Densmore. Inspector S. A. Densmore; Judges, L. A. Anger and B. Aguirre. Polls will be open from one hour after sunrise till sunset. J. D. HARRER Chairman.

Attest: P. H. MACK Clerk.

Dated August 5, 1887.

NOTICE.

AGRICULTURAL DISTRICT NUMBER 18.

Notice is hereby given that all parties are invited to send for exhibition at the Fair of Agricultural District No. 18, of California, all kinds of manufactured articles of American production; all products of the soil; mineral products; objects of a curious nature, or such as are of interest to science; collections of native insects; fossils, rare books, or other printed matter or manuscripts. The Directors desire to make an interesting display and will welcome everything that will be likely to instruct or entertain the public. Full guarantee will be given for the safe return to the consignor of any article sent for exhibition at the Fair, which will begin at Independence October 4th and continue through the week. Anything consigned for exhibition should reach Independence not later than Saturday, October 1st and should be addressed to the secretary.

C. MULHOLLAND, Secretary Agricultural Dist. No. 18.

TAKE SIMMONS LIVER REGULATOR

For all Diseases of the Liver, Kidneys, Stomach and Spleen.

This purely vegetable preparation, now so celebrated as a Family Medicine, originated in the South in 1828. It acts gently on the Bowels and Kidneys and corrects the action of the Liver, and is, therefore, the best preparatory medicine, whatever the sickness may prove to be. In all common diseases it will, unassisted by any other medicine, effect a speedy cure.

The Regulator is safe to administer in any condition of the system, and under no circumstances can it do harm. It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance; will promote digestion, dissipate headache, and generally tone up the system. The dose is small, not unpleasant, and its virtues undoubted.

No loss of time, no interruption or stoppage of business while taking the Regulator.

Children complaining of Colic, Headache, or Sick Stomach, a teaspoonful or more will give relief.

If taken occasionally by patients exposed to MALARIA, will expel the poison and protect them from attack.

A PHYSICIAN'S OPINION.

I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system. L. M. HINTON, M. D., Washington, Ark.

SEE THAT YOU GET THE GENUINE.

PREPARED BY J. H. Zeilin & Co., Philadelphia, Pa.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, SPURGEON, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of moms as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the dollars from under their wife and babies to pay for it." JOHN R. DONOE, Ph., Jeweler, Normal, Ills., writes: "You ask what I think of the Washer? I bought last summer. Yes. It is the best machine ever invented by man. Yes. We have just as good dinners on Monday as on any other day. No. If you can't see that, you can see buy ours for glory." I will ship a sample to these desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes, and soap. Pays capable agents big money. Write for particulars.

J. WORTH, 1710 Franklin Ave., St. Louis, Mo.

MONEY to be made. Cut this out and return to us, and we will send you free, something of great value and importance to you, that will start you in business which will bring you in more money right away than anything else in this world. Any one can do the work and live at home. Either sex; all ages. Something new, that just coins money for all workers. We will start you; capital not needed. This is one of the genuine, important chances of a lifetime. Those who are ambitious and enterprising will not delay. Grand outfit free. Address TRUE & Co., Augusta, Maine.

FOR SALE.

A ranch of 320 acres, within three miles of Independence, the County Seat; nearly all enclosed by a three-strand barbed wire fence, and subdivided; a small dwelling house and a number of outbuildings; 10 acres set out to fruit trees, a portion of which are bearing, consisting of choice varieties of Apples, Pears, Apricots, Plums, Prunes, Nectarines, Cherries and Quinces, also, about two-thirds of an acre of bearing grape vines. Nursery stock enough on hand to set out from 10 to 15 acres of orchard. Received six first premiums on Apples, Pears, Plums, Prunes and Grapes, exhibited at the Eastern Slope Agricultural Fair, held in Sept., 1886. For price and terms apply to

J. W. SYMMES. On the Ranch.

Independence, May 7, 1887.

BISHOP CREEK ACADEMY.

BEGINNING OF SPRING TERM.

The Spring term of the Academy, at Bishop Creek, will begin on Monday, March 28th, 1887.

Full Literary and Classical Academic Courses

Have been arranged, in accordance with which classes will be formed. Classes will also be formed in STUDIES PREPARATORY to those of the Academic Course.

Two prizes will be given during the year for excellence in declamation, also a prize for the highest rank in scholarship.

The Fowler Literary Society,

Formed during the last term, will offer to students of the Academy excellent advantages for literary culture, in addition to the regular work of the school.

TERMS:

The expense of tuition for the term will be $12. This is lower than for institutions of a similar character in other parts of the State. Instructions in music and book-keeping will be extra.

Board and rooms will be furnished to students from abroad. Particulars can be obtained by addressing the Principal.

For any further information address the Principal.

Calendar for the Term.

Spring Term begins March 28.

Exercises of the closing week June 19 to 23.

Sunday, June 19—Special sermons to students.

Tuesday evening, June 21—Declamation contest for prizes.

Wednesday, June 22, 2:30 P. M.—Annual meeting of the Board of Trustees.

Wednesday evening, June 22—Lecture before the Fowler Literary Society.

Thursday, June 23, 10 A. M.---Closing exercises of Academy.

Thursday evening, June 23---Reception of Principal to students and friends of the Academy.

INDEPENDENCE, CAL.

SATURDAY, AUGUST 20 .....1887.

BORN.

JONES—At Round valley, August 15, 1887, to Mr. and Mrs. T. E. Jones, a daughter.

DIED.

BRADY—At Lone Pine, August 14, 1887 Thomas Brady, aged 36 years.

That dog is a bear—a bugbear.

Paddy Jack is "across the river."

"Ho for the mountains" is the cry.

The peach crop is one of the heaviest known.

J. C. Flood, the Bonanza King, is dangerously ill.

Suppose we call it Oignon Vale; 't would be more euphonious.

Rev. J. H. De La Matyr returned to Independence on Wednesday.

There will be a farewell party at Burt's Hotel, Big Pine, a week from Monday.

The fair Directors are now working in good earnest to make the fair a success.

Mrs. Mates of Lone Pine, was visiting friends at Camp Independence this week.

Dr. I. J. Woodin and C. Mulholland are rusticating in the Sierras west of Big Pine.

Flour is still scarce in Independence while Lone Pine has plenty. Why is this thus?

The Band Boys, with their new caps and flambeaux made a fine showing on Tuesday night.

A. R. Conklin returned home from Los Angeles at the end of last week. Mrs. Conklin has not yet returned.

A lot of ostriches from the ostrich farm near Los Angeles will be exhibited at the Nevada State Fair at Reno.

H. M. Yerington and a party of gentlemen interested in railroad matters were at Keeler at the end of last week.

Messrs. El. Walker and Billy Grant came up from Olancha on Thursday and spent a couple of days in town.

Should a ghostly visitant perambulate among the camps in Onion valley it will be recognized as Charley in a *robe de nuit*.

Mr. John Hughes, of Lone Pine, was taken severely ill on Wednesday. At last accounts however, he was on the mend.

Services will be held at the M. E. Church to-morrow (Sunday) evening at 8 o'clock. Sunday school at 11 a. m. All cordially invited to attend.

Mr. E. Robinson has a force of men and animals at work upon the race track. This is a new track close to town, and in a most desirable location.

Rev. T. E. Sissons, Financial Agent for the Bishop Creek Academy, has been appointed by the Nevada Conference to fill the charge at Bishop Creek.

The officers of the District Fair at Placerville have sent complimentary tickets to the President and Secretary of District No. 18, for which receivers return thanks.

John L. Hunt, of San Francisco, Secretary of the New Coso Mining Co. was at Independence at the begining of the week. He has since returned to San Francisco.

R. S. Miner, Esq., returned to Mono county on Thursday morning. He was here in connection with the Broder case and will return to Independence in about a month.

Barring that the nights are rather cold one could find no finer place to camp with a view of contemplating grand mountain scenery than Onion valley, twelve miles west of town.

A man named Thomas Brady died in the hospital at Lone Pine last Sunday morning. He was a native of Ireland, aged about thirty six years, and had been working in mines at Darwin.

Mr. Al. Griffith is a first class workman in his line. Sign lettering, carriage painting, graining, paper hanging, house painting, all these he will do in a workmanlike manner and at reasonable rates. See his card.

Hon. A. A. Sargent died in San Francisco on Sunday last. He had been ailing but a short time and his death was unexpected. In the death of Mr. Sargent his party loses one of its staunchest supporters and ablest leaders.

Rev. J. H. De La Matyr has been returned to Independence and will be in charge of the ministerial work at this place for the ensuing year. We are glad to welcome Mr. De La Matyr back. He is a liberal minded man and an earnest Christian worker.

A well known gambler named "Long" Brown committed suicide at Virginia City some days ago. He had a run of bad luck recently, became despondent and swallowed morphine. The poor house, the gutter, or suicide in solitude is apt to be end of a gambler.

Fred Holbert is handling two as fine two year-olds as could be found in a day's travel. One is a Vanderhoof belonging to Mr. Shepherd and the other a Muldoon owned by a local sport. The latter will be entered in the two-year-old trotting race at the fair.

Mr. C. L. Logan, of Bishop Creek and J. E. Reynolds, of Lone Pine, were in town during the week in attendance upon the Board of Education. Up to press time they were both succeeding very well. The Board of Examiners consists of Messrs. Shannon, Laird and Peeler.

The Supervisors of Colusa County made an appropriation of $1000 from the general fund to help defray the expense of making a county exhibit at the State Fair. No wiser expenditure was ever made. Money spent to promote the settlement and development of the country is a good investment.

R. S. Miner Esq. arrived at Independence some days ago from San Francisco. Mr. Miner appeared before the Supreme Court on behalf of Mono county in the sheep license cases. He believes that the Court will sustain the ordinance passed by the Supervisors of Mono, and will declare the license tax constitutional.

A Mountain Nook.

Last spring Mr. L. C. Gray who is developing the Kearsarge mine, planted a lot of grape cuttings at his cabin in a nook in the foot hills seven miles west from Independence. The cuttings have made rapid growth and, what may be thought strange, one of them is bearing grapes. The elevation of the little valley is about 5,500 feet above sea level, and Mount Kearsarge towers above it more than eight thousand feet; the peak of the mount is 13,700 feet above sea level. Streams dash down the mountain and flow through the valley. Within fifty yards of his cabin door Mr. Gray can at any time catch trout. There are about one hundred acres of land in this spot well suited to vines and fruit trees. Apple and pear trees and a few ornamental trees have been set out and are growing well. A short distance above the dwelling are two springs; one of these is impregnated with soda the other iron. Mr. Gray unites a portion of the water from each of these springs with a small stream taken from the brook and conducts them in a little flume to his house. The whole world might be searched in vain to find such pleasant water as this is to drink, it really appears to improve the flavor of wine when bottles are set in the water to cool. This opinion rests upon actual experiment. At night the scenery is very grand; the mountains appears to be vertical; each peak is clearly outlined against the deep blue of the sky, and each is crowned with a diadem of gems that sparkle with a luster never seen at lower altitudes. All along the foot hills of the Sierra in Owens Valley are little nooks like this where Mr. Gray lives. These contain from, say, fifty to one hundred acres of land. When rail connection shall be made with Los Angeles, every one of these little places will be settled upon. With a moderate expenditure of money and the exercise of good taste, these could be made such lovely spots as would suggest that they might have been hidden under leaves and smuggled out of Paradise by Eve. Trails lead up from these nooks into the very heart of the Sierra, into a region where lovely lakes abound; where great snow fields are found at all seasons, and where there is the best hunting and fishing in the State. This whole region only needs easy communication with Los Angeles to become a favorite resort with tourists from all parts of the world.

Hints to Fruit Growers

Mr. Angelo Rossi, who has had experience in the vineyards of France and California, says: "When planting grape cuttings in wet soil place them about 12 inches deep; in dry soil 18 to 20 inches deep. If planted in April the percentage of loss will be very small. In rich soil put them from 6 to 8 feet apart. There is a great mistake made in the valley generally by people permitting their orchards to be worked by those who know nothing about pruning and by this means get their good trees spoiled forever. Never cut a tree on the outside; always cut the inside, and cut as close to the joint as possible and in a year or two it will be all covered up and the tree will grow fine and healthy. Never cut the sprouts around the big limbs as they are the best producers and are protected from the wind; it is much better to cut the top and it will cause the tree to bear more fruit and of a better quality. Those who let their orchards go without pruning have the biggest trees while those who prune judiciously have the largest bank book." Mr. Rossi recommends that no stranger be allowed to prune vines or fruit trees without producing good reference as to capacity. An incapable or careless man may work a great injury in a short time in either vineyard or orchard. Split grafting may be done at any time after the leaves fall and before the buds start; say from November till March. Bud grafting may be done from the beginning of May until September. No pruning should be done after the trees begin to bud. Mr. Rossi says grape vines grow in Owens valley with a strength not known in other countries. He says vines grow as much in two years here as in four years west of the mountains. He says further that he worked for several years in the neighborhood of Toulouse, in the south of France, and is certain that Owens valley is a much better wine country than that provided the vines are properly cared for and the wine handled with as much skill as the French wine-makers have.

Mono Items.

[CHRONICLE-UNION.]

The Bodie Miner, after a three weeks fitful struggle as a tri-weekly, has again suspended publication.

Negotiations are pending for the sale of the Kentuck mine. John Sheehan, one of the owners, is doing some work in the mine.

The Mirande habeas corpus case, involving the constitutionality of the sheep license Ordinance of this county, has been duly submitted to the Supreme Court, from which a decision may be looked for almost daily, if those Judges are not as long winded as Judge Toohy, of San Francisco.

The Monte Cristo Mill is running satisfactorily, crushing some 25 tons a day. A small shipment of bullion was made a few days ago, but we are unable to give the value, any more than it was worth $12 an ounce. No cleanup has yet been made. A strong force is working the mine, and good ore is coming out.

George Vansickle is sinking a shaft on the Freeze Out, on the Monte Cristo ledge, between the Monte Cristo and Widow Dunn claims. At a depth of twenty-five feet he struck a six inch vein of good ore. As an extension of the Monte Cristo, that Company may want to extend its domains and take it in in due time.

The Fairs.

Arrangements should be made in due time to make a fitting display at the two State fairs, at Reno and Sacramento. We could send an exhibit of fruits, especially peaches, that would be unexcelled anywhere. At the time the fairs are held our fruit will be at its best; the different varieties of pears, peaches, nectarines, grapes etc., will then be fully matured. Such an exhibit, especially at Reno, where a place of honor has already been won for us, would be a great benefit, as showing the unrivalled qualities of the soil and climate of Owens valley for fruit growing, than which no branch of farming industry pays so well to the acreage and capital invested. It will certainly be an inducement to settlers to come where land capable of producing such fine fruit can be had so reasonably as here, and which in a few years will increase in value many fold.

Ore Returns.

EDITOR INDEPENDENT:—Just heard from first lot of horn silver, viz., 3¼ tons shipped to make up a carload with balance of base bullion on hand. I copy Selby's returns: Silver per ton, 490 ozs.; gold, $48 90 cents. Am pleased to report as above.

Yours Truly,
F. FITZGERALD.

Mr. J. G. Birchim, of Round Valley is in town. He reports the grain crop to be a good one, and matters and things progressing nicely in his section.

HALE BROS. & CO'S. ADVERTISEMENT.

To those who wish to order by mail we say:

Look Out for Our Fall & Winter Catalogue, to Be Issued the First Part of September.

It comprises the latest styles and ideas; is the most complete ever issued and we expect extraordinary results.

We are the largest Consumers of Goods on the Coast, and buy direct from the Manufacturers, thus ennabling us to give Most Advartageous Prices to you.

In 1880 we started in an unpretending way at 812 K street; we did not doubt the future since our stores increased with a rapidity that astonished us, necessitating improvement after improvement, all aimed toward having a splendid structure in Sacramento at some future time That time has come. To-day we are adding 20x80 feet to the rear of our present large establishment, and building two more stories over the 80x100 feet. The carpenter's busy hammers are heard from morn till night, sending forth a tune of enterprise from one end of Sacramento to the other, in encouraging tones of comendation; when completed we will have the largest and most magnificent store in Sacramento.

We are ready for a large order trade.

We are going to have it.

We will give prompt attention to all orders.

We will not be undersold.

Send for our new Illustrated Catalgue.

HALE BROS. & CO.

Sacramento, Cal.

829, 831, 833, 835 K St. and 1020 Ninth

Quite a number of Tulareites are in the Kings river country.

Mount Williamson, towering above Independence on the southwest, is the grandest peak in the United States. It reaches an altitude of 15,000 feet, a large portion of the northern side being a sheer descent. Two of the three peaks are inaccessible and but two parties have ascended the other.

In the Silva case the Supreme Court has denied the petition of the plaintiffs for a rehearing of the suit to compel Wells, Fargo and Co. to pay over to Silva a certificate of deposit. Unless an appeal shall be taken to the Supreme Court of the United States the money will now have to be paid to the Attorney of Silva, R. S. Miner Esq.

A large camping party started for Onion valley on Tuesday. Among the number were Mrs. J. W. P. Laird and aunt, Mrs. O. I. Mairs, Mrs. S. T. Thurston, Charley Thurston, Arlis Mairs and "kids" innumerable. The valley is a lovely spot and the campers will be sure to enjoy themselves. Another party went up this morning.

The town of Lundy, Mono county has been partially destroyed by fire. The conflagration originated in the May Lundy Hotel and, there being no means of stopping its course, spread rapidly through Main street, destroying everything in its way. As there is a number of vacant houses on the outskirts of the town, and one of the larger stores escaped, the privation will not be great.

There is a determined band of train robbers in Arizona and Texas. So far the authorities have been unable to apprehend a single member of the gang. After the recent robbery a troop of soldiers was put on the trail but they failed to overhaul the robbers. The express car was forced open with giant powder and a large sum of money taken out. One thousand Mexican dollars was left on the trail as too cumbersome to carry.

The railroad slaughter at Chatsworth, Illinois, was one of the worst that ever occurred. It is too dreadful to think that such wholesale destruction of human life was planned and carried out for the purpose of robbery. And yet there were men at hand so fiend like in nature as to begin the work of robbing the mangled victims only a few minutes after they were killed. No beast so cruel as a human being without conscience.

It is well worth while to walk through the orchard of Mr. John Baxter. No handsomer fruit pictures were ever seen than his trees now show. Peaches of the loveliest colors hang in great clusters; crimson nectarines, apples like gold, and pear trees loaded so heavily that the limbs bend down till they rest upon the ground. Thousands of acres of as good land as Mr. Baxter has got lie uncultivated all over Owens Valley. This is destined to become the most noted fruit region in the State.

A few days ago Mr. Levy had a letter from a friend telling him that the man who stole his mare had been seen in Long valley. It would appear that the thief had turned back after passing Lone Pine and went north through the valley again. When seen in Long valley he was riding a horse that is known to have belonged to Mr. C. B. Rawson. The presumption is that the thief rode Mr. Levy's mare till the animal became exhausted, then turned her loose or traded her off and stole the animal belonging to Mr. Rawson.

A large camping party returned to Lone Pine on Wednesday from Kings river. They had plenty of sport; no end of fish and venison, and one or two bears, not to speak of a fine sheep dog which Billy Grant avers was shot through by two hunters previous to climbing a tree to escape the attack of the supposed wounded bear. The dog managed to get to camp and died during the night.

Another Failure To Agree.

After being out all night, and it being plain they could not agree upon a verdict, the jury in the Hood case were discharged by Judge Hannah on Saturday morning. It is understood that the jury stood seven for conviction and five for acquital. The only witnesses to the shooting were the accused and the harty shot at. Under such circumstances it is well nigh impossible for a District Attorney to secure a conviction. This being the second trial in this case with the same result, and it being evident that a conviction cannot be secured, surely it would be best not to put the county to the expense of a third trial, but to ask that the prisoner be discharged on the ground that it is impossible to get evidence enough to secure a conviction.

Railroad Extension.

The want of railroad communication with Los Angeles is becoming more severely felt every day. In the near future the chief source of income of Owens valley settlers will be derived from the sale of the unrivalled fruits of Owens valley. To reach a suitable market a southern outlet is needed. We will then be in a position to compete successfully for the entire southern market. Such a railroad would be of more material benefit to Los Angeles than to us, and of this fact the Los Angeles people are becoming aware. There is not the least doubt that such communication will be effected in the near future. The recent visit of Mr. H. M. Yerington and other railroad men to Keeler may be regarded as favorable to this much desired result.

Ranch for Sale.

At Black Rock, twelve miles north from Independence, 520 acres of land for sale. Black Rock is one of the very best parts of Owens Valley. Four hundred acres of this land is held under U. S. patent; the remainder is located under the timber culture Act. One hundred and eighty acres are enclosed by a fence of cedar posts and barb wire Sixty acres are now under cultivation, mostly wheat, oats and barley. A large amount of hay can be cut; blue joint, red clover etc. Several large springs of pure water on the place and good water rights additional. House, outbuildings and corrals. C. & C. railroad half mile distant from east line of land. Owens river eighty rods distant. This is a fine place for an energetic man to improve and will be sold at a bargain. Apply to

C. MULHOLLAND,

161 acres well improved with good dwelling and out-houses, farming machinery, horses, cattle, etc. Located in the most desirable portion of the valley, Good water title. For further particulars inquire of

C. A. LEVY, Bishop Creek.

Working Classes ATTENTION!
We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5.00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

Bee Keeper.

HUMANITY A UNIT.

"A Wonderfully Beautiful Creature of the Grace of God"—The Possibility of Grace.

Grace is the beautifier of the soul. Luther says: "A Christian is a wonderfully beautiful creature of the grace of God." Is there no loveliness in the sweet humanity that, though adorned with many a grace, sees no beauty in itself, in admiration for the good it sees in others? Is there no attractiveness in the benevolence that can give "to the unthankful and to the evil, hopping for nothing again?" Is there no brightness in a character that is the embodiment of integrity, and that would rather suffer the loss of all things than deprive another of the smallest of his rights? Is there nothing charming in a spirit of forgiveness that, in place of malicious retaliation, shows mercy and loving-kindness and pours out its tender heart in prayer for the enemy and the oppressor? Is it not refreshing to meet with those in whom all self-seeking is dead, and who live simply to go about doing good? Is there nothing beautiful in the love that can persist in loving in the face of bitter hate, and willingly undergoes all kinds of suffering if only those inflicting it may at last be saved? Is there not a positive splendor in the consecration of a life to the uplifting of the fallen and the recovery of the lost? Is nothing to be admired in the "white flower of a blameless life," or the blending of a stern principle that could die for truth, with a gentleness that can shed tears over the suffering of a child. But the fact is, these are only a few of the features of the beautiful character of those who are Christ-like.

And to this we are "called." This is a possibility of grace. We can be saved into this and up to this. The "body of sin can be destroyed." But it can only be done by a holy nature taking its place. And that holiness is conformity to Christ, "the holy One of God." Blessed church, when all its members, by being saved from sin, have put on the Lord Jesus Christ.—*Guide to Holiness.*

WHY THE "ROYAL" IS THE BEST.

The improved method by which it has been made possible to produce pure cream of tartar, has had an important bearing upon the manufacture of baking powder. By the process heretofore generally employed, it has been found impossible to remove all impurities, more particularly the tartrate of lime, which remained to such an extent as to greatly impair the quality of the cream of tartar, and to interfere seriously with the strength and wholesomeness of the baking powders into which it entered.

In the new process, which is owned by the Royal Baking Powder Company of New York, and exclusively employed in its extensive tartar works, the imported crude grape acid is so treated as to remove all vestige of tartrate of lime or other impurities, giving a product before unknown—a chemically pure cream of tartar.

By the employment of these superior facilities, the Royal Baking Powder Company has made the Royal Baking Powder, as the chemists all certify, of the highest possible degree of strength, "absolutely pure" and wholesome, and with an always uniform leavening power. It is for these reasons that the "Royal" never fails to produce bread, biscuit, cakes, etc., that are light, sweet, digestible, and wholesome; the eating of which is never followed by indigestion, or any of those physical discomforts attendant upon the partaking of improperly prepared food. In rendering possible the production of a baking powder possessed of these qualifications, the improved method of refining cream of tartar becomes at once a matter of material importance to the culinary world.

USELESS PERSONS.

The Inertia of Motion as Dangerous to Success as the Inertia of Rest.

An inert person is likely to be a useless person. Motion is not necessarily progress; action is not necessarily accomplishment. One may be as truly inert in action as in inaction. Among philosophers, inertia is that tendency of matter to remain in the state in which it has been put. Once at rest, it continues at rest; once in motion, it continues with the same motion—until acted upon by some external force. Most persons are troubled with inertia. If they are at rest, they need some one to rouse them into action. If they are in motion they need some one to vary the speed, or change the direction of, or stop, that motion. He who waits for an external force to cure his own inertia, will not be very likely to be much of a force in helping to cure the world's inertia. By slacking your own speed, you may draw some one else into action. By increasing your speed you may push some one else into action. There is no virtue in motion unless you move something; no virtue in action, unless you act upon something. If you would be of use in the world, avoid the inertia of motion as well as the inertia of rest.—*S.-S. Times.*

The Bones of Marshal Ney.

Sensational reports have been sent from Salisbury, N. C., that the remains of the famous Marshal Ney, who commanded the Old Guard at Waterloo, lie buried in the soil of that State. It is said that a man named Peter S. Ney came to North Carolina in 1816 and died there. Many of his old friends insist that this man was Marshal Ney. It was said that Ney's skull had been trephined, and an examination of the remains would prove conclusively that the remains were his. The remains were disinterred and found to have crumbled into dust, and it was impossible to ascertain whether or not the skull had been trephined.—*Chicago News.*

—The "beautiful" Indian maiden, thinks a writer to the Philadelphia *Press*, is generally a big, fat, dirty-looking creature, with a blanket around her that comes to her knees, bareheaded, with moccasins on that she generally pulls off when they are worn out. The blanket is fastened at the neck and also with a belt at the waist. One thing they have, the most beautiful, pearl-looking teeth.

A DREARY COUNTRY.

Interesting Account of the Hudson Bay Region and Its Inhabitants.

Those who have never seen life as it exists among the inhabitants of the Hudson Bay country would be astonished at the extent of civilization among a class of people generally supposed to be savages, as well as at the awful grandeur of the scenery and forbidding aspect of the graveyard coasts along the shores of that northern sea. In all the uninhabitable region of North America there is nowhere to be found a more bleak, desolate, or dreary waste than that between Ungava Bay, off the coast of Labrador on the east, and Fort Churchill, on the west and southern part of Hudson Bay proper. Although little is known yet regarding this weird and frozen region, it has had a growth within the last half century which has been something phenomenal, and having been measured according to its needs by the God of Nature has gone on advancing from age to age, until at the present time, not alone the more fertile islands, but the extent of land back from the coast on either side, is thickly populated by a people who hunt and fish and talk and chatter even among the misery and destitution which life in a region of perpetual frost and snow must bring. Hudson Bay itself is really an island sea, extending between latitude 51° and 64° north, and longitude 77° and 95° west, and while about 1,000 miles long at its greatest distance, is only about 600 miles in breadth, covering an area of over 500,000 square miles. It is navigable only for about three months in the year—from the middle of June to the middle of September—and for the remainder of the year is filled with drift ice, which renders navigation, even for a short distance, an absolute impossibility. The eastern coasts of the bay are sights to be admired, cliffs rising in many cases to a height of from 200 to 400 feet abruptly from the water's edge, and, being composed of a glacier-like substance which, being ever coated with ice and frozen snow, shine in the sunlight until it is almost impossible to look at them for any length of time. The residents of this section are not properly Esquimaux, but a cross between this race and the French and Indians, who have come in for the purpose of hunting and fishing, and finally settled down among the natives to live as they do and share with them in the privations which no other life affords. On an average, in the summer months, the thermometer stands at about 45° above, while the temperature in the winter runs as low as 60° below zero and will average about 25° below. Fish are scarce and can be caught only in the rivers, of which on the east there is only the Great Whale, while on the west there are the Hayes, Nelson, Churchill, Moose, Albany, Weeknish, Main and Abbitibbe. Seal abound in plenty, but are extremely shy and hard for the natives to get at, while porpoise and walrus are equally difficult to get hold of. Were it not for the small fur-bearing animals which are about the shores the poor half-breeds would stand a very good chance of perishing by hunger, as they can expect nothing in the way of favors from the Hudson Bay Company's stores, a few of which are along the coast. The natives live in little villages composed of from fifty to one hundred rude huts. Each community has its place of worship and its church burial ground, which is consecrated by the Moravian missionaries, a few of whom are to be found wandering about from village to village, from the eastern extent of the settlements down as far as Fort Churchill on the west. These faithful, beloved men expect no recompense for their services, and if they did they wouldn't get it, for there is not in all the country such a thing as money, the only exchange being in fish, oil or furs. Whenever one of a tribe dies the rest of his family—meaning by that the entire settlement—stop work for the day and prepare to bury him. If the settlement possesses such a thing as a dinner bell, and the most of them do, the oldest man in the village goes about from hut to hut and rings the bell in front of each until the occupants come out, both big and little, and, falling into line, march after him. When the circuit has been made, and big and little are all collected, a march is made for the kirote, as it is called, the village church, which consists of about an acre of ground simply inclosed by a wall of stones near the middle of the community. Into this little field go the entire populace, and after chanting the virtues of the dead for some hours, the corpse is taken away on a skin rack and covered with ice and snow in the common burial plot. The rest of the day is spent in rejoicing, and the next day, if the deceased was married, his better half makes another choice, and at the end of a week, if an agreement be come to, the dead is forgotten and the no longer sorrowing ones begin life over again.—*Cor. Pittsburgh Post.*

Methods of the Dudes.

The old clo' man could, if he would, tell curious secrets of well dressed humanity. Most of us can recall transactions with this peripatetic trader, in which, after treating with contumely each individual piece of a not inelegant wardrobe, he lugged off the garments and left with the seller a pitifully small sum in exchange. The gilded youth does these things better. His old clothes are but technically old, as the young soldier of a few years' service is technically a veteran. He never wears a garment longer than a few weeks, and he sells it for a fair percentage of the original cost. He gets long credits from his tailor and cash down from the old clo' man. He thus contrives to be always well dressed at a comparatively moderate cost. It is told of a great ready made clothier's son that the young man appeared in a new suit at least once a month. He wore his garments carefully, and after they had been pressed and cleaned returned them to his father's stock to be sold as new to an unsuspecting public.—New York Letter.

Playing Marbles.

In nearly all the Sussex villages not only boys, but grown up and even very aged men, play at marbles on good Friday. It is considered as wrong to omit this solemn duty as to go without the Christmas pudding, etc.—Notes and Queries.

TRYING TO CAPTURE CARLOTTA.

A Mexican General's Story of His Attempt to Take the Empress Prisoner.

In 1873 I was coming from the City of Mexico to El Paso, Tex., and by chance I met Gen. Aurellano, who is now a member of the national congress in the City of Mexico. We began to talk of the improvements of the country and on other topics. When we passed the City of Queretaro, where Maximilian was made prisoner, I mentioned the incident about the Empress Carlotta in 1866, and he said: "Yes, it was I who made the attempt to capture her." "Will you explain to me how it was, and what your intentions were, general?" "Yes," he answered. "You may remember," he said, "the decree of Oct. 3, 1865, issued by Maximilian and his ministers, and which read: 'Every Mexican caught with any weapon in his hands shall be considered as a bandit and shall be executed immediately.' It is said that Maximilian himself was opposed to this decree, but, influenced by Bazaine and the Empress Carlotta, was compelled to issue it. Now, by this merciless law we lost the bravest of our soldiers and the best of our generals.

"In May of 1866 the well known and perhaps the best of our guerrilleros, Nicolas Romero, was taken prisoner in Jalisco and brought to the City of Mexico, where, together with others, he was to be shot on the 6th of June. I had a great regard for this man, brave in battle and merciful with his prisoners, and I resolved, at the risk of my life, to save him. I was commanding 1,600 men; my headquarters was the Mount of San Juan, which you know is not far from the capital; I chose sixty of my bravest men, and, favored by the darkness of the night of the 5th of June, I led them through the forests of the road connecting the castle of Chapultepec with the capital; I hid my men and myself in a small river along the road; I knew the empress had to pass between the hours of 6 and 7 in the morning, as she was accustomed to take a ride every morning at that hour from the city to the castle. My intention was to capture her, and by doing that I was sure to rescue my great friend. I also knew she had with her ten or twelve men, but I had six times that number, and what gave me confidence was they did not expect such an attack.

"I waited. The hour came, and I said to my soldiers: 'Don't hurt the woman on a white horse, but try to capture her.' Just then Charlotta came in sight, and with the cry to my men, 'For Mexico!' we sprang to the bed of the road, and a hand in hand struggle at once began. The empress, to my surprise, instead of fleeing toward the castle, as I expected she would, turned to the city. I followed her closely—very closely. I was about to catch the tail of her horse, but by that time I was at the gate of the city, and before 200 or more French soldiers, who were thunderstruck at the sight of their empress passing like lightning between them. The captain commanding this body of soldiers was Boulanger! I took advantage of their surprise and returned to my men. The empress owed her life to the beautiful mare. Indeed, that mare beat my horse and saved her mistress. When I reached the place where my men were, all the French soldiers with the exception of one, the captain, were lying on the road, some killed, others wounded, and a woman was lying also on a zarape of one of my soldiers. I told the captain to take care of his companions and the woman, and ordered my soldiers to retreat to the Mount of San Juan. I was unsuccessful, but even now I feel conscious of having done all in my power to rescue a dear friend."

The general was so affected that I did not press the subject any further.—C. Olivares in Cincinnati Commercial Gazette.

Wonders of the Miocene Age.

Were we, in vision, to behold that wonderful Miocene age, where as yet no traces of man have been found, when vines and magnolias grew in northern lands, palm trees flourished along the Hudson river, and long armed apes were swinging in British, French and German forests, we are warranted in believing that we should see birds and quadrupeds simpler and less interesting than those which now exist, with habits and instincts less complex than those of their surviving representatives which have been for ages exposed to a struggle for life with man, or which have been trained to man's service.

To look upon that pre-human world would be like looking through the oceans of the present day. Hunger, fight, flight and feeding we should have. The horn, the mailed coat, the heavy hoof, the poisoned fang, the muscular embrace, the terrible tooth and beak would be there doing work which is accomplished now in these more populous times by bodies diminished in size and brains increased in bulk. An examination of mammalian skulls, from their first appearance in strata onwards, lends countenance to this argument; that there has been, on the whole, a mental improvement among the birds and quadrupeds of the northern hemisphere.—George Jackson in New Orleans Times-Democrat.

Ten Rules for Bathers.

When suffering from violent excitement, do not bathe.

Undress slowly, but then go directly into the water.

Take your time on the way to the bathing house or beach.

On arriving at the beach inquire about depth and currents of water.

Do not remain too long in the water, especially if not very robust.

After meals, and especially after taking alcoholic liquors, do not bathe.

When suffering from suddenly occurring or from continued illness, do not bathe.

Jump in head first, or at least dip under quickly, if you do not like to do the first.

After sleepless nights or excessive exercise, do not bathe, unless you first rest a few hours.

After bathing, rub the body to stimulate circulation and then dress quickly; then take moderate exercise.—National Druggist.

Interesting Signaling Apparatus.

A highly interesting signaling appartus has just been examined at the Station Montparnasse, Paris. On opening the door of a compartment a bell box in the guard's van indicates the number of the carriage, of the compartment, and at which side the door was opened. When the train stops all doors instantly open on the side the passengers have to alight; should any door on the opposite side be opened it would be signaled by the bell ringing. In case of danger, communication can be made without opening the door by simply pressing on a knob, with the same effect.—Frank Leslie's.

The man who is always in a hurry leaves a great many things behind him.

RUSSIAN GIRL STUDENTS.

The Desperate Effort Made by Them to Secure a Little Education.

The attempt on the Czar brings the Nihilists again to the fore, and will have the effect of exposing the Russian lady students here to much nagging police espionage. One rarely sees them unless in the Quartier Latin, although I came across a nest of them a short time ago in a hotel in the Cours de la Reine. Quakers could not have been more plainly dressed, and most of them had their hair cropped. They were good musicians, and one and all hardened smokers. Russian girls take to the fragrant weed like Kalmucks. I am not sure that their air of quiet, settled sadness is due to impecuniousness. A studentess told me that the only cheery ones among them are Jewesses, and that they are not very wealthy; but they meet with moral, and, indeed, often material, support from persons of their race settled in Paris. I also learned from her that not a few of her companions are girls of influential families, and that they have broken away from home and come here under assumed names to study. The difficulties with which some of them had to contend in making their way here would strike you, were I to relate them, as belonging to the domain of romance. What do you think of the daughter of the Governor of a province who was sent south by her family to be out of the way of restless spirits with whom she came into sympathetic contact in Moscow, working her way as a cabin boy to Varna? She there entered a hotel as "boots," stayed some time, and, when she had money enough to buy a suit of clothes suitable to her sex, took service as a nursery-maid in a family about to start for England. When there, she was engaged as a nursery governess in a noble family, and was taken to the country-seat of some cousins of her own, high in the English peerage. But they had no idea who she was. As soon as she had saved a small sum she came to Paris, and before she could find a lodging, she used to pass her nights in a casual asylum. Being a person of first-rate education, she now prepares girls wanting to be admitted to the new high schools. The place where she resides is a big loft over a cart-maker's shed, which has been fitted up as a dormitory and living-room for about twenty studentesses. Another loft serves as a refectory, where meals are cooked at a large stove. Each studentess takes a turn at cooking. The tables on which dinner is served are made of boards placed on trestles. When the plates and dishes are removed in the evening, all sit down to study. The brain of the Russian girl is a receptive one, and retains what it takes in. I don't think that the studentesses I describe are engaged in dynamite conspiracies; but they wish well to those who are.—*Paris Cor. London Truth.*

OFF FOR EUROPE

Two Men Now Realizing the Bright Dreams of Their Early Life.

Zach Messenger, the owner of the unpretentious little barber-shop at 315 Bush street, is not at his post of duty these days. He left two days ago via the Canadian Pacific Railroad for Europe, taking his better half with him, and intending to be gone five months. It is only a brief time since Mr. Messenger had no such notion in his head as doing a foreign land. An attache of the little shop yesterday told an *Examiner* reporter how it was he happened to change his mind.

"You see," he said, "Zach has been having quite a struggle of it for several years, although he is an old San Francisco boy, and has had a pretty fair trade. But his expenses were heavy, and most of the time he just about kept even. But he could always spare a dollar or two in any little enterprise that promised a profit. So it was that he got to taking a ticket a month lately in the Louisiana State Lottery. Well, in the drawing of April 12th last, he pulled out one-tenth of Ticket No. 67,060 for $15,000, and was promptly notified to this effect.

"He went straight down to Wells, Fargo & Co. and got the sum mentioned. Pleased! I should say he was. He said since he'd been so fortunate he'd just take a little trip off. Oh! yes, he takes more than one ticket now, as do most all who know Zach."

Another tenth of the $150,600 prize was won across the bay at Oakland at the same drawing. It soon became known that A. Mousson, a bachelor of 40 who had been trying all his life hitherto to win a fortune, was the lucky man. Mr. Mousson had conceived the idea that he could not do a better thing, as he went along, than to invest in a ticket or two. Now he considers it the best move he ever made in his life.

For some days he has been receiving the congratulations of his friends, and now he is casting about to carry out some of the many bright plans of his early life.

It is rumored also that when he goes upon a trip to the Neckar, as it is possible he may, he will not go alone, and that the trip will be all the more enjoyable on that account.—San Francisco Cal. *Examiner*, May 4th, 1887.

Said Jenkins: "My duty I ought not to dodge;
To stay from lodge isn't right."
Said his wife: "But whenever you go out to lodge
You manage to lodge out all night."

NIGHTMARE,

sick-headache, depression of spirits and want of ambition are symptoms of a diseased liver. The lungs, stomach, and bowels are all in sympathy. Life is only a living death. Dr. Pierce's "Golden Medical Discovery" acts upon the torpid liver, and effectually removes all these difficulties and disorders. Nervous feelings, gloomy forebodings, and irritability of temper all disappear.

There was once a fair maid of South Vernon,
Who'd a hat with a big bunch of fern on;
The crown stood up straight,
Two pounds was its weight,
With a brim that an engine could turn on.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

AN AROUSED COMMUNITY.

The Unusual Stir Caused in Kingston, New York.

Special Correspondence Boston Globe

The letter I recently wrote the *Globe* describing a remarkable occurrence which took place here has had the effect of thoroughly awakening this community. The facts, as described, were that Jere Smith, son of Cornelius B. Smith of the State Insurance Department, after passing through an agonizing ordeal, and having been abandoned by his friends, had been most wonderfully rescued. His experience was, in its beginning at least, almost the same as that of hundreds of other men and women in every city and town. He had gone along thoughtlessly, noticing only occasional inconveniences, and had suddenly been awakened to the fact that death was staring him in the face. He had overlooked little passing troubles without realizing that they are often "the beginning of the end." He had neglected interests that concerned his very life, just as thousands of others do, simply because they come in a quiet and often unnoticed way. And it is cause for gratitude that his experience is having so good and arousing an effect on others who were drifting in the same dangerous direction.

BEGINNING OF THE END.

I was in the office of the Kingston *Freeman*, one of the best interior papers of the State, the other day, and had a talk with W. H. Winton, its popular manager. Quite naturally the conversation drifted to Mr. Smith's case, and the stimulating effect it was having on the people. Mr. Winton said:

"I can specially sympathize with Mr. Smith for I have been through a much similar experience in my own family. My wife became troubled and weakened, as so many women do, and from small symptoms and beginnings grew worse until she finally began to bloat terribly. She had been attended by physicians, sometimes with temporary success, usually without. We finally determined to try the same means which Mr. Smith employed so successfully, and my wife is not in her grave, but in the enjoyment of health wholly because Hunt's Remedy rescued her. This is a grand medicine and a large suffering world, too often ignorant or skeptical of its life saving, healthy giving qualities, needs it."

PRESCRIBING.

"It is certainly receiving wonderful indorsements" I remarked. "Do you think it merits them."

"Every one of them. Why, when my wife began using the remedy she discovered the same medicine had been given her by a physician some time ago without her knowing the name of the medicine given at the time. I can also prove that bushel baskets full of empty bottles of Hunt's Remedy were taken out of a doctor's office after his death. No one supposes for a moment that the bottles were used for desk ornaments or bric-a-brac, but the contents had undoubtedly been given to patients in small quantities at high prices. The medical profession evidently knows no better or more valuable remedy."

Mr. Cornelius B. Smith, the father of Jere Smith, confirmed all the son had said and added: "I have not words strong enough to give Hunt's Remedy the praise it merits, and there are hundreds of others in this city who feel the same way."

"TOWN TALK."

Mr. Edwin H. Fassett said that the facts above given had been the "town talk" of Kingston, and his assertion was confirmed by William D. Prennier.

Messrs. Cooper and Winchell, who are popular druggists, declare that not only are all the facts above stated true, but the demand for the remedy is something remarkable. It has become a household necessity here, as it undoubtedly deserves to be everywhere.

WINTHROP.

The cheapest thing in straw hats this season is the head of a dude.

Young or middle-aged men suffering from nervous debility and kindred weaknesses should send 10 cents in stamps for large illustrated treatise suggesting sure means of cure. World's Dispensay Medical Association, Buffalo, N. Y.

The young lady who pounds the piano has a disagreeable bang.

No Opium in Piso's Cure for Consumption. Cures where other remedies fail. 25c.

If afflicted with Sore Eyes, use Dr. Isaac Thompson's Eye Water. Druggists sell it. 25c.

Cuticura
A POSITIVE CURE
for every form of
Skin and Blood
Disease
from
PIMPLES to SCROFULA.

SKIN TORTURES OF A LIFETIME INSTANTLY relieved by a warm bath with CUTICURA SOAP, a real Skin Beautifyer, and a single application of CUTICURA, the great Skin Cure.

This repeated daily, with two or three doses of CUTICURA RESOLVENT, the New Blood Purifyer, to keep the blood cool, the perspiration pure and unirritating, the bowels open, the liver and kidneys active, will speedily cure

Eczema, tetter, ringworm, psoriasis, lichen, pruritus, scall head, dandruff, and every species of torturing, disfiguring, itching, scaly and pimply diseases of the skin and scalp, with loss of hair, when physicians and all known remedies fail.

Lydia E. Pinkham

The Woman's Sure Friend

IT IS A BLESSING TO OVERWORKED WOMEN. IT REMOVES FAINTNESS, FLATULENCY, ALL CRAVING FOR STIMULANTS, AND RELIEVES WEAKNESS OF THE STOMACH. CURES LEUCORRHŒA, MENSTRUAL PERIODS PASSED without PAIN.

Sold by Druggists. Price $1. per bottle.

TRUE ESTIMATE OF VALUE.

Remember that when we assert the value of BRANDRETH'S PILLS we at the same time refer you to the thousand of testimonials we have published supporting all and even more than we claim. The best evidence of their value lies in these testimonials. The PILLS have been in use in this country for over fifty years and in that time have surely been well tested. We never heard complaint of them. They are harmless, being vegetable, and always do their work well.

A large head is a sign of brains, but a big head is a sign of folly.

WHAT WOULD THE WORLD DO

without woman? asks the essayist who starts out to say something new on this oft-treated subject. Of course, the human element of the world would not exist without woman, so the question is gratuitous. It would have been far more sensible to ask: What would the world do without the salvation of woman, without a panacea for her physical ills and cure for her peculiar diseases. In a word, what would the world do without Dr. Pierce's "Favorite Prescription," the great remedy for female weaknesses? It is indispensable for the ills of womankind.

The blowing adder is a handsome snake, but as lazy as a mud-turtle. One touch of his tooth, though, is always worth $10 to the Coroner.

"Brown's Bronchial Troches" are widely known as an admirable remedy for Bronchitis, Hoarseness, Coughs, and Throat troubles. *Sold only in boxes.*

Try Germea for Breakfast.

ROYAL

BAKING POWDER

Absolutely Pure.

The Powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low-test, short-weight, alum or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 106 Wall Street, N. Y.

PHILOSOPHER DUNDER.

He Furnishes Some Good Reading for the Lazy and Discontented.

Vhell, shildren, once upon a time, you know, dere vhas a man who lifed close peside a big woods. He vhas werry poor. His clothes vhas in rags. He doan' haf so mooch money in one year ash would puy him a quart of peanuts. He vhas always complaining of his hardt lot, und he vhas always madt pecause somepody else vhas rich. Vhell, one day vhen he vhas cryin' oudt dot he vhas sick, and dat he doan' haf some luck, und dot eafery pody else vhas all right but him, a leedle oldt man comes out of der forest und says to him:

"Vhas your name Hardt Luck?"

"Yes, dot vhas my name, und I vhas so discouraged dot I shoot myself. If you vhas a fairy I like you to help me along."

"Certainly. Shust you come oudt mit der woods."

Vhen Hardt Luck goes out mit him he finds himself tied oop mit a tree pooty queek, und some more oldt mans come around mit switches und gif him sooch a licking as nefer vhas. Den der first leedle oldt man unties him und says:

"Your poverty comes from your laziness; your hardt lot vhas your own fault; your sickness vhas pecause you doan' shweat. I like you to remember dot one week of hardt work beats fife years of luck. You must learn der plain lesson dot vhen a man doan' help himself nopody else vhas responsible for his troubles."

Und, shildren, dot vhas shust der vhay of it. If you see some mans who vhas always kicking und complaining und telling of his hardt luck, you may pet he vhas all to plame for it, und der sooner somepody boots some ambition into him der petter he vhas off.

Vell, once upon anoder time a man who lifs py a farm mit his wife, und haf some cows und sheep und pigs, und vhas all right, vhas going home from his day's work vhen he meets an old womans in a black cloak. He vhas going past her, but she shtops him und says:

"Poor mans, I feel sadt for you dot you haf to work so awful hardt. On der sea shore vhas a big treasure. Vhy doan't you go und find him und be a rich man."

Vhell, dot man skips home to tell his wife und all night long nopody shleeps a wink. He goes oudt in der morning und looks und looks, und eafery day und eafery week he looks und digs und vhalks aroundt to find dot treasure. His fields grow oop mit weeds, his cows und pigs und sheep vhas soldt off, und vhen he comes home he quarrels mit his wife pecause he doan't find dot money. One day vhen der sheriff sells him oudt und his wife runs off, dot oldt womans meets him again, und he vhas so awful madt dot he like to kill her.

"My frendt," said der oldt womans, "it vhas through you dot I like to teach der worldt a lesson. He who vhas content mit vhat he has vhas rich. He who has plenty for all his wants vhas a fool to run after dot which is buried out of sight. Vhat you got by honest toil brought happiness; vhat you hoped to acquire through luck has brought you to poverty and wretchedness."

Und, shildren, dot vhas all aboudt it.
—*Detroit Free Press.*

HISTORY OF WATCHES.

The Cumbersome Affairs Carried by Our Remote Forefathers.

Watches were originally made of steel and iron. No glasses were used until about 1615, the cases being wholly of metal, and to admit of readily seeing the time the cover of the face was sometimes perforated in elegant designs. Instead of the form now universally adopted, various styles of casing were employed, such as globular, octangular, cruciform, skull, acorn, pear, lemon, tulip, bird, and in fact, nearly every imaginable shape that ingenuity could invent or caprice suggest, and as a consequence of this and the fact that many of those watches were provided with striking movements, they were so bulky that it was inconvenient to carry them in the pocket, and they were hung at the girdle with swivels, so that their faces could be readily turned for observation without being removed from their position. The hairspring was not introduced until about 1658, and was a great improvement on the early watches. About a century later the smallest repeating watch ever made was presented to George III. of England. If was smaller than our silver half-dime, and weighed only five penny-weights and one-eighth grains. It was necessary to make a set of minute tools for its construction. For this watch the manufacturer received a present from the King of 500 guineas (about $2,500), and it is reported that he was afterward offered a thousand guineas to duplicate it for the Emperor of Russia, but he refused it, so that his gift to the King might remain unique. A smaller watch than this, however, formed a part of the Swiss exhibit in the World's Fair of 1851, but this was not a repeater. It was only three-sixteenths of an inch in diameter, and was set in the end of a pencil-case. It not only gave the hours, minutes and seconds, but the day sof the month also.—*School Record.*

—An Italian traveler, Prof. S. Sommier, finds that the northern limit of the Siberian forest region is retreating southward, on account, he believes, of increasing moisture of the climate of Arctic Asia. In many districts the trees have been succeeded by extensive tracts of water-saturated moss.

FUNERALS IN MEXICO.

How an Enterprising Stockholder Made His Street-Car Shares Pay.

In the City of Mexico every body rides. They patronize the street cars when a carriage can be obtained cheaper. That is one can get a carriage for 25 and 50 cents an hour, when one knows how to do it. The street car fares cost 12½ and 25 cents, yet the cabman sleeps on his elevated post of honor while the cars overflow at both ends. The cars in the City of Mexico run on ninety miles of rails and last year carried 9,500,000 passengers. The company owns 2,000 mules and horses, 175 first-class coaches, 85 second-class, 50 platform or freight cars and 36 funeral cars, according to the statistics furnished me. They pay an annual dividend of 6 per cent. on a capital of $5,100,000, yet they rival the Interstate Commerce bill on their liberality with passes. In a whole year only six were issued, and they were given to Government officials.

All the cars start from the Zocalo, the center square of the city, which faces the palace and cathedral, and was designed and laid out at the command of Carlotta, Maximilian's unfortunate bride. No car ever runs single. They all travel in trains of various lengths. The drivers say it is to protect themselves from bandits, who might otherwise overpower the passengers on one car and rid them of their earthly gain. Every car has two drivers, a conductor to sell tickets and another to collect them. This is to prevent cheating. At every corner the drivers blow a horn to warn pedestrians to clear the way. The mules go at a break neck speed, while the drivers apply the whip vigorously. Very seldom more than one mule is used in a car, as the city is level, but that one slender mule will carry an immense load with a speed which would turn a Kentucky mule gray with envy.

When the street car line was first opened in Mexico, an enterprising stockholder, Senor Gayosso, bought up all the hearses in the city. He then had funeral cars built for the tracks, and procured the sole right to prepare passengers and haul them to their last resting-place. He is to-day one of the wealthiest men in Mexico. The first-class funeral cars for adults are built of fine black wood. A raised part is in the center of the car on which the coffin is placed. A canopy, exquisitely finished, covers the entire car, the sides being artistically draped. From four to eight beautiful black horses, with long black plumes in their heads, haul this strange car.

The two drivers are dressed in fine black suits, gloves and high silk hats bound with wide crepe bands. The coffin is placed on the rest prepared for it, and all around and over flowers are placed. Following this comes a train of cars with the friends. The windows are draped with white crepe and the doors with black. A funeral train will average twenty cars and more, if it is a person of wealth who has died, but in the hundreds who follow a body to the grave can not be found one woman or a child.

I have asked the reason why no women ever attend funerals in Mexico. It is against the rules of society. Mr. Gayosso says women are not allowed to go to funerals because they cry too much. However, a wife cannot go to her husband's funeral, nor can a mother follow her babe to its grave.

There is a similiarity in all the funeral cars. Those for children are white, drawn by white horses. Those for the poor are, like other things in this world for the poor, cheap and shabby. The poor Indian can have a funeral car and two passage tickets for fifty cents by applying to the police. He can even hire a plain, unpainted coffin to carry the dead to the grave. Once there the body is wrapped in a serape and consigned to a grave which has been rented for from two to five years. At the end of that time the grave is opened and the bleaching bones are cast into a corner kept for that purpose, where they lay bleaching in the hot Southern sun, exposed to the gaze of the public.

Funerals cost from 50 cents to $2,000. One of the prettiest customs in Mexico is the universal respect which greets a passing funeral. Every man, from the millionaire to the poor-half clad peon, takes off his hat until the sad train has passed. Well-dressed senoras bow their heads and silently cross themselves, while the Indian women kneel in prayer.—*Nellie Bly, in N. Y. Mail and Express.*

Working Him Nicely.

"My dear," said a husband, who is fond of putting posers, "can you tell me why young women who don't want to get married are like angels' visits."

The lady finally gave it up.

"Because they are few and far between. Ha, ha, ha! Not bad, eh?"

"Exceedingly clever. He, he, he! By the way, John, can you let me have that thirty dollars?"

"Certainly," said John.—*N. Y. Sun.*

—There is now little doubt that 1887 will be the biggest building year that this country has ever known in railroads, factories and other houses. It is now estimated that 21,000 miles of new and 19,000 miles of old railway track will be laid this year—thus affording the iron furnaces and steel rolling and rail mills an abundance of work. The cost of these railroads is estimated at $533,000,000 for the new and $100,000,000 for the old roads—or say $650,000,000 of capital needed for the railroads alone.—*Public Opinion.*

—It is true that a grass widow is particularly susceptible to hay fever.—*Columbus Dispatch.*

A NEW INDIAN POLICY

As Proposed by Henry Guy Carleton—Soap and Spelling Books.

I confess that I regard the situation as grave and critical. There are 400 Indians, including squaws and papooses, on the warpath, and our total available force with which to resist their ruthless advance upon civilization is even less than 25,000 regular troops. Without wishing to excite unnecessary apprehension or create uneasiness in the large cities, I merely suggest it is evident that in the great struggle we can only hope for supremacy by the exercise of superior judgment and tactics, and by a desperate determination to resist the savages to the last gasp.

Although the secretary has at his call the advice of persons who have studied and mastered the Indian question during a long residence in Washington, and whose experience with savage tribes in New York, Philadelphia and other frontier stations enables them to speak with assurance, I trust he will not despise the few little hints I have brought with me from New Mexico and Texas.

The victory obtained by our forces over Geronimo is a notable precedent. This chieftain, with at least forty warriors, including a few boys and a couple of squaws, held Sonora and New Mexico in a state of siege for nearly a year. With only three battalions of cavalry and six companies of infantry, and with the support of a meager brigade of the Mexican army, we successfully prevented his invasion of the north, and when finally he ran out of ammunition and surrendered, we were almost able to guard him back to the reservation, and would have done so had he not ruthlessly broken away.

The good old days, when a territorial sportsman could go out any fine, clear morning and kill half a dozen Indians before breakfast, have passed away. It is now the policy of the government to conduct an Indian war without bloodshed, and of late years the effort has been entirely successful. The only question of moment is the one of expense. There are thoughtful statesmen who contend that to expend $2,000,000 and a year's time to capture forty Indians who would not bring a dollar and a half apiece at a sheriff's sale is unnecessary and wasteful. On the other hand, a too rigid economy might result in the Indians remaining permanently at large, and respectable citizens thereby lose their hair and become humorists, wandering north in great and destructive numbers to the terror of the inhabitants.

The real cause of the prolongation of New Mexican campaigns is the inability of officers to sit quietly down and map out the expedition in accordance with the rules of war. With a large family of red ants in the front parlor, a horned toad on the window sill catching flies, a centipede in his left boot and the uncertainty as to whether it is a tarantula or a scorpion he feels on the back of his neck, the commanding officer is in doubt whether to send for a case of paris green or a dose of bromide, and the tactical portion of his meditation naturally suffers. Then the constant necessity of keeping the bedposts deluged with kerosene is apt to make a general's calculations go wrong, and I have known the simple presence of a vigorous rattlesnake behind the post commander's trunk to break up his entire plan for a battle.

The climate is also somewhat prejudicial to military discipline and maneuvers. New Mexican hens lay hard boiled eggs all through the summer, and in midwinter the post trader cuts whisky with a buzz saw. There is more solid and substantial climate in one New Mexican day than can be found elsewhere in a year, and for an energetic officer to find his pack mules and bacon fried together at the end of a march is disheartening.

Perhaps through a desire to cater to the taste of the inhabitants nature has given New Mexico very little water. The rivers exist on the map, with the exception of the Rio Grande, which occasionally has water enough in its course to lay the dust. A "spring" is to be found here and there, loaded with alkali, epsom salts and green scum, with an occasional coyote mired in the center to give it a flavor.

The fauna of New Mexico are few, but of interest. Beside sixteen varieties of rattlesnake, twenty-one of horned toad and forty-two of lizard, there is the coyote and the greaser. The greaser is wealthier than the coyote. I have known an opulent greaser to possess two strings of red peppers, a bushel of corn, a peck of onions and seven dogs. One greaser, who lived near Fort McRae, was the Vanderbilt of the section. He had nine dogs. The coyote is so poor he cannot even afford to keep fleas.

The coyote is superior to the greaser in that he sings. Shortly after midnight I have known officers [illegible] but an indifferent ear for music to lie awake for hours listening to a chorus of coyotes, and expressing their opinion in the strongest terms. A coyote sings every night when he has no supper, and he gets a supper about once a year when he is in luck.

I have a suggestion to submit to Mr. Endicott.

Let packages of soap and spelling books be scattered through the fastnesses of the Miembres, the Sierra Blanca and the Megallon mountains. Discovering these the Indians, impelled by fatal curiosity, will try to find out their use. Soap is pernicious to an Indian. It enfeebles his constitution on the first application. Then, while the agony of his first cleanliness is upon him, he will desperately seek relief from the spelling book, and the first touch of rudimentary education will kill him. This method is cruel perhaps, but it is sure.—New York World.

THE MEANING OF TEXAS.

Correct Version of the Origin of the Name of the Lone Star State.

The Clarendon *Northwest Texan* reviews the old and never-to-be-forgotten question as to the origin of the name of Texas. That paper says:

Texas is an Indian name and signifies paradise. It was given by a company of weary and thirsty Indian travelers, who, after many days of travel under the heat of a summer sun, discovered the beautiful waters of the Colorado and exclaimed "Tchas," which the American-Texans soon pronounced Texas.

This reads very much like the story of the name of Alabama, which is interpreted "here we rest." It is about time to give a rest to the old dispute about the name of the Lone Star State. Governor Ireland was a good deal laughed at by some of the papers because in a magazine article he adopted friend or friendship as the original meaning of the word. For this he had high authority. John Quincy Adams, when United States Secretary of State, had a long correspondence with Don Onis, the Spanish Minister, on the disputed boundary question between the United States and Spain. The latter wrote, in regard to the early occupation of Texas by Spanish troops and missions, that the officer of Spain who took possession of the country on Matagora Bay stated that he met a tribe of Indians who saluted him with the word "Tehas," which, in their language, meant friendly. Some writers have claimed that the word is the Spanish one which is spelled tejas, and means roof, and was given to the Indians because they had roofs on their dwellings; but this was no novelty to the conquerors, as they found roofs common to the dwellings of the natives of Mexico. The word is spelled as many ways as it is defined: Texas, Tehas, Tejas, Tecas, etc., the original pronunciation being difficult to English-speaking people. It is said by historians that the territory now called Texas was known to the Spanish missionaries in 1524 as Mixtecapan; the people were called Mixtecans, and were thought to be descendants of Mixtecati, the reputed progenitor of the inhabitants of Mexico when the country was conquered by Cortez. It is about time to adjourn the question as to whether the present inhabitants are Texans or Texians, as they used to be called, or Texicans as a Trinity River poet in the days of the Texas revolution called them when he wanted a word to rhyme with Mexicans. The laws of the republic used the word Texian, but even the laws of an adjoining State can not compel people who have been accustomed to write the name Arkansas to spell it Arkansaw.—*Galveston News.*

PEDESTRIAN TOURS.

The Most Pleasant Way of Spending Summer Vacations.

The recent publication of Mr. Lee Meriwether's entertaining little book, "A Tramp Trip," in which he shows us how we can "see Europe on fifty cents a day," the latest of many works of the kind, will set a large number of young fellows meditating and calculating. It awakens in the toiling sons of men wild desires for the knapsack and alpenstock. The rudest experience of Mr. Meriwether seems agreeable to the student, tired of a too protracted wrestle with his dictionaries, so long as he only reads the author's account of it. Doubtless, it would be a different thing to find ourselves in the heart of Russia, ignorant of the language of the country, an object of suspicion to the police and the supply of cash running low. It was certainly a gallant feat to travel in twelve months fourteen thousand miles, in Italy, Russia, Germany, France and England, at an expense of three hundred and eighteen dollars and thirty-seven cents, paying for it by sending letters to the newspapers, and then writing a little book which may yield profit enough for a voyage round the world.

If we can not all do these heroic things, many of our young readers can achieve a walk of one, two or three weeks through the nearest range of mountains, or along the banks of the nearest river. The success of such a trip depends chiefly upon a strict compliance with the physical conditions. Mr. Meriwether says: "Carry only such indispensables as a light, strong, flexible knapsack, a waterproof coat, a change of underclothing, an extra flannel shirt for cold summits, a pocket drinking cup and a map of the country. Be sure the shoes are perfectly right, for the least thing wrong about one shoe may spoil the journey."

The most common error of pedestrian tourists is overdoing, particularly at first. Mr. Meriwether, beginning his tour at Naples, walked twenty-five miles on the second day, and came near being totally disheartened. His feet were blistered; every bone ached; every muscle was sore. But after two or three days' rest, he mustered resolution enough to walk on. It is a good plan to start late in the week, Friday or Saturday, so that the Sunday rest may come when it is wanted. Total avoidance of intoxicating drinks, plenty of nourishing food, eaten in a cheerful, leisurely manner and eight hours' sleep every night, with an occasional long halt at the most interesting spots, will usually bring pedestrians home in splendid condition.—*Youth's Companion.*

—"He's gawn to the dawgs, paw feilaw, he has, I assuaw you." "Good gracious! I hadn't noticed it." "Gad! Wheaw aw youaw eyes? Haven't you seen how tight his bweeches aw, and the cussed colaw of the cwavat he weaws?"—*Town Topics.*

STORIES OF BATS.

American and Indian Aborigines Who Consider Them a Table Delicacy.

Bats are found in various places, and in cold climates hibernate during the winter; in other words, they are enabled to enter a dormant state and live for months without eating. So complete is this sleep that in cases examined the most delicate instrument failed to detect breathing on the part of the animal, and in another instance the bat was placed under water without any apparent harm resulting from the extended bath. The deep sleeps are generally passed in trunks of trees or caves, and in the latter myriads of bats are often found.

Far from being timid, the bats of India are extremely bold in their depredations, and it is told of an officer newly arrived in the country south of the Punjaub that he was alarmed at night by loud noises upon his piazza, and thinking an attack was being made by native robbers, he opened fire with his revolver, to find that the uproar was caused by fruit-bats that had been robbing a wild-almond orchard and had brought the nuts under the cover of his veranda to open them.

Mr. Fraser, a naturalist, who traveled extensively in Ecuador, describes a bat that went fishing, diving down to the surface of the water and picking up small crustaceans which were swimming near the surface. The bat, according to the same authority, is very affectionate. Referring to two kept as pets, he says: "They were social, though both were males, usually hanging side by side. Sometimes they brought their faces together and licked each other's open mouths in a most singular manner."

While bats have wings, they are entirely different from those of a bird. Imagine a man's finger as long as his body and booming out a soft membrane attached to the sides and ending at the feet, and an idea of the bat's wings may be gained; each finger, with a single exception, is lengthened out and connected like the ribs of an umbrella with this extremely delicate and sensitive wing.

Some of the small bats nip and bite when attacked or taken; but to human beings the odor is in many cases quite sufficient to drive any but a collector away. This is particularly noticeable in the bat known scientifically as cheiromeles torquatus. The body is almost naked, and the odor so strong, overpowering and offensive that people have been rendered sick while merely making a drawing of one.

Bats are famous for their habits of intemperance, and a party of drunken ones is often met with. Their condition is due to their love for the toddy which they obtain from the chatties of cocoanut trees. So intoxicated do they become that they are often found at the foot of trees sleeping off the effects of their debauch, and so fall victims to the vice.

Some of the American Indians do not object to roast bat, and the big fruit-bats of the Indian peninsula are considered great luxuries by the natives. As these animals have a stretch of wing of five feet it must require no little moral courage to eat one.—*Chicago News.*

GERMANY'S PRINTING.

Facts and Figures Concerning the Imperial Printing Office at Berlin.

The imperial printing establishment in Berlin at present employs no fewer than 95 skilled artisans, besides 770 male and female workers and apprentices. The extent of the work carried on may be judged when we say that the quantity of printed matter supplied yearly to the various authorities amounts to 120,000,000 sheets, of which the post and telegraph offices alone take 13,000,000 and 60,000,000 pieces in books, etc. Postage and revenue, etc., stamps are dispatched to their various destinations during the year in 20,000 boxes, having a total weight of one million kilogs. Post-cards and official forms are annually prepared to the number of 12,000,000. Altogether the establishment turned out last year over 1,173,500,000 pieces of different sorts of money paper, having a nominal value of nearly 1,060,000,000 marks, equivalent to an average daily production of 3,500,000 pieces, to the value of nearly 7,750,000 marks. As the work-people are not allowed to leave the establishment until the end of the day's work, a building had to be constructed to serve as a dining hall. This erection is maintained by the work-people themselves, each of whom contributes a yearly sum of 2½ marks.—*Inland Printer.*

New and Old Violins.

There is a great deal of nonsense afloat about the "new principle" of making violins, by which new instruments are as desirable as old. People are all at sea about the worth of a violin. Why, if $100 were paid for a new violin, as is often advertised, it is a high price, showing less wisdom than an abundance of money. Any sum above $100 is an artificial price, just as in the case of China bric-a-brac, where fashion makes the market. The fashion is rather violent I might add, at present, and violins made on a "new principle" are quoted high. The value of age is that it mellows the tone and there is no principle that can accomplish that. The ear of the average mortal is not sensible to the finer qualities of tone, and hence a new violin is as exquisite to it as the oldest Cremona. Twenty-five dollars is a good price for a new violin, but there is no quotation on an old one. One rule is that it is worth what we can get.—*St. Louis Republican.*

PEDAL AILMENTS.

The Causes, Formation and Proper Treatment of Painful Bunions.

Bunions "are enlarged, inflamed or irritated bursæ" situated over some joint in the foot that has become distorted. The most common places for them to occur is at the junction of either the first or fifth toe with the rest of the foot, but none of the joints subject to distortion are exempt. It is said that the tendency to the formation of bunions is sometimes inherited, and that people with this legacy from their ancestry acquire bunions in spite of every attention being given to secure properly fitting footgear. Savages who wear no covering upon the feet never have bunions. Usually the first sign of a bunion is—a painful spot appears over some joint that has become a little out of its natural position. Then swelling begins in the bursa that has been formed consequent on the distortion and projection of the joint, and the part remains permanently enlarged. The trouble may end here, or the irritation may go on to active inflammation.

There is violent pain, generally pulsating with the heart, heat, redness and swelling. If not treated with rest and soothing applications, matter (pus) forms, and ulcers follow when an opening is made. The pus may burrow in different directions, the inflammation may extend to the numerous joints and destruction of the bones or part or the whole of the feet may follow careless treatment of an inflamed bunion. The first thing to be done in the treatment of bunions is to remove injurious pressure. The shoes must be long and easy, still tight enough over the instep to prevent the foot from slipping forward. The inner side of the forward portion of the shoe should be straight and fully as wide as that portion just back of it. If the bones of the great toe are alone distorted, the remedy is to provide a separate compartment in the shoe for its reception; while a "casting" with a piece of spring steel, properly adjusted, should be worn at night until the deformity is corrected. In the worst cases, cutting of shortened tendons is a preliminary to treatment which is indispensable.

When one of the toes has been pressed upwards, so that those on either side come nearly together below it, the deformity may be corrected by applying a strip of adhesive plaster so as to bring the ends around the sound ones at the sides, to which they are attached, and over the one between that is out of place. By keeping up this application for a long time the proper position will be restored. In old people, bunions must be treated with the utmost care. If they have to be opened because of inflammation going on in the formation of matter, gangrene (mortification) is too often the result. The troublesome ulcer left sometimes after such an event must be treated with stimulating applications. If the bone becomes uncovered and diseased, it is advised by some good authorities to apply strong nitric acid (aqua fortis) freely but carefully. This stimulates to healthy action in some instances.—*St. Louis Globe-Democrat.*

AFRICAN PIGMIES.

A Race of Little People Living on the South Branch of the Congo.

Herodotus speaks of pigmies as a race of little men and women living in Africa. Since that day travelers have brought back from that continent reports of such people being seen or heard of in the interior. Of late it has been the fashion to discredit Herodotus and all writers who repeat or corroborate his stories. As it happens, however, a German explorer, Dr. Wolff, proves that the early writers were correctly informed. He has found, in the country along a south branch of the Congo, whole villages of tiny men and women, of a height not more than four feet and seven inches. They are known as Batua. Their villages, consisting of huts, are met with in clearings in the forests, which cover the greater part of the country. Among their neighbors the Batua are regarded as little, benevolent beings, whose mission it is to provide the tribes among whom they live with game and palm wine. In exchange, maize and bananas are given to the pigmies. These happy relations between the little people and their neighbors will remind the reader of the way in which the fairies and brownies used to be looked upon by our ancestors. The Batua excel in the art of climbing palm trees to collect the sap, and in setting traps for game. Their agility is almost incredible. In hunting they bound through the high grass like grasshoppers, and face the elephant, antelope and buffalo with the greatest boldness, shooting their arrows with rare precision, and following up quickly with a stroke of the lance. Physically the Batua are very well made, having absolutely no deformity. They are simply little people, very brave and very cunning. Their mean height is four feet and three inches. Their skin is a yellow brown, less dark than that of larger races. Their hair is short and woolly. They have no beard.—*Youth's Companion.*

—The leading hog States in their order are Iowa, Missouri, Illinois, Texas, Indiana, Nebraska, Ohio and Kansas. Two years ago Illinois had 440,157 more hogs than she had last January and Missouri 473,858 less, the two States losing upward of 1,000,000 in number, although fast increasing in population. Missouri was then the third State. She has now increased in rank to the second, while Iowa has lost nearly 2,000,000 in number in the last two years.—*St. Louis Republican.*

STRANGE PHENOMENON.

The Surf of the Atlantic Heard at a Distance of Seventy Miles.

There is a story that Mr. Eliot Glover, of Portland, formerly of this city, related apropos of sounds out of the still sky. I was in Farmington, said he, visiting my uncle. On Christmas night I attended the Christmas festival with my relatives, and it was a clear starlit night, for I remember at the close of the Christmas tree festival they sent a fire balloon into the air, and it went straight up and seemed to hang over us quite stationary. Then it took a course in another direction and seemed to float over toward Lewiston. The next day was Sunday, and after breakfast I walked out with my uncle. It was a very still day, without a breeze, apparently, from any quarter. Smoke rolled up straight into the sky. We were walking silently along when my uncle stopped and said: "What do you hear?" I listened. "It sounds like the roar of the sea," I said. It did sound like it—the low monotone of the surf on the shore, the ceaseless roar of the ocean in a storm. "But," I added, "of course it is not the sea. It must be the wind." "The wind?" asked my uncle; "where do you see it? Look at those trees. They are motionless. Look at the smoke. Look at the grove of pines over there, They would sing if any trees were singing, and they are quiet. "Sure enough it wasn't the wind, and if not the wind what was it? It must be the ocean. We listened to it for five minutes. It boomed and roared sullenly. I was convinced that it was the sea. In the afternoon I met a well-known Farmington gentleman out walking and asked him if he had heard any sound odd or strange. He said that he heard the wind in the trees. I asked him if he could see any trees in motion, and he said no. I told him I thought it was the sea. He poohed at first, but subsequently I heard him telling a friend that he had heard the sea roaring. That night we looked at the map, and found that the nearest points at which the sea came were Boothbay and Harpswell, and they are from seventy to eighty miles as the birds fly. The next day the newspapers brought reports of a fearful storm along the coast, with high seas and damaging surf along the shore. I have not hesitated to believe that we heard the surf at Boothbay that Sunday in Farmington. What current of upper air brought it that seventy miles? The day was as calm as the calm of the ocean at rest.
Lewiston (Me.) Journal.

TECHNICAL TRAINING.

The Need of Educating Young Men for the Profession of Railroading.

In no field is more room afforded for the application of such skill and knowledge as technical training gives, than in the management and operation of railroads. Railroading has, in fact, become a profession, fully as exacting and requiring as high degrees of professional skill and intellectual attainments as the liberal professions. Yet Dr. Barnard has failed to find that "any of our railway managers have a proper appreciation of the situation, or that there has been any well-digested effort in the direction of educating railway officials or employes upon systematic lines, such as, for example, produce at West Point and Annapolis corps of young men whose basic education and training, with a little experience, fit them for any position of responsibility and trust in our military and naval service. Unquestionably there must be in many of our large railway organizations those who have long recognized the need of, and would warmly welcome, this educational factor in railway management, and doubtless many of them are, from previous education and long experience, peculiarly qualified for making a forcible presentation of the advantages of—and in view of the great changes that scientific discoveries are making in methods of production and transportation, and the new industries that are continually springing up, I may say the absolute necessity for—a combination of scientific and technical education for the operatives of the transportation service of the country. But, unfortunately, men of this type are, as a rule with few exceptions, overtasked with responsibilities and harassed with anxieties that leave few opportunities and little inclination for expressing their views on any subject foreign to their specific duties."—*Popular Science Monthly.*

Dust Baths for Fowls, Etc.

A dust bath is to the hen what a water bath is to mankind, a means of cleaning the skin from impurities, and especially from vermin. It should always be placed where it may keep dry, and where it may always be handy. The dust must not only be dry, but it must be in the shape of an impalpable powder. Fine loam, or humas clay is the best. To this may be added one-half of fine-sifted coal ashes. Wood ashes should never be used. But if an ounce of carbolic acid be put in water enough to dissolve it, and this is sprinkled on two bushels of dry dust and the whole thoroughly mixed, it will assist the fowls in ridding themselves of vermin. The dust bath should be placed where it can receive the full rays of the sun. The hotter it thus gets the better the fowls like it. The box in which the material is placed should be large, not less than 4x4 feet if possible, and the dust therein may be to a depth of three or four inches.—*Farm, Field and Stockman.*

—A California court has decided that when a man is taken ill at a hotel no extra charge can be made for serving his meals in his room.

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY AUGUST 27 .....1887.

The Roselle Jury Agree.

The trials of the two Roselles for substantially the same offense are suggective of a sentiment which we may try to reason away, but which remains all the same. Mrs. Roselle found three men who would not agree to a verdict of guilty, though the evidence of her guilt was conclusive. No one of the three could have had doubt of the fact that she poured vitriol upon Petrie's face, nor could one of them have believed that such an act was necessary to the successful defense of her person. The motive may not have been fully established, but the act was. Yet three of the jurors voted to acquit her of the charge. The man. Roselle, admits having ordered his wife to do as she did do. He gave this advice doubtless under the belief that his wife was not in any degree to blame for this act of Petrie which provoked the offense. But the jury found him guilty as charged, his being in advising and ordering the outrage. In brief, there is one law for man and another for woman. Mrs. Roselle in Mr. Roselle's place would, in all probability, have been convicted. What are we going to do about it! It is hardly worth while to attach the blame to the jury in either case, unless we can feel some assurance that the sentiment which led to the non-agreement of the jury in the Mrs. Roselle case is not more or less prevalent in the community at large. What proportion of men will go into a jury-box determined to mete out the justice to a woman that would be given to a man under otherwise identical conditions? In fact, the failing, if such it be, is a leaning to virtue's side. If there must be a distinction, let it be in favor of the weaker party Since juries are composed of men exclusively, it is well that they should not be more severe in their judgment of woman than of man.—*S. F. Call.*

Says the San Francisco *Alta*, of late date: The wave of permanent population is breaking all over California. Localities are in active competition to secure their share of coming emmigration. Many of our counties are perfect principalities in extent and excel the promised land in fruitfullness. The man who is of little faith in California should take Kern county as an example. That county runs over into the Majave desert, and that side of it which lies between the influence of the Southern California boom is placarded all over the country already. But this side of it, lying in the tip of the San Joaquin valley, has already a development which stands the test of the experience of a dozen years. Its productive possibilities are simply prodigious. On one great estate there nearly every crop has been tried and every form of stock raising, successfully, and now it wants people, and, offers the most alluring prospects to colonizing enterprises. When the enterprising invasion passes the mountains it will conquest Kern, and then move on down the San Joaquin valley; and every settler in all that great region will add to the commerce of San Francisco. It is hard to individualize any county in the State. All that the press can do is to fix some satisfying locality in the mind of the intending immigrant, and when he sees it, we care not at what season, he is sure to count as lost those years which he has spent elsewhere.

Country Schools.

One of the principal reasons why education in district schools is not always of the best quality is found in the desire of Boards of Trustees to have the teachers changed very often. When school patrons come to know that a poor teacher is dear at any price, and that a good teacher is worth far more the second year than the first the millenium in school affairs will have arrived. We believe that a good teacher who has taught for a year in a school, can do more and better work in the next six months than any quaity good teacher, who is new to the district, can do in eight months. We believe that examination records will prove the truth of this assertion.

It takes a teacher at least two months to learn thoroughly the requirements of his school, the varying disyositions of his pupils, and the desires of his patrons, and every time a Board of Trustees dispenses with the services of a competent teacher, they waste a large portion of the school fund. As the majority of our country schools are in session for eight months, or less, and as a new teacher must of necessity waste at least two months before thoroughly good work can be done, we maintain that in those schools where teachers are changed annually, at least two eights, or one-fourth, of the school fund is paid out for the purpose of "breaking in" teachers. Just think of it, one-fourth of all the time spent at a country school is wasted through the short-sighted policy of School Trustees! No wonder that parents complain that their children do not advance as rapidly as those in the towns; no wonder the Boards of Supervisors hesitate to allow a large tax for the County Fund: no wonder that the overburdened tax-payar complains that his money is spent uselessly.

All this could be remedied, if some system, similar to that of Australia, should be adopted. If our country teachers were appointed by some central body as the County Board of Education, composed of men who know the requirements of the schools, a change for the better would result immediately. To be sure, this would place a great deal of power in the hands of a few and much favoritesm might and possibly would be shown, but under the present system, teachers are appointed by men who intend to do what is right; but while they are competent farmers, they are utterly unfitted to judge of the necessary qualifications, and they are often hoodwinked by the smooth talking gentleman teachers, or captivated by the bright eyes and charming grace of some of the lady teachers, and hence they somtimes make utterly unfit appointments.

The country school is the great feeder for colleges and schools devoted to higher education, and some of the brightest lights in our national history have received their early education in some far away district school. Let us do what we can to raise their standard of excellence, and to bring them on a par with our town and city schools, and in order to do this, let those in authority advise Trustees to "hold fast that which is good," and to "change not the old for the new" for trivial reasons.—*College Journal,*

Recent elections in England prove beyond doubt that a large proportion of the English people have no sympathy with the tyrranous measures of the Tory government against Ireland. The Irish people only ask to be allowed to manage Irish affairs so that they may not be forced to leave the land of their birth, or to live there in hunger and rags. Every man should have from the fruits of his own labor a sufficiency of wholesome food for himself and family; a dwelling better than a pig-sty and such garments as decency, if not comfort, requires. Americans who have never been in Ireland cannot realize the terrible fact that for millions, aye millions, of the Irish people such things were and are beyond their reach. From Derry and Sligo; from Limerick and Cork, from Dublin and Dundalk; from Newry and Belfast; from every port in Ireland steamers are leaving every day laden with bacon, eggs, beef, mutton, poultry, fish, game, in short, food of all kinds, while the people whose labor produces these things are clothed like scarecrows, exist on a scanty supply of such food as would cause an American farmer to be prosecuted for cruelty to animals if he fed his hogs that way, and live in hovels inferior to a Piute wickup. The Tory landlords demand all that the laborer can produce down to the last blade of grass, and the Tories made laws enabling them to force it from the producer. It is to bring about some change in this form of civilization that the Irish agitation is kept up.

NOTICE.

AGRICULTURAL DISTRICT NUMBER 18.

Notice is hereby given that all parties are invited to send for exhibition at the Fair of Agricultural District No. 18, of California, all kinds of manufactured articles of American production; all products of the soil; mineral products; objects of a curious nature, or such as are of interest to science; collections of native insects; fossils, rare books, or other printed matter or manuscripts. The Directors desire to make an interesting display and will welcome everything that will be likely to instruct or entertain the public. Full guarantee will be given for the safe return to the consignors of any article sent for exhibition at the Fair, which will begin at Independence October 4th and continue through the week. Anything consigned for exhibition should reach Independence not later than Saturday, October 1st and should be addressed to the Secretary.

C. MULHOLLAND,
Secretary Agricultural Dist. No 18.

TAKE SIMMONS LIVER REGULATOR

For all Diseases of the

Liver, Kidneys, Stomach and Spleen.

This **purely vegetable** preparation, now so celebrated as a Family Medicine, originated in the South in **1828.** It acts **gently** on the **Bowels** and **Kidneys** and **corrects** the action of the Liver, and is, therefore, the **best preparatory medicine,** whatever the sickness may prove to be. In all common diseases it will, **unassisted** by any other medicine, **effect a speedy cure.**

The **Regulator** is safe to administer in **any** condition of the system, and **under no circumstances can it do harm.** It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance; will **promote digestion, dissipate headache, and generally tone up the system.** The dose is small, **not unpleasant,** and its virtues undoubted.

No loss of time, no interruption or stoppage of business while taking the Regulator.

Children complaining of **Colic, Headache,** or **Sick Stomach,** a teaspoonful or more will give relief.

If taken occasionally by patients exposed to **MALARIA,** will expel the poison and protect them from attack.

A PHYSICIAN'S OPINION.

I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system. L. M. HINTON, M. D., Washington, Ark.

SEE THAT YOU GET THE GENUINE.

J. H. Zeilin & Co., Philadelphia, Pa.

FOR SALE.

A ranch of 320 acres, within three miles of Independence, the County Seat; nearly all enclosed by a three-strand barbed wire fence, and subdivided; a small dwelling house and a number of outbuildings; 10 acres set out to fruit trees, a portion of which are bearing, consisting of choice varieties of Apples, Pears, Apricots, Plums, Prunes, Nectarines, Cherries and Quinces, also, about two-thirds of an acre of bearing grape vines. Nursery stock enough on hand to set out from 10 to 15 acres of orchard Received six first premiums on Apples, Pears, Plums, Prunes and Grapes, exibited at the Eastern Slope Agricultural Fair, held in Sept., 1886. For price and terms apply to

J. W. SYMMES.
On the Ranch.

Independence, May 7, 1887.

BISHOP CREEK ACADEMY.

BEGINNING OF SPRING TERM.

The Spring term of the Academy, at Bishop Creek, will begin on Monday, March 28th, 1887.

Full Literary and Classical Academic Courses

Have been arranged, in accordance with which classes will be formed. Classes will also be formed in STUDIES PREPARATORY to those of the Academic Course.

Two prizes will be given during the year for excellence in declamation, also a prize for the highest rank in scholarship.

The Fowler Literary Society,

Formed during the last term, will offer to students of the Academy excellent advantages for literary culture, in addition to the regular work of the school.

TERMS:

The expense of tuition for the term will be $12. This is lower than for institutions of a similar character in other parts of the State. Instructions in music and book-keeping will be extra.

Board and rooms will be furnished to students from abroad. Particulars can be obtained by addressing the Principal.

For any further information address the Principal.

Calendar for the Term.

Spring Term begins March 28.

Exercises of the closing week June 19 to 23.

Sunday, June 19—Special sermons to students.

Tuesday evening, June 21—Declamation contest for prizes.

Wednesday, June 22, 2:30 P. M.—Annual meeting of the Board of Trustees.

Wednesday evening, June 22—Lecture before the Fowler Literary Society.

Thursday, June 23, 10 A. M.---Closing exercises of Academy.

Thursday evening, June 23---Reception of Principal to students and friends of the Academy.

Railroad Time Table.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, AUGUST 27 1887

The thrashers have reached this vicinity.

There is but little snow left on the mountains.

A wedding is said to be in preparation at Big Pine.

Harry Jiggens returned from Mojave on Thursday evening.

Work is steadily progressing on the Independence Water Works.

Mr. R. Hessian, of Big Pine, is visiting Independence and vicinity.

Sunday school at the M. E. Church at 11 o'clock a. m. tomorrow (Sunday)

Mrs. C. W. Ober has gone to Darwin to attend her husband, who was severely hurt last week.

Aurora is getting her second wind. Increased force of men are being put to work in her mines and mills.

Mr. C. Anthony, of Darwin, was in town a couple of days in the beginning of the week.

Rev. J. H. Del La Matyr will preach at Lone Pine tomorrow (Sunday) at 11 o'clock a. m. and at 7 30 p. m.

The Baxter family, the Parish family, Jeff Zeigler and one or two more start for the Kern river country on a camping excursion to-day.

After standing idle two years Mr. J. C. Steward has repaired his saw mill in Big Pine canyon, and will begin cutting lumber in a day or two.

Over in Colusa, California, this season some of the peach trees produced roses. It was probably because everything is so rose-colored over there this season.

L. P. Drexler and other San Francisco capitalists are putting up a mill at Gold Mountain, Nevada. The mountain is full of veins of quartz which are in turn full of gold.

Carson has a boom. It is a baseball boom. The population has been divided up into six clubs: The Amateurs, Zephyrs, Box Factory, Gamboliers, Clerks and Variety Nines.

A duel was recently decided in Mexico by the two combatants going into a darkened room in which was placed 100 tarantulas. When the door was opened both men were found dead.

A special premium of $50 will be given for the best display of fruit at the Nevada State Fair at Reno. A display of fruit from Owens Valley could be sent that could not be beaten anywhere.

We have received a copy of the Thirteenth Annual Report of the Boys and Girls Aid Society of San Francisco. This Society has done and is doing excellent work and should receive the cordial support of every parent.

A new paper called the *College Journal* has been received at this office. Every school teacher should be a subscriber. It is published quarterly at Colusa, Cal., the price being 25 cents per annum.

The case of Aaron Hood has been dismissed. The Dist. Attorney made the motion on the ground of lack of evidence for conviction. Hickey has been released from custody and is now around town.

John McLean, who was cut by Robert Climo, has improved very much during the past few days. He is now able to be out upon the street. His wound hurts him less when walking about than while seated or lying on his bed.

Mr. S. A. Densmore has been elected Director for Divison No. 2 of the Irrigation District. The vote will not be canvassed until the next meeting of the Board of Supervisors here. Active meosures will be delayed for some time yet.

A party consisting of the following persons are camping in the Bubbs creek country; Mr. and Mrs. Houle, Miss Sophia Rhine, Miss Maud Cook, Miss Ana Thomson, Henry Rhine, Chas. Robinson, Harry Cook, W. F. Matlack and Pierce Johnson.

Doctor Anderson, formerly of Candelaria, Nevada, now a resident of Parkfield, Monterey county, this State, recently had a stroke of paralysis. It will be highly gratifying to his many warm friends east of the mountains to know that he has almost entirely recovered his health.

Joseph Haggerty, a carpenter, fell from a building at the Defiance mine, at Darwin, about the first of this month. At first he thought his hurts were slight, but proved to be serious, and a few days ago he was brought to Independence and placed under the care of Doctor Woodin.

One or two families have recently located at Fish Spring and now there are children enough there to entitle the settlers to a new school district. A petition for the creation of a new district will be presented at the next meeting of the Board of Supervisors; at present the nearest school is at Big Pine, six miles distant,

Rev. Sissons will come to Independence next week, and will preach for the first time at the M. E. Church on the following Sunday. Mr. Sissons has the reputation of being a good preacher, who cares more about leading people to love and serve God than to amuse them.

Hon. A. J. Gould, our representative at the last session of the Legislature, is in town on a visit for his health which for some time has been quite poor. Judge Gould has always had the interests of the county deeply at heart, and at the last Legislature worked earnestly and faithfully. We hope he will soon be completely recovered.

Death valley is to be turned into an ostrich ranch. A Mexican has fourteen well grown chicks that he hatched out there at his little ranch near the borax works from eggs brought from Los Angeles. The eggs were buried in the hot sand, and of nights the ground was covered with blankets to retain the heat it absorbed during the day. The ranch is about 220 feet below the level of the sea.

Mr. Frank Vinson came up from Keeler on Thursday morning. He and his partner Bob Wimberly have about fifteen tons of ore ready for shipment that will average about $300 per ton taken from the Indiana mine. The boys have been at work about three and a half months. Frank reports the chief pleasure of Keeler to be boat riding which is participated in by the Keelers with great zest.

Correspondence.

EDITOR INDEPENDENT:—Dear Sir; After leaving Independence on Thursday we traveled all day and camped at Lake Rhoda. Next morning we were on the road bright and early, and traveled until after dark. When we reached the camp where we had left our companions, we found the entire outfit piled up by a tree, and a notice posted up stating that they had run short of provisions and started for Big Meadows afoot and alone, packing their blankets in the bargain. We unpacked and stayed about two hours and then pulled out for Big Meadows about 10 o'clock at night. As we had a very steep hill to climb we traveled very slowly for eight miles. Here we struck a rolling country where we thought they might have camped, so we fired our guns and whooped and yelled all along until we reached Horse Corral Meadows a distance of ten miles from the river where we were answered. We found them just at break of day with but little to eat. They cheered us as we rode into camp and the day was pleasantly spent together. Sunday we journied on to Big Meadows where we stopped off a day. Tuesday we reached a meadow three miles from Comstock's mill and Wednesday we reached home. Here we learned that the man who stole the horse was wanted in Tulare county for stealing a double barrelled shotgun and a valuable dog from one Henry Miller, who lives on Kaweat river. The gun we sold to Mr. Levy and I have the dog. Mr. Miller is a friend of mine, so will take care of the dog and would like to recover his gun. I hope the scoundrel has been caught.

Yours truly,
J. W. Biedsoe.

Dried Nectarines.

Fresno fruit-packers are this year drying thousands of pounds of nectarines. This fruit has not yet appeared in the markets in sufficient quantities to attract attention, although enough was offered for sale last year to create a fair demand for this season's pack among those who were fortunate enough to secure a portion last year's crop. The nectarine has not been extensively planted in California yet, and certainly merits much more attention than it has received from our orchardists. As a dried fruit, when prepared for table use, the nectarine is superior to either the peach or apricot, and its excellent qualities only need to be more generally known to be recognized as such. Special pains should and doubtless will be exercised by our fruit-packers to place this season's crop upon the market in the most attractive shape, and thus encourage a more general demand for the crop of succeeding seasons. Nowhere does the nectarine thrive better than in the sandy loam of Inyo county, and here are tens of thousands of acres of good land not yet brought under cultivation, with an abundant supply of water easily obtainable, and which if devoted to the growth of nectarines, apricots or peaches, would yield a net profit of at least $100 per acre each year. Let our fruit-growers extend the area devoted to nectarines. We believe this to be the coming fruit, and we do not hesitate to encourage others to engage in its production. It cannot be grown with any success in any of the Eastern States, and as the demand increases for it, California orchards will have to be greatly enlarged to meet it.

Dangerously Hurt

On Friday a week ago word came to Independence that Mr. C. W. Ober had been dangerously injured by an explosion, the nature of which could not be definitely learned. Dr. J. D. Blair immediately started for Darwin and has since been in constant attendance. From Mr. Fitzgerald we learn as follows: Mr. Ober was at work in the mill; toward noon he walked about two hundred yards away to a place where a considerable quantity of black and giant powder had been thrown away as condemned. A spark from his pipe ignited the black powder causing an explosion which threw him a considerable distance down the hill, burning and lacerating him in a terrible manner. Fortunately, however, he was too far away to be injured by the explosion of giant powder which followed. His clothing caught fire and had not instant help arrived he would undoubtedly have been burned to death. The injured man was quickly removed to a house near at hand and every thing done to alleviate his sufferings until the arrival of a physician. Though serious y hurt he is out of danger and will eventually recover.

Medical Value of Lemons

"While you are giving people simple rules for preserving their health, why don't you tell them about the use of lemons," an intelligent professional man asked me the other day. He went on to say that he had long been troubled with an inactive liver, which gave him a world of pain and trouble, until recently he was advised to take a glass of hot water with the juice of half a lemon squeezed into it, but no sugar, night and morning and see what the effect would be. He tried it, and found himself better almost immediately. His daily headaches, which medicine had failed to cure, left him; his appetite improved and he gained several pounds in weight within a few weeks. After awhile he omitted the drink, either at night or in the morning, and now at times does without either of them. "I am satisfied from the experiment," said he, "that there is no better medicine for persons who are troubled with billious and liver complaints than the simple remedy I have given, which is far more efficacious than quinine or any other drug, while it is devoid of their injurious consequences. It excites the liver, stimulates the digestive organs, and tones up the system generally. It is not unpleasant to take, either; indeed one soon gets to liking it.

For Eastern Farmers

Mr. Sam. McMurry, at Big Pine, has a twelve acre patch of alfalfa. Last year the hay crop gathered from this patch fed sixty-five head of cattle and seven head of horses; all the animals were kept in fine condition till new feed came last spring. Only two crops were cut; instead of cutting a third crop the animals were turned in on the pasture. This year the crop on the same ground was better than last year. The land is of the same kind, neither better nor worse than thousands of acres in the same locality now covered with sage brush. Last winter was an average season for Owens valley. Mr. McMurry has peach and other young fruit trees now coming into bearing. The land is evidently well suited to fruit raising, the soil being a sandy loam.

Mrs. G. Sanger, of Alvord, Mrs. Collins and Miss Collins, of Warm Springs: Miss Laura McMurray and her cousin Miss Jennie McGinnis, of Big Pine, are all on a camping trip in the mountains at the head waters of Big Pine Creek. Messrs. Perry McMurry and Ed. Smith are the cavaliers in escort.

HALE BROS. & CO'S. ADVERTISEMENT.

To those who wish to order by mail we say:

Look Out for Our Fall & Winter Catalogue, to Be Issued the First Part of September.

It comprises the latest styles and ideas; is the most complete ever issued and we expect extraordinary results.

We are the largest Consumers of Goods on the Coast, and buy direct from the Manufacturers, thus ennabling us to give Most Advartageous Prices to you.

In 1880 we started in an unpretending way at 812 K street; we did not doubt the future since our stores increased with a rapidity that astonished us, necessitating improvement after improvement, all aimed toward having a splendid structure in Sacramento at some future time That time has come. To-day we are adding 20x80 feet to the rear of our present large establishment, and building two more stories over the 80x100 feet. The carpenter's busy hammers are heard from morn till night, sending forth a tune of enterprise from one end of Sacramento to the other, in encouraging tones of comendation; when completed we will have the largest and most magnificent store in Sacramento.

We are ready for a large order trade.

We are going to have it.

We will give prompt attention to all orders.

We will not be undersold.

Send for our new Illustrated Catalgue.

Open Air Workers

It is very unusual for bees to build their combs in the open air and without some sort of enclosure; yet this unusual sight may be seen at the residence of Mr. T. G. Goodale, at Fish Springs. On the gable end of the house where the cornice makes a return forming a sheet, a colony of bees have built their combs, running them up against the building without any other covering than the eve projecting above. The colony is a large one and a great amount of honey has already been stored.

Suicide.

Cap. Smith, who accidentally shot himself in the leg at Benton some time ago, committed suicide at his home at West Bishop last Sunday. He had been drinking considerably of late and felt gloomy and depressed. He had been in town during the day, returning home in the evening. About dusk a pistol shot was heard but it caused no apprehension among those in the house. About bedtime Mrs. Smith went to her son's room and found him absent. A search revealed the fact that he had gone outside the house and shot himself through the head, resulting in instant death. The weapon used was the same with which he was shot at Benton. He was buried on Tuesday at Bishop Creek.

Ranch for Sale.

At Black Rock, twelve miles north from Independence, 520 acres of land for sale. Black Rock is one of the very best parts of Owens Valley. Four hundred acres of this land is held under U. S. patent; the remainder is located under the timber culture Act. One hundred and eighty acres are enclosed by a fence of cedar posts and barb wire Sixty acres are now under cultivation, mostly wheat, oats and barley. A large amount of hay can be cut; blue joint, red clover etc. Several large springs of pure water on the place and good water rights additional. House, outbuildings and corrals. C. & C. railroad half mile distant from east line of land. Owens river eighty rods distant. This is a fine place for an energetic man to improve and will be sold at a bargain. Apply to

C. MULHOLLAND,

The Southern Eureka mill, near Greenville was burned last Friday morning. The mill has been idle for some time. It was owned by Goodwin & Standart. There was no insurance and the loss was about $5,000. The fire is believed to have been the work of an incendiary.

There was Sunday eve between dark and 11 o'clock, a wonderful and ominous upward bounding of the barometer. A little after that hour the mercury started down with such celerity that the top of the column was cup-shaped. This is pretty good earthquake weather, and these eccentricities in the barometer seem to indicate disturbances of some kind. For about a week the mercury has hardly moved till last night.—*Enterprise.*

Some months ago Mr. Jacob Keller and family came to Owens valley from Sonoma county. Mr. Keller was a victim of Martin, the so-called "manager" of the fictitious International Immigrant Union, of San Francisco. Mrtin lied to Mr. Keller, cheated him out of his money, and when the poor man came here instead of finding a nice tract of good land with plenty of water he found a bare, dry tract of gravel. Mr. Keller went to work for wages for a while but has lately located a fine tract of 160 acres at Fish Springs and now is improving the place and will soon have a nice home.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, SHOWLAND, MO., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. 1st. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $100."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

Working Classes ATTENTION!
We are now prepared to furnish all classes with employment at home, the whole of the time or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

RUPTURED PERSONS! Not a Truss. Ask for terms of our Appliance.
WE GIVE PRIVATE TRIAL.

MEN ONLY
NERVOUSNESS, LOST VITALITY, OR ANY WEAKNESS Decay, and numerous troublesome diseases, baffling the skilled physicians, result from youthful indiscretion, too free indulgence, or over brain work. Avoid the imposition of pretentious remedies for these troubles. Get our Free Circular and Trial Package, and learn important facts before taking treatment elsewhere. Take a SURE REMEDY that HAS CURED thousands, does not interfere with attention to business, or cause pain or inconvenience in any way. Founded on scientific medical principles. By direct application to the seat of disease its specific influence is felt without delay. The natural functions of the human organism is restored. The alienating elements of life, which have been wasted are given back, and the patient becomes cheerful and rapidly gains both strength and normal vigor.

BEES & HONEY

I am making a specialty of comb honey in one pound sections and will be in town once a week to supply my customers.

Extracted honey in cans for sale as usual, at the stores. Honey and comb foundation always kept in stock at the Apiary, at Oak Creek above Camp Independence.

W. M. MUTH-RASMUSSEN.
Bee Keeper.

BEN: PERLEY POORE.

A Merited Tribute to the Memory of a Useful Author and Journalist.

The death of this distinguished journalist rightly evokes an unusual tribute of respect from the American press. He passes away, nearly the last of a brilliant line of newspaper men whose individual fame was made before the telegraph fused all mental effort into that inchoate mass now looked for and known as "the daily dispatches." Aside from his work as a newsgatherer and political spectator, Ben: Perley Poore earned the gratitude of every writer in the land through the great number of reference works which he published. He taught the teachers of men. The book of Webster in the proof-rooms and the manuals and directories of Ben: Perley Poore in the editorial-rooms have been for the last quarter of a century the volumes most often open to consultation. If a young man write a book nowadays, of which 100,000 copies are distributed, the papers begin drafting his grandfather's history; but 800,000 copies of Major Poore's "Life of General Taylor" were sold over thirty years ago. He was in every social way highly distinguished; all the societies of the East claim a share in his obsequies. He wore a colon instead of a period in his name, and why he did it God only knows; but, because the man was really illustrious, there was not a printer in the land who would not go borrowing sorts all over the office rather than fail to humor this typographical whim.—*Chicago Herald.*

—A contemporary suggests that a cow can be easily led by a halter which commands her nose, but with difficulty by a rope around her horns.

BAKING POWDERS.

Interesting Tests Made by the Government Chemists.

Dr. Edward G. Love, the Analytical Chemist for the Government, has made some interesting experiments as to the comparative value of baking powders. Dr. Love's tests were made to determine what brands are the most economical to use, and as their capacity lies in their leavening power, tests were directed solely to ascertain the available gas of each powder. Dr. Love's report gives the following:

Name of the Baking Powders.	Strength Cubic inches Gas per each ounce of Powder.
"Royal"(absolutely pure)	127.4
"Patapsco" (alum powder	125.2*
"Rumford's" (phosphate) fresh	122.5*
"Rumford's" (phosphate) old	32.7*
"Hanford's None Such," fresh	121.6
"Hanford's None Such," old	84.35
"Redhead's"	117.0
"Charm" (alum powder)	116.9
"Amazon" (alum powder)	111.9*
"Cleveland's" (contains lime)	110.8
"Sea Foam"	107.9
"Czar"	106.8
"Dr. Price's" (contains lime)	102.6
"Snow Flake" (Groff's, St. Paul)	101.88
"Lewis's" Condensed	98.2
"Congress" yeast	97.5
"C. E. Andrews & Co's" (contains alum)	78.17*
"Hecker's"	92.5
"Gillets"	84.2
"Bulk"	80.5

*In his report the Government Chemist says:

"I regard all alum powders as very unwholesome. Phosphate and Tartaric Acid powders liberate their gas too freely in process of baking, or under varying climatic changes suffer deterioration."

Dr. H. A. Mott, the former Government Chemist, after a careful and elaborate examination of the various Baking Powders of commerce, reported to the Government in favor of the Royal brand.

Prof. McMurtrie, late chief chemist for the U. S. Government at Washington, says: "The chemical tests to which I have submitted the Royal Baking Powder, prove it perfectly healthful, and free from every deleterious substance."

THE KAISER'S ESCAPES.

Reminiscences of Two Attacks on the Life of the German Emperor.

I had myself been in Berlin when both attacks were made upon the life of the Emperor—when Hoedle shot at him from the crowd, and Nobling from a window overlooking the celebrated street, Unter den Linden. A curious little incident occurred upon the latter occasion. As the Emperor was going to his afternoon drive in the Thiergarten, he asked an attendant standing in the hall of the palace why such an unusual and gayly-dressed crowd thronged the streets.

"They go to see the Shah of Persia, your Majesty," was the answer.

"Ah, then I also must put on gala attire," the Emperor remarked, smiling, and forthwith took from a table his Prussian helmet, replacing with its steel plating the military cloth cap which he had before placed on his head. When a few hours later he was brought back to the palace wounded and bleeding, the helmet was dented in several places where the mixed shot used by Nobling had struck against the metal. Had the unresisting cloth been there instead, who can tell how different the ending of the tragedy might have been?

Two or three days after the attempted assassination, the old monarch asked to see the clothes he had worn on that fatal day. Looking at the military cape, riddled with shot, and the dents in the eagle-capped helmet, he turned to those standing by his bedside, and with tears in his eyes, said, pointing to the marks of the bullets: "Thank God it was not one of my own Berlin men who did that!"—*Blackwood's Magazine.*

She Knew What He Needed.

It was one of the genus tramps. He knocked at the door of a house, and when a kindly looking woman opened it he said:

"Madam, I am very hungry. I have had nothing for a week back."

"Why, my poor soul," said the good woman, "wait a moment, and I'll find something for you."

And she gave him a porous plaster, and closed the door before he had finished thanking her.—Chicago Sunday National.

LADY AND WOMAN.

The Inconceivable Prejudice Existing Against the Latter Term.

It is quite possible that a cook, or a chambermaid, or a laundress may be a lady at heart. It is also possible that the mistress of the house may be in no sense a lady. And this brings us to the query: "What does the word 'lady' signify?" To most of us, if we think about it, it means a human being of the female sex, gifted with culture, refinement and breeding. We understand it in some way as descriptive of the kind of woman under consideration. It does not mean the costume she wears. The number of dollars to her credit has nothing to do with it, and it certainly does not apply to every person who wears a petticoat. But, notwithstanding the general conviction that "lady" conveys a peculiar meaning, there has long been a tendency, even among well-bred people, to refer to every woman, except the lowest working class, as a lady.

The custom among domestics of dubbing the entire part of female creation as ladies I have sometimes attributed to our democratic form of government. The peasants of the old world never dream of being "ladies" in their own country. They come here, where their chance is as good as any one's one day to ride in their own coach-and-four; they find others no better than they called ladies; the word has a pleasant sound in their untutored and unreasoning ears, and they cling to it, as if by keeping a tight grip they would the sooner reach the coveted position. This is a notion of my own, in which I may be mistaken. At all events the practice prevails, particularly among the class I have mentioned, and no amount of reasoning will be likely to uproot it.

But why is there a prejudice against the term woman? It is a good Anglo-Saxon word, comprehensive and intelligent, and, as I understand it, carries no reproach with it. No greater praise can be paid to the human female than to call her a "womanly woman." It gives an impression of a combination of virtues and graces of mind and heart that can be conveyed by no other words. "A fine woman," "a good woman," or "a plain woman" is quite sufficient for ordinary usage. The only time and season when there seems to be any real demand for the word lady is in describing a woman of rare accomplishments, elegant manners and high birth. And, after all, it seems to me that the terms gentlewoman and lady are synonymous. The one is defined as gentle and well-bred. Does the other mean more or less? It does not follow that "well-bred" means elegance of manners. The most suave and polished exterior may be rotten at the core, and an unpretentious surface may conceal the kindness and gentleness of nature without which no man or woman can deserve the appellation of gentleman or lady. But in spite of the foregone conclusion that woman is a proper and sensible title for all female humankind, there is a tremendous prejudice against it, especially among working-women of the intermediate class. The saleswomen in stores are among the greatest sticklers for their rights in this matter. Has any one ever known a "saleswoman" to advertise for a place? Every paper, however, sets forth the wants of more or less "saleladies." They may every one of them be ladies. Are they any the less women?—*Philadelphia Record.*

HUMOROUS.

—A Warning.—

Full many a man, both young and old
Is sent to his sarcophagus,
By pouring water icy cold
Adown his warm œsophagus.
—*Journal of Reconstructives.*

—"Yes," said Jenkinson, "I used to believe every thing I heard—in fact, was the most credulous fellow alive; but since I've had this miserable sore throat I find it hard to swallow anything."

—According to the Scriptures "the way of the transgressor is hard," but the next revised version will no doubt put it, "The way of the transgressor is Canada-wards." And goodness knows, that is hard enough!—*Norristown Herald.*

—Magistrate—"A little difficulty between ladies, eh? Has the complainant been sworn?" Plaintiff's Lawyer—"Not yet." Magistrate—"What is your age, madam?" The Complainant—"Nineteen." Magistrate—"You will now swear to tell the truth, the whole truth, etc."—*Philadelphia Call.*

—Young Husband—"Isn't there something peculiar about the taste of these onions, my dear?" Young Wife (anxiously) 'Oh, I hope not, my dear. I took such pains with them. I even sprinkled them with Jockey Club before I put them to boil, to take away the unpleasant odor.—*N. S. Sun.*

—Tommy—"Does your mother allow you to kiss the nurse girl?" Johnny—"O, I guess she don't care. Does yours?" Tommy—"I don't think she does. I never asked her, but you'd a died to hear her lay down the law to pa when she saw him do it one day, an' she lets him do lots o' things she wouldn't let me."—*Pittsburgh Dispatch.*

—"I hear that Smith is contesting his wife's will," said one Dakota man to another a day or two ago. "I don't know how that may be," replied the other, "but I am quite sure of one thing." "What's that?" "Smith never contested his wife's will while she was alive. He seems to be getting courageous under his sad affliction."—*Dakota Bell.*

—Janey, attaining to the delightful promotion of an evening's "hair-brushing" with her grownup young aunties and their visitor, grew expansive in the relaxing spirit of the hour, and in a benevolent burst of confidence imparted the intelligence that "my mamma puts chalk on her face, too!" then, grown prudent, added, "well, just to keep her face warm, you know, when it is cold."—*Harper's Bazar.*

Snowfall in Germany.

A German mathematician has calculated that the snowfall of central Germany from Dec. 19 to 23 weighed no less than 10,000,000 tons in the area between 50 degs. and 52.5 degs. north latitude and between 7 degs. and 18 degs. east longitude—Arkansaw Traveler.

INGENIOUS MECHANICAL TOYS.

Puppets That Were Almost Human—Wonderful Contrivances.

Puppets or marionettes were patronized by both the Greeks and Romans, and automata, which are the inventions that are now principally dealt in, also go back to a remote period. Vulcan's tripod on wheels has the authority of Homer; Dædalus made moving statues; Archytas of Tarentum, 400 B. C., invented a wooden pigeon that could fly in the air. In the Fifteenth century Regiomantanus made an iron fly that moved through the atmosphere, and afterward an automatic eagle, which, on the arrival of the Emperor Maximilian at Nuremberg, flew forth to meet him. Albertus Magnus is credited with constructing a head that moved and talked, and which so frightened Thomas Aquinas that he smashed it into pieces, Albertus exclaiming when he saw his achievement destroyed, "So perishes the work of thirty years!" Roger Bacon made a speaking head of brass, which excited awe among all who heard it. Speaking automata have been frequently attempted of late years, but the great difficulty lies in simulating the human voice. The most successful of these efforts was perhaps that of Professor Faber, of Vienna, exhibited in London forty years ago under the name of Euphonia. Faber worked twenty-five years at the automaton. The figure enunciated words and also sang. There was an arrangement of hollow pipes, pedals and keys, which the inventor played to "prompt the discourse."

Willars de Hanecort, in the Thirteenth century, constructed an angel that "would always point with his finger to the sun." The Marquis of Worcester made an artificial horse that would carry a rider as swiftly as if he were a genuine barb. Philip Camuz invented a wonderful group of automata for Louis XIV—a coach and four horses, that started off with a crack of a whip, the horses prancing, trotting and galloping in turn; it ran along until it got in front of the king, when it stopped, when a toy footman descended and opening the carriage door handed out a lady "with born grace." The lady made a courtesy, presented a petition to his majesty, and re-entering her carriage was driven away. Gen. De Gennes, a Frenchman, who defended the colony of St. Christopher against the English about 1688, amused himself by making an automaton peacock, which walked about in all its pride of extended feathers, and picking up corn from the ground swallowed it.

The king of automata constructors was Jaques Vaucanson, born at Grenoble in 1709. While quite a boy he made several self moving figures. The bent of his mind was determined by a rather peculiar circumstance. Being left to himself in the house of a friend to which he went with his mother, he perceived through the crack of a partition an old clock with slowly swinging pendulum, which excited his attention. Next time he visited this house he had a pencil and paper with him, and made a rough sketch of the clock. By earnest study and investigation he succeeded in making a clock of his own out of pieces of wood, and his wooden clock kept time fairly well. Then began his experiments with automata. He made a wooden chapel, with moving figures of priests. He invented a hydraulic machine for the city of Lyons, and later, in the same place, perfected a machine for silk weaving that caused the work people to rise against him in arms. His first great achievement in automata was his flute player, which was one of the wonders of his time. He had been ill, and made it during his convalescence. The several parts of it were made by different workmen to prevent its discovery. Only a faithful servant aided him in his secret. According to D'Alembert, the remarkable figure stood on a pedestal, in which a portion of the mechanism was concealed, and the player not only blew into the instrument, but with its lips increased or diminished the sound, performing the legato and staccato passages with perfection, and fingering with complete accuracy. It was exhibited in Paris in 1738, and made a great sensation. Vaucanson next made a flageolet player, and later a mechanical duck, which waddled, swam, dived and quacked, and, like De Gennes' peacock, picking up and swallowing its food. He was engaged on an endless chain when he died. He willed all his automata to the king.

Maetzel, the inventor of the metronome and of several musical automata, opened an exhibition in Vienna in 1809, with a life size automaton trumpeter as the chief attraction. When the audience entered all they saw was a tent. After a time the curtain parted, and Maetzel appeared leading forward a trumpeter in the full regimentals of an Austrian dragoon. By pressing the left epaulet of the figure he made it play cavalry calls and a march, and an allegro by Weigl, accompanied by a full band of living musicians. Nor was this all. The figure retired and reappeared as a trumpeter of the French guard. Maetzel wound it up on the left hip, pressed once more on the left epaulet, and it played the French cavalry calls, a French cavalry march, a march by Dussek and one of Pleyel's allegros, the full band again accompanying.

Knauss again exhibited at Vienna an automaton that wrote, and the Drozes, father and son, constructed several mechanical figures that both wrote and played musical instruments. A pantomime in five acts was performed by a troupe of puppets in Paris in 1729, and Blenfalt, in 1746, got up a representation of "The Bombardment of Antwerp," by automata. Another piece performed by Blenfalt's automata, which he called comediens practiciens, was "The Grand Assault of Berg-op-Zoom."—"Romance of Invention."

Total Loss of Memory.

There are a few cases recorded of total loss of memory, usually following a deep and prolonged (unnatural) sleep or severe accident, such as concussion of the brain, almost drowning, etc. In one or two of these the personal identity has been completely lost, so that on recovery the victim lost all remembrance of name, family, friends, localities and mental acquisitions. They were in the condition, so far as knowledge of any kind was concerned, of the new born child. In some of these re-education was successfully attempted and a new memory formed, but the old was never regained. In others, a larger number than of those just mentioned, the forgetfulness was of only temporary duration. After a few weeks or months all that was before known was regained in an instant and the process of re-education was no longer needed. There are numerous instances of the memory being lost of all that had occurred for hours, days, weeks, or even months, immediately preceding a serious accident in which the brain had suffered concussion. In these the memory relative to everything up to a certain date before the accident remains intact on recovering consciousness.—Globe-Democrat.

Cocoanuts and Pineapples.

Cocoanut-raising is a growing industry in Southern Florida. Pineapples and cocoanuts pay very well. Ten thousand pineapples can be raised, it is said, to an acre, and the same amount of space will support fifty cocoanut trees. The latter require very little cultivation. They begin to bear at from nine to twelve years of age and produce from eighty to one hundred and fifty nuts to the tree. They bring about five cents apiece to the grower. Many groves have been planted within a few years. One New Jersey gentleman has 330 000 trees.

A VICTIM TO FORTUNE'S FAVORS.

A reporter of the *Appeal*, hearing that Mr. J. C. Curry, of the Tivoli garden, 181 Main street, had "struck" The Louisiana State Lottery in the drawing of the 14th inst., dropped into his place of business yesterday afternoon and found him quietly serving his customers, as though the "pick up" was no new thing to him. The reporter stared in amazement, wondering at the serenity of this favorite of fortune. Finding speech, he congratulated Mr. Curry upon his good fortune. "Oh," said the winder, with a waive of his hand, "it is a small matter—only $5,000—and my hand has been shaken and my health drank until I am dizzy." "You treat the matter coolly," the reporter ventured, more amazed than ever. "Yes," said Mr. Curry. "I got $5,000 and placed it in the bank to my credit. I did not particularly need it. It is just a lucky hit that is liable to strike any man that plays against a square game, and the Louisiana is fair, you know," and with this the proprietor of the one-twentieth of ticket No. 21,658 turned to receive new congratulations and to set up the drinks, while the reporter slowly returned to his wigwam, contemplating the wonderful nerve required to stand up under such a stroke of fortune.—*Memphis* (Tenn.) *Appeal*, June 28.

G. A. R.

The twenty-first national encampment of the Grand Army of the Republic will be held at St. Louis, Mo., the last week in September next. Arrangements have been made for a grand excursion of G. A. R. Comrades, their families and friends—open to all—to leave San Francisco on Tuesday, September 19, 1887.

The rate of this excursion will be $67.50 for the round trip from San Francisco to St. Louis and return, and the limit of the tickets will be such as to afford excursionists ample time to visit all the principal points in the East before returning.

Pullman Palace Sleeping Cars through from San Francisco to St. Louis, without change, at regular berth rates. Union Pacific Tourist Cars fully equipped at $5.00 extra per passenger.

For information apply to or address

GEO. WATTS,
8 New Montgomery Street,
Palace Hotel, San Francisco.

We never fully appreciate how much subdued humility there can be found in a man until we see him playing dominoes with his mother-in-law.

THE BRAND ON CAIN

was not more fearful than are the marks of skin diseases, and yet Dr. Pierce's "Golden Medical Discovery" is a certain cure for all of them. Blotches, pimples, eruptions, pustules, scaly incrustations, lumps, inflamed patches, salt-rheum, tetter, boils, carbuncles, ulcers, old sores, are by its use healed quickly and permanently.

Green—Since he had that slander suit Pryor has gone out of business. Brown—Why, what was his business? Green—Other people's.

PENALTIES OF IMPRUDENCE.

Summer is at hand—the time of year when old heads and young become imprudent, get over-heated, cool off suddenly, catch cold, headache, nervous disorders, and a thousand and one other troubles. Preaching prudence is played out. The only thing to do is—after you have contracted one or more of these pains—to cure yourself as quickly as possible. Small pains are not to be neglected except at the risk of serious consequences. Remove them at once. It can be done by an application of one or more of ALLCOCK'S POROUS PLASTERS, recognized the world over as the best external remedy ever made. Mind you, don't neglect your little ills. They outgrow everything else and if let alone cost you more than you can ever know. Remember ALLCOCK'S PLASTERS.

Captain Nutt, who was so prompt in pursuing the revolted Apaches of Arizona, probably has the elements of a kernel in him.

Young and middle-aged men, suffering from nervous debility and kindred affections, as loss of memory and hypochondria, should enclose 10 cents in stamps for large illustrated treatise suggesting sure means of cure. Address, World's Dispensary Medical Association, Buffalo, N. Y.

A Wisconsin man drank a quart of ice-water to get cool, and has been growing colder ever since.

Try Germea for Breakfast.

BABY'S SKIN & SCALP CLEANSED PURIFIED AND BEAUTIFIED BY CUTICURA.

FOR CLEANSING, PURIFYING AND BEAUTIFYING the skin of children and infants and curing torturing, disfiguring, itching, scaly and pimply diseases of the skin, scalp and blood, with loss of hair, from infancy to old age, the CUTICURA REMEDIES are infallible.

CUTICURA, the great SKIN CURE, and CUTICURA SOAP, an exquisite Skin Beautifier, prepared from it, externally, and CUTICURA RESOLVENT, the new Blood Purifier, internally, invariably succeed when all other remedies and the best physicians fail.

CUTICURA REMEDIES are absolutely pure, and the only infallible skin beautifiers and blood purifiers, free from poisonous ingredients.

Sold everywhere. Price, CUTICURA, 50c.; SOAP, 25c.; RESOLVENT, $1. Prepared by the POTTER DRUG AND CHEMICAL CO., BOSTON, MASS.

Send for "How to Cure Skin Diseases."

BABY'S Skin and Scalp preserved and beautified by CUTICURA MEDICATED SOAP.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND WILL HELP ANY WOMAN Suffering from Kidney Disease or from troubles peculiar to her sex.

Its purpose is solely for the legitimate healing of the disease and the relief of pain, and that it does all it claims to do, thousands of ladies can gladly testify.

It has stood the test of twenty years in relieving periodical pain, promoting regularity of seasons, and banishing weakness, backache and consequent nervous distress.

Probably no other woman in the world receives so many "letters of thanks" as Lydia E. Pinkham, of Lynn, Mass. Mrs. P—— of Enfield, N. H., says: "I will simply say that your Vegetable Compound is all you recommend it to be. *It has done me Worlds of good.*" Another lady writes from Ottawa as follows: "I have just to-day bought the seventh bottle of your Vegetable Compound, have used two boxes of Pills and several packages of your Sanative Wash, and think it but right to tell you how much good I derived from your medicines. *They are a regular God-send.* All the pains and aches have almost disappeared, my stomach is much stronger too and I feel myself improved every way."

Price $1. Sold by all Druggists.

S. F. N. U. Series, No. 266.

3 months treatment for 50c. Piso's Remedy for Catarrh. Sold by druggists.

A Note of Alarm—"Don't come to-night. Pa is huffy about that gas bill."

If you are bilious, take Dr. Pierce's "Pleasant Purgative Pellets," the original "Little Liver Pills." Of all druggists.

"Say, ma, do men wear top coats to take a spin in?" is one of Tommy's recent conundrums.

Throat Diseases commence with a Cold, Cough, or over-fatiguing the voice. These symptoms (which, if neglected, often result in a chronic trouble of the Throat) are allayed by the use of "*Brown's Bronchial Troches*"

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

ROYAL

BAKING POWDER

Absolutely Pure.

The Powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low-test, short-weight, alum or phosphate powders. Sold only in cans. ROYAL BAKING POWDER Co., 106 Wall Street, N. Y.

Sold by Druggists. Price, $1.00.

LIVER, BLOOD AND LUNG DISEASES.

LIVER DISEASE AND HEART TROUBLE.

MRS. MARY A. MCCLURE, *Columbus, Kans.*, writes: "I addressed you in November, 1884, in regard to my health, being afflicted with liver disease, heart trouble, and female weakness. I was advised to use Dr. Pierce's Golden Medical Discovery, Favorite Prescription and Pellets. I used one bottle of the 'Prescription,' five of the 'Discovery,' and four of the 'Pleasant Purgative Pellets.' My health began to improve under the use of your medicine, and my strength came back. My difficulties have all disappeared. I can work hard all day, or walk four or five miles a day, and stand it well; and when I began using the medicine I could scarcely walk across the room, most of the time, and I did not think I could ever feel well again. I have a little baby girl eight months old. Although she is a little delicate in size and appearance, she is healthy. I give your remedies all the credit for curing me, as I took no other treatment after beginning their use. I am very grateful for your kindness, and thank God and thank you that I am as well as I am after years of suffering."

LIVER DISEASE.

MRS. I. V. WEBBER, of *Yorkshire, Cattaraugus Co., N. Y.*, writes: "I wish to say a few words in praise of your 'Golden Medical Discovery' and 'Pleasant Purgative Pellets.' For five years previous to taking them I was a great sufferer; I had a severe pain in my right side continually; was unable to do my own work. I am happy to say I am now well and strong, thanks to your medicines."

Chronic Diarrhea Cured.—D. LAZARUS, Esq., *275 and 277 Decatur Street, New Orleans, La.*, writes: "I used three bottles of the 'Golden Medical Discovery,' and it has cured me of chronic diarrhea. My bowels are now regular."

GENERAL DEBILITY.

MRS. PARMELIA BRUNDAGE, of *161 Lock Street, Lockport, N. Y.* writes: "I was troubled with chills, nervous and general debility, with frequent sore throat, and my mouth was badly cankered. My liver was inactive, and I suffered much from dyspepsia. I am pleased to say that your 'Golden Medical Discovery' and 'Pellets' have cured me of all these ailments and I cannot say enough in their praise. I must also say a word in reference to your 'Favorite Prescription,' as it has proven itself a most excellent medicine for weak females. It has been used in my family with excellent results."

Dyspepsia.—JAMES L. COLBY, Esq., of *Yucatan, Houston Co., Minn.*, writes: "I was troubled with indigestion, and would eat heartily and grow poor at the same time. I experienced heartburn, sour stomach, and many other disagreeable symptoms common to that disorder. I commenced taking your 'Golden Medical Discovery' and 'Pellets,' and I am now entirely free from the dyspepsia, and am, in fact, healthier than I have been for five years. I weigh one hundred and seventy-one and one-half pounds, and have done as much work the past summer as I have ever done in the same length of time in my life. I never took a medicine that seemed to tone up the muscles and invigorate the whole system equal to your 'Discovery' and 'Pellets.'"

INVIGORATES THE SYSTEM.

Dyspepsia.—THERESA A. CASS, of *Springfield, Mo.*, writes: "I was troubled one year with liver complaint, dyspepsia, and sleeplessness, but your 'Golden Medical Discovery' cured me."

Chills and Fever.—Rev. H. E. MOSLEY, *Montmorenci, S. C.*, writes: "Last August I thought I would die with chills and fever. I took your 'Discovery' and it stopped them in a very short time."

"THE BLOOD IS THE LIFE."

Thoroughly cleanse the blood, which is the fountain of health, by using Dr. Pierce's Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, and bodily health and vigor will be established.

Golden Medical Discovery cures all humors, from the common pimple, blotch, or eruption, to the worst Scrofula, or blood-poison. Especially has it proven its efficacy in curing Salt-rheum or Tetter, Fever-sores, Hip-joint Disease, Scrofulous Sores and Swellings, Enlarged Glands, and Eating Ulcers.

INDIGESTION BOILS, BLOTCHES.

REV. F. ASBURY HOWELL, *Pastor of the M. E. Church, of Silverton, N. J.*, says: "I was afflicted with catarrh and indigestion. Boils and blotches began to arise on the surface of the skin, and I experienced a tired feeling and dullness. I began the use of Dr. Pierce's Golden Medical Discovery as directed by him for such complaints, and in one week's time I began to feel like a new man, and am now sound and well. The 'Pleasant Purgative Pellets' are the best remedy for bilious or sick headache, or tightness about the chest, and bad taste in the mouth, that I have ever used. My wife could not walk across the floor when she began to take your 'Golden Medical Discovery.' Now she can walk quite a little ways, and do some light work."

HIP-JOINT DISEASE.

MRS. IDA M. STRONG, of *Ainsworth, Ind.*, writes: "My little boy had been troubled with hip-joint disease for two years. When he commenced the use of your 'Golden Medical Discovery' and 'Pellets,' he was confined to his bed, and could not be moved without suffering great pain. But now, thanks to your 'Discovery,' he is able to be up all the time, and can walk with the help of crutches. He does not suffer any pain, and can eat and sleep as well as any one. It has only been about three months since he commenced using your medicine. I cannot find words with which to express my gratitude for the benefit he has received through you."

A TERRIBLE AFFLICTION.

Skin Disease.—The "Democrat and News," of *Cambridge, Maryland*, says: "MRS. ELIZA ANN POOLE, wife of Leonard Poole, of *Williamsburg, Dorchester Co., Md.*, has been cured of a bad case of Eczema by using Dr. Pierce's Golden Medical Discovery. The disease appeared first in her feet, extended to the knees, covering the whole of the lower limbs from feet to knees, then attacked the elbows and became so severe as to prostrate her. After being treated by several physicians for a year or two she commenced the use of the medicine named above. She soon began to mend and is now well and hearty. Mrs. Poole thinks the medicine has saved her life and prolonged her days."

MR. T. A. AYRES, of *East New Market, Dorchester County, Md.*, vouches for the above facts.

CONSUMPTION, WEAK LUNGS, SPITTING OF BLOOD.

GOLDEN MEDICAL DISCOVERY cures Consumption (which is Scrofula of the Lungs), by its wonderful blood-purifying, invigorating and nutritive properties. For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Severe Coughs, Asthma, and kindred affections, it is a sovereign remedy. While it promptly cures the severest Cough it strengthens the system and purifies the blood.

It rapidly builds up the system, and increases the flesh and weight of those reduced below the usual standard of health by "wasting diseases."

Consumption.—MRS. EDWARD NEWTON, of *Harrowsmith, Ont.*, writes: "You will ever be praised by me for the remarkable cure in my case. I was so reduced that my friends had all given me up, and I had also been given up by two doctors. I then went to the best doctor in these parts. He told me that medicine was only a punishment in my case, and would not undertake to treat me. He said I might try Cod liver oil if I liked, as that was the only thing that could possibly have any curative power over consumption so far advanced. I tried the Cod liver oil as a last treatment, but I was so weak I could not keep it on my stomach. My husband, not feeling satisfied to give me up yet, though he had bought for me everything he saw advertised for my complaint, procured a quantity of your 'Golden Medical Discovery.' I took only four bottles, and, to the surprise of everybody, am to-day doing my own work, and am entirely free from that terrible cough which harrassed me night and day. I have been afflicted with rheumatism for a number of years, and now feel so much better that I believe, with a continuation of your 'Golden Medical Discovery,' I will be restored to perfect health. I would say to those who are falling a prey to that terrible disease consumption, do not do as I did, take everything else first; but take the 'Golden Medical Discovery' in the early stages of the disease, and thereby save a great deal of suffering and be restored to health at once. Any person who is still in doubt, need but write me, inclosing a stamped, self-addressed envelope for reply, when the foregoing statement will be fully substantiated by me."

GIVEN UP TO DIE.

Ulcer Cured.—ISAAC E. DOWNS, Esq., of *Spring Valley, Rockland Co., N. Y.* (P. O. Box 28), writes: "The 'Golden Medical Discovery' has cured my daughter of a very bad ulcer located on the thigh. After trying almost everything without success, we procured three bottles of your 'Discovery,' which healed it up perfectly." Mr. Downs continues:

Consumption and Heart Disease.—"I also wish to thank you for the remarkable cure you have effected in my case. For three years I had suffered from that terrible disease, consumption, and heart disease. Before consulting you I had wasted away to a skeleton; could not sleep nor rest, and many times wished to die to be out of my misery. I then consulted you, and you told me you had hopes of curing me, but it would take time. I took five months' treatment in all. The first two months I was almost discouraged; could not perceive any favorable symptoms, but the third month I began to pick up in flesh and strength. I cannot now recite how, step by step, the signs and realities of returning health gradually but surely developed themselves. To-day I tip the scales at one hundred and sixty, and am well and strong."

WASTED TO A SKELETON.

Our principal reliance in curing Mr. Downs' terrible disease was the "Golden Medical Discovery."

BLEEDING FROM LUNGS.

JOSEPH F. MCFARLAND, Esq., *Athens, Ga.*, writes: "My wife had frequent bleeding from the lungs before she commenced using your 'Golden Medical Discovery.' She has not had any since its use. For some six months she has been feeling so well that she has discontinued it."

Golden Medical Discovery is Sold by Druggists. Price $1.00 per Bottle, or Six Bottles for $5.00.

WHOLESOME BREAD.

Elementary Principles and Important Points in Bread-Making.

Bread of some kind forms an article of diet for all nations, and that it should be of the best quality is of the greatest importance, the health and welfare of the family depending so largely upon it.

In making bread, as in every other branch of cooking, the main thing is to become acquainted with the elementary principles. Few things that belong to the department of housekeeping have been so much discussed as bread-baking, and possibly it is because there has been so many different theories advanced upon the subject that housekeepers are bewildered and uncertain as to the best made.

Of course perfect bread can be made only from the best material, combined with the most scrupulous care and attention throughout the process. There should be no delay when the sponge is well mixed, and obtains the proper degree of lightness, or placing the loaves in a hot oven when ready to bake.

Certain chemical changes must take place in some of the components of the mixture, and as it is very important that all the necessary conditions for aiding these changes should be perfect, it is of course plain to every housekeeper that both knowledge and skill are required to become successful in the art of bread making.

After the quality of flour, indeed some cooks say in advance of it, the first thing to be considered in bread making is the yeast. Without good yeast it is impossible to make good bread, and it should be the ambition of every housekeeper to acquire the art of making good home-made yeast.

When ready to make bread the first step is mixing the ingredients. Atmospheric changes affect the sponge, and it is, therefore, best to mix it in a stone vessel and keep it excluded from the air. In summer no artificial heat is needed, but in winter it should be kept warm.

The length of time required for kneading is materially affected by the quality of the flour and the kind of yeast used, the better the quality of both the less time for working the bread will be requisite.

The most important point in bread-making is reached when the loaves are put in the pans for the last time. To decide when dough is sufficiently light to bake is a matter of great consideration to the cook, as it varies in different temperatures and at different seasons of the year, but practice will soon teach the length of time required. It is seldom less than half an hour, or more than two hours. A loaf of bread should be nearly double in size after it is put in the pan. The heat of the oven should be moderate when the bread is put in to bake, and should be gradually increased in intensity.

There are various methods of testing bread to ascertain when done. A loaf of hot bread when well baked will not burn the hand; if it does, there is more hot steam within than is consistent with perfect baking, and the bread should be replaced in the oven. The crust of a well baked loaf of bread is a rich brown. If any doubt is entertained of the bread being well done, it is better to leave it in the oven a little too long than not long enough.

Bread, as soon as baked, should be taken from the pans and placed uncovered in such a position as will expose the greatest possible amount of surface to the air. This prevents the crusts from being hard, as well as permits the rapid escape of gas involved in the process of fermentation.—*Eliza R. Parker, in Louisville Courier-Journal.*

GOOD COUNTRY ROADS.

Why Every Farmer Should Take an Interest in Their Maintenance.

I have been driving through a fine section of country to-day, but I was not favorably impressed with the character of its settlers, though I saw but few of them, and spoke to only one. I formed my idea of them from the condition of the roads. They were in very bad shape. It was impossible to drive off a walk in many places. In some places, it would be unsafe for a stranger to attempt to drive in a dark night.

This is not as it should be. Every farmer should take pride in having good roads along his land. If the assessed amount of road work is not sufficient to put them in good shape, let the property owners turn out with teams, and picks, and shovels, and make them good. It is for the interest of every man living in the neighborhood to have a good road and keep it so. When it is once made as it ought to be, but little labor will be required in keeping it so. If there is a swampy spot, drain it, and raise the roadbed. If there is a big stone or stump in the road, or near it, dig it out. Never crook about to avoid such obstacles, but get rid of them, once for all. Cut down the bushes along the fences, and see that the fences are in good condition, if cattle are allowed to run in the road. This may not be part of a road-master's duty, but it ought to be, so far as road fences are concerned.

It is for the interest of every farmer in the road district to elect to the office of road-master the man who will do the work best. Too often, qualification for the work is left out of consideration altogether in electing a man to the position.

This is a mistake. Select the man who keeps things as they should be about his farm, and the probability is that he will want to put the roads in the same condition. If so, give him your hearty co-operation, instead of trying to shirk out of "working on the road," as some men do.—*Cor. Our Country Home.*

THE WORLD'S WHEAT CROP.

America Leading the World in the Production of the Precious Grain.

The Department of Agriculture at Washington has been at some pains to gather from all available sources the figures showing the wheat crop of the world for 1886. The table contains no reports from China or Japan, but as the wheat crop of these two countries is comparatively small and never figures in the general wheat trade of the world, the omission is insignificant. The total crop is placed at 2,031,322,285 bushels. As this estimate covers the total wheat supply of not less than 1,000,000,000 of people it will be seen that the average per capita consumption of wheat allowed for does not exceed two bushels. In several countries the wheat production falls far below that amount, as in India, for instance, which has become a prominent country its 200,000,000 of population are credited with only 258,000,000 bushels of wheat, or about one and a quarter bushels per capita.

Of the wheat-growing countries our own is far and away in advance of all others. With less than 60,000,000 of population, our wheat crop for last year was 457,000,000, or about eight bushels per capita. The average per capita consumption in the United States for a number of years has been four and a half bushels, or the equivalent of one barrel of flour, thus leaving of last year's production three and a half bushels per capita for seed and export. The yield for 1886 was by no means exceptionally large, scarcely an average, perhaps, the yield once during the present decade having risen to 520,000,000 bushels. While in the aggregate, our wheat yield is at least a good third greater than that of any other country in the world, when we come to compare the yield per acre with some other countries we haven't much to be proud of. The average yield per acre in 1886 was not far from twelve bushels, while in Great Britain for the same year it was a trifle under twenty-seven bushels, and in 1885 upward of thirty-one bushels. Had our wheat acreage been as prolific as that of Great Britain last year, the yield would have exceeded 1,000,000,000 bushels or one half the total product of the world, instead of a little more than one-quarter, as at present. This comparison shows the capabilities of the United States as a wheat-growing country, when our farmers shall arrive at the conclusion that it will be more profitable to make two bushels of wheat grow where only one grew before, than to double the yield by doubling the acreage. Although positive statistics are not at hand to substantiate the assertion, it is probable that the consumption per capita of wheat is as high in the United States as in any country except France and Great Britain. It has not reached its highest point yet by any means, as in the South and Southwest Indian corn forms a much large proportion of the daily food of the people than it will when the farmers of those sections increase the fertility of their soils and give more attention to wheat growing, as they are certain to do in the future.

Next to the United States France produces the largest wheat crop, both in number of bushels and per capita. The French wheat crop for 1886 was 299,107,620 bushels, or about eight and one-third bushels per capita. As the wheat crop of France leads that of all other grains it follows that wheat is the common food of the entire people and that necessarily the per capita consumption is very high. Third on the list of wheat producing countries comes India, with 258,317,632 bushels. The per capita production in this country is very low, notwithstanding the very respectable proportions of the crop as a whole. The Indian ryot merely scratches his soil with the same rude wooden plow in use by his ancestors two thousand and, perhaps, five thousand years ago. The yield is necessarily small, and does not increase per acre, although the extension of the railway system of India has led to an important extension of the wheat-producing area, and it is thus made accessible to a market and becomes a chief article of export. Of the 258,000,000 bushels of wheat grown in India last year not more than 200,000,000 bushels, or one bushel per capita, was consumed at home. The balance was exported and formed an important item in the wheat supply of Great Britain. The ryot who grew the wheat ate very little of it, subsisting chiefly upon other products less salable.

Fourth in the list of wheat-growing countries comes Russia, with a crop for 1886 amounting to 213,907,084 bushels. Unlike France and the United States, Russia does not grow wheat as its leading staple. Rye is the principal Russian crop, the production in 1886 reaching 737,800,000 bushels. The wheat crop of Russia amounts to but little over two bushels per capita, and of this small amount a large share is exported. Like the India ryot, the Russian farmer sells his wheat and lives on his rye and other less salable grains. The taxes in the Czar's dominions are something enormous, and the wheat crop is the most available article upon which to raise money for the tax-gatherer. Austria-Hungary comes fifth in the list of wheat growing countries, with a crop for 1886 of 143,001,488 bushels, or a trifle more than three bushels per capita. This is mostly consumed at home. Spain, with a population of about 18,000,000, raised 131,660,000 bushels of wheat last year, or between seven and eight bushels per capita. Italy comes next, with a crop amounting to 129,412,133 bushels, or about five bushels per capita.—*Philadelphia Telegraph.*

CO-OPERATIVE PASTRY POETRY.

Fair Phyllis made a pretty cake,
To please her papa's palate;
Her parent put it on a stake,
And used it for a mallet.
—Philadelphia News.

And then she made a big mince pie,
In manner new and novel;
Her father seized it with a sigh,
And used it for a shovel.
—New York Morning Journal.

And then she stirred a pan of dough,
And made a mess of biscuit;
And passed them to her sweetheart, though
He thought he wouldn't risk it.
—Marblehead Folio.

She took some yeast, some flour and lard,
And, true to duty's call,
She baked them in a lump so hard
It made a good baseball.
—Richmond Baton.

Some cookies next day she deftly made,
All sugared round the edges;
Her pa, in the wood splitting trade,
Found they made stunning wedges.
—Fall River Advance.

Sweet Phyllis made a loaf next night,
With wonder working skill;
Her pa filled it with dynamite
And fired!—the loaf's there still.
—St. Paul Herald.

Not yet content that she'd done enough,
Some beefsteak next she fried.
It came from Henderson, of course 'twas tough,
She tackled a piece and—died.
—Henderson Gold Leaf.

They Didn't Intimidate the Flies.

Old Sowergrout—By dunder! I belief I vos scheated in dose vly screens. I vos hung dem in de most gonspicuous part of de room, but dose fly schoost gome in as bad as never.—Judge.

Able Bodied Chicago Liars.

Said Col. Phil Hoyne yesterday: "The hottest day in the history of Chicago was July 4, 1837. At noon that day the thermometer registered 123 in the shade. The lake stewed and steamed like a tea kettle and fish floated ashore already boiled and cream gravy on them."

"June 28, 1842, was the hottest day I ever knew of," said Long John Wentworth. "I was living on a farm then—the Cooley farm, near where Kinsley's restaurant stands now. It was so hot that we had to hang the thermometer in the well and keep fanning it to prevent it from bursting."

"On Aug. 6, 1846," said Amos Tucker, "we caught a blazer. Along about sunset I went out to the barnyard to see how the stock was getting along. We had twelve fine hogs just ready for the market. Well, when I got to the barnyard all I could find of them hogs was twelve buckets of leaf lard."

"The hottest day I ever knew of was July 15, 1853," said Jonathan Young Scammon. "I remember the exact date, because on the morning of that day our hens all laid hard boiled eggs."—Chicago News.

Society Notes.

The engagement of Miss Erminie Botts, daughter of the wealthy livery stable proprietor, to Lord Ernest Algernon Sykes-Nyms of Cove-upon-Avon is announced. This wedding will take place next September at the bride's palatial home at Bottsden-on-Goose Island.

A gloom has been precipitated upon the community by the rumor that Miss Birdie McPace's vaccination did not take.

Mr. Swinburne J. Terhune is still confined to his bed owing to his having eaten a slice of fruit cake at a fashionable german last Thursday evening.

The highest social circles have received with open arms Mr. and Mrs. Elmer K. Muzzlewhite, the wealthy and cultured New Yorkers, who have taken up a temporary residence in Chicago for the purpose of getting a divorce.—Chicago News.

The Sabbath Not Broken.

Eastern Stranger—My, my! I didn't suppose you allowed baseball playing here on Sunday.

Omaha Man—The playing is being done by an out of town club and we don't feel responsible for them, you know.

"But isn't that the Omaha club they are playing against?"

"Yes, but the Omaha club is composed of very conscientious young men who wouldn't think of breaking the Sabbath."

"But there they are right in the field and on this hallowed day of rest."

"If you look at the score you will see that they are not playing; they are resting."—Omaha World.

Value of an Education.

Little Dot—Oh, dear, I don't see why mamma gives me such lessons as this to learn, nothin' but great big words.

Little Dick—Well, folks use big words sometimes.

"But these are awful long things, ever so many syllables; why, some stretch 'most clear across the page. There isn't any use in learning them."

"Indeed there is, Dot. If you don't learn all them big words you'll grow up in ignorance an' never be able to read circus posters."—Omaha World.

Economy.

Pater—Tom, Tom! This'll never do! Past 11 o'clock, and you've been in bed fifteen hours out o' the twenty-four.

Tom—But it's cheap, gov'nor; costs nothing; wh'r'as directly a fellow's up and dressed expenses begin.—London Punch.

Hereditary gout is a most unjust disease. The father has had all the fun and the son catches most of the pain.—New Orleans Picayune.

SULTANIC WHIMS.

How Some of the Turkish Autocrats Used to Pass Away Their Time.

The amusements of the Sultans vary much according to the age in which they live, and according to their temperament and their particular tastes. Murad IV. took pleasure in cutting off the head of a slave every morning, in order to give him an appetite; and the most moderate historians place the number of murders that he ordered or committed with his own hand at more than a hundred thousand. One of his favorite distractions was to have men and women stripped before him, thrown upon iron hooks fastened in a high wall These unfortunates remained hanging by their flesh, suffered frightfully for a long time in this horrible position, and were delivered only by death. One day he had a dozen children disemboweled in order to find in their stomachs an apple that had just been stolen in his garden.

Murad united drunkenness to these amiable tastes. His excesses having finally brought upon him a serious malady, he succeeded, contrary to all hope, in escaping death. When he felt himself beyond danger, he celebrated his good fortune by a nocturnal orgy, drinking with his wives more deeply than ever. A Turkish poet of the time celebrated this exploit in a song, the hyperboles of which are almost untranslatable: "Murad, that sublime emanation from Heaven, was torn from the arms of the maiden of the vine, whom he loved distractedly, and his divine image was no longer reflected in the matutinal cup, which for so many years had gleamed for him upon the voluptuous couch. At the dawn of Beiram the master of the universe permitted the delicious fluid to sparkle under his eyes in the intoxicating cup, and he began again to touch with his divine and ruby lips the crystal in which smiled the golden draught."

What the poet does not say is that when Murad had dipped his divine and ruby lips in the enchanting cup he also dipped his divine and ruby hands in the blood of his subjects. After his supper, which almost always ended in an ogry, he ran into the street, crazed with drink, saber in hand, and killed those that he met. During the day he posted himself behind a window of the seraglio and hurled poisoned arrows at the passers-by. When he went out he had some Janissaries, armed with clubs, accompany him, and they beat to death the unfortunate ones they encountered upon their way.

Other times bring other manners and other tastes. The soul of Sultan Abdul Aziz has no occasion to reproach itself with any murder during its sojourn upon earth; and he could discount M. Grevy himself in his cagerness to save the lives of those condemned to death. His lips never knew the taste of spirits, wine nor tobacco; but he loved cock-fighting passionately, and he busied himself more with these turbulent winged creatures than with his wives and ministers. He invited Pashas, Chamberlains and Generals to these tournaments, for which he had a kind of arena, or inclosed space, constructed within the inclosure of the seraglio. He cheered on the one that seemed to be weakening, and those about him, all belaced, naturally mingled their voices with that of their master. A jury, selected by his Highness from the dignitaries of the empire, had to announce the victor and bestow the prize upon him.

One day one of these cocks distinguished himself so much that Abdul Aziz directed that he be treated with special consideration. He called him the Grand Vizier in the presence of that veritable official himself.

The thing next to cocks that Abdul Aziz loved most was his menagerie, a splendid collection of animals, especially rich in ferocious beasts. For a time he was possessed with a passion for parrots; but he soon withdrew from this brilliant society, and one day he opened their prison and drove them away. The birds took flight to Pera, and what was the surprise of the inhabitants of that Christian suburb when they saw beat down upon their roofs and against their windows a swarm of paroquets, macaws and cockatoos, which seemed to have fallen from heaven.—*Cosmopolitan.*

—An old cavalryman says that a horse will never step on a man intentionally. It is a standing order with cavalry that should a man become dismounted he must lie down and be perfectly still. If he does so, the entire company will pass over him, and he will not be injured. A horse notices where he is going, and is on the lookout for a firm foundation to put his foot on. It is an instinct with him, therefore, to step over a prostrate man. The injuries caused by a runaway horse are nearly always inflicted by the animal knocking people down and not by his stepping on them.—*N. Y. Sun.*

—Near Oakville, W. T., is the burnt stump of a cedar tree, probably the largest on record. It is a hollow shell, fifty feet high, eighty-seven feet in circumference, one foot from the ground; seventy-three, two feet and a half from the ground, and fifty-four feet eight inches, six feet from the ground. The cavity is twenty-three feet at its largest diameter.

—A new composition of building material for architectural purposes consists of glue, water, boiled linseed oil and the muriatic and sulphuric acids, to be used with calcined sulphate of lime and calcined carbonate of lime, the compounding and use to be in a specially prescribed way.—*Boston Budget*

THE GERMAN CAPITAL.

What an American Saw and Heard in and Around Berlin.

The endeavor to find some good reason for the location of Berlin has well-nigh wrecked my Yankee guessing powers. On the practical side of the Atlantic we think every large city must be evolved from some aggregation of natural advantages, but with the exception of the stream whose name exposes the capital to the accusation of always being on a Spree, Berlin has none of these. From north, south, east or west, you approach it over a vast plain, and when at last you begin to suspect that the Government is abducting you to the wastes of some German Sahara, the usual uninviting suburbs of a great city come into view, and you alight in a town of nearly 1,500,000 inhabitants. Coming from the West, the Harz is the last hilly country from which a New Englander can derive even a crumb of comfort. Beyond is a region of low, wave-like hills, a mining country where every depression has its chimney stacks and every elevation a windmill, and where one is never out of sight of one or more of the little red-roofed mining villages.

There are phenomena to be seen in Berlin; for instance, a restaurant where waiters refuse fees, and horse-cars which have room "for one more" according to American ideas, but which will not carry one passenger, great or small, more than the number prescribed by law. It was very gratifying to meet such a regulation; it may prevent many abuses; at least it compelled me to walk a weary distance one rainy evening, and taught me the difference between the application of a rule in general and in particular. It also introduced me to another interesting German custom, for, reaching my lodging at a late hour, I found the street-door locked. Door-bells are unknown here, and I had no key. A kick at the door echoed up and down the quiet street so ominously that a descent of the vigilant police seemed inevitable, but it aroused no response from within, and a repetition was out of the question. I thought tremendously, then sought a neighboring restaurant, confided in a waiter and learned that after a certain hour of the night the citizens resign themselves to the guardianship of the "wachter," who locks all the street doors in his district and pockets the keys. He who arrives later, without a key and would enjoy the shelter of his own roof, goes up and down the street several times in search of this functionary, finds him probably at last drinking beer within a stone's throw of the starting place, and in consideration of a small fee induces him to give his key the double turn which the mechanism of German locks requires and admit him to his own dwelling.

Berlin is a well-paved town, especially on its principal streets, which are laid with asphalt. The comfort of this can hardly be appreciated without experience; it deadens the noise of the tremendous traffic, lessens draft and allows an unusual degree of cleanliness. A dozen strong boys armed with "pushers" following one another down Friederich strasse are able to clean its entire length of nearly two miles, and leave it perfectly dry in two hours after the cessation of a heavy rain. But even the ordinary pavements are kept in good order, and in general one can find few cleaner cities than this.

The police system is very efficient. The general law throughout Germany requiring registration at the police bureaus of not only citizens, but strangers as well, and even travelers, is here most rigidly enforced. Every newcomer must personally appear before the police and account for himself, and also notify them of intended departure. Suspicious people are summarily investigated, as a friend of mine experienced during the winter. The fact that he hails from the American Athens may have lent something to the mysterious air with which he promenaded the "Linden" in the neighborhood of the palace at a late hour while waiting for a friend. At any rate, he soon attracted the attention of the police, was scrutinized, followed and finally arrested and brought before an interrogator. In spite of protestations and the evidence of student papers he was subjected to some hours' detention, a most searching examination, and was finally sent to his lodging under police escort, with an injunction to be more prudent in the future. But in general one need not complain of his treatment by the public servants. In all Germany they are polite, attentive and efficient to a degree which prompts not wholly favorable comparisons with our own country.—*Cor. Springfield (Mass.) Republican.*

The Best Form of Locomotive.

The same diversity of opinion as to the best form of locomotive for general use appears to prevail in England as in America. While coupled wheels are mostly preferred for passenger engines, five feet to six feet six inches diameter, a few leading American engineers prefer single drivers, and are disposed to revert to even seven feet, a diameter which has been tried and abandoned in the past as not meeting the expectations entertained of it. About fifteen years is the estimated average life of an American locomotive. It is generally admitted that railway trains in England are driven at a faster rate of speed than in the United States—say about twenty per cent. in excess of the latter. There are express trains, however, between some of our principal cities, that compare favorably with those in England.—*N. Y. Sun.*

NOTES ON MILKING.

Always Milk in the Same Order and Be Kind to the Cows.

Drawing the milk from the cow is an every-day job—we might say, a twice-a-day job. The operation looks simple enough, and is quite easy for one who understands it. None others should ever milk a cow, for it is important that the milking should be done rightly, rapidly and without hurting the cow or producing any sense of uneasiness. Many good milkers could not tell you, if asked, how they milk. They do it from habit acquired by early and long practice, and without thought as to how they do it. But a good milker opens his hand and grasps a portion of the udder, pressing the milk down into the teat, and when his thumb and forefinger come to where the teat begins, they are tightly clasped, so as to prevent a return of the milk to the udder. Then quickly follow the second, third and fourth fingers, each pressing the milk downward, until the whole hand is closed and the milk is expeled. This is the proper way to grasp and squeeze the teat. Some milk with the thumb and finger, stripping the milk out by letting the teat draw through between them. This may be done with easy-milking, short-teated cows, but is by no means a method to be commended. It pulls too much on the teat, and is liable to hurt a sensitive cow. There no need of pulling the teat at all, as many do, the gentle, rubbing pressure at first made on the udder being sufficient to fill the teat, which should be emptied by a gentle squeeze, as just described. This does not hurt the cow, unless the nails may be driven into the skin—which should by all means be avoided—or the teat is sore, in which case it should be carefully moistened and limbered with ointment before beginning to milk. A good, careful, kind, rapid and thorough milker is a valuable hand in a dairyman's service. Always milk in the same order. Let the same milker milk the same cow, following up in the same order every day. The habit of expectancy on the part of the cow is thus soon established, and she is ready for the milker when he comes to her, and is not disappointed. This regularity assures quiet satisfaction, and the largest flow of milk. Any change of milkers or break in the order will be found to lessen the yield, so readily does the cow fall into a habit. The hour for milking should always be the same.

Be kind to the cow. She is by nature a very gentle and docile animal, and we might add, an affectionate one. She soon learns to like those who treat her kindly and care for her. She is inclined to bestow upon her milker the love she would have bestowed upon her calf, had it been permitted to run with her. It is necessary that he should gain her confidence, at least, that she may not stand in fear of him. Some one has said, "Speak to a cow as you would to a lady." Certainly she should be kindly spoken to, and treated in a way to make her glad to see her milker when he presents himself. Then she will at once "hoist," commence chewing her cud, and with a dreamy look of enjoyment in her eyes, pour out the lacteal treasure at your touch.—*Prairie Farmer.*

HOUSEHOLD HINTS.

Useful Suggestions on a Variety of Important Domestic Matters.

Hot sunshine will remove scorch.

The best liquid for cleaning old brass is a solution of oxalic acid.

Kerosene applied to unused stoves will keep them from rusting.

A damp cloth dipped in common soda will brighten tin ware easily.

To clean knives:—Cut a small potato, dip it in brickdust and rub them.

Grease may be removed from silk by applying magnesia to the wrong side.

New iron should be gradually heated at first, it will not be so likely to crack.

Paint splashes may be removed from window pains by a very hot solution of soda, using a soft flannel.

Mildewed linen may be restored by soaping the spots, and while wet covering them with powdered chalk.

To extract paint from clothing:—Saturate the spots with spirits of turpentine, let it remain several hours, then rub it and it will drop off.

Javalle water is indispensable in laundry work; dip any stains in it for a moment, then in boiling water, and they will disappear. If any yellowness remains, bleach.

Boiling water made strong with ammonia and applied with a whisk broom, cleans willow chairs admirably. Soap should never be used, as it turns them yellow.

Ammonia greatly lessens the work of cleaning kitchen utensils, and of washing windows. Rubbing a Brussels carpet with strong ammonia water brightens it and removes stains.

Lamp burners that have become dim and sticky, can be renovated by boiling them in strong soda water, using a tin tomato can for this purpose; then scour the burners with sapolio and they will be as good as new.

Copperas dissolved in boiling water will instantly cleanse iron sinks and drains. A few drops of spirits of turpentine mixed with stove blacking lessens labor and adds polish. Kerosene in cooked starch (a teaspoonful to a quart), will prevent clothes sticking to the irons, and gives a gloss; the scent evaporates in the drying. (Powdered borax is good if one decidedly objects to the smell of kerosene.)—*Good Housekeeping.*

—The ostrich feathers which were sold during March at Port Elizabeth, in South Africa, realized £26,245.

THE LIMEKILN CLUB.

Brother Gardner Analyzes the Disease Commonly Known as Swell-Head.

"If Lord John Buckhorn ar' in de hall to-night I should like to hev him come for'd," said Brother Gardner, as the dust settled down and the members got their feet drawn in.

Lord John, who is a young man and a young member, made his way up the center aisle and as he reached the president's desk the latter continued:

"Brudder Buckhorn, I h'ar dat you ar' talkin' 'bout a tower to Yurup, an' you is sayin' you is gwine to rent a box in de pos'offis, an' you has bin talkin' considerable 'bout ownin' some pine lands down in Alabama."

"Yes, sah."

"Ar' you gwine to tower to Yurup?"

"N-no, sah."

"Got yer box in de pos'offis picked out?"

"Not yit, sah."

"An' I spose dem pine lands in Alabama ar' all in your eye?"

"Y-yes, sah?"

"I reckoned so. You ar' a young man, an' you has de swell-head an' want to swell out. You want to be tooken fur a millyonaire, when you doan' ai'rn but seben dollars a week and you am wearin' a hat of de style of three y'ars ago. Brudder Buckhorn, I want to spoke a few plain words to you.

"When dat disease called de swell-head keeps a grip on a young man arter he has passed his twenty-fo'th birthday he am purty sartin to eventooally bring up in de lunatic asylum or de poo' house.

"De pusson who goes aroun' purtendin' to be what he ain't, he's laid out to hoe de hardest kind of a row. He may fool a few ole women an' young chill'en, but de rest of de world will tumble to him fur what he is. Not only dat, but dey will dispise him fur his hypocrisy. Samuel Shin, who airns about fo' dollars a week, could circulate aroun' an' tell de people dat he was gwine to open a nashunal bank or build an elevator or organize a steamboat line. He might git a dollar's worf of credit at some co'ner grocery, an' some shoemaker might put a lift on one of his heels an' chalk it down, but in a few weeks Samuel would take a powerful drop, an' when he came down de concussion would jar de buttons off his shirt.

"'Spose'n, Brudder Buckhorn, dat Jay Gould should go aroun' claimin' dat he writ de works of Shakspeare, or dat de mayor of Buffalo should bob up an' declar dat he writ Paradise Lost! Can't you h'ar de dull thud with which they would strike the airth in about ten days?

"Jist sot yerself down some day an' emagine what would hev happened had Horace Greeley claimed dat he was George de Fourth, or had John Jacob Astor asserted dat he was Captain Kidd!

"I say to you, Brudder Buckhorn, drap it! Be who you ar' an' what you ar'. If you git up to eight dollars a week, let de world know it. If you drap back to five dollars doan' lie about it. An' about your disease. It doan' kerry a person off, like gallopin' consumpshun or typhoid fever, but it holds him up to the ridicule an' contempt of all sensible men. It might help you to soak your head in a pail of warm water. If it doan', you'd better put yer head between two freight kyars an' let 'em come together on ye. You may now resoome yer seat, an' if de ailment continers to grow on ye I'll look about for some remedy which de club kin apply."—*Detroit Free Press.*

BANGS AND BRAIDS.

The Latest Styles in Hair-Dressing for Ladies, Misses and Girls.

The back hair is now worn only medium high in a small soft coil or braided round and round. Very young ladies wear a very small Greek knot or braid extending out from the head, but this is a severe style, and is becoming only to well-shaped heads; the larger round braided coil close to the head is more generally becoming, and is used by young and elderly women. The French twist is less fashionable than formerly; instead the back hair is waved across and carried up easily—not too tightly—from the nape of the neck to the coil. The straight bang is convenient in warm weather, and will be worn again quite short, not covering more than half the forehead, as all dressing for the front hair now shows more of the forehead than formerly. The pointed or curved Russian bang is still popular. The newest fancy is to brush the short front hair up from the forehead, curving it slightly and letting it rest against the long hair back, which is puffed upward slightly but without a roll or cushion underneath, and is drawn back to the coil without parting. Elderly ladies wear soft chatelain braids in two loops that are both high and low without being extreme either way. Children are again wearing their hair short, shingled closely, and with a small bang just in front, not beginning far back on the top of the head. If large girls of twelve years wear long hair, it hangs straight without being waved; it is better, however, to have their hair shingled, as it will then thicken and grow to a good length before they are grown. Misses wear braids tied and hanging or in loops or coils. The straight bang is liked for school girls, as it is easily kept in order.—*Harper's Bazar.*

—"I want a bow," said a lady to a clerk in a dry goods store. The clerk, wishing to do something smart, drew himself up and said: "I'm at your service, ma'am." "Yes," said the lady, eyeing him deploringly, "but I want a white, not a green one." The clerk went to measuring the tape immediately.—*Philadelphia Call.*

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY SEPTEMBER 3 .....1887.

A Camping Place.

Through the whole length of Owens valley the eastern side of the Sierra springs up so abruptly from the plain, that access to the fishing and hunting grounds among the higher summits can only be had by going on foot, or on the backs of sure footed saddle animals. There is but one exception to this rule, and that is up Big Pine canyon. The mouth of the canyon is twenty six miles north from Independence, A fairly good wagon road extends up the canyon to within a short distance of the everlasting snowfields in which the stream has its source. A short distance above its mouth the canyon becomes a narrow gorge, the mountains on either side greatly increasing in elevation. The stream is of great volume, and descends in a continued succession of cataracts, so that looking up the canyon the bottom of the gorge appears to be full of snow. At the bottom of each cataract is a deep blue pool where the water appears to rest an instant before plunging over the next fall. Ten miles up the canyon is the

CAMPING PLACE.

Here the gorge opens out to a width of about a quarter of a mile making a grassy plain extending nearly a mile. Little groves of birch and poplar dot the surface, and there is good grazing. Here the stream is divided into two branches nearly equal in volume. There is a break in the chain on the north side of the canyon, down which the water rushes fully three hundred feet. The descent is not perpendicular, but so nearly so that the water after making the first plunge at once becomes a mass of snow-white foam, so light and fleecy in appearance that the spectator would not be surprised to see it float away on the air like a cloud, A safe but very steep trail leads up beyond this water fall; and here another little valley is found extending about a mile and a half. This valley curves around towards the South about one and a half miles, and is then crossed by a wall of rock, down which the stream rushes in a cataract very like the first one. The climb up this ridge is toilsome but quite safe; beyond it the canyon keeps curving towards the south. The mountains on either side are steeper than below; in places they are verticle for heights of two to three thousand feet. Enormous masses of rock have fallen from the hights comptetely filling the narrow gorge and forming a succession of water falls. Clambering over these wrecks of mountain tops is a work of no small labor, and suggests that any moment the peaks that now tower up to such awful hights may come crashing down and bury the intruder who ventures among them. In a few places the tops of dead pine trees are seen sticking up among the masses of fallen rock, showing that those masses were hurled down in comparatively recent times In the spaces between these piles of rock the little valley has nice groves of pine, with pretty little meadows gemmed with wild flowers. This is the character of the valley for a distance of three miles; then it is crossed by a ledge or rocks between three and four hundred feet high, down which the stream rushes. A fissure in this ledge a short distance south from the stream affords a steep but safe way to the plateau above; and having climbed this, the traveler looks down about one hundred feet upon the

FIRST OF THE LAKES.

This is about half a mile across and nearly circular. The lake is as blue as the sky and evidently deep. A ledge of rocks about a quarter of a mile across separates this lake from another of about the same size and appearance. Through a fissure in the rock the stream rushes from the upper to the lower lake. These lakes are in a great basin of circular form and from twelve to fifteen miles in diameter. The rocks on the floor and sides of this basin have been polished smooth by glacial action. Away up among the peaks of the mountains the remains of the ancient glaciers yet linger; some of these patches of snow and ice are at least a thousand acres in extent, perhaps more. Several of the surrounding peaks are over fourteen thousand feet high. On the south of the basin, one of the grandest of the peaks shoots up, a sheer wall of rock, unbroken by a single shelf or bench, to a highth of at least five thousand feet above the floor of the basin. The whole is suggestive of a cathe dral, but of sucha cathedral as the Divine Architect of the universe alone could construct. Beside this all that man has ever done sinks into utter insignificance. Saint Peter's and Saint Paul's compared with this would be even less than the toys of children. Nor are other accessories wanting to deepen the impression of a temple dedicated to the worship of God. In every crevice of the rocks where a little soil has gathered, there a pine tree is growing, and through their branches the soft summer breeze makes low, sweet music, sweeter than the famed "Miserere," sung once a year in the Sistine church at Rome; the cataracts on the mountain sides, with their swelling and falling roar, make a deeper and richer accompaniment than was ever heard

"Where through the long drawn aisle and fretted vault
The pealing anthem swells the notes of praise."

Going back to the camp and following the other branch of the stream up the canyon about two miles, a pretty pool is reached, the water is quiet, deep and clear, and is bordered by a lovely green meadow. A wall of rock bars the way, down which the stream dashes in a nearly unbroken fall of between four and five hundred feet. Vertical walls of rock, hundreds of feet high, confine the stream on each side: the gorge is filled with immense masses of granite, and to climb up over these is a work of some difficulty: Just at the top of this gorge the evidences of glacial action are as plain as in the west canyon. To a higth of a thousand feet or more the cliffs on each side are polished smooth. Just at the top of the gorge on the west side stands a solid mass of rock about three hundred feet high, and completely detached from the mountain side. Appearances indicate that the glacier ground away the supporting rock from the base of this cliff, and when the ice itself melted away the whole mass slipped downward, leaving a narrow crack from summit to base through which a man could not pass. Beyond this the little valley extends about a mile, covered with grass and flowers; the stream rippling over a gravelly bed till it emerges from a deed lake. On all sides but one the rocks rise up nearly vertical from the lake to a hight of fifteen hundred to two thousand feet. Then a circular bench, ten or twelve miles in extent, sweeps around and upward to the base of the final summits of the mountains; this space is filled with the remains of the ancient glaciers, and the water from these, plunges down the rocks, making the lake and the stream. Want of space will not permit, nor are words available to convey any just conception of the grandeur of these scenes. The American who trots over the tame scenery of Europe without first having witnessed these inconparibly grander scenes of his own country, may well be regarded as a foolish snob; one who has no mind of his own, but slavishly follows where silly fashion leads.

FISH AND GAME.

Trout are plentiful in the streams near the camping place, and any one with patitience and a little practice may take a good string every day. At distances of three or four miles from camp, and over steep but good bridle paths, are springs where grouse and quail frequent, and where good marksmen may secure a bag of game any day. Women can safely visit all of these scenes, but to do so they should be provided with stout shoes and short petticoats; still better would be trousers of drilling lined with flannel, At the camp during the middle of August the thermometer ranged about 80 deg. at midday, just before sunrise the usual temperature was 56 deg. There are no bear or other dangerous animals in that region. When the railroad shall be extended to Los Angeles, that tourists from that city can reach these scenes in a few hours, hundreds of people will flock to the grandest scenery in the United States. Then will be duly appreciated the wines and the fruits of Owens valley; products that have no equal elsewhere.

1810 1887

PROGRAMA

DE LA

CELEBRACION

DE LA

INDEPENDENCIA DE MEXICO.

DIA 15.

1ro.—A Las 11 y 30 minutos de la noche del 15, el Señor Cristobal Carrasco, dara el "Grito de Independencia" y a la conclucion se tocara nuestro hermosa "Himno Nacional" por la Orquesta dirijida por el Prof. Ford, disparandose en seguida los 21 cañonazos de costumbre enarbolandose á la vez el Pabellón Nacional.

Best mare, 2 years old..... 5 00
Best mare 1 year old..... 5 00

CLASS III.
HORSES OF ALL WORK.

Best stallion, 3 years old and upward.....$20 00
Best stallion, 1 year old..... 5 00
Best mare, 3 years old and upward..... 15 00
Best mare, 2 years old..... 7 50
Best mare, 1 year old..... 5 00
Best stallion and family, not less than three... 20 00

CLASS IV.
TEAMS.

Best matched team.....$15 00
Best single gelding, 3 years old and upward.. 7 50

CLASS V.
DRAFT HORSES.

Best stallion, 3 years old and upward.....$15 00
Best matched team..... 15 00
Best single gelding..... 7 50

CLASS V.
SWEEPSTAKES.

Best stallion, any breed or age,
Association Silver Cup, Engraved.
Best mare, any breed or age,
Association Silver Cup, Engraved.

SECOND DAY—Wednesday

CLASS VII.
JACKS.

Best Jack, 2 years old and upward.....$ 7 50
Best Jennet, 2 years old and upward..... 2 50
Best Jack and family, not less than three..... 10 00

CLASS VIII.
MULES.

Best span owned by one person.....$10 00

CLASS IX.
CATTLE—BULLS.

Best bull, 1 year old and upward.....$ 5 00
Second best bull, 1 year old and upward..... 5 00
Best bull calf..... 10 00

CLASS X.
COWS.

Best cow, 3 years old and upward.....$10 00
Best cow, 2 years Old..... 5 00
Best heifer calf..... 5 00

CLASS XI.
SHEEP.

Best ram, 2 years old and upward.....$ 5 00
Best lot of ewes, not less than five..... 5 00
Best lot of ewe lambs, not less than five 2 50

CLASS XII
GOATS.

Best lot of goats, not less than three.....$ 5 00

CLASS XIII.
SWINE

Best boar, 2 years old and upward.....$ 2 50
Best boar under 2 years old..... 2 50
Best sow, 2 years old and upward..... 2 50
Best sow, 1 year old and under..... 2 50
Best pen of 5 pigs, any age or breed..... 2 50

CLASS XIV.
POULTRY ETC.

Best pair of fowls, any age or breed.....$ 2 00
Best hen and brood of chicks..... 2 00
Best pair of bronze turkeys..... 2 00

THIRD DAY—Thursday

Second Department.

CLASS I.
AGRICULTURAL PRODUCTS.

All products exhibited in this Department must have been produced in Nevada, or in California east of the Sierra Nevada mountains, and by the exhibitor

Best 100 pounds of flour.....$ 5 00
Best 100 pounds of wheat, any variety..... 3 00
Best 100 pounds of barley..... 3 00
Best 100 pounds of oats..... 3 00
Best 100 pounds of corn..... 2 00
Best 50 pounds of alfalfa seed..... 2 50
Best bale of timothy hay..... 2 50
Best bale of alfalfa hay..... 2 50

CLASS II.
VEGETABLES, ROOTS, ETC.

Best 10 pounds of sweet potatoes.....$ 1 00
50 pounds Early Rose potatoes..... 1 00
100 pounds any variety of potatoes..... 2 00
12 parsnips..... 1 00
12 carrots..... 1 00
12 pounds turnips..... 1 00
12 beets..... 1 00
10 pounds tomatoes, any variety..... 1 00
½ doz. cabbage..... 1 00
50 pounds any variety of onions..... 1 00
½ doz. squash..... 1 00
pumpkin..... 1 00
sample of red peppers..... 1 00
½ doz. watermelons..... 1 00
½ doz. cucumbers..... 1 00
½ doz. cantaloupes..... 1 00
10 pounds of white beans..... 1 00
10 pounds of pink beans..... 1 00

INDEPENDENCE, CAL.

SATURDAY, SEPTEMBER 3 1887

BORN.

ELLIOT—At Bishop Creek, August 30, 1887, to Mr. and Mrs. W. C. T. Elliot, a son.

Mr. Dan Crough has returned from his trip north.

Mrs. Stewart of Lone Pine was in town during the week.

John Reddy, of Darwin, is a student at St. Mary's College, San Francisco.

Mr and Mrs. Elliott, of Big Pine, have been made happy by the birth of a son.

The camping parties in the hills west of Big Pine have all returned to the valley.

Mr. Stoutenborough, writes that $1,600, has been subscribed for the fair at Bishop Creek.

At latest reports Governor Bartlett was so ill that no hope was entertained of his recovery.

Mr. Harry Burt and family of Big Pine, will leave in a few days for Austin Nevada where they will reside.

On Monday last Mrs. J. W. McMurry of Big Pine, was taken with a congestive chill and was quite ill for a few days.

The Independence American Club will meet this (Saturday) evening at the Court House, at half past 7 o'clock.

The fair of the Third District Agricultural Association will be held at Chico, October 11th to 15th inclusive.

A meeting was held at the M. E. Paronage last Wednesday when a Board of Trustees were elected, also Stewards and other church officers.

Mr. C. Anthony, of Darwin, has gone to San Francisco. He reports that W. C. Ober was in a critical condition, having been attacked with spasms.

Several weeks ago it was published that a new post office had been established at Panamint. Richard Decker has since been appointed Post Master.

Pat. Keyes recently shipped fourteen and a half tons of ore from a prospect at the White Hill. The amount returned by Selby & Co. was $1 440; nearly one hundred dollars per ton.

A party of Surveyors in the employ of the Denver and Rio Grande R. R. Company are at work surveying for a line across the Sierra in the neighborhood of Bridgeport, Mono county.

The *Chronicle-Union* says that quite a number of horses are missing in the neighborhood of Bridgeport. The thief who stole Mr. Levy's horse was reported to have gone in that direction.

Orders for fruit are coming to Independence much faster than they can be filled. Our fruit is so fine in appearance and of such far superior flavor that those who get it once care for no other.

John Alexander has a car load of ore ready for shipment, from a prospect ten miles east of Alvord station. The ore was found at the surface, and there are indications of a good deposit.

Jack Lavelle is prospecting at Chrysopolis; at the beginning of the week he ran through a sample of three and a half tons of ore at the Mexican mill that yielded $144, being forty dollars per ton.

P. P. Dow died suddenly at Keeler last Monday. He had been ailing some time from kidney trouble. Mr. Dow was an old timer in Owens valley, and was engaged in the stage business for many years.

The State Board of Equalization has fixed the assessment of the C & C road within Inyo county at $158,686. This is an increase over the assessment of last year of $10,000, and makes the total increase of assessment of the county $117,688.

Good reports come from Aurora. The Antelope, Juniata and Durand mines are all said to be turning out good ore in large quantities. The Walker Lake *Bulletin* says the Silver Hill mill is running day and night on Antelope ore.

Supervisors Harger, Robinson and Eldred met at the Court House on Wednesday, and canvassed the vote cast at a special election for Director of the second division of the irrigating district. Mr. A. Densmore was declared elected.

Trusting to the guidance of a divining rod, a mine has been sunk on the west side of Mount Davidson to a depth of 500 feet. No ore has yet been found but the work of sinking still goes on. The divining rod is a very old superstition.

Mr. H. L. Clark has gone across the mountains by way of King's River. At Visalia he expects to meet his brother-in-law Mr. W. Russell, and together they will return by the same route and make the ascent of Mount Whitney on their way back.

Mrs. Conklin, who is at Los Angeles, was badly frightened by a runaway team that dashed into a street car in which she was riding. Some of the other passengers were bruised and cut, but Mrs. Conklin escaped with no worse effects than a bad scare.

Mr. Ed. Reed, of Candelaria, was at Independence at the beginning of the week. Mr. Reed intends to open a furniture store, hardware and tinsmith business at Bishop Creek. Busines will detain him at Candelaria till about the beginning of next year.

Religious services, tomorrow, [Sunday] Rev. Sissons will preach at the M. E. Church in forenoon, and at a quarter before eight o'clock p. m. After the forenoon service the sacrament of the communion will be administered. Sunday school at 11 o'clock a. m.

A new race track has been located near the south end of town; the ground is good and will make a first class track; water is convenient and the park can easily be made a nice place of resort in addition to its other uses.

Mr. and Mrs. Enos and Mr. John McSweeney got back from their trip to Long valley on Thursday. Mr. Enos says reports were current up there that the man who stole Mr. Levy's horse had been followed by other parties who had lost horses, and captured at Fresno Flats. The reports said that the man had been severely wounded in the pursuit, three shots having taken effect upon him. It would be cheaper to bury the fellow than to try him.

The Poor Mans's Country.

The land boom is increasing every day. There are not wanting signs that it may, if it has not already, became a frenzy, like the mining stock excitements of a few years ago. Should this prove to be the case a crash is certain to follow sooner or later. In the end it will be found that the price of land can only be maintained at a figure where it will yield in produce enough to pay interest on the capital invested. Excitements may carry prices beyond that figure, but a reaction is sure to restore real values. At present Owens valley offers one of the very best openings in the state for the safe investment of capital. Excellent land can now be bought at prices that may be increased three or four fold, and still the land would yield enough to pay good interest on the money invested. A good farm of one hundred and sixty acres can be bought here for a sum of money that would'nt buy a garden spot where the excitement is now raging. Owens valley is the country for a man who has small capital and wants a home, and that is the kind of people we want.

For the Fair.

Many farmers, merchants and housekeepers have already acted upon the suggestion offered a few weeks ago, and have accumulated much for exhibition at the Fair. Grain in the sheaf and threshed; corn, fruits and vegetables; of these displays will be made that will be little less suprising to many of our own citizens than to strangers. More and better cattle and horses will be shown than was thought possible. Every owner of a fine animal is desirous of having that official recognition that can be had only at these state instutions. The Directors will have funds enough at their disposal and are determined to offer such premiums as will make it worth while for the owners of fine animals to exhibit them at the Fair.

Farewell Party.

On Monday evening last the residents of Big Pine and vicinity together with a representation from Bishop Creek and Independence met at Big Pine to attend a farewell party tendered Harry Burt and family. At 10 o'clock dancing commenced in Eagles Hall and was continued until 12 o'clock when supper was announced. The repast was spread in the dining room of the Hotel, and was excellently gotten up, showing both taste and liberality. After supper dancing was resumed and continued until the "wee sma' hours." The party then dispersed with kind expressions of regard to host and hostess and well wishes for success in their new home.

Selling Liquor To Indians.

For some time past Sheriff Gregg has been laying in wait for a Chinaman, who he had reason to believe was selling whiskey to Indians. Last Tuesday evening the Sheriff caught the Chinaman in the act and arrested him. The man was tried next morning and fined fifty dollars, or to be confined in the Jail fifty days. This Chinaman is a dangerous character; only a few weeks ago he was fined for making an assault on another Chinaman with a butcher's cleaver. He paid the fine. When last arrested he was armed with two revolvers and a most murderous looking dagger; those the Sheriff now has in his possession. Mr. Gregg has done good service in this case.

Meteorological Summary for July, 1887

Keeler, Cal.

Mean actual barometer	26 300 inches.
Mean temperature	81
Highest temperature	97
Lowest temperature	61
Monthly range of temperature	38

Precipitation	0.52
Number of clear days	21
Number of fair days	9
Number of cloudy days	1
Number of rainy days	4

D. C. Gaunow,
Observer, Sig. Corps, U. S. A.

Sad Accident.

Rev. James Crossman, one of the ministers who attended the recent Conference at Carson, was dangerously, if not fatally injured while on his way home. He stopped over night at a place about twenty-five miles north of Reno, and while in a stable taking care of his horses, one of the animals attacked him savagely. When rescued he was unconscious, and upon examination it was found that his skull was broken and he was otherwise terribly injured.

Fair Date Changed.

At a meeting of the Directors of the 18th Agricultural District, held last Tuesday evening; the date for holding the annual fair of said District was changed from October 4th to September 27th, being one week earlier than the date at first fixed. The reason for making this change was to afford people at Independence an opportunity to attend the fair at Bishop Creek.

A beef famine is expected. An immense number of cattle perished on the range last winter; severe drouth has destroyed many more this summer in the western states. It is estimated that the total number of beef cattle lost during the winter and summer will be at least 1,500,000.

Several years ago the people of Independence constructed a race track and erected buildings thereon near town. More recently Alexander Clark located the ground for a homestead and refuses to surrender the buildings to the citizens. Suit has been begun by the people for the recovery of the property.

One year ago a poor Italian began working a small mine prospect at Darwin. He has all the time worked alone and now has twenty-five hundred dollars saved from his year's work. The hills around Darwin are full of small ledges where miners could work alone or two or three together and make good wages.

A team belonging to O. I. Mairs was employed to take Dr. Blair to to attend C. W. Ober. On the way back one of the horses, a very fine animal, laid down in the road and died. The trip is a hard one and the horses were urged so as to get help to the injured man.

The executive committee of the Board of Directors are doing good work preparing for the Agricultural District Fair. Much has already been accomplished, and in the most important direction, namely, securing funds. Lumber and other material is on hand and on the way. We have yet about six weeks for preparation and a great deal can be done in that time.

The great rush of buyers of real estate in various parts of the State is increasing. Millions of dollars are invested eaery day, and still prices are going upward. Half a dozen wide awake real estate dealers could make fortunes in Owens valley. It needs but the touch of a practiced hand to start the boom here; we say to such an one, like the Macedonian in the apostle's dream, "Come over to us and help us."

HALE BROS. & CO'S. ADVERTISEMENT.

To those who wish to order by mail we say:

Look Out for Our Fall & Winter Catalogue, to Be Issued the First Part of September.

It comprises the latest styles and ideas; is the most complete ever issued and we expect extraordinary results.

We are the largest Consumers of Goods on the Coast, and buy direct from the Manufacturers, thus ennabling us to give Most Advartageous Prices to you.

In 1880 we started in an unpretending way at 812 K street; we did not doubt the future since our stores increased with a rapidity that astonished us, neeessitating improvement after improvement, all aimed toward having a splendid structure in Sacramento at some future time That time has come. To-day we are adding 20x80 feet to the rear of our present large establishment, and building two more stories over the 80x100 feet. The carpenter's busy hammers are heard from morn till night, sending forth a tune of enterprise from one end of Sacramento to the other, in encouraging tones of comendation; when completed we will have the largest and most magnificent store in Sacramento.

We are ready for a large order trade.

We are going to have it.

We will give prompt attention to all orders.

We will not be undersold.

Send for our new Illustrated Catalgue.

HALE BROS. & CO.

Sacramento, Cal.

829, 831, 833, 835 K St. and 1026 Ninth

On the evening following the celebration of Mexican Independence at Lone Pine, a ball will be given for the benefit of the sufferers by the earthquake at Baviape, Mexico. These poor people have been terribly afflicted, and any aid, however little, would be to them a blessing.

Attention is invited to the Fair Premium list, published on another page. By comparison it will be seen that in many of the more important exhibits the premiums offered by the 18th Agricultural District are more liberal than in several Districts in the State. In fixing premiums the intention of the Directors was to give to exhibitors every dollar possible, in order to compensate for the trouble of making the exhibits. The official recognition that can be had only at these State institutions is another valuable consideration.

At the Methodist Conference recently held at Carson, the Superintendent of the mission in his report to the Conference said: "Both Bishop Creek and Independence charges are in a rich valley, well adapted to all kinds of fruit. The C. & C. R. R. is just now contemplating an extension of its line to Los Angeles, and people are going down there in great numbers and taking up land. It will soon be a thickly settled country, abounding in wealth. Our Church and school are there to reap the harvest of the seed of truth and righteousness so early sown."

Ranch for Sale.

At Black Rock, twelve miles north from Independence, 520 acres of land for sale. Black Rock is one of the very best parts of Owens Valley. Four hundred acres of this land is held under U. S. patent; the remainder is located under the timber culture Act. One hundred and eighty acres are enclosed by a fence of cedar posts and barb wire Sixty acres are now under cultivation, mostly wheat, oats and barley. A large amount of hay can be cut; blue joint, red clover etc. Several large springs of pure water on the place and good water rights additional. House, outbuildings and corrals. C. & C. railroad half mile distant from east line of land. Owens river eighty rods distant. This is a fine place for an energetic man to improve and will be sold at a bargain. Apply to

C. MULHOLLAND,

SALE OF FAIR PRIVILEGES.

The exclusive privileges of keeping a bar, ice-cream stand, confectionery stand, lunch stand, and selling pools on the grounds during the Annual Fair of the 18th Agricultural District, commencing September 27, 1887, at Independence, will be sold at the reading room of the Norman House, Independence, at 2 o'clock p. m., on Monday, September 12, 1887. Said sales will be made at public auction to the highest bidder. Terms of sale, cash at sale.

By order of Directors. C. MULHOLLAND, Secretary.

FINAL PRE-EMPTION PROOF.

D. S. No. 1109.

LAND OFFICE AT INDEPENDENCE, CAL.
April 6, 1887.

NOTICE IS HEREBY GIVEN THAT THE following-named settler has filed notice of his intention to make final proof in support of his claim, and that said proof will be made before the Register and Receiver at Independence on September 27, 1887, viz.: August Stecker, for the W ½ of S E ¼ and W ½ of N E ¼ Sec 22 Twp 13 S, R 35 E, M D. M.

He names the following witnesses to prove his continuous residence upon, and cultivation of said claim, viz.: John C. Irwin, John A. Lank, Arthur Tanner and Alexander Clark, all Inyo county, Cal.

JOHN W. P. LAIRD,
o-m14 Register.

NOTICE OF SPECIAL ELECTION.

Office of Board of Supervisors, Inyo county State of California.

WHEREAS, At a special election held in Division No. 2, of Irrigation District No. 1, of Inyo county, on July 2, 1887, it appears from the returns of said election that the vote cast for Director of said Division resulted in a tie vote between S. A. Densmore and J. S. Gorman and no Director was elected therein.

Now, therefore, notice is hereby given that an election will be held in such Division on Saturday, August 20, 1887, for the purpose of electing one Director for said Division.

For the purpose of holding and conducting such election the following voting place and the following officers are hereby appointed, to wit: At the residence of S. A. Densmore. Inspector S. A. Densmore; Judges, L. A. Anger and B. Aguirre. Polls will be open from one hour after sunrise till sunset. J. D. HARGER Chairman.

Attest: P. H. MACK, Clerk.

Dated August 5, 1887.

161 acres well improved with good dwelling and out-honses, farming machinery, horses, cattle, etc. Located in the most desirable portion of the valley. Good water title. For further particulars inquire of

C. A. LEVY, Bishop Creek.
P. W. Forbes, Independence.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN G. EVANS, SPURTLAND, MO., writes: "I stand up and affirm that a Washer saves more hard labor and money to a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will put up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I would roll one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, NORMAL, ILL., writes: "You ask what I think of the Washer I bought last summer. 1st. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ones for $100."

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine.

WOMEN OF CENTRAL SOUDAN.

A Bevy of African Beauties—Dress and Jewelry—Social Restrictions.

The women of the household have got over their first tremors, and come to the conclusion that we are a good natured and a harmless looking sort of fellows. At first they peep over the wall or out of neighboring doorways, till, growing bolder, they venture in groups out of their hiding places to see, and doubtless to be seen. Not to alarm them, we take notes surreptitiously, and observe that they make up quite an ethnological collection of African types. Fillani and Haussa women from the neighborhood, Nupe and Yoruba specimens from the Niger districts, and others from the tribes of Adamawa and the Benne region. Clearly our friend is a man of catholic tastes in the matter of women. His harem presents all kinds of face and figures, from the copper colored Fillani, with slender, lithe figure, well shaped face and positively beautiful eyes, to the shapeless form, black skin, ugly face and muddy eyes of the lowest negro type.

They are all dressed alike, with a lower turkedi or cloth round the waist, hanging to the ankles, a second sheet wound round the body under the armpits, and a third worn in the varied modes of a shawl on the head and shoulders. The hair is gathered into a solid ridge of grease and hair, which extends from the brow to the nape of the neck, something after the manner of the crest of a helmet. From each temple hangs a kind of stiff love lock. The ankles are adorned with enormously heavy anklets of solid brass, the bar being little short of an inch and a half in thickness, the ends ornamented with neatly made polygonal beads. Nothing better finished could be turned out of a European workshop. Round the wrist are placed several more brass bracelets, not so expansively made, but collectively so heavy that to ease their arms the wearers are frequently to be seen with hands clasped behind the head or hanging down their backs. Their ornaments usually include a string of agate beads made in the country. The women, unlike the men, do not affect white colors, the more fashionable cloths being checks of dark blue, a medium tint of the same, white and magenta. Among those who can afford expensive articles the latter two colors are prevalent.

Strangers are not usually admitted into the family compound, but it most not be supposed that the women are strictly kept inside and never let out. Quite the reverse. In the evenings they are almost invariably left at liberty to wander forth and join in any dance or merrymaking there may be afoot, and I would not like to be responsible for the statement that their behavior is always best on these occasions. During the day, also, if any of the women have anything to buy or sell at the market there is no restriction to their going thither. In the more wealthy families, however, there is always one if not two wives who are kept in strict seclusion, and not infrequently eunuchs are employed to guard the morals of the harem.—Joseph Thomson in Harper's Magazine.

The Late Professor Hermann.

"Tall and singularly spare of figure," says a London Standard correspondent of the late Professor Hermann, "nature seemed to have cut him out for a conjurer. At a children's performance, given with his never failing generosity at the Colon theatre, in Buenos Ayres, for the benefit of the Italian hospital, I saw him go down amongst his audience with a huge bowl of sweetmeats. Having distributed these, he reeled out from the seemingly empty basin several hundred yards of paper ribbon, and then, rolling these up and tearing them asunder, 'produced' four live geese. No new principle was involved in this, but I mention it as an instance of his immense power of concealment. The environment of all his tricks was pre-eminently artistic. His canary bird vanished, not like a 'copper up the sleeve,' but with a weird shriek, and a cloud of yellow feathers left fluttering to the ground. His tact and audacity were as magnificent as his manipulation. After bringing out four globes of goldfish (larger than any other conjurer has been able to work with) from a cloth, he would go down into the stalls and request spectators to prod his sides and examine his coat tail pockets; then producing the fifth bowl, which had been lying in the hollow of his back. If he had a specialty it was the management of living animals, but he could never overcome his horror of serpents sufficiently to allow him to introduce two young boa constrictors, which I tamed for him."—New York Tribune.

Permanency of Type Writing.

The announcement made some time ago that the type writer records in the departments in Washington were fading caused quite a flurry in nearly every big office and business house in the city, as the type writer is now quite extensively used. There are, it is said, between 40,000 and 50,000 in use in this country. Many wills are now prepared with type writers, and it will thus be seen that much depends on the ink. Other legal documents, scarcely less important, are now written with the machine. After considerable quiet investigation, it has been found that the fault lay in the quality of ink used. Black record ribbons, whose ink is made of lamp black, and the indelible copying ribbons insure permanency for the writing. The matter was so important that the examiner of the chemical division of the United States patent office investigated it at the request of the secretary of the treasury. He found that with the two ribbons mentioned the ink is driven more deeply into the paper than with a pen, and is less susceptible to chemical agencies for removing it. This assurance has again brought the machine back into use, and we are making wills with it the same as before.—Lawyer in Globe-Democrat.

Why the Crow Is Black.

The Indians of the extreme northwest had some very remarkable legends about the creation, in which the crow takes the leading part, bringing order out of chaos. Perhaps the most curious was that which accounted for the raven coat of the crow. One night, while making a tour through his dominions, he stopped at the house of Can-nook, a chief, and begged for lodging and a drink of water. Can-nook offered him a bed, but, on account of the scarcity of water, refused to give him anything to drink. When all the rest were asleep the crow got up to hunt for the water butt, but was heard by Can-nook's wife, who aroused her husband. He, thinking that the crow was about to escape, piled logs of gum wood upon the fire. The crow made desperate efforts to fly through the hole in the roof where the smoke escaped, but Can-nook caused the smoke to be denser and denser, and when the crow finally regained the outer air he had a black plumage. It was previously white.—The American Magazine.

ART IDEAS IN DESSERT.

After Dinner Decorations of Ancient Days—Paper Playthings, Etc.

A French epicurean writer says that the dessert should be the crowning tableau of the dinner. It should surprise, astonish and dazzle. If the dinner has fully satisfied the sense of taste and the appetite, the dessert should address itself to the soul, as it were, through the eyes and rouse sensations of surprise and admiration and crown the enjoyments that commenced with the removal of the cover of the soup tureen.

The dessert of the middle ages had no special character. There was a good deal of Cellini cup and Limoges plate, Palissy dish and gold chased goblet about it, and perfumes and spices in plenty. The cake one can readily imagine to be like wedding cake, quite heavy, full of citron, and considered indigestible, and a person can also imagine certain errors of taste marring the whole affair, as in Ben Jonson's time, when, at a lord mayor's feast, a beribboned dwarf jester at a given signal took a flying header into a large bowl of custard, to the alarm, terror and delight of the aldermen, court gallants and the ladies, whose fine ruffs and slashed hose of silk and satin must have been fearfully splashed and spotted. In the times of the Medicis and Bartholomew massacre the French and Italian nobles had a queer custom of always carrying about with them in the pockets of their doublets costly little boxes filled with bonbons, reminding one very much of some good grandfather or uncle who always has a peppermint in a bit of paper tucked away in the far off corner of some pocket. It was a childish custom, and proves that the age had a sweet tooth and a more boyish taste than ours. It must have been highly conducive to flirting and may have been useful for diplomatic purposes.

Robert May, in his cook book, expatiates largely on the skill and art required to build a large gilded ship of confectionery during the reign of James I. "Its masts, cabins and portholes all smart and glittering, its bunting flying, its figurehead as bright as gold leaf could make it. Its guns were charged with actual powder, its cargo was two turreted pies, one full of living birds, the other of frogs. When borne in by gay pages to the sound of music, the guns were discharged, the ladies screamed and fainted, so much so as to require being held up and consoled with sips of Tokay, the gallants all the while smiling and applauding. After all this you may suppose they will desire to see what is in the pies. The lids are lifted, and out come frogs and flying birds, causing much delight and surprise to the whole company." Such were the sports of Whitehall when black browed old Rowley presided at the table.

The house of Brunswick brought over sound Protestantism, but German taste. Cooking grew cumbrous and dull; a naturalism became the fashion of the German and French cooks of the eighteenth century. Horace Walpole, great about trifles, derided the new fashion in dessert. Jellies, biscuit, sugar plums and creams, simple and pleasant, had given way to fashionable inanity, and fashionable rusticity to harlequins, gondoliers, Turks, Chinese and shepherdesses of Saxon China. These fantastic creatures wandering about a dessert in a meaningless way among dry, frizzly groves of curled paper and silk flowers, were soon discovered to be insipid. Meadows full of spotted cattle, sugar cottages, pigmy and long tailed Neptunes in cockle shell cars domineering over oceans of looking glass and rumply seas of silver tissue paper did not satisfy. Gradually Frederick, Prince of Wales, whose companions were Desnoyess, the dancing master, and Doddington, the toady, began to deride these puppet shows that figured in the center of the Burgundy glasses and the dishes of macaroons. The grandeur of size now struck these pigmy dandies. The confectioners aspired to actual statuary; spindle legged Venuses in affected postures.

The dessert is allowed by all writers to be of Italian origin. The maitre d'hotel before the Italian dessert arrived gloried in large dishes, mountains of fruit and hills of sticky sweetmeats. The elegance was clumsy and ostentatious; there was no poetry in it. The newer fashion consisted in those trees and shrubs and gardens alluded to by Walpole. Frenchmen delighted in the sea of glasses, the flower beds formed of colored sand and the little men and women in sugar promenading about. The sand garden first appeared in France in 1725 at the marriage of Louis XV with Queen Mary of Poland. Desforges was the first decorator of those days. He introduced imitation foliage and gave a natural appearance to frizzled muslin. He was succeeded by De-Lorme, who had not such profundity of imagination, yet he won many laurels, and was followed by Dutfoy in 1805, who immortalized himself by forming the center of his dessert of palaces and temples of perfect taste and of vast extent. Domes, cupolas, galleries in perspective, elegant porticoes, columns and entablatures were molded by his ingenious and skillful hands.

The appropriate attributes with which he adorned his temples rendered mythology an after dinner study at once agreeable and instructive. He almost gave life to these extraordinary pictures by a tasteful arrangement of light and shade. He sought also the aid of the pyrotechnist, and that artist hurried to his succor. He mixed harmless Chinese and scented fireworks with his temples and Greek shrines. In a moment the temples of Dutfroy were the center of a whirl of colored fires; a thousand globes darted to the ceiling and shed their scented sparks on the astonished and delighted guests.—"M. R. H." in Boston Herald.

Fainting as an Element in Fiction.

Swooning is now, I fear, sadly out of date. In society we no longer look upon it as a pleasing evidence of feminine propriety, and in the modern novel nothing sufficiently exciting to bring about such a result is ever permitted to happen. But in the good old impossible stories of the past it formed a very important element, and some of Mrs. Radcliffe's heroines can easily achieve twenty-seven fainting fits by their own unaided industry. They faint at the most inopportune times and under the most exasperating circumstances; when they are running away from banditti, or hiding from cruel relatives, or shut up by themselves in gloomy dungeons, with nobody to look after and resuscitate them. Their trembling limbs are always refusing to support them just when a little activity is really necessary for safety, and, though they live in an atmosphere of horrors, the smallest shock is more than they can endure with equanimity. In the Sicilian romance, Julia's brother, desiring to speak to her for a minute, knocks gently at her door, whereupon, with the most unexpected promptness, "she shrieked and fainted;" and, as the key happens to be turned on the inside, he is obliged to wait in the hall until she slowly regains her consciousness.—Atlantic Monthly.

WHEN TO CUT WHEAT.

The Importance of Harvesting the Grain at the Right Moment.

Yearly milling journals advocate the cutting of wheat while the grain is in the dough state, especially if the wheat be winter wheat. It is asserted that it makes more pounds of flour per bushel, and whiter flour than when wheat is allowed to get hard before being cut. This being admitted, it is nevertheless true that the yield per acre is seriously reduced. We have repeatedly shown this, and have as constantly advised farmers to allow the wheat to get at least so ripe that the grain will hold itself intact when shelled by hand from the ear. If millers want wheat cut in the dough state they must pay a considerable advance over commercial prices, to cover shrinkage in weight and extra cost in drying. Really the objection of the miller, as betwen fully ripe and unripe wheat, is the larger percentage of bran.

Directly under the bran lies the gluten cells, the most valuable constituent of wheat. Under the old system of milling much of this gluten was left in the bran. Under the newer system nearly all this gluten is saved. Hence, the only means of enhanced profit to the miller, as between ripe and unripe wheat, lies in the greater thickness of the bran in the ripe, as compared with the unripe wheat. There is no increase of either gluten or starch in the grains of wheat after being cut, since the straw dries quickly. In standing grain also, there is very little deposit of valuable constituents after the straw is fairly yellow at the bottom. Hence, when wheat is fit to cut, the wise farmer will secure the crop as quickly as possible, and will get it under cover as soon as it is fully cured, so it will not injure in the stack or mow.

But the farmer must take another important matter into consideration, in harvesting. He must calculate the probabilities as between his means of cutting and the time necessary to secure the crop in the best condition as a whole. If his conveniences are not such as will enable him to secure the entire crop in the best condition, a portion must be cut rather green, and a portion rather ripe, but none should be cut so green as to shrink much, and none so ripe as to shell badly, as to the grain, or to crinkle down as to the straw. It is far better that the reaper be kept going early and late, to the full endurance of the teams and hands, than that the crop be allowed to suffer.

Fair minded harvest hands will not object to these additional daily hours of labor if they are paid for the extra service, and no money is better spent than in the effort to secure a crop in the best possible condition.—*Farm Field and Stockman.*

BEAUTY ALWAYS WINS.

Disagreeable Results of a Peculiar Bet Made by Two Noblemen.

Several gentlemen were seated the other day in a London Strangers' Club, discussing the subject of female beauty. One of them, Sir Arthur McCamur, expressed the opinion that there was no situation in life in which a beautiful woman has not twice the success of her less attractive sister. Beginning with the stage at the top, upon which the beautiful actress already has half the game in her hands, down to the common beggar-woman in the streets, he eloquently illustrated his thesis. The company was not unanimous, however, and finally Count Patrick made a wager with Sir Authur McCamur, which was carried out in the following manner: A remarkably beautiful chambermaid of the club, and at the same time a stewardess, plain almost to ugliness, were provided with precisely similar and common clothes, and sent out to beg the whole afternoon in an aristocratic neighborhood, with instructions to meet again in the club at nine o'clock. The gentlemen passed the time at the card table, but dawn still found them there with the cards in their hands, and neither of the two beggars had returned. The reason of this turned out to be that both had shown themselves so inapt at their new business that they had been arrested by the police, and had passed the night in the cells. The two noble sportsmen appeared as witnesses, and made a frank confession to the magistrate of the whole affair. He thereupon asked the beggars why they had consented to such degradation. They replied, because these gentlemen had promised them three pounds each if they would do so. The magistrate answered: "I am not here to judge of the reasons which have led anybody to commit a breach of the law. What you have just admitted to me, so far from being an exculpation, makes your case much worse than that of those who are compelled by need and distress to seek relief upon the streets in defiance of the law. You are both sentenced to eight days' imprisonment. Perhaps it may be agreeable to those gentlemen who have come forward as witnesses to learn here in court the cases with which beauty has nothing to do, and that it has not the slightest influence upon the decision of a judge.'—*Magdeburger Zeitung.*

Baby's First Words.

Omaha Dame—Your baby seems very bright for his age.

Kansas Mother—Oh, he's just as smart as they make 'em.

"Can he say papa and mamma yet?"

"No, he ain't learned that, but you just ought to hear him lisp 'weal estate.'"—Omaha World.

Inside Points.

"I see," said a friend to the editor of a Dakota daily, "that you call these papers you are printing now the second edition—how do they differ from those you were running off half an hour ago?"

"We stopped and oiled the press," and the journalist reached for the lever again.—Dakota Bell.

Happy Again.

The buttercups nod to the breezes of morn,
The hillsides with daisies are hoary,
They say dandelions the meadows adorn,
And bloometh the sweet morning glory.

The wild bee is humming in sweet rural nooks,
Where waveth the red tufted clover,
And the husband goes round with delight in his looks,
For the days of house cleaning are over.
—Boston Transcript.

A YOUNG BUTCHER'S LUCK.

He Wins $15,000 in the Louisiana State Lottery.

"I want to see a reporter," said an unusually happy-looking individual as he entered the *Chronicle* building. On being introduced to one of the staff he commenced by saying that his name was A. J. Trefts, and that he lived in Butchertown. As there was a very large fire recently in that part of the city there was apparently no great reason for such unusual joy as that manifested by Mr. Trefts. He, however, was very anxious to communicate the news of a godsend which had fallen to him soon after he had been burnt out.

"I am the fellow. I won it. Just bought one ticket and got $15,000. That's luck, isn't it?" said the jovial Trefts.

Then it began to dawn upon the reporter that he was really in the presence of another one of the lucky holders of a winning number of a Louisiana lottery prize. Mr. Trefts had come down of his own free will to tell of his lucky venture.

"I could hardly believe my eyes when I read that number," said he, "52,749. I looked at my ticket and turned it over and laid it down beside the paper and compared it, and then I began to think I was the luckiest man I ever met. Just think, one ticket and all that money for $1!"

"What are you going to do now, Mr. Trefts?" asked the interviewer.

"I am going to extend my business right away, for that fire nearly did for me. I didn't believe much in the Louisiana Lottery before, and I just thought to myself when I bought the ticket, 'Well, I've lost enough already, this dollar will never be missed,' and now you may be sure I never stop thinking how glad I was I bought it, and so I thought I would drop in and tell you all about it."—[San Francisco (Cal.) Chronicle, July 2.

Little Laughs.

If you doubt that silence is golden, look at the profits of the still.—Duluth Paragrapher.

Whatever else may be said of her class in the genus homo, the society lady bares herself bravely.—Duluth Paragrapher.

"Berty" wants to know how he can retain the love of his sweetheart, Elizabeth. Eternal vigilance is the price of Lib, Berty.—Texas Siftings.

The best shelter for a girl is her mother's wing, especially when she is disposed to be what the Frenchmen call a little chic.—Siftings.

Mrs. Graff, of Dakota, presented her husband with twins, and he said he would run over to the station and wire his mother-in-law a pair o'Graff.—Duluth Paragrapher.

It is when a baggage master comes to handle the baggage of a star actor that he realizes the force of Hamlet's remark about Yorick—a fellow of infinite chest.—Siftings.

Blobson—Don't you think Simpkins is a very bright young man? Dumpsey—Well, yes, he would be if his check was polished.—Burlington Free Press.

"A boy assassin hanged," read Mrs. Bascom from the newspaper. "Well," she remarked, "a sassin' boy is a great trial, but I don't think he ought to be hanged for it."—Burlington Free Press.

Miss Shawsgarden (of St. Louis, to Miss Breezy, of Chicago)—Well, how is everything in Chicago? Dull as usual, I suppose? Miss Breezy—No, things are looking very bright. How is the pasturage in St. Louis?—New York Sun.

Minister (making a call)—And do you always do as your mamma tells you to, Flossie? Flossie (emphatically)—I guess I do, and so does papa.—New York Sun.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

If you wish to know just how little patience you have left try to raise a refractory car window to please a fidgety woman on a hot day.

For weak lungs, spitting of blood, weak stomach, night sweats, and the early stages of Consumption, "Golden Medical Discovery" is specific. By druggists.

The way to keep your credit good is never to use it. It is one of the few things in this world that gets the brighter and more valuable with disuse.

Piso's Remedy for Catarrh is agreeable to use. It is not a liquid or a snuff. 50 cts.

Try Germea for Breakfast.

How to Cure Skin & Scalp Diseases with the CUTICURA REMEDIES.

TORTURING, DISFIGURING, ITCHING, scaly and pimply diseases of the skin, scalp and blood, with loss of hair, from infancy to old age, are cured by the CUTICURA REMEDIES.

CUTICURA RESOLVENT, the new Blood Purifier, cleanses the blood and perspiration of disease-sustaining elements, and thus removes the *cause*.

CUTICURA, the great Skin Cure, instantly allays itching and inflammation, clears the skin and scalp of crusts, scales and sores, and restores the hair.

CUTICURA REMEDIES are the great skin beautifiers.

Sold everywhere. Price, CUTICURA, 50c.; SOAP, 25c.; RESOLVENT, $1. Prepared by the POTTER DRUG AND CHEMICAL CO., BOSTON MASS.

Send for "How to Cure Skin Diseases."

TINTED with the loveliest delicacy is the skin bathed with CUTICURA MEDICATED SOAP.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Is a Positive Cure

For Female Complaints and Weaknesses so common to our best female population.

It will cure entirely the worst form of Female Complaints, all Ovarian troubles, Inflammation and Ulceration, Falling and Displacements, and the consequent Spinal weakness, and is particularly adapted to the Change of Life.

It will dissolve and expel tumors from the Uterus in an early stage of development. The tendency to cancerous humors there is checked very speedily by its use.

It removes faintness, flatulency, destroys all craving for stimulants, and relieves weakness of the stomach. It cures Bloating, Headaches, Nervous Prostration, General Debility, Sleeplessness, Depression and Indigestion. That feeling of bearing down, causing pain, weight and backache, is always permanently cured by its use. It will at all times and under all circumstances act in harmony with the laws that govern the Female system.

For the cure of Kidney Complaints of either sex this Compound is unsurpassed. Price $1. Six bottles for $5.

No family should be without *LYDIA E. PINKHAM'S LIVER PILLS.* They cure constipation, biliousness and torpidity of the liver. 25 cents a box at all druggists.

"GENTLE AS THE BREEZE OF EVENING."

This line of an old hymn is quite appropriate when applied to "Pleasant Purgative Pellets." "I don't like to take pills if I can avoid it," we often hear persons say, "because they constipate me so," now the "Pellets" never do this. They are so gentle and mild that their effect is almost precisely similar to a natural movement of the bowels, and no unpleasant effects are left behind.

A book has been written for "middle-aged women." It will be a middle-aged book before a woman will be seen buying it for her own reading.

THE BEGINNING OF THE END.

The beginning of disease is a slight debility or disorder of some of the vital organs, the stomach, the liver or the bowels usually. There are dyspeptic symptoms, the liver is troublesome, the skin grows tawney and unhealthy looking, there are pains in the right side or through the right shoulder blade. The climax is often an utter prostration of the physical energies, perhaps a fatal issue. But if the difficulty, is met in time with Hostetter's Stomach Bitters, which is always effective as a remedy, and it should be resorted to at an early stage, there will be no reason to apprehend those injurious subsequent effects upon the system often entailed by entirely cured diseases. Far better is it, also, to employ this safe remedial agent in fever and ague, and other malarial complaints, than quinine, and other potent drugs, which, even when they do prove effectual for a time, ruin the stomach and impair the general health.

The boy who expects to set the world on fire will never do it by smoking cigarettes. He will simply burn out his own energies.

"Brown's Bronchial Troches" will relieve Bronchitis, Asthma, and Throat Diseases.

DISGUSTING SKIN DISEASES.

What spectacle is more disgusting than that of a man or woman with a skin disease which shows itself in pimples and blotches on hands, arms, face and neck? It is simple impure blood. See what BRANDRETH'S PILLS did for a chronic case:

For four years I was in the Mounted Infantry in the U. S. Army, residing during that time principally in Texas. Almost all of that time I had a chronic skin disease, characterized by an eruption over the entire surface of my legs and thighs, arms and chest. The doctors termed it eczema. I had given up all hopes of ever being cured, when BRANDRETH'S PILLS were recommended to me. I concluded to try them, and did so, and I have thanked God daily since then that I did so. I think I used them altogether for about three months, and, by that time, was completely cured and have never had any trouble since. My skin is as clear as any one's.

GEORGE CHAPMAN.

Pincenning, Mich., Dec. 8, 1885.

Perhaps the divine idea in making women shorter than men was to enable the former to "look up to" the latter.

PREMATURELY AGED.

Many a woman is robbed of those charms which the gentler sex value so highly, and made old before her time by functional irregularities. To such the bloom of youth may be restored by the use of a remedy which has stood the test of time and which is to-day acknowledged to be without an equal as a cure for all female weaknesses—Dr. Pierce's "Favorite Prescription." By all druggists.

One thing is certain, beer is bad ballast for any boat, be she yacht or be she yawl.

G. A. R.

The twenty-first national encampment of the Grand Army of the Republic will be held at St. Louis, Mo., the last week in September next. Arrangements have been made for a grand excursion of G. A. R. Comrades, their families and friends—open to all—to leave San Francisco on Tuesday, September 19, 1887.

The rate of this excursion will be $67.50 for the round trip from San Francisco to St. Louis and return, and the limit of the tickets will be such as to afford excursionists ample time to visit all the principal points in the East before returning.

Pullman Palace Sleeping Cars through from San Francisco to St. Louis, without change, at regular berth rates. Union Pacific Tourist Cars fully equipped at $5.00 extra per passenger.

25 CTS. PISO'S CURE FOR CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes good. Use in time. Sold by druggists. CONSUMPTION

GOLDEN MEDICAL DISCOVERY

CURES ALL HUMORS,

from a common Blotch, or Eruption, to the worst Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin, in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. Great Eating Ulcers rapidly heal under its benign influence. Especially has it manifested its potency in curing Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Disease, White Swellings, Goitre, or Thick Neck, and Enlarged Glands. Send ten cents in stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections.

"THE BLOOD IS THE LIFE." Thoroughly cleanse it by using Dr. Pierce's Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, and vital strength, will be established.

CONSUMPTION,

which is Scrofula of the Lungs, is arrested and cured by this remedy, if taken before the last stages of the disease are reached. From its marvelous power over this terribly fatal disease, when first offering this now celebrated remedy to the public, Dr. PIERCE thought seriously of calling it his "Consumption Cure," but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption, but for all Chronic Diseases of the

Liver, Blood, and Lungs.

If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flushes, low spirits and gloomy forebodings, irregular appetite, and coated tongue, you are suffering from Indigestion, Dyspepsia, and Torpid Liver, or "Biliousness." In many cases only part of these symptoms are experienced. As a remedy for all such cases, Dr. Pierce's Golden Medical Discovery is unsurpassed.

For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy.

SOLD BY DRUGGISTS, at $1.00, or SIX BOTTLES for $5.00.

Send ten cents in stamps for Dr. Pierce's book on Consumption. Address, World's Dispensary Medical Association, 663 Main Street, BUFFALO, N. Y.

$500 REWARD

is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure. If you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption.

Dr. Sage's CATARRH REMEDY cures the worst cases of Catarrh, "Cold in the Head," and Catarrhal Headache. 50 cents.

Is the lady shown in these portraits, and they are given here to benefit other ladies by showing how their forms may be superbly developed, combining Beauty, Grace, Strength, and Health.

☞ The pictures here are poorly printed, but I will send colored ones correct in every detail to any lady asking for them; also pictures of many others, who have given me permission to do so. This delightful change was made by using

THE SPANISH SYSTEM OF PHYSICAL CULTURE.

GUARANTEED a superb bust development in young and middle-aged ladies and after nursing; finely modeled shoulders; rounded, symmetrical limbs and arms; a pure, lovely complexion, free from sallowness, freckles, eruptions, black-heads, moth-patches, etc.; brilliant eyes, with perfect health and strength. ☞ That tired feeling and all female weakness promptly cured. Spanish women owe their celebrated beauty to this System. See the book for details.

$5 WORTH FREE to any responsible lady who will privately say a good word for the treatment after using successfully. See page 9 of book.

BOOK FREE with many beautiful portraits, which I have permission to send, showing results of treatment on Form, Complexion and Health.

HOME TREATMENT: Do not mistake: home treatment is sent by express, prepaid by me, with just the same results as if taken at the Institute. Write immediately for the Free Book, with portraits, references and all details to enable you to enjoy all the good of this system. It has been used for four centuries by the Spanish ladies, and they are world-famed for their beauty and health.

CONFIDENCE: Never forget that all names are held sacred. Some give permission to use their names, but I never ask it, and without such permission no names is mentioned or case referred to.

SOME EXTRACTS FROM LETTERS.

Mrs. Switzer is a member of the Pacific Dental Association, and is well known in this city.

Office of Mrs. Anna Switzer, Ladies' and Children's Dentist, No. 3 Fulton Street.

SAN FRANCISCO, Feb. 6, 1886.

DEAR DR. HARMON:—

I want to say that, in consideration of the great good your Spanish Treatment has done me, and for your constant courtesy, I will be glad to have you refer any one interested in the same way to me. Show them this letter if you wish, and hand them my card, a number of which I enclose, and ask them to call at my office. With much esteem, ANNA SWITZER.

Mrs. Smyth is a lady of wealth and culture, formerly of this city, but now residing at her Oakland residence across the bay.

DR. HARMON—

Dear Sir: I have received great benefit from your Development Treatment, and you can use my name and address any time you desire to do so. My residence is given below and I will cheerfully answer any question personally or by note.

A friend spent Thursday with me and remarked that I was growing younger and wanted to know what kind of padding I used to get myself up so well with. I gave her your little book, and she will come to see you soon.

* * * * * MRS. S. G. SMYTH.

Box 196, Oakland, Cal.

Mrs. C. B. Moss (name given by permission), aged 27, used both the Development and Complexion Treatment. She says:

"As I told you when I first wrote you, my bust was never fully developed, and nursing two children spoiled what I had in my girlhood. *Now I can wear as low dresses in the evening as anyone, if I want to.* My limbs have filled out, too, and in every way I am vastly improved. The Complexion Treatment has done me much good, clearing my face of all black specks, pimples, etc., making it fair and fresh looking. I use no powder now and never will again. * * * Show this letter to any one interested, and refer them to me. Two ladies have sent from here for your treatment, and more will follow."

(See her portraits on page 20 and 21 of book.)

BURDETTE.

Humorous and Incisive Comments on Current Topics.

Last week, at about the same hour and on the same day, an editor and a horse died. In the papers of his own state the editor was dismissed with nine or ten lines. A minimum space of a half column was devoted to the horse; the editors told his age, the names of his mother, grandfather and grandmother; told what they did; what the horse himself did; told what he was worth; how he came to be worth so much, and one man spoke of him as the "deceased;" and all the writers agreed that in the death of this horse the country had suffered a great loss. That is fame, my boy; if you are at all ambitious you will some day be mighty sorry that you weren't born a "hoss" instead of an editor. Still, if you go with the right kind of people, you may yet grow to be a "ass." That won't help much, though.

LACKS THE QUALIFICATIONS.

One young gentleman in this year's crop of Cornell graduates announces that he is an Anarchist. Not in full standing, he isn't. He may have selected that profession, but he can't qualify. It will take years, patient, waiting years, of razorless soaplessness before he can accumulate the necessary amount of hair and dirt to be a full grown Anarchist. If he has been at Cornell four years he ought to know that hair and dirt are the two essentials of Anarchism; all other things are elective.

JUST THAT KIND OF A PLACE.

"This paper says," remarked Mrs. MacSorley, "that a Columbarium has been established at Philadelphia. What's that?" "It is a place where they are going to cast the big columbiad guns for the new steel cruisers," replied Mr. MacSorley, who is considered an authority on military matters by Mrs. MacSorley. "But this seems to be a kind of a place where they make ashes of dead people," said Mrs. MacSorley, "instead of burying them." "That's just exactly it," said MacSorley, "a 100 pound columbiad gun makes hashes of all the people that gets in its way, and they can't find enough of 'em to bury 'em. That's what it is; a Columbarium."

HE DOESN'T EXACTLY CATCH ON.

Something or other, we can't say just what, but something in the little editorial note, makes me think that a new man has taken hold of The Nevada Watchman: "The delay in the appearance of The Watchman this week is due to the fact that our wife and myself took a little trip to the county seat, where we were detained by heavy rains flooding the streams and carrying away bridges. The bridge at Hunter's Forks was gone, so leaving our better half at Neighbor Paddock's we came on by myself in time to get out this week's edition only two days late." He has the tune pretty well, but he gets the words a little mixed.

THE UNFAILING SIGN.

Ah, ha! what do we hear? From every city, town and hamlet (except Henry Irving's) comes the rallying cry: "The people; not the politicians!" Ah, yes; this is the sign that the politicians have about completed their slates, and are getting ready to pack the conventions and adopt things "spontaneously."

EVEN JUSTICE.

People rejoice in the conviction of Jacob Sharp, because it seems to the ordinary mind that the tempter certainly deserves punishment along with the tempted. People don't like to see the little rascals punished while the great rascals escape. And yet it has always gone hard with the transgressor. Adam was expelled from Eden because he was bribed to disobedience with a handful of fruit, while the devil went right on having as good a time as ever; better, indeed, for the devil. Esau, who sold his birthright, lost his father's blessing, and Jacob, whose other name at that time might have been Sharp, gained everything by taking advantage of his brother's weakness. So, once in a long time, people like to see the fellows who operate the market squeezed till they howl. It pleases people. It doesn't draw on their sympathies, and tends to reconcile the other convicts to their fate. When a man barks his shins by falling through a defective cellar grating, nothing pleases him more or spreads a more healing balm upon his abrasions than to see the owner of the property break his neck in the same coal hole.

THE DAY WE DO NOT CELEBRATE.

One broiling day in hot July,
John Adams said, long years gone by,

"This day, that makes a people free,
Will be the people's jubilee;

"With games, guns, sports and shows displayed,
With bells, pomp, bonfires and parade,

"O'er all this land, from shore to shore,
From this time forth forever more."

The years passed on, and by and by,
Men's hearts grew cold in hot July.

And one New England mayor said,
"Of rockets I am sore afraid;

"And whoso sends one up ablaze,
I'll send him up for twenty days."

Then said the Mayor O'Day McQuade,
"Thayre uz no nade fur no perade."

And Mayor Hans Von Schwartzenmeyer,
Proclaimed "I'll haf me no boniier."

Said Mayor Baptiste Raphael,
"No make-a-ring-a dat-a bell."

"By gar," said Mayor Jean Crapaud,
"Zis July games vill has to go."

And Mayor Knud Christofferssonn
Cried, "Djeath to hjim who fjires a gjunn!"

At last, said Mayor Wun Lung See,
"Too muchee hoop-la bobberee!"

And so the Yankee holiday
In 1900 passed away.

—Brooklyn Eagle.

A Startling Statement.

Eastern Man—Oh, the real estate boom is not confined to the west by a good deal. A few of us have founded a big town ourselves in Pennsylvania within a year.

Omaha Man—That's good work; must be some mighty sharp men in your section.

"Well, in the first place we bought the side of a mountain, all rock and scrub oak, got it mighty cheap of course."

"I see, I see. Then divided it up into little, wee, tiny bits of lots and"——

"No, we divided it into big lots so every man could raise enough garden truck to keep the family going."

"Queer notion, but then, of course, you got the land for almost nothing. How many thousand dollars did the free picnics and excursions cost you?"

"Didn't have any."

"Oh, that's it. Depended on brass bands, eh? Well, they cost money, big money, but they pay."

"Hadn't so much as a tin trumpet."

"Great Scott! How did you sell the lots?"

"We started a silk mill along side of 'em."

N. B.—At this point the conversation stopped and the Omaha man was carried into a drug store in a fainting condition. The shock was too much for him.—Omaha World.

Good Interest, Too.

"What do you know of interest today, Mr. Chinker?" inquired a reporter while nosing around for news.

"Same as usual," was the brusque reply. "Seven per cent. on good security."—Merchant Traveler.

A FRENCH CHESTNUT.

Curious Story of a Tree in the Garden of the Tuileries.

There is a curious story about a chestnut tree in the garden of the Tuileries, which a Paris paper has just recalled. It is known as the "Chestnut of the 20th of March," and the peculiarity about it is that it always puts out its foliage before any other tree in the garden. This year, however, it has violated all its traditions; its leaves did not appear until after many of its neighbors had begun to show their foliage, and it is this fact which recalls the following story: One day when Louis XVIII. was talking with one of his courtiers, Count Limoleon, about the weather, the latter imprudently alluded to the famous chestnut tree. "What is the chestnut tree of the 20th of March?" inquired the King. "I hear some one speak of it every year." The Count saw that he had made a bad mistake, but tried to repair it. "Sire," he replied, "every one avoids speaking to your Majesty of this chestnut tree, because it is a souvenir of one of the most unhappy episodes of your reign." "What is that?" asked the King. "The 20th of March is the date on which the usurper Bonaparte, after his escape from the Isle of Elba, arrived in Paris and took up his residence in the palace of the Tuileries." "Well I know that," replied the King; "but what has it to do with the chestnut tree?" "The followers of Bonaparte observed that on that day there was one tree in the garden which was covered with leaves, while the others had none at all, and the mob from Paris came to see the tree which it was said put forth its leaves in honor of the usurper." "Well," said the King, "this merely proves that trees are like men in some respects; they do not all have the same opinions. And did you say that since my second restoration this particular tree had continued to have leaves on the 20th of March?" "Yes, sire, it is true." The reply seemed to annoy the King, and, although he said nothing about it, the courtiers decided it would be best to cut down the Bonapartist tree and substitute one that was more proper and loyal in its habits. But what happens? The year passed, and as the King did not say any thing more about the tree it was believed by the courtiers that he had forgotten all about it. They were very much astonished, therefore, when on the 20th of March, 1824 the King, who never went to the garden of the Tuileries, expressed a wish to see the famous chestnut tree. Their amazement was extreme, however, when they arrived at the garden and found the tree in full bloom, with even more leaves and flowers than before. Their mortification may be imagined. The King, however, reassured them by remarking, after he had taken a good look at the tree, "Well, let it remain and represent the Bonapartist opinions if it will. So long as this is the only thing which conspires against us the Bourbons have little to fear." The tree is still in the garden of the Tuileries, but it is not the one which bloomed on the 20th of March, 1815, when the Emperor returned to Paris.—*Chicago Tribune.*

STRENGTHENING FOOD.

A Subject of Considerable Interest to Raisers of Poultry.

With poultry culture, the use of strengthening, stimulating food is very important at certain times, but whenever it is used it should always be accompanied with caution and good judgment on the part of the breeder. There is a time for all things, and the time to use food calculated to force growth or production is only when such a course will do good and not do harm.

I really believe that it is best not to give the breeding stock any stimulating food, other than occasionally to supply or provide for any lack of insect or animal diet that may occur. Fowls that are fed too abundantly on animal food soon show the bad effects created by such treatment.

To treat the fowls in the best possible manner is to imitate nature as closely as possible. A very little meat for each fowl, and the same of green food is all they require of this kind of diet, as the only thing to be accomplished is to supply their natural demands in as natural a way as possible.

In speaking in the above manner I mean to apply principally to fowls intended for breeding purposes only, for when the fowls are raised principally for market purposes the case becomes quite different, the idea then being to get the most good in the least possible time. Cooked food is excellent in accomplishing this result, and should be used freely, and any such stimulating and warming food as onion, red pepper and such like should be supplied occasionally and as often as the breeder thinks it is advantageous to his flock. The principal value of such stimulating food is to warm up the whole system and this will serve to act as an appetizer, and by a judicious use of this kind of diet it will not only be valuable for what little nourishment it contains in itself, but the other food will be better assimilated by coming in contact and being treated in connection with this stimulating food.—*American Poultry Journal.*

—The sugar trade of Batavia has taken great stride since 1880, the production increasing year after year. The crop of 1884 was the largest ever known and that of the present year it is expected will be fully up to it.

—The finest pork made in the world is that produced on the Madeira Islands, where the swine live principally on nuts.—*Christian at Work.*

—Eight Englishwomen have been imported by a New York company to cut velvet—an art that is but little known in this country.

SCIENCE AND INDUSTRY.

—One of the industries of the boys and girls at Lowville, N. Y., is the gathering of spruce gum. A great many make over five dollars a day.

—The hop crop last year was about 92,000 tons, while the estimated consumption is 81,000 tons, leaving a surplus of 10,000 tons. Yet, as the hop crop is sometimes very uncertain, prices may go up again before the close of 1887.—*Cleveland Leader.*

—In a recent lecture before the Royal Society of Edinburgh John Murray, of the Challenger expedition, said he believed that, taking its size into consideration, there was no country in the world with a better record of scientific work or a greater mass of scientific literature than Scotland during the past twenty years.—*Chicago Times.*

—There is not so much need of sandpaper in the manufacture of furniture and all cabinet work nowadays, as the machinery used turns out very perfect work. It is estimated by one of the largest manufacturers of sand-paper in the country that not more than seventy per cent. of the amount of last year's business will be done this year.—*Boston Budget.*

—A vexing and unsettled question in physiology is, "Why are not the walls of stomach and intestines themselves digested by their own fluids?" Because these tissues are living, was the answer of John Hunter in 1772, but Dr. J. W. Warren has just disproved this explanation by digesting the legs of living frogs in artificial gastric juice.—*Springfield Times.*

—Mr. Stephen Salisbury, of Worcester, Mass., has just given to the Technical Institute of that city $100,000, to be used in the erection and equipment of a building for laboratories for mechanical, physical and chemical science as a memorial to his father, the late Stephen Salisbury, who for a great many years was president and chief patron of the institute.—*Chicago Tribune.*

—The invention of a new optical glass is said to be creating a sensation in the German scientific world. The glass, owing to its great refractory power, promises to be of marked influence in practical optics, inasmuch as it will admit of the production of lenses of short focal width, such as it has hitherto been impossible to obtain. For microscopic photography it will be of the greatest importance.—*Public Opinion.*

—At a meeting of the Physiological Society of Berlin it was given as a fact that when the bee has filled his cell and has completed the lid a drop of formic acid, obtained from the poison bag connected with the sting, is added to the honey by perforating the lid with the sting. This formic acid preserves honey and every other sugar solution from fermentation. Most of the insects that have a stinging apparatus similar to that of the bee are collectors and storers of honey, so the sting has a double function—it is a weapon and a pickle.—*Foote's Health Monthly.*

PUNGENT PARAGRAPHS.

—California raisin growers expect to make an average of $400 an acre this season.

—The old saying, "Worth, not wealth," means that you can't buy anything of Worth unless you have wealth.

—He (at dinner)—"May I assist you to the cheese, Miss Vassar?" Miss Vassar (just graduated)—"Thanks, no! I am very comfortable where I am. But you may assist the cheese to me, if you will!"—*Puck.*

—A Division of Labor.—He—"Where are you going, my pretty maid?" She—"I'm going a-milking, sir" (she said). He—"Can I not help you, my pretty maid?" She—"You can work the pump-handle, sir" (she said).—*Puck.*

—The tallest man in the world is supposed to be an Austrian named Winkelmeier, twenty-two years of age. His height is eight feet and three inches, being a foot more than that of Chang, the Chinese giant.—*Chicago Advance.*

—"Is the sermon done?" an old woman was asked as she was leaving the church. "No," was the prompt reply, "the sermon is preached but it will have to be done (and practised) by us hearers during the week."—*Chicago Living Church.*

—Man Wants but Little Here Below.—

Some men content from birth,
Their modest life course run,
And only want the earth
And a mortgage on the sun.
They'd live in quiet bliss
And free from all that mars,
If they had the Solar Sys-
Tem and the other stars.

—"Ma, is Mr. Thompson respectable?" "Certainly, my child. Why do you ask that question?" "Because he wears such poor clothes." "You should not judge persons by their clothes; none but silly people do that." "Then everybody's silly, ain't they, ma?"

—"I may not be so eloquent as some of them," said the Senator from Middlefork, "but when I make a speech nobody is able to answer it." "Very likely," replied the honorable Senator from Hampsex. "Did you ever hear of an echo to nothing?" The Senator from Middlefork is still wondering what the honorable Senator on the left was driving at.—*Boston Transcript.*

—"I am deeply interested of late," said the new minister, "in the higher teachings of Buddha." "Well, you've come to the wrong place for that study, young man, growled Mr. Oldboarder, "you can't learn anything about that article from this hypocritical oleomargarine." And the quiet was so loud that the little water pitcher lifted its great ears to hear whose bill had been presented and laid over under the rules.—*Burdette.*

His Title to the Land.

A friend of mine, Hugh Craig, a graduate of Oxford, told me a story once, which I have since seen in The Overland Monthly, regarding a claim to a title.

At a "land court" a middle aged Maori appeared and made a long speech, giving the reason why a title of a certain piece of land should be given to him. An old, grizzled Maori had listened without saying a word. At last, as the younger man was about finishing his speech, he inquired:

"Where are my ancestors buried, but in this land where I was born?"

When he had ended the old man eater slowly arose, and throwing off everything but a waistcloth, he bounded across the room and addressed the court, saying:

"I have listened with disgust and contempt to the words of this tuturn (nobody). What claim can he have on this land? I conquered long ago the people and lived on that land when he was a small child; and the mistake I then made was in permitting him to live! And he asks: 'Where are his ancestors buried?' I tell him and show him. Here! here!"—patting his stomach with his left hand. "His ancestors are here. I ate them, and that is my title to the land!"

No better or stronger title to native land can be brought before the native land courts than the above described "Title by Digestion."—Brookline News.

Our Servants.

Mistress—Nora, I would like to have you wear this cap.

Nora O'Dowd—A cap is it? A cap you're wantin' me to wear? One uv thim things loike a doily shtuck on the top uv me head! Sure the nixt thing you'd be axin' me to be coachman for the baby; I'd as lave be drivin' a pig to the market wid a rope to his leg as do the loikes o' that.—Harper's Bazar.

They Went Back and Lied.

Said Buffalo Bill to an American who saw him recently in London:

"Before I got into the show business, as you must have suspected, I conducted—that's the word now—a great many parties of noble young Englishmen all through the Black Hills, the Yellowstone country, the Little Missouri and Little Big Horn countries. Well, they were mostly quiet, good natured fellows, that kept me shooting to get skins, antlers and such like for them, and I pride myself on keepin' them out o' trouble with Injuns and grizzlies and such. I find these quiet chaps have come home and figured as heroes of every kind of scrimmage; every skin was the natural focus of a stack of lies, and every horn is hung with a dime novel of the most sensational kind. And I'm expected to back 'em all up and add more gory particulars. It's rough on an honest frontierman, but I do it." "What, sustain wholesale lies?" "Wal, this way," said Bill with a faint blush, "it's mostly a young gal with glowing eyes, who's been lied to, that asks me, and I ain't got it in me to take her vision away from her, and then," he added in a dreamy way, "it's all goin' to help the show."—Dakota Bell.

Couldn't Reasonably Expect It.

He popped his head cautiously inside of our sanctum door, just as we were starting out on an important leading article, and mentally cursing the innate perversity of a stubborn steel pen and a bottle of limpid, mucilaginous, mud colored ink.

"Don't want no lead pencils today, do you?" he equivocally sang out.

"Come in, my man," was our encouraging response; "let's look at 'em; what do they cost?"

"Ten cents a dozen," was the answer in a seductive, persuasive tone of voice.

After paying for our purchase, we cautiously inquired:

"Do you think they'll write?"

The vender of confined plumbago shrugged his shoulders and made truthful response:

"The pencils look good enough, but you certainly couldn't expect them to write at that price."—Pretzel's Sunday National.

"Mum's the Word."

"Father! father!" shouted the son of a Pennsylvania farmer as he rushed into the house, "it's come!"

"What?"

"Natural gas!"

"Nea! William, don't you lie to me."

"But we've struck it—me and Jim—down behind the barn."

"Well, shet right up or the old woman will hear you. Not a word to her, William—not a whisper! Time we struck ile I had to buy her two calico dresses, and when we found coal she struck for a pair of shoes. If she hears of this she'll want a $2 shawl, and like enough a pair of them red stockings. Mum is the word, William."—Wall Street News.

Pure Blood.

Mrs. Bondclipper—Doctor, what do you think is the matter with me?

Doctor—I am inclined to think your blood is not pure. I'll have to give you something to purify your blood.

Mrs. Bondclipper, haughtily—You are probably not aware that I belong to one of the old Dutch families of New York.—Texas Siftings.

Evident Loss of Time.

Bowery Professor—You seem to take a good deal of interest in astronomy?

Farmer Cornhusk—Yas, I spend a great deal of time in stud'n' the heavens; in fact I'm losing valuable time this moment.

Bowery Professor (sotto voce)—Yes, I know you are.—Texas Siftings.

Excuses Exhausted.

Me been a swimmin'? Oh, no, mother,
I dassent without your consent.
My hair wet? Oh yes, that Tom Sother,
He pumped on me, by accident.
How'd my coat get that muddy dirt?
Oh, that's from playin' in the ditch.
What! Me got on Tom Sother's shirt?
You've got me now, ma! Git the switch!

—Boston Beacon.

STYLISH DRESS FABRICS.

Durable Light-Weight Material for Midsummer Suits and Gowns.

Fine *crepe de Chine* is seen with a cross-barred effect produced by lines of the same color; this is shown in heliotrope, white, rose, lemon and gray, while in contrasts there are scarlet and dark-blue on white. This material is chosen for loose vest fronts, puffs or sleeves, plastrons or wherever on an elaborate toilette a very soft effect is desirable. It often contrasts decidedly in color with the foundation fabric, and pale blue with heliotrope, olive with brown and absinthe with gray are frequently seen.

Plaids, especially the large ones, obtain well in the light-weight suitings. Those having mode, gray or light-brown backgrounds, with lines in bright hues upon them, are liked and are made up into skirts and draperies to wear with cloth bodices in plain, dark colors. Of course, if it is becoming the bodice may be of the plaid goods, but very few find the effect improving. A becoming costume is made of plaid suiting with a mode background, the lines forming the plaid being of brown, red, dark blue and dark green. The skirt is surrounded by a flat drapery that is broadly box-plaited at the front and sides and falls full at the back; and from under one of these plaits, at one side of the front, starts a drapery that is long and petal-shaped and reaches to the full, much-looped back drapery at the other side. There is no trimming whatever, the drapery being finished with a simple hand-sewed hem. The basque is a tailor-made, close-fitting postillion of dark-brown cloth, and is closed with tiny crochetted buttons the same color. A high linen collar and cuffs are worn, and the brooch is a round one of dull silver. The hat is of brown straw, with clusters of velvet wall flowers in front. The umbrella is of dark-brown silk, and has a curiously twisted handle of natural wood. In plaid and plain ginghams the same development is in vogue.

Fine cashmeres in the popular shades will be worn during the entire season, for they are quite as cool as the foulards or the cottons. Care is taken to have the lining as light as possible, and when an old silk gown is possessed it is utilized for the skirt foundation, thereby lessening the weight and at the same time imparting a more elegant finish to the gown. Gray of the shade that has a tinge of blue, tan, heliotrope, olive and new blue are the colors, preference being given the heliotrope, gray and olive. Soft, surplice-like bodices are chosen, and long, artistically-arranged draperies and full, puffed sleeves develop well in this fabric. The French have always appreciated the value of cashmere, especially when the figure is slender and needs to have its angles softened into curves; but the English-speaking people have been governed by caprice in the use of this charming fabric, proclaiming it the height of fashion one day and entirely ignoring it the next. Now it is having its day again. A blue-gray cashmere is made up in a charming and becoming manner. The plain skirt is silk the same shade, and over it are draperies of the cashmere. The back-drapery is long and much-looped, and on one side the front-drapery is short and full, while on the other it is long and falls in a graceful curve. Near the front this drapery appears to be raised in a graceful bunch of wrinkles by sashes of wide ribbon that pass one over and one under and are tied in a large knot and then fall far down on the skirt. The basque is of the cashmere and has inserted in it a vest formed of somewhat narrow strips of ribbon with a *picot* edge, the lower edge of each strip overlapping the next below it with effective results. The coat sleeves have a narrow cuff of the silk, and the high collar is made of silk. A plaiting of bright red ribbon is the edge finish. The bonnet is of bluish-gray straw, with a fan decoration of red *crepe*. The parasol is bluish-gray silk, and the gloves are of gray undressed kid.—*Butterick's Delineator.*

Water and the Stomach.

According to Dr. Leuf, when water is taken into the full or partly full stomach, it does not mingle with the food, as we are generally taught, but passes along quickly between the food and the lesser curvature, towards the pylorus, through which it passes into the intestine. The secretion of mucus by the lining membrane is constant, and during the night a considerable amount accumulates in the stomach; some of its liquid portion is absorbed, and that which remains is thick and tenacious. If food is taken into the stomach when in this condition, it becomes coated with this mucus, and the secretion of the gastric juice and its action are delayed. These facts show the value of a goblet of water before breakfast. This washes out the tenacious mucus, and stimulates the gastric glands to secretion. In old or feeble persons water should not be taken cold, but it may be with great advantage then taken warm or hot. This removal of the accumulated mucus from the stomach is probably one of the reasons why taking soup at the beginning of a meal has always been found so beneficial.—*N. Y. Post.*

—Several years ago a few deer were let loose on the mountains east of Bennington, and since that an effort has been made to enforce the law forbidding any one to kill deer in Vermont. The result is that already here and there throughout the State deer are seen, and as the law has three years to run it is quite likely that the Green mountains may in time be well stocked.

NEW YORK FASHIONS.

Dressy Novelties in Ladies' Boots and Shoes, Hosiery and Summer Cloths.

Boots and shoes are less pointed, without, however, being quite square at the toes. The two styles have made mutual concessions, and in consequence boots taper, but stop short before forming a decided point. Silk stockings in colors of fawn, heliotrope, Roman red, pale bronze, moss green, cameo and silver, are considered the hose *par excellence* this season to be worn with fine summer shoes and sandals of light-weight French kid. Very ornate low-cut sandals and slippers, with tabs, straps, bands, and buckles, are still very fashionable for drawing-room toilets, but are never adopted for the street, except for carriage wear during the very heated summer weather; however, half low Newport ties, Fedora shoes, and medium-high opera shoes will be seen on the promenade, these invariable worn with stockings of jet black, no other color being admissible, unless perhaps exception be made of golden-brown silk stockings or hose of fine Lisle thread of this color, worn with half-low shoes of bronze kid.

One of the pretty combinations of the moment, of which there are so many, shows an underskirt of cream-colored satin foulard, brocaded with rose blossoms in shaded pink, surrounded with delicate green leaves. Upon this is draped in such a manner as to leave the left side entirely exposed a shepherdess polonaise of moss-green crepe de chine, the silk of the finest texture and of wonderful luster. The drapery is looped high on the left side, almost to the waist, where is placed a cluster of moss-green and pale pink ribbons with loops of unequal length. The sleeves reach to just below the elbow, and the corsage portion, also of the figured foulard, opens over a blouse vest of the crepe de chine, which is trimmed with a jaboted frill of cream lace from throat to belt. This costume is designed for a summer evening dancing dress for a pretty young blonde, whose rose-and-lily complexion enables her to don this very trying tint, just now so fashionable, with impunity.

Decided contrasts in color and the use of summer cloths are the features of the most elegant French tailor gowns. For example, a heliotrope armure opens over a vest and petticoat of Suede cloth, decorated with bands of heliotrope silk gimp. A moss-green nuns' cloth costume has a lower skirt of gray-white pilot-cloth, striped with moss green. Serge gowns of bright Roman red for natty young ladies are half-concealed by elaborate braid embroideries, or with passementeries, or very deep geranium red, while for more mature women are dark green costumes draped on golden brown, or suits of gray cloth over underdresses of striped cloth, showing three distinct shades of gray alternating with a half stripe of Japanese red. The basques of these dresses are handsomely trimmed in front, but are severely plain in the back, often being cut with the postillion plaits, and in many cases being finished with a single point, or with all the handful of plaits in the middle seam vere closely lapped over each other and cut in points at the end.—*N. Y. Post.*

A NEW GRANT STORY.

How the General Came Into Possession of His Favorite Driving Horse.

Colonel H. A. Chadwick recently told a little story about General Grant that ought to be published:

"In 1864 General Grant was a good deal at headquarters in Washington. He loved a fast horse, and he thought the big chestnut Cincinnatus he then drove wound take the dust from no other in Washington. One day he was spinning along the road on the outskirts of the town when he noticed a rough-looking grey horse trotting along to a two-wheeled butcher-wagon filled with meat. The General flew past the wagon, but the gray just set back his ears and the way he made the mud fly along that road was just astonishing. He got his nose to the rear of Grant's buggy, he pulled his head up to the hind wheels, and his forequarters were soon pattering along in a swift, never-breaking trot near the heels of the great Cincinnatus. Grant got mad and used his whip, the butcher driver laughed wickedly and held the reins taut on the gray, and the meat-wagon jolting and jumping, showered the dirt from its wheels over the General and into the nose of the horse he thought could not be beat.

"Next morning early, little Webster, of Grant's staff, came over to me and said: 'Chad, the old man is as mad as sheol this morning. He was out on the road yesterday, and got beat by a gray horse dragging a lead of beef. Now he wants that horse, and you are to buy it for him. Here's his check signed in blank, and you must not lose that animal for $5,000.' Well, to make a long story short, I found who owned the horse, and as luck would have it, I got him into my stable for $350, and ten minutes after he was at headquarters in Grant's possession. When the General drove him out the next day, the butcher saw him, and in half an hour the man of meat was at our hotel making the air blue for having sold the horse at so low a figure. But I threw in a little bonus and sent him away satisfied. Grant drove that horse for ten years, and it was his favorite animal during all that time. It finally died on the General's farm in Missouri.—*N. Y. Graphic.*

—It has been computed that the death rate of the globe is 67 a minute, 97,790 a day and 35,639,835 a year, and the birth rate 70 a minute, 100,800 a day and 36,792,000 a year.—*N. Y. Sun.*

A SHREWD OLD DARKY.

He Propounds a Question Which His Master Never Answered.

General —— is an old-time Southerner, very vain about his personal appearance and very proud of his cigars, which are about as good as can be bought, for the General has plenty of money. The General has a negro valet who has grown old in his service and feels that his long years of faithful service ought to entitle him to some privileges which would not be granted to a younger servitor. The old negro flatters himself that he bears a strong personal resemblance to his master, and among his colored acquaintances is known as "The Gin'el." Of course General —— does not recognize this alleged resemblance and would, without hesitation, shoot the man who dared insinuate, in his presence, that the remotest resemblance existed. Yet among themselves the friends of General —— do say that he and his old valet do, somehow, look alike.

One day General —— gave his valet one of his old dressing gowns. Soon thereafter, General —— began to miss some of his high-priced cigars, and to make his temptation lighter gave him a box of cheap cigars together with a strong hint of his suspicions. Still the good cigars continued to disappear. At last General —— lost all patience and plainly charged the old negro with the theft.

"You old black rascal," he thundered, "I know you've stolen those cigars, and you had better tell me the truth or I'll have you shot, hang me if I dont."

The darky was too scared to speak for a moment, but he wasn't long without something to say for himself, and as he went on with his defense grew quite jubilant in manner, feeling assured that he would be acquitted. This is what he said:

"Now, Gin'el, I axes you to let me 'splain. 'Scuse me, Gin'el please. I 'clar fo' de Lord I aint stole dem seegars. I ain't stole noffin' since I jined de church, mor'n six monts ago. Gin'el, you 'members dat ole dressing-gown dat you gib me. Well, when I goes home and puts on dat dressin'-gown an' puts bof my feet on de mantel jes like I see you do, my ole 'oman she say: 'I 'clar Willyum Henry, yu does look mi'ty like de Gin'el.' An' I tells you, Gin'el, I does feel pow'ful like you, but somehow I ain't jes like you. I wants som'pin. I keeps thinkin' and thinkin' wat it mout be. Den my ole 'oman, she say agin: 'I 'clar Willyum Henry, ef you jes had one ob de Gin'el's fine see-gars yu'd look jes like him. Well, Gin'el, when I gets one ob dem fine see-gars I knows I looks jes like you, 'cus I feels like way."

"But you old black reprobate," broke in the General, "why didn't you smoke one of the cigars I gave you and leave mine alone."

The old negro drew himself up proudly, and looked reproachfully at his master, while he replied:

"Gin'el, I'se knowed you nigh onto fifty yeers, an' I'se niver knowed you to smoke a poo' see-gar. I doesn't wantt disgrace yer, Gin'el. Howse I gwine to look like you wid a poo' see-gar in my mout?"

The General never answered the question.—*N. Y. Tribune.*

A MEXICAN VOLCANO.

Discovery of a Huge Crater That Sends Out Destruction in Many Forms.

The explorers sent out by Governor Torres to ascertain the existence of the volcano reported near Bavispe, Sonora, Mexico, have returned. They report an active volcano fourteen miles southeast of Bavispe, in the Sierra Madre mountains. The party could not approach nearer than four miles of the mountain. The crater was pouring forth an immense volume of smoke, fire and lava, and boiling water was issuing from the side of the mountain. The lava, in vast waves, was slowly pouring down the mountain into the canons, which are being filled. Boiling water has destroyed all vegetation in the valleys in the vicinity. Boulders weighing tons are hurled down from the crater.

The exploring party says the noise proceeding from the mountain was most terrific—like a number of vast engines at work, accompanied by sounds of thunder. The air was dense with smoke and cinders. The party had great difficulty of approaching within four miles of the mountain, owing to the great chasms made by the earthquake, and all the roads and trails are totally wiped out. The country is fearfully broken up. The entire surface of the earth presents a woe-begone appearance, and not a bird or living thing could be seen within ten miles of the volcano.

The town of Bavispe is a complete ruin. The people have all moved out on the high plains, and are living in tents in mortal fear. There has been a constant tremor and continual series of shocks daily since the first earthquake shock.—*Troy (N. Y.) Times.*

—A remarkable needle is owned by Queen Victoria. Indeed, it is likely that there is no other needle so wonderful in the whole world. It represents the column of Trajan in miniature. This Roman column is adorned with many scenes in sculpture, which tell of the heroic deeds of the Emperor Trajan. On the little needle are pictured scenes from the life of Queen Victoria, but the pictures are so small that it is necessary to use a magnifying glass in order to see them. The needle can be opened. It contains a number of needles of smaller size, which also contain microscopic pictures.—*Public Opinion.*

INYO INDEPENDENT.

County Official Paper.

C. Mulholland, EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY SEPTEMBER 10 .....1887.

Desirable Settlers.

Competent authorites estimate that during the present year the number of new settlers coming into the State will be one hundred thousand. No better citizens could be had than most of the new comers are, for, as the *Call* says they are almost invariably persons of American birth, good education and some means. The emigrant fare across the continent is not high, only $62.50, but it is enough to keep out the impecunious European emigrant, who has been aided to get a passage across the Atlantic. So far as known the new comers hail chiefly from New England, the Middle States and the easternmost of the grain States. This is the best American stock; the bone and sinew of the nation; the flower of American people. They will plant the school-house and the newspaper wherever they go; will uphold free speech and a free ballot, and will maintain the law and preserve order.

Melville District.

The following is taken from the Salinas *Index* of August 25th.—Melville school district in Cholame valley is named after Geo. W. Melville, Chief Engineer of the U. S. Navy, and well known in connection with Arctic exploration. Mr. Melville having been informed of the naming of the district in his honor, responded with the following letter to Dr. Anderson, a resident of the district.

PHILADELPHIA, June 27, 1887.

A. ANDERSON, M. D.,

Dear Sir: I am in receipt of a letter from my old comrade, Chas. Mulholland, in which he speaks kindly of his friend and my unknown admirer, yourself, and suggested that I drop you a line that you might have my awkward autograph. I have the honor to inform you that I have mailed this day to your address a copy of my book, "In the Lena Delta," as a contribution to the library of your school district. Hoping it will be pleasurable and instructive to the youth of both sexes of your county,

I am Sir, respectfully,
GEO. W. MELVILLE,
Chief Eng. U. S. N.

The people of Melville district are proud of the letter and the book received from the famous author, and have sent to him an acknowledgement of the receipt thereof, together with the thanks of the school children for the consideration shown them and their district.

Ranch for Sale.

At Black Rock, twelve miles north from Independence, 520 acres of land for sale. Black Rock is one of the very best parts of Owens Valley. Four hundred acres of this land is held under U. S. patent; the remainder is located under the timber culture Act. One hundred and eighty acres are enclosed by a fence of cedar posts and barb wire. Sixty acres are now under cultivation, mostly wheat, oats and barley. A large amount of hay can be cut; blue joint, red clover etc. Several large springs of pure water on the place and good water rights additional. House, outbuildings and corrals. C. & C. railroad half mile distant from east line of land. Owens river eighty rods distant. This is a fine place for an energetic man to improve and will be sold at a bargain. Apply to

C. MULHOLLAND,

Railroad Time Table.

DRAFT HORSES.

Best stallion, 3 years old and upward.....$15 00
Best matched team..... 15 00
Best single gelding..... 7 50

CLASS V.
SWEEPSTAKES.

Best stallion, any breed or age,
Association Silver Cup, Engraved.
Best mare, any breed or age,
Association Silver Cup, Engraved.

SECOND DAY—Wednesday.

CLASS VII.
JACKS.

Best Jack, 2 years old and upward.....$ 7 50
Best Jennet, 2 year s old and upward..... 2 50
Best Jack and family, not less than three..... 10 00

CLASS VIII.
MULES.

Best span owned by one person.....$10 00

CLASS IX.
CATTLE—BULLS.

Best bull, 1 year old and upward.....$ 5 00
Second best bull, 1 year old and upward..... 5 00
Best bull calf..... 10 00

CLASS X.
COWS.

Best cow, 3 years old and upward.....$10 00
Best cow, 2 years Old..... 5 00
Best heifer calf..... 5 00

CLASS XI.
SHEEP.

Best ram, 2 years old and upward.....$ 5 00
Best lot of ewes, not less than five..... 5 00
Best lot of ewe lambs, not less than five 2 50

CLASS XII.
GOATS.

Best lot of goats, not less than three.....$ 5 00

CLASS XIII.
SWINE.

Best boar, 2 years old and upward.....$ 2 50
Best boar under 2 years old..... 2 50
Best sow, 2 years old and upward..... 2 50
Best sow, 1 year old and under..... 2 50
Best pen of 5 pigs, any age or breed..... 2 50

CLASS XIV.
POULTRY ETC.

Best pair of fowls, any age or breed.....$ 2 00
Best hen and breed of chicks..... 2 00
Best pair of bronze turkeys..... 2 00

THIRD DAY—Thursday.

Second Department.
CLASS I.
AGRICULTURAL PRODUCTS.

All products exhibited in this Department must have been produced in Nevada, or in California east of the Sierra Nevada mountains, and by the exhibitor

Best 100 pounds of flour.....$ 5 00
Best 100 pounds of wheat, any variety..... 3 00
Best 100 pounds of barley..... 3 00
Best 100 pounds of oats..... 3 00
Best 100 pounds of corn..... 2 00
Best 50 pounds of alfalfa seed..... 2 50
Best bale of timothy hay..... 2 50
Best bale of alfalfa hay..... 2 50

CLASS II.
VEGETABLES, ROOTS, ETC.

Best 10 pounds of sweet potatoes.....$ 1 00
50 pounds Early Rose potatoes..... 1 00
100 pounds any variety of potatoes..... 2 00
12 parsnips..... 1 00
12 carrots..... 1 00
12 pounds turnips..... 1 00
12 beets..... 1 00
10 pounds tomatoes, any variety..... 1 00
¼ doz. cabbage..... 1 00
50 pounds any variety of onions..... 1 00
½ doz. squash..... 1 00
pumpkin..... 1 00
sample of red peppers..... 1 00
¼ doz. watermelons..... 1 00
¼ doz. encumbers..... 1 00
¼ doz. cantaloupes..... 1 00
10 pounds of white beans..... 1 00
10 pounds of pink beans..... 1 00

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, SEPTEMBER 10 1887

MARRIED.

SOLAZAR—GRIJALVA — At Independence, September 5, 1887, by Hon. John A Hannah Superior Judge, Claudio Solazar to Miss Eloisa Grijalva, both of Lone Pine.

CLARK—FRIEDLINE—At Bishop Creek, September 5, 1887, by Rev. Andrew Clark, Mr. John W. Clark and Miss Minnie Friedline.

BORN.

GLADE—At Georges Creek, September 5, 1887, to Mr. and Mrs. Henry Glade, twins, boy and girl.

DIED.

OBER—At Darwin, September 7, 1887, Curtis W. Ober, aged 47 years.

A. R. Conklin left town last Tuesday for San Francisco.

J. W. Farrel came in from Darwin at the beginning of the week.

Bishop W. L. Harris of the M. E. Church, died at New York September 2nd, aged 70 years.

The sales of real estate at Los Angeles for the week ending last Saturday, aggregated $2,900,701.

J. E. Vinson died at Gridley, Butte county, last week. The deceased was father of Frank Vinson.

Mr. W. Walker and Mr. W. Grant came up from Olancha last Thursday; they left this morning for home.

Mr. W. H. Russell and Mr. Charles came down from Benton and stayed a few days this week at the San Carlos mine.

Rev. Sissons will not preach at Independence to-morrow (Sunday), but expects to be here and preach the Sunday following.

More men are wanted to work in the mines; all the miners that can be had are employed and others are taken as fast as they offer.

Mr. and Mrs. Eibeshutz have gone to San Francisco. Mr. Eibeshutz expects to return soon, but Mrs. Eibeshutz intends staying in the city several weeks.

Germany is beginning to ship iron to the United States cheaper than England. We should make all our own iron; we have plenty of ore, coal and lime.

Attend the celebration of Mexican independence at Lone Pine next Friday. At this anniversary there is always a good attendance from Independence.

It is stated that during the fair at Independence, Manuel Diaz will run any man in the county one hundred and twenty-five yards for a purse of one hundred fifty dollars.

It is expected that a minister from the east will come to take charge of the M. E. Church at Independence. It may be four or five weeks before the gentleman can get here.

About ten thousand acres of land has been located on the line of the east side canal, from Independence station southward. A good deal of this land has been located by people of Reno and Carson.

During the week a party of Carson people were on a visit at Independence. The party consisted of Mr. and Mrs. P. B. Ellis, Miss Theresa Tuffly, Mr. Oliver Roberts, Mr. C. A. Hofer and Mr. E. S. Doherty.

Mrs. A. O. Collins, of Warm Spring, and her son passed through Independence last Tuesday on their way to Tehachipi. Mrs. Collins was called to attend a near relative who was thought to be at the point of death.

Five acres of ground at the south end of town has been cleared and fenced for a fair ground. Work on the Pavilion building is pushed vigorously. The new race track is a little farther south of this tract, and is also being rapidly improved.

When the down train on the C. & C. road was nearing Benton station last Wednesday the engine, tender and baggage car got off the rails. No injury was done beyond loss of time. The train was about eight hours late at Independence.

Work on the new race track is progressing rapidly. We have been on several of the best tracks in the state and say positively that this will be fully equal to any of them as a fast track. The soil will make a firm yet not too hard way, will be level and smooth and free from dust.

Last Monday evening a theatre at Exeter, England, was burned. One hundred and twenty dead bodies were taken from the ruins. Theaters are built without sufficient openings for the audience to escape in case of fire; and these horrors occur frequently.

The projectors of Thermolita colony, near Oroville, advertise that the climate is even and healthy. Mean temperature, winter 58°. This might be considered pleasant winter climate by some of the people whom Dante saw in his rambles through Hades.

Mr. A. Stecker is laid up by a hurt received on a building at Lone Pine. He fell from a scaffold and got a bad cut and bruise on the right shin; it was neglected and gangrene set in; Doctor Woodin remedied that trouble, and now Gus. is likely to be around again in a week or so.

The growth of Los Angeles within one year is wonderful. For 1886 the total assessed value of the city and county was $400,81,820. For 1887 the total assessed value is $99,416,402. This vast increase is mostly due to the work of the local newspapers in writing up the country.

No better piece of statesmanship has been done in many a day than the act of Secretary Lamar in making an order that restores for settlement from 25,000,000 to 30,000,000 acres of the public domain that was claimed by the Atlantic and Pacific railroad company. This action is above politics; it is patriotism.

The Bridgeport *Chronicle-Union* says two men have been arrested and lodged in jail there, having been caught with twenty-five stolen horses in their possession. The horses had different brands. One of the men has since been identified as an old offender who had been in jail on the other side of the mountains. Sam Fales noticed that the horses were not branded alike and was mainly instrumental in making the arrests.

The Collins Ranch.

At the time Mr. Sanger came to Owens Valley a year ago last spring Mr. A. O. Collins, who was his partner in Kern county for years, accompanied him and bought the McCown ranch, eight miles north of the Gregg ranch, now owned by Mr. Sanger. By purchase and location Mr. Collins now owns over one thousand acres of land. A ditch taken from the river conveys water onto all of this tract, with the exception of less than twenty acres. As the ditch has a fall of three feet to the mile water can be got onto this if need be. The soil for the greater part is a light, sandy loam and seems especially adapted to alfalfa. Along the road and on spots that were never cultivated but where seed has been washed in or scattered accidentally alfalfa is growing. One piece of land was seeded early last spring for the first time with oats and alfalfa. A good start was made when during the unusual high winds in April the tract was covered with a light sand until not a trace of verdure could be seen. The grain made a start through this and was again growing nicely only to be again buried up. This was discouraging. However, water was turned on and soon for the third time both grain and alfalfa were growing. The alfalfa is now thoroughly set and growing rapidly; with the exception of an odd knoll here and there where the water did not reach the stand is close and next season will undoubtedly produce a heavy crop. Another field that looked as though it would have to be re-sown has a fine stand. There are upward of two hundred acres now in alfalfa and more will be started next season. The ditch will supply and abundance of water for the entire tract. Trees and vines so far as tried grow rapidly. Mr. Collins will devote his attention to horse breeding, the ranch being well adapted to that purpose. Until the railroad is extended to a southern connection there will be no market for beef cattle, as they cannot be driven out to advantage. There are a good many beef cattle now at Big Pine for which there is no market. The extension of the railroad is a necessity that is becoming very apparent to the railroad managers and may be confidently expected at an early date.

Worth Visiting.

During the fruit season no place near town is better worth seeing than the ranch of Mr. J. W. Symmes. The farm is three miles southeast of town on the dividing line between the grassy bottom land and the sage brush upland. The soil is dark loam mixed with granite sand. At this time most of the peach crop is already gathered, but there are still some trees of late varieties, heavily loaded with very fine fruit. Rows of dwarf Bartlett pear trees are laden with pears, every one of which is a marvel of its kind. Cherries; apricots and nectarines, of course are all gone long ago. Mr. Symmes first set out over thirty varieties of apple trees, but kept discarding till he now has only eight or nine standard varieties. The apples now are a sight worth going miles to see. Italian, French and German prune trees are carrying very full crops of the finest of fruit; a few other choice varieties of plum trees bear heavy crops of the best quality. Two years ago quite a number of fig tree slips were set out, now the young trees are full of fruit. During the present season Mr. Symmes irrigated his orchard twice. There is a small vineyard, most of the vines being choice varieties; among the rest a number of raisin grape vines. All of the grapes are of the very best quality; the vines are not irrigated at all at any season of the year. Mr. Symmes has on hand young trees and will set out about ten acres more orchard the coming season. The current prices realized for the fruit are; for peaches, pears, apples and grapes, three cents per pound; plums four to five cents. Orders come in faster than they can be filled. Compared with the fruits of Owens valley, fruits grown west of of the mountains are dry and insipid.

Beautiful Fruit.

A few days ago Mr. W. Walker of Olancha, sent a sample box of fruit to a friend at Independence. For the information of those who do not know the country, it may be well to state that Olancha is in the "desert" south of Owens Lake. This box contained three or four varieties of peaches; two of apples, and a few plums. The peaches were no larger than are grown at many places in Owens valley; but for beauty of color and delicacy of flavor the world might be searched in vain to find their superior. Each peach had the lovely tints of an opening rosebud; a gentleman who was invited to eat some said "I dont know how to describe the flavor, if taste and color were the same these would taste like rosebuds." The plums could be compared only to huge rubies; looked at against the sunlight, they appeared to glow with all the rich color of those beautiful gems. The apples were worthy in their way to be with the other fruits; in size, color, form, flavor, it is difficult to believe that they could be excelled.

Land Sales.

At the beginning of this week several land sales were made at Big Pine. The Crocker Brothers, of Kernville, bought the farms of J. W. McMurry, Mrs. Naylor, James Jones and the Campbell place. The McMurry tract contains seventeen hundred acres; the other places combined contain over eight hundred acres, making the whole purchase contain over twenty-five hundred acres. The piece of land ranged from ten dollars per acre for unimproved, to nearly fifty dollars for improved. A few months ago the same parties were bargaining for the same properties, but finally decided not to buy. Now they have come back and taken the land at an advance of several thousand dollars. Any one who intends to buy land in Owens valley had better do so now; land can never again be bought here so cheap as at present.

Directors Meeting.

All meetings of the Board of Directors of Agricultural District No. 18 for several weeks past, have been called at only a few hours notice. Therefore it has not been possible for the Secretary to give notice of such meetings to Directors who live distant from Independence. As this is well understood by the Directors, most of those who live too distan to attend easily have appointed proxies, so that a quorum can at any time be had for the transaction of business.

Valuable Wheat.

Last spring Mr. T. J. Goodale planted some seed wheat that he got from Washington. It proves to be a valuable variety. The stem is very strong, stands up well and does not lodge. The heads average about six inches in length: the berry is plump and white. From the small amount sown Mr. Goodale has gathered twenty sacks, which he will use seed next season.

Keynot Shut Down.

Work on the Keynot mine, Beveridge district, has been entirely suspended; all the men employed at the mine came in to Lone Pine several days ago. The cause of the suspension is said to be a lawsuit that is now impending.

HALE BROS. & CO'S. ADVERTISEMENT.

To those who wish to order by mail we say:

Look Out for Our Fall & Winter Catalogue, to Be Issued the First Part of September.

It comprises the latest styles and ideas; is the most complete ever issued and we expect extraordinary results.

We are the largest Consumers of Goods on the Coast, and buy direct from the Manufacturers, thus ennabling us to give Most Advartageous Prices to you.

In 1880 we started in an unpretending way at 812 K street; we did not doubt the future since our stores increased with a rapidity that astonished us, necessitating improvement after improvement, all aimed toward having a splendid structure in Sacramento at some future time That time has come. To-day we are adding 20x80 feet to the rear of our present large establishment, and building two more stories over the 80x100 feet. The carpenter's busy hammers are heard from morn till night, sending forth a tune of enterprise from one end of Sacramento to the other, in encouraging tones of comendation; when completed we will have the largest and most magnificent store in Sacramento.

We are ready for a large order trade.

We are going to have it.

We will give prompt attention to all orders.

We will not be undersold.

Send for our new Illustrated Catalgue.

HALE BROS. & CO.

Sacramento, Cal.

829, 831, 833, 835 K St. and 1026 Ninth

On To Los Angeles.

On Wednesday of last week a meeting of Salt Lake City local capitalists interested in building a road west to the Navada line, and which shall be extended to Los Angeles; was held in the Chamber of Commerce, with Governor West in the chair. The Governor made a fine and telling speech. Among other things, he said: "There are many powerful railroad corporations struggling this way, and when they come they will want to go further. We give an invitation to all the big roads, and we will give them wings to go further west, that they may carry to the east the blessings of the distant countries of the world." A large amount was immediately subscribed for the building of the road. Among the subscribers are capitalists of Los Angeles and of San Francisco. This is the line that has been talked of for some time, and that will cross Inyo county a short distance south of the present terminus of the C. & C. R. R. at Keeler.

Sagana Melons.

Last spring Mr. McCarrol sent to Pennsylvania and got the seed of a variety of musk melon called by the above name. The seed were planted at Mr. Goodale's place, Fish Spring, and have made fine yield. The melons do not at all look like the ordinary musk melon, but more resemble huge cucumbers. The meat is salmon colored and of delicious flavor. Evidently the soil and climate here are well suited to the production of this variety.

Calico Destroyed by Fire.

The town of Calico was burned last Tuesday evening. Applewhite's lodging house and two other houses at north end of town were the only buildings that were left. The fire originated in the bedroom of H. W. Bell at the rear of his store. All efforts to check the fire were used without success, as a strong heavy east wind swept the flames to the adjoining buildings, soon destroying the entire town.

Queer Rest.

The Calico *Print* has suspended pulication. The Editor says he needs rest and is going to collect bills that are due him. If he had said that he was going to chop cordwood, or to hoist rock out of a mine shaft with a windlass, or to spend a few weeks in some similar easy work we might accept the plea of "rest," but collecting bills by way of recreation! well, there is no disputing about taste.

The I. A. D. A. will give a dramatic performance at Independence during fair week. "Led Astray" will be presented on the 28th, and "Lady Audley's Secret," on the 30th; there is a full cast for each play. The stage and all its appointments will be first class. The scenery will be obtained from San Francisco. See ad. next week.

Last Sunday night at Holbrook, Arizona, Sheriff Owens attempted to arrest a gang of cattle thieves. The Sheriff was alone and the theives resisted. At the end of the debate the Sheriff was all right; two of the thieves were dead, a third was mortally wounded and the fourth had lead enough in him to keep him quiet, though he may recover enough to be hung.

Letters of inquiry about lands in Owens valley continue to pour in by every mail. But of late there is a marked difference in the character of the inquiries. Formerly most letters were in reference to the location of government lands; now most of the letters come from parties who want to invest money in improved or partly improved places. Nearly all of the last class of inquiries come from citizens of California.

C. W. Ober died at Darwin about one o'clock Wednesday morning. He was injured by an explosion of blasting powder two weeks ago. The death of Mr. Ober was quite unexpected. It had been reported that he was rapidly recovering from the effects of the accident, and was thought to be quite out of danger; when suddenly it was telegraphed from Keeler to Independence that he was dead. Mr. Ober was long a resident of Owens valley and had many friends.

Mr. Oliver Roberts, who was at Independence this week, did the State some service at Darwin several years ago. There was a ruffian there at that time named Belmont; a treacherous, murderous scoundrel, a "holy terror," as such villians were called. Mr. Roberts was then a very young man, and Belmont on one occasion assaulted him in the usual brutal way. The response of Mr. Roberts was quick and pointed, and it was pointed straight. Belmont was buried without the formality of an inquest. Mr. Roberts was thanked for his good service.

IRWIN'S SALOON

Cor. Edwards and Market Streets,

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, Sportsman, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Keeper and Mover that ever was put on my farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and cost as much money it does and cost no more, I could sell one at every lodge. If they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, Norwalk, Ia., writes: "You ask what I think of the Washer I bought last summer. Int. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $10?"

I will ship a sample to those desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

FREE TRIAL PACKAGE. PROF. HARRIS' Pastille. A RADICAL CURE FOR NERVOUS DEBILITY, Organic Weakness, & PHYSICAL DECAY, In Young & Middle Aged Men.

MEN ONLY. NERVOUS DEBILITY ORGANIC WEAKNESS Decay and excesses or Overmeddlesome bath, despite the skilled physicians, result (with youthful indiscretion, too free indulgence, or over brain work. Avoid the imposition of patent nostrum remedies for these troubles. Get our Free Circular and Trial Package, and learn important facts before taking treatment elsewhere. Take a SURE REMEDY that has CURED thousands, does not interfere with attention to business, or cause pain or inconvenience in any way. Founded on scientific medical principles. By direct application to the seat of disease its specific influence is felt without delay. The natural functions of the human organism is restored. The animating elements of life, which have been wasted are given back, and the patient becomes clear full and rapidly gains both strength and natural vigor.

VITAL RESTORER

TESTED FOR SEVEN YEARS BY USE IN MANY THOUSAND CASES.

TREATMENT. One Month, - $3.00 Two Months, - 5.00 Three Months, 7.00

HARRIS REMEDY CO., Sole Agents, 306½ N. Tenth St., ST. LOUIS, MO.

RUPTURED PERSONS! Not a Truss. Ask for terms of our Appliance. WE GIVE THEM AWAY.

BEES & HONEY

I am making a specialty of comb honey in one pound sections and will be in town once a week to supply my customers.

Extracted honey in cans for sale, as usual, at the stores. Honey and comb foundation always kept in stock at the Apiary, at Oak Creek above Camp Independence.

W. M. MUTH RASMUSSEN,
Bee Keeper.

The Fear of the Dead in China.

The great overruling superstitions in China are, however, the fear of the dead and the belief in Feng Shui. The latter word means literally "wind and water," and seems to typify both the good and baneful influences of physical phenomena. It is the existence of these two superstitions which really forms the barrier to progress in China, because they interfere with the reception of foreign ideas and the development of industrial projects in mining, railway making, etc. Feng Shui is defined, says the Roman Catholic bishop of Ningpo, as "the path of the Great Dragon, who rushes through the air just above the houses, spouting blessings in showers from his nostrils. He flies straight forward, unless by evil chance he should strike against some high building, in which case he turns aside at an angle, and so the houses beyond lose their share of his blessing. Hence the zealous care of the Chinese house builders lest any one should build a house higher than his neighbor, and the singular uniformity of domestic architecture."

The fear of the dead leads to the most slavish form of ancestor worship, and the three first weeks of April are specially devoted to the service of the shades. At that time every one visits the graves of his relations with offerings, carried on trays or in baskets. The cost of these annual services and offerings to the dead is stated by Mrs. Gordon-Cumming to be not less than £32,000,000, all to propitiate the spirits of those whose graves cover the country, and who are believed to be powerful for evil if neglected. The dead are even honored by the bestowal of new titles if there is special reason for distinguishing them.—All the Year Round.

The Misery of the Idler.

There is dignity in labor. It does not narrow down the mental powers and the individual dignity, as is too often asserted; but if pursued with a proper appreciation of its incalculable assistance to human happiness, and made subservient to the great plan of human life, is ennobling and itself exalted.

An idle man no more respects himself than do others respect him. He feels that he is a fit and exposed object for others' jeers and light remarks. He lacks an internal feeling of dignity, that is the noblest of all the impulses by which he is controlled and his life made a bright example. He sees others at work around him, and feels a sense of isolation come over him that is perpetually gnawing at the huge pile of happiness he had laid away for the good time when he should have nothing to do. In his expected happiness he is of all men most miserable. Something is wanting to give a zest to the pleasures he is continually trying to enter upon. There hangs an undefined and undefinable gloom about his horizon. His blood flows sluggishly. He looks forward to nothing, because his all is right about him in the stagnant present. His pleasures pall on his taste. He is cloyed with the very sweetness he had so wistfully coveted. He envies the jolly, red faced draymen, dragging at their loads of boxes, bales and barrels. The very sweep looks happy to his eye, because he seems to go into his work with signs of animation. Oh! the misery of literally having nothing to do! nothing to do!—Boston Budget.

Millions of Exploded Shells.

On the way back from Appomattox we came from Richmond to Fredericksburg, and somewhere on the route passed a place where an immense amount of ammunition had been destroyed at some former time. I did not learn any particulars, but it looked as if all the artillery wagons, and caissons, and ammunition chests had been parked in a big park and set on fire. The spokes of some of the wheels had been cut and then fired, the fire communicating to the fixed ammunition and exploding it and blowing everything up. It seemed as if millions of shells were there, some exploded, others not, but everything blackened with burned powder. Every conceivable kind of ammunition was there, and some few pieces of disabled ordnance. In some places the ammunition would be two or three feet deep, in others none. As I recollect it, it seemed as if there must be two or three acres in extent. One thing that appeared very strange was that some of the shells were too large for field artillery. Some, in fact, must have been designed for use on gun boats, as it could only have been available for the heaviest kind of ordnance. I never saw any account of it anywhere, nor have I any idea to which army it had belonged.—"Trefoil" in Buffalo News.

The Mind or Faith Cure.

We must admit that there are cases well authenticated where the so called mind or faith cure does what medicine could not accomplish. These are certain nervous troubles that the mind directly influences. For instance, a woman will sometimes become bedridden, entirely devoid of the power of motion, when the action of her heart, liver and vital organs is normal. Drugs will do her no good. The faith doctor will come along, give her a nervous shock, and she is cured. Then everybody will be told of the miraculous event, and the faith doctor will pretend to cure everything, from rheumatism to colic. But, outside of a few nervous phenomena, the mind doctor is powerless. He is out of his element when he tries a physical cure. Faith cannot cure a fever any more than medicine would cure a wound. Charlatanism flourishes because ignorant people fail to distinguish between nervous and physical disorders. There is a famous physician who treats these purely nervous cases in a peculiar and successful way. He shuts them in a dark room for some weeks, and, as their digestion is good, overfeeds them, and by a fattening process entirely overcomes nervousness.—Doctor in Globe-Democrat.

Queer Signs in English Shops.

There are all sorts of queer signs and placards in English shops, and the understanding of many of them is a thing beyond Yankee comprehension. What is an American child going to select in a British confectioner's from the candies placarded "Dingees," "Fondants," "Aboukirs," "Pralines" and "Waterloo Jambs?" The candies themselves are none too inviting to those familiar with American and French dainties. A favorite method here is to sell them in little bottles, all prepared and suggestive of drug store cough drops and croup dabs. One universal adjunct of the grocer's shop is a basket filled with hen triumphs and labeled: "New laid eggs." These are seen in the hearts of the biggest cities, and the "new laid eggs" are invariably covered with dust. An agreeable sign on some houses in nearly every street is that of Mr. So-and-so, surgeon, often accompanied by another pointing to the basement, showing the road "to the surgery." The ordinary Englishman must needs stand a deal of cutting up to furnish a livelihood for all these gentlemen, and it is gratifying to know that Mrs. So-and-so means to keep her best room tidy, and not have people blundering in expecting to have their legs sawed off in the parlor.—London Cor. Chicago Tribune.

Definition of "Embracery."

"Embracery" is a word not in common use that has appeared frequently in the newspapers in the last day or two and is likely to be heard often in connection with the Sharp jury. A definition of it may not be out of place. According to Worcester it means "an attempt to corrupt, or to influence by unlawful means, a court or jury."

A JUNE SONG.

The summer grass is growing, the sweet June winds are blowing,
The dusky reaper yonder sings and binds his sunburned sheaves;
How sweet to lie half waking, dreamless, fretless, care forsaking,
And watch with poet lovingness the blowing of the leaves.
Oh, the blowing of the leaves!
Oh, the tossing, shifting green,
And the tender sky between,
That shows in azure glimpses through the blowing of the leaves!

How sweet to lie unthinking, draughts of balmy perfume drinking
From opoponax and myrtle, where the wind its magic weaves;
Sweet, by mellow sunlight litten, to read the tune unwritten
Borne inward to the spirit by the blowing of the leaves!
Oh, the blowing of the leaves!
Oh, the laughing, dancing green,
And the great slow bird, half seen,
That soars the sunshine far above the blowing of the leaves!

A Poet's rest, divinely lulled by airy songs that finely
Steal from rose sweet garden corners, or from birds' nests 'neath the eaves;
A Dreamer's peace, unshaken by aught that might awaken
The bitterness of heart that lies outside the blowing of the leaves!
Oh, the blowing of the leaves!
Oh, the cloud of happy green,
And the golden hearted sheen
That sifts and settles downward through the blowing of the leaves!

—M. E. M. Davis.

FONDLY CHERISHED SUPERSTITIONS.

Omens Which Portend Riches and Prosperity--A Lucky Blunder.

Coming down to native superstitions, their number is simply endless. Among the most fondly cherished of these are those which portend riches and prosperity. Children with much down on their hands or arms are bound to be rich. A white speck on the finger nail presages a valuable gift, as does the itching of the palm of the right hand. Most ladies are terribly annoyed at the appearance of an incipient mustache on their upper lips, but it is a sign of riches. If the sign always proved true it would certainly furnish a very acceptable compensation to many of the victims of this masculine adornment.

Good luck is presaged by a whole array of omens. To pick up a four leaf clover, find a horse shoe or a pin are certain harbingers of good fortune. Just how to pick up a pin when you find it is a matter of some dispute. The Yankee, Thad Stevens, who represented a Pennsylvania Dutch constituency in congress till he died in the harness, always maintained that the pin must be picked up by the point. The majority of authorities are against the Vermont-Pennsylvania statesman, however, declare the pin must be picked up by the head. To put your sock or stocking on wrong side out is a lucky blunder. To fall up stairs not only promises good luck to the owner of the bruised shin or nose, but presages a wedding in the house within a year. A maiden who gets beaten invariably at cards will win a good husband, a far more important winning to her. To assure a bridal party good luck throw the shoe from the left foot at them, but be careful not to hit either of the newly married couple. If the shoe should hit either nothing will save the couple from speedy disaster unless they propitiate the fates by carrying a piece of coal in their pockets. If you put on something new on Whitsunday good luck will attend you all the year.

Those who want to be assured of success in all their undertakings are directed to take the first spider they come across and throw it over the left shoulder. If afraid the spider will bite, a black snail will answer as a substitute. Take the snail by the horns, as Paddy did the bull, and if you throw it over your left shoulder you will have better luck than Paddy did. To keep your luck you must not turn your feather bed on Sunday or kill the cricket that sings on your hearth. If your keys or pocket knife or any of your steel belongings get rusty, it is a sign that some one is laying up money for you.—Philadelphia Times.

A Hot Spell in Australia.

Englishmen have as yet but the vaguest and most indistinct conception of the magnificence and extent of the possessions occupied by their kinsfolk in the noble island continent of the southern Pacific. The mainland of Australia measures 1,700 miles from north to south, and 2,400 miles from east to west. Its total area is somewhat larger than that of the United States, and rather less than the whole of Europe. All its mountain ranges are near the coast, a geographical configuration which is fatal to the existence of long and deep rivers. The interior, treeless and waterless, acts in summer like a great oven, and the winds from the equator are heated as they pass over the vast arid surface. Under the influence of these hot winds, a man, beast, bird, and vegetation suffer alike. But the rabbit revels in them, for they are akin to the torrid blasts of north Africa, from which he originally came, crossing over from Mogador and Tunis to the southern shores of Spain, and thence finding his way into Europe and Asia. The leaves of the English trees, such as the elm and plane, which have been transported to Australia, drop in profusion before the fiery breath of the "brickfielders;" but happily the days upon which the thermometer registers more than 100 degs. in the shade at Melbourne, Sydney and Adelaide are of rare occurrence. The hot spell rarely lasts more than three days, and is often limited to one, as the sunset not unfrequently brings with it a cool gale from the south pole.—London Telegraph.

A Restaurant Keeper's Ruse.

The Berlin restaurant keeper who recently invented a new way of getting a piece of hard manual labor done without paying for it was a keen observer of human nature as well as a "well known Gastwirt." In his garden lay the stump of a tall acacia, which he intended using for firewood. This could only be done by chopping the tough wood—a task which could not be done without incurring some expense to the parsimonious owner. His garden was much frequented. Why not save the money and make some of his sturdy visitors do the work? "Practice in cutting wood may here be had without payment," appeared in large letters on a board near where the acacia and an ax lay invitingly on the ground. The result was instantaneous. Nearly every visitor who saw the board tried his muscular power on the stump, and before many days were over the enormous task was done.—Pall Mall Budget.

Why He Received His Dismissal.

A St. Paul paterfamilias headed off a suitor for his daughter's hand in a neat way. The youth had been referred to her father by the girl, and inquiries as to his character proving satisfactory the old gentleman invited him to dinner as a final test. As the senior looked around he noticed that the young man was toying with his salt box in a peculiar way. "Please pass me the salt," he said. The young man gently pushed the salt box with the ends of his fingers, at the same time making a slight forward movement with his head. "That will do," said the girl's papa; "you can't marry my daughter." The careful and discerning father had discovered from the way in which his daughter's lover had pushed forward the salt box that he was familiar with the handling of poker chips.—Boston Journal.

WIT AND WISDOM.

—De nearer sundown de busier de lazy man.—*The Judge.*

—An impecunious man designates a ten-dollar bill as "a William," because he is not sufficiently familiar with it to call it "Bill."

—True politeness is perfect ease and freedom. It simply consists in treating others just as you love to be treated yourself.

—Every man has a right to make himself something better than he is, but no man has a right to claim honor and credit which are not due him.

—Young woman (timidly to clerk)—"I would like to look at some false hair, please." Clerk (experienced)—"Yes, ma'am. What color does your friend want?" Sale effected.—*Life.*

—On a Would-be Cornetist:

No more his shrill blast
Our ears will ring through;
He rests now at last,
And the neighbors rest, too.
—*Boston Budget.*

—A writer asserts that "the old-fashioned rocking chair is and always will be the favorite article of furniture." Guess not. The sofa with a tendency to sag in the middle still holds its own.—*Burlington Free Press.*

—Some one who has given the subject considerable study says that "blue eyes usually go with light hair." We have not given the matter much thought, but we have noticed that black eyes frequently go with a bloody nose.—*Norristown Herald.*

—Teacher—With whom did Achilles fight at Troy? Boy—With Pluto. "Wrong." "With Nero." "Wrong." "Then it was Hector." "What made you think of Pluto and Nero?" "Oh, I knew it was one of our dogs. Their names are Pluto, Nero and Hector."—*Frankfurter Zeitung.*

—Tough (in apothecary's shop)—Say, young feller, gimme ten grains o' strichnine, right away, in a big hurry, and don't you forget it. Clerk—Rats? Tough—Now, look a-here, I don't want any o' your slang, or I'll jump over there and spoil that dude collar o' yours in 'bout four seconds. He was waited on immediately.—*Harper's Bazar.*

—Mrs. Bagley—Aurelia, you had better hide that milliner's bill, and I'll try to shave enough off the grocer's bill to pay it. Your paw is greatly worried over his business affairs. Aurelia—O maw! you don't mean to say he is going to fail? Mrs. Bagley—I know nothing for certain, but last night I heard him talking in his sleep about being robbed by a man named Umpire and about the men going out on strikes, and I fear the worst.—*Philadelphia Call.*

THE BRINK OF THE PRECIPICE.

The Slight Step that Has Proven Fatal to so Many Men and Women.

Recently Senator Pike of New Hampshire, while talking with a friend suddenly threw up his head, gasped, and without a word fell to the ground dead. General McClellan went out for a drive, came home and died in his chair. William H. Vanderbilt is conversing with Mr. Garrett of the Baltimore and Ohio Railroad in his own house, and suddenly falls to the floor dead. A prominent citizen of Boston hastens to catch a train at the depot, and dies before the train leaves the station. A well known society lady of Hartford while dancing at a reception suddenly becomes faint, and before she can be conveyed from the room has ceased to breathe. These are a few of the sudden deaths of which we hear, but the vast number of which we do not hear is thousands. Are they all caused by heart disease? Do the mysterious beatings of that delicate instrument, that works day and night without ceasing, stop of their own accord, and thus bring death at once!

FELL DEAD.

Mr. Henry T. Dodge resides at East Providence, R. I. About six months ago he felt a shortness of breath, a peculiar faintness, and occasional shooting pains at his heart. He noticed that his pulse was irregular and would once in a while skip a beat. These symptoms were not continuous, and some days he would feel as well as usual, but at other times he would be painfully aware that he had a heart and that it was diseased. Finally his body began to bloat, and he consulted a number of doctors. They all pronounced his trouble heart disease, but would not prescribe for him because they said it was beyond their reach. Mr. Dodge then went to Dr. George D. Wilcox, one of the best physicians in New England. After a careful examination Dr. Wilcox told him there was but one thing that could cure him, and to try that as a last resort. With but little hope Mr. Dodge consented. In two days the bloating disappeared, the pain departed, the pulse became full and regular, and Mr. Dodge is well and in perfect health to-day because Hunt's Remedy saved him.

THE DOCTOR'S CALL.

Dr. Wilcox, in conversation with the writer on this subject, said: "In a careful observation extending over twenty years I have found Hunt's Remedy in vast numbers of cases of an organic nature exceedingly efficient and acting very promptly. Its power is best illustrated in valvular heart lesions with dropsy, also in simple enlargement of the heart without valvular disease. When the heart becomes weakened and unable to circulate the blood, Hunt's Remedy is so valuable that I have been in the habit of naming it "Heart Tonic."

ONE OUT OF FIVE.

This is what one of the ablest physicians in this country says about this wonderful remedy, which has won its way to such popularity solely on its merits. One out of every five men, women, and children has functional disease of the heart, and one out of every eight organic disease of the heart! This is a terrible fact, but a solemn fact, nevertheless, and it is cause for gratitude that a remedy has been found which will not only check the disease in time, but prevent its increase after the first symptoms are observed.

"A word to the wise is sufficient."

A LABORER'S LUCK.

He Wins a Pile of Money in the Louisiana Lottery.

The story of big winnings in the Louisiana Lottery has already become a common one to the people of this city, but the tale of George Miller's luck in becoming rich through the June drawing possesses new phases of interest that make it worth telling. The $5,000 that fell to him through his holding a coupon bearing the number 21,658 has raised him from poverty to comparative affluence. Miller was a laborer, who for about two years has been earning a living by sweeping the streets at night. He has long been a Street Department employee, but the highest position he occupied has been the driver of a cart. The money he won has been enough to set him up in business, and to-day he will open a saloon and be his own master. Miller states that he has been buying Louisiana Lottery tickets every now and then during the past two years, but in all had not expended more than $20 for them. He held but two coupons for the June drawing. He says that the lottery is, in his opinion, a good investment and that he will continue purchasing a ticket or two each month.

Miss Lou Reed of No. 1339 Union street won $30,000 in the June drawing; W. D. Everhart of Weaverville, Cal., over $15,000, and two other parties here collected $5,000 each through different local banks.—*San Francisco (Cal.,) Examiner, July 7.*

RELIGIOUS AND EDUCATIONAL.

—Methodism is still the most powerful denomination in the South, especially in Georgia.

—The London Road Car Company, to their credit, stand out against the practice of running cars on Sunday, although they believe their dividend could be increased one per cent, by adopting it.

—At Mr. Moody's two schools in Northfield over five hundred young men and women are now being educated to become missionaries, teachers and workers in other branches of Christian effort.

—Higher education has made great advancement in Greece during recent years. The lyceum for girls has a staff of seventy-six teachers and 1,500 pupils. Illiteracy in the kingdom is rare, even in the out-of-the-way hill countries.

—A little girl in a Boston school who was asked to define the word "redress" promptly replied that it meant a female reader. And a little girl in an English school recently gave "gandress" as feminine of "gander."—*Cincinnati Times.*

—A man with patched garments recently came into the rooms of a London missionary society to beg, as was feared, but taking out a package of banknotes he said he wished them to be used in preaching Christ to the heathen. His gift amounted to $375.

—The Turkish Government officials have now put the seal of the Sultan on thirty-two editions of the Arabic Scriptures and parts of Scriptures, thus giving the sanction of the Imperial Caliph of Islam for the free circulation of the word of God.—*N. W. Christian Advocate.*

—Miami University, Oxford, O., was never in a safer and better condition. The rents of land, the interest of the accumulated fund, tuition and room-rents bring an annual income of $14,000, and the State of Ohio appropriated $4,450 as a contingent fund, a total revenue of $18,450 for the current year.

—Rev. L. Lloyd, of the Church of England, who has been laboring in Fuh Chow since 1876, states that the 1,600 converts whom he found on going to Fuh Chow have been increased to the grand total of 6,000, and of these he himself has been privileged to baptize one thousand.—*Public Opinion.*

—*Head and Hand* is the name of the little paper, whose first number has just appeared from the press of the LeMoyne Institute at Memphis. Principal A. J. Steele is the editor, but the mechanical work is all done by members of the manual training department. This issue shows both good head work and good hand work on the part of the pupils.

PHYSICIANS HAVE FOUND OUT

That a contaminating and foreign element in the blood, developed by indigestion, is the cause of rheumatism. This settles upon the sensitive sub-cutaneous covering of the muscles and ligaments of the joints, causing constant and shifting pain, and aggregating as a calcareous, chalky deposit which produces stiffness and distortion of the joints. No fact which experience has demonstrated in regard to Hostetter's Stomach Bitters has stronger evidence to support than this, namely, that this medicine of comprehensive uses checks the formidable and atrocious disease, nor is it less positively established that it is preferable to the poisons often used to arrest it, since the medicine contains only salutary ingredients. It is also a signal remedy for malarial fevers, constipation, dyspepsia, kidney and bladder ailments, debility and other disorders. See that you get the genuine.

Mankind's a kicker, 'tis great nature's laws,
That human beings shall be hard to please;
The man who six months since bespoke a thaw,
Is now kept busy praying for a freeze.

Young and middle-aged men suffering from nervous debility and kindred affections, as loss of memory and hypochondria, should enclose 10 cents in stamps for large illustrated pamphlet suggesting sure cure. Address, World's Dispensary Medical Association, Buffalo, N. Y.

If there is anything worse than a hair
In the butter to make a man swear.
It's the fearful French cackle,
Which no fellow can tackle
That is slung in a swell bill-of-fare.

The flies stop buzzing, the office boy ceases to shuffle his feet, and there is a general and solemn hush when Mr. Gould sits down to write his check for $4,500,000.

OUR PROGRESS.

As stages are quickly abandoned with the completion of railroads, so the huge drastic, cathartic pills, composed of crude and bulky medicines are quickly abandoned with the introduction of Dr. Piesce's "Pleasant Purgative Pellets," which are sugar-coated, and little larger than mustard seeds, but composed of highly concentrated vegetable extracts. By druggists.

Up in Washington Territory there is a ranch where they shear 2,580 sheep in one day. This threatens to rival the business done in Wall street.

WRENCHED HIS BACK.

LYNDONVILLE, ORLEANS CO., N. Y., April 2, 1885.

About a year ago, I imprudently stepped off the Hudson River cars while they were in motion. In trying to save myself from a fearful fall I wrenched my back terribly. The next day I could not walk, and I suffered pain from my neck to my heels. Various applications were made, but nothing which was done abated my suffering. Being anxious to get up and attend to business, I determined to place three ALLCOCK'S POROUS PLASTERS, one above the other, on my back. In about an hour and a half they caused considerable itching. The pain and soreness sensibly decreased, and I rested pretty well that night. The next morning the itching began to be quite severe under the plasters. To get some relief, I had my back well rubbed crossways over the Plasters. I was surprised within two hours afterwards to find the pain and soreness almost gone. I stayed in bed that day; and the morning afterwards I got up and attended to business.

O. Y. PETTMAN.

Judge Alfred Cowles of San Diego is a hundred years old. How very young the San Diego Land Company must seem to him.

A SMALL LEAK

will sink a great ship; and what at first appears to be a trifling cough is apt to culminate in consumption if not properly attended to in time. For consumption, which is scrofula of the lungs, and for all blood and skin diseases, Dr. Pierce's "Golden Medical Discovery" has no equal. By druggists.

A good American wine needs no bush. All that is required is a popular foreign label.

For Throat Diseases and Coughs, "*Brown's Bronchial Troches,*" like all other *really good* things, are imitated, and purchasers should be careful to obtain the genuine article prepared by JOHN I. BROWN & SONS.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

G. A. R.

The twenty-first national encampment of the Grand Army of the Republic will be held at St. Louis, Mo., the last week in September next. Arrangements have been made for a grand excursion of G. A. R. Comrades, their families and friends—open to all—to leave San Francisco on Tuesday, September 19, 1887.

The rate of this excursion will be $67.50 for the round trip from San Francisco to St. Louis and return, and the limit of the tickets will be such as to afford excursionists ample time to visit all the principal points in the East before returning.

Pullman Palace Sleeping Cars through from San Francisco to St. Louis, without change, at regular berth rates. Union Pacific Tourist Cars fully equipped at $5.00 extra per passenger.

8 New Montgomery Street,
Palace Hotel, San Francisco.

If a cough disturbs your sleep, take Piso's Cure for Consumption and rest well.

Try Germea for Breakfast.

BEAUTY of Skin & Scalp RESTORED by the CUTICURA Remedies.

NOTHING IS KNOWN TO SCIENCE, AT ALL comparable to the CUTICURA REMEDIES in their marvelous properties of cleansing, purifying and beautifying the skin, and in curing torturing, disfiguring, itching, scaly and pimply diseases of the skin, scalp and blood, with loss of hair.

CUTICURA, the great Skin Cure, and CUTICURA SOAP, an exquisite Skin Beautifier, prepared from it, externally, and CUTICURA RESOLVENT, the new blood purifier, internally, are a positive cure for every form of skin and blood disease, from pimples to scrofula. CUTICURA REMEDIES are absolutely pure, and the only infallible skin beautifiers and blood purifiers.

Sold everywhere. Price: CUTICURA, 50c.; RESOLVENT, $1; SOAP, 25c. Prepared by the POTTER DRUG AND CHEMICAL CO., BOSTON, MASS.

Send for "How to Cure Skin Diseases."

HANDS Soft as dove's down, and as white, by using CUTICURA MEDICATED SOAP

For Good Purposes.

Mrs. M. A. Dauphin of Philadelphia, is well known to the ladies of that city from the great good she has done by means of Lydia E. Pinkham's Vegetable Compound. She writes Mrs. Pinkham of a recent interesting case. "A young married lady came to me suffering with a severe case of Prolapsus and Ulceration. She commenced taking the Compound and in two months was *fully restored.* In proof of this she soon found herself in an interesting condition. Influenced by foolish friends she attempted to evade the responsibilities of maturity. After ten or twelve days she came to me again and she was indeed in a most alarming state and suffered terribly. I gave her a tablespoonful of the compound every hour for eight hours until she fell asleep, she awoke much relieved and evidently better. She continued taking the Compound, and in due season she became the mother of a fine healthy boy. But for the timely use of the medicine she believes her life would have been lost."

Your Druggist has the Compound. $1. per bottle.

WANTED!—Agents in every town on the Pacific Coast for KIMBALL'S LIQUID GLUE. Needed in every family. Wholesale, $1.00 per doz. Retail, 15 cts. each. CHAS. P. KIMBALL, 534 Valencia Street San Francisco, Cal.

ICE! Make your Ice and Ice Cream at home. Cost nothing to make. Price of Machine, $30 up. T. H. DAY, 1313 Vallejo Street, S. F.

Invalids' Hotel and Surgical Institute

Staff of Eighteen Experienced and Skillful Physicians and Surgeons.

ALL CHRONIC DISEASES A SPECIALTY.—Patients treated here or at their homes. Many treated at home, through correspondence, as successfully as if here in person. Come and see us, or send ten cents in stamps for our "Invalids' Guide-Book," which gives all particulars. Address: WORLD'S DISPENSARY MEDICAL ASSOCIATION, 663 Main St., Buffalo, N.Y.

For "worn-out," "run-down," debilitated school teachers, milliners, seamstresses, housekeepers, and overworked women generally, Dr. Pierce's Favorite Prescription is the best of all restorative tonics. It is not a "Cure-all," but admirably fulfills a singleness of purpose, being a most potent Specific for all those Chronic Weaknesses and Diseases peculiar to women. The treatment of many thousands of such cases, at the Invalids' Hotel and Surgical Institute has afforded a large experience in adapting remedies for their cure, and

Dr. Pierce's Favorite Prescription

is the result of this vast experience. For internal congestion, inflammation and ulceration, it is a Specific. It is a powerful general, as well as uterine, tonic and nervine, and imparts vigor and strength to the whole system. It cures weakness of stomach, indigestion, bloating, weak back, nervous prostration, exhaustion, debility and sleeplessness, in either sex. Favorite Prescription is sold by druggists under our *positive guarantee.* See wrapper around bottle.

PRICE $1.00, OR SIX BOTTLES FOR $5.00.

Send 10 cents in stamps for Dr. Pierce's large Treatise on Diseases of Women (160 pages, paper-covered). Address, WORLD'S DISPENSARY MEDICAL ASSOCIATION, 663 Main Street, Buffalo, N. Y.

THE PICNIC GUSHER.

Something About a Dear Delightful Maiden Whom All of Us Have Met.

She is usually a spinster of from thirty-five to forty years. Of course there are more youthful gushers, but the gushiest and most interesting gush comes from the spinster with juvenile manners.

I danced attendance on one at the first picnic of the season, which occurred one day, recently. It was a Sunday-school picnic, and if there is any thing on this earth more blissful than a Sunday school picnic I have not reveled in its delights. The instant I was introduced to my gusher she said:

"Isn't it a perfectly lovely day for our picnic? And what a perfectly lovely time we are all having! Don't you love a picnic?"

I don't, but I didn't say so.

"I just think they are too perfectly delightful for any thing! I'm *so* fond of nature! And how joyously happy the dear little ones are!"

Four or five of the "joyously happy dear little ones" were having a hand-to-hand fight over a swing within ten feet of us, but I didn't say any thing about it, and the lover of nature said:

"Aren't you passionately fond of the trees and the birds and the flowers? They make me *so* happy! I could dwell forever and ever—mercy on us! What's that horrid black thing? Only a bug! Oh, I'm *so* afraid of bugs. I know it's awfully foolish of me, but I just can't help it. And I just *scream* real *hard* when I see a *worm*. Papa says I'm a silly little thing."

Papa was evidently correct, but I refrained from saying so, and she went on with all the innocence and freedom of her thirty-nine years.

"There are some boys fishing in the brook. I think it's *horrid* to hook the dear, cunning little fishes so. Do you know I tried it once, and I fainted dead away when papa put the poor, innocent little worm on the hook? I couldn't *help* it. It seemed so dreadfully, awfully cruel. Papa called me a foolish little girl, and I really suppose I am."

A dirty-faced boy came along and held out a bunch of wilted dandelion blossoms, saying briefly: "Want 'em?"

"Oh, *thank* you ever and *ever* so much, Bertie, dear. How kind and thoughtful of you! And I do *so* love the dear little dandelion blossoms! Do you know, Mr. D—, that I really think that some flowers *speak* to us? I know it's foolish of me, but I can't *help* thinking so. May be it's only because I am *so* fond of the dear little blossoms. Papa laughs at me because I rave so about the dear, merry laughing little brooks, the beautiful skies, all white and azure, the tender buds and blossoms and the gentle little lambs. *You* don't think it's so very, *very* foolish and childish in me? I often wish I wasn't quite so childish!"

Her friends probably wished so, too, but for two hours she rambled on, and when at last she became "quite weary" and sat down gracefully in a rhubarb pie I stole away and took the first train for home.—*Zenas Dane, in Tid-Bits.*

GOVERNMENT WHITEWASH.

The Brilliant Mixture Said to be Used on the White House.

The following is the recipe for making the brilliant whitewash said to be used on the east side of the Executive Mansion, at Washington. It is recommended for either inside or outside walls. Take a half bushel of unslaked lime, slake it with boiling water, covering it during the process to keep in the steam, strain the liquid through a fine sieve or strainer, and add to it a peck of clean salt previously well dissolved in warm water; three pounds of ground rice boiled to a thin paste and stirred in boiling hot; one-half pound Spanish whiting and one pound of clean glue, melted over hot water. Add five gallons of water to this mixture and let it stand for a few days, covered from dust. It should be put on the wall quite hot, so it is well to keep the whitewash in a kettle over a portable furnace. One pint of this mixture will cover a square yard of wall. This is said to be the best and most brilliant whitewash made, and the quantity mixed can be graduated by the measure given for covering the square yard of the wall. For coloring whitewash avoid green, which makes the lime crack and peel off the walls. You can get a beautiful red or pink by adding Spanish brown in small or larger quantity, as you judge by the depth of color made. Finely pulverized common clay, mixed well with the Spanish brown before it is stirred into the mixture, makes a good lilac. Lamp-black and Spanish brown, stirred together, make a reddish stone color; chrome yellow in the "wash" makes a sunshiny wall. It is best to experiment with the color on a board and leave it to dry before laying it on the wall. When the wall has been smoked and is to be made clear white, a plentiful sprinkling of indigo, squeezed through a bag into the whitewash, will give it the purest, cleanest color.—*Farm, Field and Stockman.*

—An old gentleman remarked the other evening, when he saw a lady and gentleman going down Government street, the latter having the former's arm, that things had awfully changed since he was a youngster; it used to be the fashion for the lady to take the gentleman's arm. The change was explained to him by a by-stander to the effect that, when he (the old gentleman) was young, the girls were afraid the boys would get away from them if they did not hold on to them, but now the boys entertained the fear that the girls would "skip" if not held.—*Pensacola Commercial.*

A GOOD HOG-HOUSE.

Directions for Erecting a Substantial, Convenient and Yet Simple Structure.

A good hog-house or houses—if many hogs are reared on the farm—can not well be dispensed with on any farm. I have built six for my own use since I first began farming, and think that in the later-built ones I have combined convenience and economy, and will tell what kind of a hog-house I like and would build.

The first hog-houses I built were made twelve feet wide, but I have now had four that were eight feet wide, and I find this width ample to accommodate as many hogs as can eat at the trough, and so I recommend a house of this width. It is sometimes desirable to move a house a short distance, and so I usually make them eight by sixteen feet, and find that three men can roll one of them from fifty to one hundred feet in a few hours if it is thought best to change the location. A house eight by sixteen feet will accommodate from twelve to fifteen store hogs through the winter, and is large enough to fatten ten large hogs in. The bill of lumber for a house of this size built as I direct, is as follows:

	Feet.
Two sills, 6 by 6 inches, and 8 feet long	48
Five joist, 2 by 10 inches, and 16 feet long	134
Floor and lining	210
Four corner posts, 4 by 4 inches	24
Plates and nail ties	50
Nine rafters, 2 by 4 inches, and 9 feet long	54
Siding, inch boards	336
Sheathing	100
Total amount of lumber required	956

This, at $1.75 per 100 feet, will cost $16.73, to which add 1,000 shingles at $3.75, and $1 for nails and hinges, and it brings the total cost of material for the house to $21.48. The farmer, if he will follow my directions, need not employ a carpenter to build such a house, and two hands can complete one in two days or less.

After the foundation is ready—which may be locust posts set well in the ground, bowlders or masonry, if preferred—place your short sills across the ends and level them, and then set the floor joists on the sills, so that the two outside ones will come exactly to the ends of the sills. Bridge the joist in the center and then lay the floor. A floor of inch lumber, laid double, is much better than one of two-inch planks, and will cost less, for the lining can be laid with cracks three or four inches wide.

After the floor is laid, cut your posts four and a half feet high for the rear and seven and a half for the front. Saw them perfectly square at both ends, set them up at the corners, and fasten them by what the carpenters call "toe-nailing;" then spike a two by four studding to the tops, front and rear. For a plate, put up your two end rafters, setting them exactly flush with the sills, so that the weather-boarding will be nailed to the sill at the bottom and the rafter at the top. You will need one run of nail-ties, which can be ship-lapped to the posts, and when these are up you are ready to cover the building.

Use siding fourteen feet long covering it, and it will cut one length for the front and one for the rear. The roof of this house slopes but one way, and it is best to have the front—or high part of the roof—toward either the west or south. If the roof is made to project a little, and finish with a light cornice, it will present quite a good appearance.

Make a good trough and fasten it securely. I have never found any thing better than a good V-trough; the front of it should be of two-inch lumber, but the back part, which comes against the side of the building, may be inch. It is next to impossible to keep hogs clean, and the house free from bad odors, if they are confined to a single floor, but by making an outside pen, with a board floor, from twelve to eighteen inches lower than the feeding floor, and keeping it always supplied with an absorbent, I have no difficulty in keeping my hog-houses from becoming malodorous. So I always raise the floor of the main house, and then lay a floor of nearly the same size either at the rear or one end of the house. As this floor need not be laid double, it will take but 128 feet of lumber to make it, and it can rest on any cheap old scantlings thrown flat on the ground for mud sills. Enclose it with a substantial fence, made without cracks, and furnish the hogs some old straw or corn fodder as often as they require it, and they will enjoy working it over, and will shred it up and make good manure of it sooner than any other stock.

Every hog house of this size should be provided with a movable partition so that it can be divided into two parts when desired, as an appartment eight feet square is large enough for a sow to farrow in. Two short posts, two by four inches, can be set up, front and rear, and just far enough apart so that an inch board can be dropped between them, and three boards, a foot wide, will make the partition. To prevent hogs from lifting them out, bore a half inch hole just above the top board in one of the posts, at each end, and put in a stout pin. If it is desired to have room for corn above, use longer posts, say twelve feet from the front and nine for the rear, and use two by six lumber for nail ties, and two by eight joist, crosswise of the building, to support the upper floor. This will give room, at a very small expense, to store about one hundred bushels of corn above the hogs.—*Waldo F. Brown, in Country Gentleman.*

—Breach of promise suits are unknown in Kansas. The girls out there do nothing on credit. They do not consider themselves engaged until they are married.

ENGLISH SPARROWS.

Pugnacious Little Birds Which Are Driving Out Native Songsters.

Just after the war, before the benches in the parks were reserved for the exclusive use of nurse girls and park policemen, a naturalist, who lived in the parks when he had nothing else to do, discovered that the shade trees were being slowly killed by the caterpillars and other insects. He wrote a big letter to one of the newspapers, and somebody advised the Park Commissioners to import English sparrows to check the evil. Acting upon the suggestion, a basketful of the birds was brought over from England in the fall of 1866 and set free in Fairmount Park, Philadelphia. They did so well that in the following year another batch was let loose in Central Park.

It was not long before it was discovered that the sparrows didn't eat insects at all, and instead of a boon they became a nuisance.

Like many foreigners, they acted as if the country was made for them, and they set to work driving out the other birds whose ancestors lived here before the Pilgrims landed on Plymouth Rock. They bossed the wrens, teased the blue-jays and took possession of all the nice houses which the Park Commissioners had built in the shade trees. They bred fast, and in a few years the army was strong enough to fight all the other tribes of birds together. One by one they drove out the orioles and made it so uncomfortable for the robins that they moved into the country, and soon they had the field all to themselves. In the meantime the caterpillars held high carnival.

Then the cry went up that the sparrow was a nuisance and ought to go. Dr. Merriam, who is at the head of the scientific branch of the Department of Agriculture, sent out printed circulars to the farmers all over the country asking them to pass judgment on the sparrow. He received over two thousand replies, and not a single one of them had a good word for the sparrow.

Ornithologist Assemblyman Erwin was much interested in the matter, and through his efforts the last Legislature passed a bill making it a misdemeanor punishable by arrest and fine to feed sparrows or harbor them.

"Something ought to be done to check the ravages of the sparrows," said Mr. C. C. Amery, Secretary of the Audubon Society, "for there's no doubt that they are objectionable. In my opinion it would be best to treat them just like the other game birds—that is, protect them at certain seasons and allow sportsmen to slaughter them at will during the rest of the year. I think it would be well to set a bounty on the sparrow's head, say a cent for each. This would encourage the gamins to kill them and give them a chance to earn a few honest pennies.

Restaurants would cheerfully pay two cents more for the birds, which, by the way, are excellent eating and often palmed off for the more gamy reed-bird. The domestic sparrow is not a migratory bird and never leaves the towns or villages, and only a few journey to the country. They are very pugnacious and can fight any bird of their size. They eat grain and the scraps of food to be found in the ash-barrels and gutters, and a full-fledged sparrow would not condescend to eat the fattest grub-worm, even if he were almost starved. It is a singular fact that the young can only be raised by feeding them with insects until they are big enough to take care of themselves, but after that they live like their parents. They breed from three to four times a year and can stand any sort of climate, hot or cold. Although they have only been in this country a little over twenty years, they have migrated West rapidly, and can be found almost anywhere east of the Mississippi. I remember when they were first introduced into India, where they followed the English army during the war, and in less than five years they were settled in large numbers in the Punjab and Afghanistan.

"They have practically driven out all the song birds, and even the swallows that used to build their nests under the eaves of our houses here have been forced to seek another home."

The writer saw a desperate battle between a big sparrow and a swallow the other day. The swallow had built its nest under the canopy of a tall chimney. One fine morning a sparrow approached, and, perching himself on the nest, peered saucily into it, and began to peck at the poor swallow, who was seated on her eggs. A desperate battle ensued. Unable to defend herself in her cramped-up position, the swallow left her nest and flew to the roof to get away from her tormentor, who followed and renewed the battle. The sparrow, being more skilled in the art of warfare, had the best of it, and after cruelly pounding the swallow drove her off, and then returned to the nest and wantonly destroyed the eggs.

Even the most ardent champions of the English sparrow concede that he is an enemy to the small American song birds, and unless something is done to check him he will ultimately exterminate them. The farmers also complain that the sparrow destroys the buds of fruit trees and bushes.—*N. Y. World.*

—It was over twenty years ago when little Caspar paid a visit to the West country with his mother. The chief mode of locomotion, after pedals, was in that section by lumber wagons. This was a new and strange thing to the boy, and one stormy night, after he was in bed, while his mother was preparing to follow him, hearing a long, rolling peal of thunder, he exclaimed: "Why, mamma, does God ride in lumber wagons, too?"—*Babyhood.*

—Variety is the best culinary spice.

UMBRELLA TINKERS.

A Glance at a Comparatively New But Very Useful Industry.

An umbrella repairer's den is almost as interesting a place as an old-book shop. A few years ago, when tramps were abroad in the land in large numbers, many of them armed themselves with hammers and umbrella frames that the tinker's disguise might shield them in the surreptitious inspection of window fastenings. But now the repairer of faded and infirm umbrellas has a place in the world, and although rascals may be in the business they are fewer than they used to be. There are in this city some six or eight men who conduct hospitals for the treatment of old rain-protectors, and two men manufacture umbrellas from stick to cover at the order of customers.

"Any bell that's got a head on 'im and can do any thing, can mend an umbrella," said one of the umbrella doctors to a reporter as he bent over a broken catch.

The gentlemen said he had several men employed in drumming up trade, and a man and women were at work in his shop. Round about were umbrellas in all stages of decay, with numerous handles and other essentials. Ribs were piled up without number, and ribs to spare—but not "spare-ribs." The anatomical construction of the umbrella is peculiar, and the rib is an important feature. As the doctor said, it is the most easily knocked out of gear of any of the necessary parts.

"The best ribs are imported from England. There are two kinds, the solid and hollow. Umbrellas are not made so good as formerly. The handle is the chief thing noticed in buying, and a neat handle piece will sell for a good price an umbrella that will fall to pieces inside of two weeks. The best articles are manufactured in Philadelphia and New York. The cheap gold-headed umbrellas are good for our business. Unless they are exceptions to the general rule, a few months finishes them, and we are called to make repairs. With the ribs, the cover is an important part. We furnish them for from $1 to $7. An umbrella can't be so badly mangled but we can fix it, so long as there's a little something to build on. Part of a stick and a few ribs are enough to give us our bearings."

The magnitude of the umbrella business may pretty fairly be estimated. Allowing one umbrella to every ten people, and placing the population of Indianapolis at 100,000, there are 10,000 umbrellas within the cincture of the Belt railroad. Of course they are changed about and traded in mysterious ways, but offenses of this kind do not fall within the provisions of the penal code. The city's umbrellas are worth, if they be valued at the average of $1 each, the sum of $10,000. The valuation may be rather large, but a few cents added to the intrinsic worth will serve to count for the mental disturbance of owners in guarding their property. Taking it for granted that every umbrella of the possible 10,000 has to be repaired during the year, and guessing at the cost of the work for each one to be 6 cents (a very low estimate, by the way), some idea of the financial returns of the repairer will be gained.

The mender is no respecter of persons. In his shop the most miserable-looking blue cotton wreck is perched beside the finest article in silk. "He hasn't enough sense to come in out of the rain," is a common expression indicating the worst kind of intellectual poverty. Thoreau, the Walden hermit philosopher, liked to be rained on, but the idea of getting wet is not a pleasant one to the average mind. The dude may have his wet and dry umbrella. A man less exquisite must have a rain umbrella, sure. He had better keep it in repair and ready for the "rainy day" that is always coming, and to this end should consult and patronize the tinker, whose specialty is to keep rain-shielders in good condition.—*Indianapolis News.*

The Telephone of 1665.

"There is nothing new under the sun," not even the telephone. Permit me to state that in the year 1665 there was published in England a book with the title of "Micographia." The author was Dr. Robert Hooke, a celebrated scientist, mathematician and philosopher, who was born in the Isle of Wight in 1635, and educated at Oxford. The work referred to contains various philosophical descriptions of minute bodies made by magnifying glasses, as indicated in the title, together with "Observations and Inquiries" on them. In the preface the learned scientist asserts that the lowest whispers, by certain means (which he does not make public) may be heard at the distance of a furlong; that he knew a way by which it is easy to hear any one speak through a wall three feet thick, and that by means of an extended wire, sound may be conveyed to a very great distance almost in an instant.—*North American Review.*

—"Magnolia metal" is an invention which promises to secure that much desired result, immunity from heated journals in running gear of all kinds—"hot boxes," as they are called. It is a secret composition of lead, antimony, etc., somewhat in the nature of the well-known "Babbitt metal," but has stood tests, both in testing machines, and in practice in engines working at a high velocity, much more severe than any other metal thus far made has been able to endure.—*N. Y. Examiner.*

—While dusting the furniture, a Bangor serving maid fell out of a second-story window. She then placidly arose and dusted herself.—*N. Y. Commercial Advertiser.*

TRAVELING SALESMEN.

The Ability to Sell Goods on the Road Apparently a Natural Gift.

"Is the ability to sell goods on the road an acquired art or is it a natural gift?" is a question which is often asked, and the answer which it has received are numerous and varied. One man says: "I believe traveling salesmen are born, not made. If a man be a thoroughbred salesman he can sell any thing, no matter whether he be familiar with the goods or not. Here is a case in point: I have in mind a traveling man who ranks among the most successful in this city. I have personal knowledge of three different lines of goods he has handled with equal success. When I first knew him he was on the road for a boot and shoe firm. He had no particular training for the position, but stepped right out on the road with his prices and samples. Notwithstanding his ignorance of the goods he sold and his lack of acquaintance with the details of the business, his success was remarkable and the orders he sent home were astonishing. After a few years in this line of business at the handsome salary his ability readily commanded, he made a sudden break and started on the road representing a large furniture manufacturer. Before the end of his first trip his success became evident, and more than one car-load bill was sold. Remarkable as were these two ventures, they were not more so than his latest move. After a few years in the furniture business he made another sudden change and invested his capital in an importing drug-house of this city, in which he still retains his interest. From its complicated nature this branch of business presented even more difficulties than either of the other lines which he had represented, but away he went on the road and in came his orders. To-day there is not, I believe, a more successful salesman on the road in that line, and he has a trade which he holds firmly. How he sells goods and secures such a trade I am utterly at a loss to explain, nor will he offer an explanation himself. Nevertheless he sells the goods. I have seen him in his own office try to sell goods to some small chance customer and make a complete failure with both goods and prices by his side. Then again I have known him to run over to New York without a sample or price of any kind and come back with a pocketful of orders at more than ruling prices. That a man has a secret that is worth thousands of dollars to him, although to another man it might perhaps be worthless."

A dry goods merchant said: "You can not tell from a man's appearance whether or not he will make a good salesman. Some of the most unpromising men we have employed have turned out to be the best of traveling men. For instance, some years ago we engaged a man who had previously found employment as a hog-butcher. He was a most uncouth and unattractive character, with little education and apparently small business capacity. We put him on the road very doubtfully, and to our great astonishment he made an excellent salesman. He worked up cross-roads trade principally, and sent in some rousing big orders. He was in our employ for many years, and did a splendid business. It so happened that he was just suited for the trade he took, and he handled it well, where another man might have made a dismal failure. I find that frequently some of the best salesmen are men of small ability in other directions. Of course that is not general, as the great majority of traveling men can turn their hands to almost any kind of work, but it does show that the ability to sell goods on the road is a natural gift rather than an acquirement."—*Philadelphia Record.*

She Knew He Was Failing.

"You are not as strong as you need to be, John," said a fond wife to her husband; "I think it is about time you were getting some insurance on your life." "Insurance on my life! What are you talking about? I am as healthy as I ever was; insurance, indeed!" "Well, my dear, I only mentioned it, you know, out of respect for yourself; I thought you were failing." "And what in the world put it into your head that I am failing! Me failing? Why, I am as strong as a horse, and can run up three flights of stairs without taking a breath." "Well, it may be so; but I am afraid you are deceiving yourself." "Deceiving myself! Goodness gracious, woman, what do you mean?" "Don't be so impatient; what makes me think you are failing is this: When you were courting me you could hold me on your lap three hours; now you can not hold the baby on your lap three minutes."—*Boston Courier.*

—Another new fashion in Philadelphia is the "engagement dinner," at which the father or nearest male relative of the lady usually makes the announcement at the close of the dinner, and a pretty practice sometimes indulged is for each guest to pick up a flower and throw it at the fiancee, who is thus met with a rose shower from all sides of the table. On this occasion, reports an observer, "the bridegroom-elect often kisses his mother-in-law elect, and the father of the Benedict in turn kisses the fiancee."

—"What's the use of learnin' a lot o' language?" said the father of the boy. "When I went to school, readin', writin' an' 'rithumtic was good 'nough for me. I don't care nothin' for languages." "You don't seem to care very much for the English language," commented the teacher.—*Harper's Bazar.*

MEXICAN BANDITTI.

The Style of Highway Robbery in the Early Days of California.

Mexican bandits form a class worth studying. They have any amount of courage, and their entire disregard of the law is mingled with a certain dashing, easy, good-fellowship air, as if they would say to the very men they rob: "I complain of nothing in you. I am even disposed to like you, if you will only give me your money and make no trouble," and they are not without a certain religious feeling, that prompts them to say their "aves" before and after a crime. They have the hospitality, too, of their race, and if you enter one of their huts they will share with you freely their "tortillas" and "chile colorade." In the early settlement of California this class was very numerous. They herded cattle as vaqueros part of the time and gambled and robbed travelers for the rest. In 1866 I was under-sheriff of Santa Clara County, and received an account of numerous robberies by four Mexicans upon the road between the Almaden mines and San Jose. The first was an American teamster, who was driving along in his wagon, and they captured him in true Mexican style—by throwing the lasso over his head and dragging him from the wagon, going through his pockets and then allowing him to proceed on his way. Their next attack was upon a man on foot, whom they relieved of his baggage and money. Their last venture was not so successful. They tried to capture a bright young German—Otto Gerlach. Having a good horse, he put spurs to it and started to outride them. They followed with loud cries, whirling their lassos in the air. By hard riding he executed a flank maneuver that enabled him to elude them, and coming to town he gave me a full description of the men. I felt assured that they were the same who had robbed the teamster and pedestrian a few days before. I knew pretty well by reputation two of the bandits, Juan Soto and Jesus Orlindo. The other two men were strangers, but I knew I could identify them from his description. It was midsummer, the time of rodeos. The Spanish have a custom at this season of driving the numerous herds of cattle pastured on the plains and in the mountains into one large inclosure, where they are branded by the different vaqueros. I thought that I might find one or all of them at some of these rodeos. In this I was not mistaken, as the sequel proved.

My first capture was of Juan Soto, whom I found in the lower part of Santa Clara County, on Murphy's ranch, in company with certain of his countrymen, none of whom had been his companions in the highway robbery. Still, I feared their resistance, and, as I was alone, was compelled to bide my time. I left my horse and buggy in the thickest of chaparral and concealed myself, but in such a position that I could observe all that was being done. Presently all of his companions galloped off after some recreant cattle and Juan was left alone. He was a very large man, six feet high, and built in proportion, with the bright black eyes and swarthy skin of his race. He was humming a gay little Spanish ballad, and did not notice me until I had him covered with my pistol.

"Get off that horse and lie down upon your face quickly," I said in Spanish.

He took in the whole situation at a glance, and suddenly did so, knowing very well that he though I was on foot and he had a swift horse, that a shot is swifter and my aim was sure.

I made him put his hands behind him, and then putting my pistol in my pocket, I handcuffed him. It was a critical moment for me, for had his companions returned they could have lassoed me without difficulty, but the whole operation took but a moment, and again drawing my pistol, I ordered him to precede me to where my buggy was waiting. Here I assisted him into the buggy, and taking the reins in one hand, I seated myself by his side and drove rapidly down the road. A moment later swift hoofs echoed behind us, and loud voices called to us to stop. I only drove more rapidly, for I feared they would attempt to release him. They had returned and seeing Juan's horse riderless, naturally wished to know why. On they came, and I grasped my pistol, determined to sell my life, if necessary, as dearly as possible. My chief fear was that they would use the lasso. They stopped when they reached me, however, and asked angrily what I meant by taking Juan away. I told them of his offense, and that I was the sheriff. They did not offer to molest me, but rode back muttering, and I had no further trouble in landing him in jail. He was tried, convicted and sent to prison for two years.—*Chicago Times.*

Harrowing Statistics.

The lack of enthusiasm in Ireland over the Queen's jubilee figures in Tory speeches as evidence of the disloyalty of that race. Perhaps a few statistics may speak louder than trumpets. Here is a table that may explain away a part of this "disloyalty" of the Irish:

Died of famine	1,225,000
Evicted	3,668,000
Number of emigrants	4,186,000

A country which can show such vital statistics as these, covering half a century and involving over eighty per cent. of the population, displays a very narrow and ungenerous spirit indeed in refusing to throw up its hat in patriotic rejoicing and look forward with light heart for another half century of the same.—*Springfield (Mass.) Republican.*

THE GREAT NAPOLEON.

Wonderful Works of Statesmanship Accomplished by the Famous Warrior.

The battle of Austerlitz was fought on December 2, 1805. Early in 1806 peace was made by the treaty of Presburg, and Napoleon returned to Paris to occupy himself in consolidating his influence in Germany by founding the Confederation of the Rhine. It was at this time, in the year 1806, when he was in the zenith, or about the zenith of his fortunes, that the portrait by Longhi was taken. The face is certainly extremely handsome; there is great refinement in the features, and every indication of intellectual power. The remarkable thing about it is that it does not in the least suggest a warrior; it is hard to imagine that it is a portrait of Napoleon, drawn in the brief period which intervened between Austerlitz and Jena. It is, however, a great mistake to regard Napoleon as only, or even chiefly, a soldier; great as he certainly was in the field, he was equally great in the cabinet. No man of his day took hold of the work of government with any thing approaching the energy or capacity displayed by him; no man of any day has ever surpassed him. Roads, canals, colleges, schools, civil as well as military, all received his attention; reforms of administration and of taxation, all the manifold tasks of government, were approached in an enlightened spirit, with the clear good sense of a man of affairs, and with an entire absence of the prejudices so characteristic of this period. Above all, his code, at which he employed the best lawyers of the day, and which he pushed through to completion in the comparatively brief period of four years from its inception, feeling, as he did, a thorough conviction of its prime necessity, in casting into the form of law the great practical reforms which had been brought in by the revolution—this work stamps him as being, beyond question, the most sound and practical statesman of his time, so far as the internal management of his country was concerned. In all this, however, there was no philanthropy, strictly so called. Napoleon was only a ruler, possessed of great power, having a comprehensive and clear mind, fully acquainted with the needs of the public service, addressing himself to all the tasks of government, and especially to the task of improving the condition of the population over which he ruled with an energy, assiduity and intelligence rarely, if ever, seen before. He was not a philanthropist, let us admit, but he was probably a great deal better ruler than if he had been a philanthropist. No sentiment ever disturbed his vision or turned him aside from carrying through what he deemed to be a desirable reform.—*Scribner's Magazine.*

LIFE AT WEST POINT.

Description of a Visit to the Riding Hall of the Military Academy.

It is accounted "great fun" to witness the first rides of the yearlings, so we will go down there and laugh at their mishaps.

Mounting the stairs to the gallery, we look down upon a large space strewn with tanbark, at one end of which is a row of some twenty horses with watering-bridles. Soon the performers file in and come to a halt in front of the horses. Do they intend to ride with only a watering-bridle, without even saddle or blanket? They will try to, at all events. The instructor commands:

"Stand to horse! Prepare to mount! Mount!"

In obedience to his command the cadets spring, struggle, leap and kick, in their efforts to bestride their steeds. The moment they are mounted, several horses develop astonishing bucking propensities, to the anguish of their riders, and the delight of the gallery. Now they start around the hall at a walk. It seems rather tame, doesn't it? But soon the command "trot!" is given, and the fun begins. The poor fellows bounce about on the horses' backs like India-rubber boys, and wabble from side to side like jumping-jacks. The trot is accelerated, the horses take the gallop, and dash around the hall, tumbling their riders in heaps at the corners, while those who by chance are still mounted grasp frantically at their horses' manes. Finally, the gait is reduced to a walk; line is formed; the dismounted yearlings, nothing daunted, catch their horses and remount, and then the performance is repeated.

If we had visited the gymnasium and fencing academy in the morning we should have seen sections of the fourth class exercising under a rigid system of instruction; and if from there we had gone to the riding-hall at the hour of first-class attendance, we should have seen exhibited the high degree of muscular skill and activity to which the system of training in gymnasium and riding-hall brings cadets. For the first class cadets ride like Indians. It is immaterial to them whether they have a saddle or blanket, or ride bareback. They leap hurdles, go through the saber exercise, and are adepts at pistol practice; they mount, dismount, vault their horses and pick up articles from the ground, all while at full speed; they ride forward, backward, sideways and double; lying down, kneeling and standing up. Visitors at the riding hall during first class hours go to admire, not to laugh.—*George I. Putnam, in St. Nicholas.*

—When you ask a Georgia man how far it is to the next plantation and he answers that it is "a peek and a right smart screech," he is supposed to mean that it is as far as you can see from where you stand and then as much farther as a strong voice can be heard.

INYO INDEPENDENT.

County Official Paper.

C. Mulholland, EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY SEPTEMBER 17 ..... 1887.

GOVERNOR BARTLETT DEAD.

Governor Bartlett died at Oakland last Monday about 5 o'clock in the afternoon. By his death the State has lost an officer who was strictly conscientious and diligent in the discharge of the duties of his station. His devotion to the public service shortened his life. His political opponents are quite as ready as the members of his own party to bear witness to his strict honor in office. From the day he took office till his last official act he appeared to have no end in view but the public good. It will confer more lasting honor upon his memory that he was an honest man than that he was a successful politician; and not the least of his public services was the proof he gave that a man could be both. It is by the nomination to office of such men as Washington Bartlett that the schemes of unprincipled politicians are defeated, and that the will of the people continues to be the law of the land. Mr. Waterman, who as Lieutenant Governor may succeeds to the office of Governor, is a citizen of Los Angeles and a Republican.

Good Advice.

In an article on the Fair of the 18th. Agricultural District at Independence, the Inyo Independent *Chronicle-Union* urges the great good arising from these District Fairs, and strongly advises the stock raisers of Mono county to take all possible care to raise fine animals for exhibition at future Fairs. The article goes on to say: "Our stock raisers should remember that after the first cost of the parental stock, it costs no more to raise a $500 horse than a $50 one, and there is always a demand for good horses. And the same can be said of cattle. The Big Meadows of Bridgeport are well adapted to this business, and while we have much good stock in these Meadows we have not what we might call fancy stock. Our horse raisers should turn their attention, also, to the raising of draught animals, for which class of horses San Francisco offers at all times a remunerative market. The District Fairs can, and will be utilized for the public sale of stock on exhibition, and such fairs are always attended by stock dealers. We hope the coming District Fair will be a success in every particular, and that the residents of southern Mono will do all in their power to make it so." The whole article shows good sense and neighborly feeling.

A large meeting was held last Friday at Mitchelstown, Ireland. The meeting was open and lawful, and was attended by several English Members of Parliament. Without any reasonable cause an armed force opened fire upon the people and several men were killed. This is the bitter fruit the infamous crimes act is already bearing, and for which the Tory ministry is justly held responsible. The effect of this terrible outrage is to make great numbers of new friends in England for Irish Home rule, and to hasten the downfall of the Tory government. Great indignation was expressed next day in Parliament against the Government. Sir Edward Reed warned the Government that the English electors would resent any interference with a public meeting. The people of Great Britain would not allow their fellow subjects in Ireland to be treated in this manner.

Recently a manufacturing firm in Massachusetts brought six young women from Ireland to work in a factory under contract, & law of Congress prohibits the carrying out of all such contracts: and when this violation of the law was discovered the young women were sent back. This is a form of protection to home industry to which no objection can be taken. It is only bare justice that foreigners should not be hired in other countries to come into the United States and drive our own citizens from the employments at which they earn a support for themselves and families.

Settlers along the Humboldt river, Nevada, are in dread that Dunphy, the big cattleman, will take all the water out of the river. The Reno *Gazette* says if Dunphy carries out the project he is said to have in view, it will leave the country west of his ranch dry, ruin the meadow lands along the river, dry up Humboldt Lake, which would probably cause no injury, and depopulate Big Meadows, one of the finest agricultural sections of the State, and damage property in that county to an incalculable extent.

Nevada stockmen allege that unless laws are passed soon by the State Legislature restricting sheep men to lands owned or occupied by them, that within five years there will not be a hoof left on our ranges. They complain, and justly too, that sheepmen, as a rule, pay no taxes, own no land, but enjoy the same privileges as does the cattleman who owns his land and pays his pro rata towards meeting the expenses of the State Government.

The San Jose *Mercury* says: One month has passed since the boom commenced, and during that period over $20,000,000 in real estate has changed hands. Large ranches have been subdivided and sold, suburban tracts have been disposed of and hundreds of city lots have found purchasers.

The *Call* a few days ago announced that Colonel Blank of the United States Navy was at the Palace Hotel. The *Call* must have been mistaken, possibly the officer was Captain Jenks of the Horse Marines.

Ranch for Sale.

At Black Rock, twelve miles north from Independence, 520 acres of land for sale. Black Rock is one of the very best parts of Owens Valley. Four hundred acres of this land is held under U. S. patent; the remainder is located under the timber culture Act. One hundred and eighty acres are enclosed by a fence of cedar posts and barb wire. Sixty acres are now under cultivation, mostly wheat, oats and barley. A large amount of hay can be cut; blue joint, red clover etc. Several large springs of pure water on the place and good water rights additional. House, outbuildings and corrals. C. & C. railroad half mile distant from east line of land. Owens river eighty rods distant. This is a fine place for an energetic man to improve and will be sold at a bargain. Apply to

On the Ranch.

Independence, May 7, 1887.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, Stoutland, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost as more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN S. DODGE, JR., jeweler, Normal, Ill., writes: "You ask what I think of the Washer I bought last summer. Int. It is the best machine ever invented by man. Qd. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for gold."

I will ship a sample to any dealer, desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

J. WORTH, 1710 Franklin Ave., St. Louis, Mo.

FIRST ANNUAL FAIR OF Agricultural District No. 18. STATE OF CALIFORNIA.

Composed Of the Counties of

ALPINE, MONO & INYO.

TO BE HELD AT

Independence,

Commencing Tuesday, September 27, and Continuing Five Days.

A. R. CONKLIN ..... *President.*

O. I. MAIRS ..... *Treasurer.*

BOARD OF DIRECTORS:

A. R. CONKLIN,	NATHAN RHINE,
WM. WALKER,	W. S. ENOS,
W. K. MILLER,	HARVEY BOONE,
T. J. GOODALE,	JOHN SHEPHERD.

FIRST DAY—Tuesday.

First Department.

In this department the same animal shall not be entered more than once, except in sweepstakes or as a junior member of a family exhibited with its sire or dam. Any stallion, mare, gelding or colt competing in a race will not be excluded from competing for premiums in their respective classes.

CLASS I.
THOROUGHBRED HORSES.

Best stallion, 3 years old and upward	$20 00

CLASS II.
GRADED HORSES.

In this class none shall be awarded premiums but such as furnish proof of a cross, either of sire or dam with a thoroughbred.

Best stallion, 3 years old and upward	$15 00
Best stallion, 1 year old	10 00
Best mare, 3 years old and upward	10 00
Best mare, 2 years old	5 00
Best mare, 1 year old	5 00

CLASS III.
HORSES OF ALL WORK.

Best stallion, 3 years old and upward	$20 00
Best stallion, 1 year old	5 00
Best mare, 3 years old and upward	15 00
Best mare, 2 years old	7 50
Best mare, 1 year old	5 00
Best stallion and family, not less than three	20 00

CLASS IV.
TEAMS.

Best matched team	$15 00
Best single gelding, 3 years old and upward	7 50

CLASS V.
DRAFT HORSES.

Best stallion, 3 years old and upward	$15 00
Best matched team	15 00
Best single gelding	7 50

CLASS V.
SWEEPSTAKES.

Best stallion, any breed or age,	Association Silver Cup, Engraved.
Best mare, any breed or age,	Association Silver Cup, Engraved

SECOND DAY—Wednesday.

CLASS VII.
JACKS.

Best Jack, 2 years old and upward	$7 50
Best Jennet, 2 years old and upward	2 50
Best Jack and family, not less than three	10 00

CLASS VIII.
MULES.

Best span owned by one person	$10 00

CLASS IX.
CATTLE—BULLS.

Best bull, 1 year old and upward	$5 00
Second best bull, 1 year old and upward	5 00
Best bull calf	10 00

CLASS X.
COWS.

Best cow, 3 years old and upward	$10 00
Best cow, 2 years old	5 00
Best heifer calf	5 00

CLASS XI.
SHEEP.

Best ram, 2 years old and upward	$5 00
Best lot of ewes, not less than five	5 00
Best lot of ewe lambs, not less than five	2 50

CLASS XII.
GOATS.

Best lot of goats, not less than three	$5 00

CLASS XIII.
SWINE

Best boar, 2 years old and upward	$2 50
Best boar under 2 years old	2 50
Best sow, 2 years old and upward	2 50
Best sow, 1 year old and under	2 50
Best pen of 5 pigs, an age or breed	2 50

CLASS XIV.
POULTRY ETC.

Best pair of fowls, any age or breed	$2 00
Best hen and brood of chicks	2 00
Best pair of bronze turkeys	2 00

THIRD DAY—Thursday.

Second Department.

CLASS I.
AGRICULTURAL PRODUCTS.

All products exhibited in this Department must have been produced in Nevada, or in California east of the Sierra Nevada mountains, and by the exhibitor

Best 100 pounds of flour	$5 00
Best 100 pounds of wheat, any variety	3 00
Best 100 pounds of barley	3 00
Best 100 pounds of oats	3 00
Best 100 pounds of corn	2 00
Best 50 pounds of alfalfa seed	2 50
Best bale of timothy hay	2 50
Best bale of alfalfa hay	2 50

CLASS II.
VEGETABLES, ROOTS, ETC.

Best 10 pounds of sweet potatoes	$1 00
50 pounds Early Rose potatoes	1 00
100 pounds any variety of potatoes	2 00
14 parsnips	1 00
12 carrots	1 00
12 pounds turnips	1 00
12 beets	1 00
10 pounds tomatoes, any variety	1 00
½ doz. cabbage	1 00
50 pounds any variety of onions	1 00
½ doz. squash	1 00
pumpkin	1 00
sample of red peppers	1 00
¼ doz. watermelons	1 00
¼ doz. cucumbers	1 00
¼ doz. cantaloupes	1 00
10 pounds of white beans	1 00
10 pounds of pink beans	1 00
10 pounds garden peas	1 00

CLASS III.
DAIRY AND FARM PRODUCE.

Best 10 pounds of butter in rolls	$2 50
jar of butter, 20 pounds, 3 months old	2 50
10 pounds of cheese	2 00
10 pounds of lard	2 00
display of honey	Silver Pitcher
Apiary display	5 00
variety of fruit in jars	2 00
variety of jellies	Silver Butter Knife
variety of preserves	Set of Teaspoons
variety of pickles	Pickle Jar
Sample of hams and bacon, each	$ 00

FOURTH DAY—Friday.

Third Department.

CLASS I.
HORTICULTURAL PRODUCTS.

Best ½ doz varieties apples	Glass Water Set
3 varieties apples	Fruit Knife
display pears	$2 50
peaches	2 50
plums	2 50
quinces	Sugar Tongs
grapes, four varieties	2 00
grapes	1 50
5 pounds dried apples	1 50
5 pounds dried peaches	1 50
5 pounds dried prunes	1 50
exhibition of dried fruits in variety	2 00

Fourth Department.

CLASS I.

Best set harness manufactured in district	$5 00
bridle made in district	2 00
pair boots made in district	2 00
pair lady's shoes made in district	2 00
½ doz. brooms made in district	2 00

Fifth Department.

CLASS I.

Best 4 bottles wine made in district	$2 00
Best 4 bottles brandy made in district	2 00

Sixth Department.

Best patchwork quilt	Needle Case
best crochet quilt	Toilet Set
Best silk embroidery	Glove Case
Handsomest crazy quilt	Lady's Fan
Handsomest pillow shams	Needle Case

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, SEPTEMBER 17 1887

BORN.

ELDRED—At Bishop Creek, September 5, 1887 to Mr. and Mrs. J. R. Eldred, a daughter.

Mr. T. C. Boland came up from Keeler last Tuesday on a brief visit to town.

Mr. E. Robinson has sold to Mr. Julian, of Lone Pine, three two year old graded Norman colts; price $410.

There was a big gathering at Lone Pine but there was not time to make a report of proceedings this week.

Mr. J. T. Hallock, State Controller of Nevada, and Mr. C. Latta of Carson, were at Independence a few days this week.

Mr. T. C. Boland has bought from Henry Giles a pair of four year old carriage horses. Price delivered at Keeler, $250.

At various mines in the White Hill region a good deal of ore is sacked, but shipment is delayed for want of sufficient pack trains to get it out.

Messrs. Upton Tracy and Peter Kaiser came over from Lida Valley a few days ago. They took in the 16th and will return in a few days.

Carsonites have got what King James called the "yird hunger," and they have got it bad. There is a regular exodus from Carson to Owens valley.

Our neighbor, Mr. J. W. Symmes, owns a nice tract of land at Los Gatos; the boom has struck there and Mr. Symmes is safe to gain accordingly.

Needle work of all kinds; preserved fruits, butter, cheese, every article of home production can be entered for premiums at the pavilion free of expense.

The people of Calico evidently have faith in the future prosperity of their town; they have gone to work vigorously to rebuild in the burned district.

A new stage has been built for the Independence Amateur Dramatic Club. The stage is so arranged that it can be taken apart and put together again as occasion may require.

Mr. H. J. Robinson and family, arrived at Independence last Tuesday from Gridley, Butte County. He is brother to Supervisor Robinson, of Independence, and has come to stay.

The biggest delegation that ever went from Independence to attend a celebration at Lone Pine went down yesterday. The Independence brass band went down the evening before.

The school at Camp Independence will be opened for the fall term next Monday, September 19th. Mr. D. Crough will again be the teacher, this being his seventh term in the same school.

A basket of peaches picked a few days ago from a tree in the orchard of E. Robinson, at Independence, they measured twelve inches in circumference on an average. The peaches were of the late Crawford variety.

John Hughes, of Lone Pine, has been so ill for several weeks past as to cause his friends to have great fears that he might not recover. Dr. Woodin reports that he is improving a little during the past few days.

Hon. Evan Williams, State Senator of Nevada, Doctor Bronson of Virginia, and H. M. Yerington, of Carson, were at Independence last Saturday. The party were making a trip through the whole length of the valley.

The fair privileges were sold last Monday. Henry Levy bought the bar, lunch stand and confectionary stand. S. D. Thurston bought the pools. Charley Robinson bought the ice cream stand. All the priviledges brought fair prices.

Mr. Rawson intends building a new saw mill a little lower down Black Rock canyon than the site of the present mill. At present there is such hurry for lumber for new buildings that there is not time to saw stuff for the new mill; but this will be done as soon as possible.

The concentrating works at Keeler have been idle for some time. Boland and Gorman are now repairing the works and will soon resume operations. The business was not very successful when first started, but changes have recently been made in the management and otherwise that give good promise of success.

Miners are earnestly requested to collect and send specimens for exhibition at the District Fair. If the senders of specimens so wish all will be returned at the close of the Fair. No expense need be incurred; nothing is necessary but to collect specimens, pack in boxes and forward to the Secretary, C. Mulholland, at Independence.

At the beginning of the week Mr. Hukel, who is cutting logs for Mr. Rawson in the mountains above Black Rock, started a fire to burn trash that was in the way. The fire caught dry brush and spread rapidly where a large number of logs were lying around. For a time it appeared that a good deal of valuable lumber would be destroyed, but the fire was at last got under control before much damage was done.

No one should send money out of the county for Howard, Elgin, Waltham or Swiss watches. Gold and Silver watches from $10 and $20 upward. Rogers and Brothers best quality of Silver plated ware $5. a dozen. You can do better at home than in San Francisco. All kinds of Jewelry work done. Send your orders to R. W. Scott, Bishop Creek, Cal.

Mrs. Sarah Stewart, of Big Pine is in poor health, and in the hope that she may be benefitted by change of climate, Mr. Stewart has rented his farm for one year, and will soon leave with his wife on a trip west of the mountains. The family expect to be gone nearly a year. Mrs. Stewart is sister to the well known cattle king, Hon. A. C. Cleveland; she is also nearly related to President Cleveland.

The farm of the late J. W. Smith, at Fish Spring, was sold by the Sheriff last Saturday. Only one bid was made, and that was $5,400, just enough to cover all claims against the estate. Hon. Evan Williams, of Carson, and Doctor Bronson, of Virginia were the buyers. This was a good bargain; the farm contains 560 acres of first class land, and there is an abundance of water at all seasons. The improvements are not worth much. The buyers could already realize a handsome profit but they won't sell.

A Fine Section of Country.

All the old settlers of Owens valley were quite certan that the great body of land on the east side of the river, and from Independence station south to Owens Lake was utterly worthless. Not one of these old settlers would have taken the whole tract or any part of it as a gift. Better informed people carefully examined the tract and made locations there. Very soon this tract for a distance of twenty miles will be the most thickly settled portion of Inyo county. For all purposes of fruit growing, including grapes for wine and raisins, the soil is the best in the county. The parties who are interested in the land have plenty of capital; the canal now in course of construction will be so far completed that water will be conveyed upon most of the land in time for settlers to begin work next spring. Last Saturday parties sought to make locations there; only one of them found a vacant section and located it; all the rest had been taken up. Three or four years hence, when young orchards and vineyards, alfalfa fields and groves of shade trees are growing luxuriently this will be a lovely region. The railroad runs through its whole length.

To Be Or Not To Be

Mr. R. J. Laws, Assistant Superintendent of the C. & C. railroad and County Surveyor McKnight are now at work on a preliminary survey for the extension of the road to Mojave. It should not be presumed from this that the road is to be pushed thro' immediately; nor would it be safe to spend money in making improvements any where on the proposed line of the road on the presumption that work will begin at once. That the extension will be made is certain; but that it will be done during the coming winter is not at all certain. It is reported that the managers of the road are considering the following conditions. At present there is not business enough in the county to warrant the investment of more capital in the road. To extend the road would speedily bring a large increase of settlers, and consequently of business. Now, whether it is better to wait for the gradual settling up of the country and growth of business, or to invest money at once and hasten these results. It would seem that there should not be any hesitation to adopt the latter course.

Prices of Fruit.

In an article published in last week's issue of this paper, an error was made in the prices of fruit sold by Mr. J. W. Symmes during the present season. Mr. Symmes in a communication says; "I have not during the present season packed any appricots, peaches, plums, prunes, pears, nectarines or grapes for less than 3½ cents per pound; and as high as 6 cents per pound, according to size and quality. I have poorer qualities of peaches, but these I always dry; it would not pay me to pack and ship for the price these would bring green. Pears I have not packed for less than 4 cents per pound, and some as high as 6 cents. I have had no trouble in finding sale for all my good fruit at the above prices. My greatest trouble was that the birds did not want to leave me enough to fill increasing orders.

Kearsarge

For some months past prospecting has been pushed ahead steadily at the Kearsarge. Three or four weeks ago an ore body was struck that looked well. Some of this ore sent to San Francisco yielded 51 ozs. silver and $25 gold per ton. Since then the ledge has been prospected further and has not only increased in size, but the ore is richer in quality. The mine is bonded from N. Rhine by San Francisco parties. There is now 550 feet of backs and ore enough in sight to pay for the mine. The latest returns from San Francisco from a lot of the ore give 100 ounces silver per ton and a proportionate increase in gold. The Kearsarge is about to become as lively as in old times.

Unexpected Strike.

For some time past a tunnel has been under way in the San Carlos mine. At the beginning of this week when the face of the tunnel was about two hundred feet distant from the main ledge, an unlooked for body of ore was run into. Mr. T. Bastian, foreman of the mine, at once sent a message to Mr. W. H. Russell; the Superintendent, at Benton. Mr. Russell came down last Monday, examined the mine and went north again next day. The extent of the ore body was not developed at latest reports, but appeared big. The ore is galena, of good quality. The San Carlos promises to be a valuable property.

Darwin Notes.

At the Promontory mine at Darwin Flanagan and Callahan are making a good thing out of their lease. They are getting out a good deal of fine ore.

At the Diffiance mine twenty-four men are employed. More miners would be put to work if they could be got.

Gould and Silva are not doing much with their mine at present. Mr. Silva being laid up sick at Keeler.

At Old Coso Mr. J. C. Eddy has a lot of gold ore ready to work, but is delayed in starting up the mill for want of men.

No Entrance Fee.

It needs to be known that no entrance fee will be charged for any goods or products entered for exhibition at the pavilion during the coming fair of District No. 18. When articles are brought for exhibition the Secretary will assign a place for them in the pavilion, and no charge will be made. This applies to all kinds of goods or articles. Season tickets are ready for sale; admitting bearer wife and minor children to pavilion and fair ground during fair week; price $5. Single tickets for each day, 50 cents. Surely it will now be understood that no entrance fee will be charged on goods or articles offered for exhibition or to compete for premiums at the pavilion.

Effect of Negligence.

Last week a party of visitors from Carson were driving at George's Creek. They passed through a gate but did not take the trouble to close it behind them. A lot of horses that had been pasturing in the field were thus let out into the road, and a valuable colt belonging to John C. Irwin was killed. Our visitors are always kindly treated; they should not return the kindness by gross neglect that entails loss on their entertainers.

Good Stewards.

Two weeks ago Mrs. J. W. P. Laird and Mrs. S. D. Thurston were chosen as Stewards for the M. E. Church. On Wednesday the ladies made their first round of calls on official business, and the result proved the wisdom of their appointment. In one afternoon they collected more funds for the Church than any two men in town would collect in a month.

Religious Services.

Rev. T. E. Sisson will preach in the M. E. Church tomorrow [Sunday] forenon and evening. Sunday school at 11 o,clock a. m. Everybody welcome.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5.00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine

BEES & HONEY

I am making a specialty of comb honey in one pound sections and will be in town once a week to supply my customers.

Extracted honey in cans for sale, as usual, at the stores. Honey and comb foundation always kept in stock at the Apiary, at Oak Creek above Camp Independence.

W. M. MUTH-RASMUSSEN,
Bee Keeper.

A COSTLY WAIF OF THE SEA.

Sailors Once in a While Find a Fortune Floating on the Water.

Two sailors entered a wholesale drug store on lower Nassau street the other day, carrying with them a parcel which they handled as carefully as a young mother fondles her infant. They thought they had a piece of ambergris, which is a very costly substance usually found in the belly of a dyspeptic whale.

They were confident they had something worth about $20,000, but upon examination, unfortunately, it was found to be only hardened tallow mixed with dirt and salt—about as valuable as a chattel mortgage on a flock of pigeons. The captain could not believe in the expert's judgment and went out, still clutching his long guarded treasure and expressing his dissatisfaction with a liberal use of profanity. Similar mistakes to the one already described are often made in this city. The proprietor of the store spoke of the history and uses of ambergris as follows:

"Nearly every one is constantly using ambergris. It is every day in the hands of ladies and gentlemen throughout the world, but comparatively few people know anything about it. Its origin is disputed. Even scientists do not agree upon its true source; and, although it enters all houses where civilization reaches and an immensely profitable trade in the commodity is carried on, nine out of ten people whom you meet would not know what you meant if you mentioned its name. It is a slatelike substance, varying in color from dark to light gray, the darker shades, which are also denser in fiber, being the most valuable. A piece weighing from twenty to thirty-five pounds is seen but once in a lifetime. The most of it handled by the dealers is made up of pieces only a few ounces in weight. It is worth to-day about $24 per ounce and during the last few years has sold as high as $40 per ounce in consequence of its scarcity. Finding a piece of it is like finding a $5 note. You are as likely, or unlikely, to find it in one place as in another. There are several theories as to its origin, the generally accepted one being that it is an accumulation of secreted and indigestible matter in the stomach of a sick whale. It is found all over the globe at rare intervals by seafaring men, either floating on the water, cast up on some shore or lodged inside the whale. The greatest source of supply is the Arctic ocean, and also the southern latitudes, the usual cruising ground of the whaling vessels. The commanders are always on the lookout for it, as among the superstitious of the sea it is considered an omen of good luck for the ship ever afterward when her master brings home a piece of ambergris. He is always allowed a portion of the profits. You could put a piece worth $10,000 in your overcoat pocket, and from this you can understand how the toilers of the ocean never cease their vigilance in hunting for it.

"The fact that it is the most efficient known substance in producing the lasting quality in perfumery gives it its enormous commercial value. Civet and musk are used for the same purpose, but are not as powerful. When a perfume is made, white rose, cassia or heliotrope, for example, the odor of the flowers would quickly pass away, as the spirits forming the body of the liquid evaporate. Ambergris, however, prevents this, and is the indispensable boon that holds back the scent for days and weeks upon the handkerchief. When treated with alcohol it divides itself up into an almost infinite number of fine particles, which are mixed in the perfumery and remain on the fabric after the spirits have evaporated, acting as minute reservoirs and holding the pure essence of the flower after the cloth is perfectly dry. One ounce dissolved in a gallon of alcohol will make a strong tincture, and you would be required to use only a single ounce of this tincture in a gallon of perfumery, which conveys an idea of how far a few ounces of ambergris will go. Its production is limited to a few pounds per year, whereas it is the most important factor in the manufacture of millions of gallons of perfumery. When a large piece is found, the news of the discovery is telegraphed to dealers and the markets of the world are affected. In one instance a New York firm, some years ago, bought up a large portion of the existing supply and realized largely on the corner thus produced. Boston is the most influential center, as New Bedford, near at hand, sends out more whaling ships than any other city of any country. The owners of the ships sell the ambergris to the wholesale dealers, and although all drug stores keep a little on hand, it is bought directly from the wholesale men by the perfumery manufacturers."—New York Mail and Express.

Peculiarities of Hungarian Music.

I remember once asking a distinguished Polish lady, herself a notable musician and pupil of the great Chopin, whether she ever played Hungarian music. "No," she answered, "I cannot play it; there is something in that music which I have not got—something which is wanting in me." What was wanting I came to understand later, when I became familiar with Hungarian music as rendered by the Tzigane players. It was the training of a gypsy's whole life which was wanting here—a training which alone teaches the secret of deciphering those wild strains which seem borrowed from the voice of the tempest or stolen from whispering reeds. In order to have played the Hungarian music aright she would have required to have slept on mountain tops during a score of years, to have been awakened by fallen dews, to have shared the food of eagles and squirrels, and have been on equally familiar terms with stags and snakes—conditions which unfortunately lie quite out of the reach of delicate Polish ladies.—Blackwood's Magazine.

A Little Chap's Advice.

A little friend of mine, while visiting out of town for a few days, enjoyed immensely the strangeness of his rural surroundings. He had not been out of the city since he was old enough to take cognizance of country ways and characteristics, and his comments on what he saw occasioned much amusement to his parents and the family where he was visiting. The other day, as he sat enjoying a piece of cake under the shade of the trees, the hens gathered about him to catch the crumbs that fell from his chubby hands, and among them was a Brahma chicken sparsely provided, as these chickens frequently are, with feathers. The little fellow gazed down with a reproachful eye at the chicken so illy provided with feathery garb, and his protest finally came: "Go 'n tell your ma to dress you, and don't be goin' wound wifout no clothes on."—Boston Budget "Saunterer."

How "Parnell" Is Pronounced.

Throughout England, and even in parliament, Mr. Parnell's name is usually spoken as in this country, with the accent on the second syllable. But he and his closest friends accent it properly on the first syllable.—Chicago Herald.

SHE WAS A NIHILIST.

The Terrible Experience of a Russian Jewess—Among the Refugees.

An anecdote, which is absolutely true in every detail, will illustrate and explain the feelings of some of the refugees in America. Not far from a New York police station is a large three story brick building. Years ago it was a handsome dwelling, but time and the small boy have played havoc with its facade, doors, windows, and railing. It is occupied by a well to do Russian, who years ago fled his native land for alleged complicity in some plot against the czar. It has long been the rendezvous of political refugees of both sexes, Russian Nihilists, Polish Liberators, French Communards, German Socialists, and Cosmopolitan Anarchists. The circle met there is composed of educated and clever people. Nearly all are excellent linguists, and more or less successful in trade, literature, or professional life. Owing probably to the terrible scenes in which they have been actors, all are more or less eccentric in behavior, speech, or ideas. Not long since a party of a dozen men and women were spending the evening in the large old fashioned parlor. All smoked, a few sipped the vitriolic vodka between the whiffs of their cigarettes, while all the rest assuaged thirst with the cheap wines of the Rhine and Moselle. The conversation had been political and literary rather than anecdotal in character, and had flagged until the room was almost silent. The only person speaking was a handsome Jewess, of 24 or 25, whose name or nom de guerre was Theodora Ounavitsch. She was a rare type of that race, being a superb blonde with bright golden hair, large lustrous blue eyes, and exhibiting the powerful figure and splendid health which characterizes the Hebrew women to so remarkable a degree. As she paused at the end of an argument and drained a glass of Josephshoefer, some one asked, "What made you a Nihilist, Dora?"

"Nothing very remarkable to us Russians," she replied. "I belong to a good family in a small town in the Warsaw province. I married the rabbi of our synagogue, and we were very happy for a few months. The czar then made a change, and sent down a new governor from St. Petersburg to replace our old one, who was a good and just man, although a Russian general. The newcomer had every vice and no virtue of any kind. He was so bad and cruel that our friends and relatives wrote us when he came warning us against him. My husband the next Sabbath in the synagogue told our people about him, and advised them to be overcautious in not violating any of the thousand tyrannical laws with which we were cursed. Though he spoke in Hebrew for fear of spies, some one betrayed him to the governor. He was arrested, tried, flogged on the public square into insensibility, and sent to Siberia for life. I was present when he underwent his agony, and stood it until I became crazed. I broke through the crowd toward the wretch of an official, and cursed him and his master the czar, and swore vengeance against both. I too was arrested, and tried at court martial, and sentenced to receive a hundred blows with the rod in the public square. I, a woman, was taken by drunken moujiks and heathen Cossacks to the place, tied by my hands to the whipping post, my clothing torn from my body to the waist, and beaten before all the soldiery and the people of the town. At the twentieth blow I fainted, but the ropes held me up, and the full hundred were counted on my body. They cut me down, rubbed rock salt and water and some iron that eats like fire into my back to stop the bleeding, and carried me to the hospital.

"I lay there two months and was discharged. I had but one idea then, and that was vengeance. By patience I managed to get employment in the governor's palace as seamstress. One afternoon he was in his bath and sent for towels. The attendant was tired, and I volunteered to take them. I threw them over my arm and under them I held a long stiletto sharp as a needle. I entered the room, and he was reading and smoking in the bath. I laid the towels by his side with my left hand, and at the next moment with my right I drove the knife through his heart. It was splendidly done. He never made a sound, and I escaped to this land. That is why I am a Nihilist. Do any of you doubt?" She sprang excitedly from her chair, and in a half a minute had bared herself to the waist. The front of her form from neck to belt might have passed as the model of the Venus di Milo, but the back! Ridges, welts and furrows that crossed and interlaced as if cut out with a redhot iron; patches of white, gray, pink, blue and angry red; holes and hollows with hard, hideous edges; half visible ribs and the edges of ruined muscles, and all of which moved, contracted and lengthened with the swaying of her body. There was a gasp from every one present. The aged host rose, silently kissed her on the forehead, and helped her to put back her garments. Then again the wine passed round, and what secret toasts were made as the party drank will never be known.—William E. S. Fales in Chicago Times.

The Richest Man.

In speaking of the wealth of some of the ancients, you class Tiberius as the wealthiest, at $118,125,000, and give that of Cræsus, the Lydian, at about $8,000,000. You have not mentioned one wealthier than them all, who was Pythius, son of Aty, the Lydian, who possessed in silver and gold together $24,516,000, which, added to his possession of land and slaves at a proportionate value, would swell his wealth to about $500,000,000. I mean his gold at the Doric value of $5.22; if reckoned at the value of the stater siebos it would give him in coin $6,036,000, and with slaves and lands in proportion, a wealth of over $120,000,000. This man Pythius, without touching his silver and gold, entertained at the city of Calænæ the army of Xerxes, over 5,000,000 strong, in his invasion of Greece, and on a previous occasion made King Darius, Xerxes' father, a magnificent present—a gold plane tree and vine. This Pythius, then, was the wealthiest man in the world, and it is doubtful if there has been any one before or since to equal him.—New Orleans Times-Democrat.

Crops in Mexico.

Between San Juan del Rio and Queretaro the Mexican Central traverses the fields of one Mexican farmer who raises 20,000 bushels of wheat a year. There are six or seven haciendas in the same locality where the crops reach 10,000 bushels; and 10,000 bushels of wheat means 40,000 bushels of corn, 2,000 bushels of peas, and 6,000 bushels of beans on the same hacienda. That is the way the Mexican farmer of this part of the country diversifies his crops. He raises wheat, corn, beans, and peas in about the proportion given. Occasionally there is a specialist like the farmer near Queretaro who goes into the raising of chile, the hot peppers of this country. This man usually has 60,000 chile plants or vines.—Globe-Democrat.

BAKING SICK INDIANS.

Remarkable Ways of Treating Disease in Vogue Among the Apaches.

To combat their ailments they have only the usual superstitious rites of a few ignorant "medicine men," and occasionally make use of those heroic and barbarous treatments so common with savages, says Lieutenant Schwatka, writing of Apache customs. One of these, I think, may be interesting. A great hole, large enough to receive the body of the invalid in a recumbent position, is dug in the ground. In this excavation a fire is maintained until the ground is heated to its greatest possible extent, when the embers and ashes are scraped out. Several layers of damp mud are immediately used to plaster the walls of this fiery furnace, and the invalid is then placed within and covered up with mud, the head alone protruding. The escaping steam makes the torture endured by the poor wretch for the thirty-six to forty-eight hours of misery in the prison of baked clay oftentimes insupportable, and but few survive the severe ordeal. A Mojave squaw, with the Americanized name of "Polly," rallied from this terrible inquisition, but it took the kindest treatment for two months under the care of a white physician to save her life.

Nearly all the Apaches are addicted to tattoong, their faces and wrists being usually adorned, and, as far as I casually noticed, there being no difference between the men and women. Paints and pigments of all characters are eagerly sought for temporary personal ornamentation, the Yumas and Mojaves even descending to stove-polish, bootblacking and mud. Undoubtedly the latter, in some of its applications, serves a more practical purpose than mere ornamentation. A thin coating of soft clay is matted through the hair and then plastered carefully down upon the skull, until it resembles, when dry, a shining bald head or an inverted earthen bowl. This is left on for two or three days until it has subserved its purpose of deadly destruction, when the earthy skull-cap is broken with a stick and the beating process continued until every particle of dust is thoroughly eradicated, when the hair is washed with the soft pulp of the root of the Yucca palm, which produces a soapy lather. After this the hair is energetically rinsed and then whipped in the open air until dry. From all this manipulation it emerges as glossy and as soft as silk.

This Yucca palm is commonly known as the Spanish bayonet and oftentimes as the soap-weed, the latter name being evidently derived from this peculiar use by the Indians and Mexicans. It is one of the most extensively common plants of Apache land and contiguous countries, and it is well for those localities that a commercial use has been found for this abundant weed—its pulp, according to recent experiments, bidding fair to give a very fine grade of printing-paper. Thus the vulgar soapweed that cleanses the outside of the Apache's head may yet improve its interior through the medium of the press.—*Century.*

—The Bible stand at the Crystal Palace was opened on July 9, 1862. From that date to December 31, 1886, nineteen million, nine hundred and fifty-nine thousand, two hundred and fifty-three separate Gospels, including a large number of Bibles and Testaments, Scripture cards and leaflets, have been circulated in thirty-six languages.—*Chicago Advance.*

—Is there a grace more desirable than that which is the essence and the spirit of the Golden Rule—a spirit which shelters ignorance from comment, while it strives to remove it; a spirit which seeks to make every one in the circle of its influence feel that he has a friend whose heart and mind are conservatories sheltering the flowers of kindliness and sympathy?—*Youth's Golden Hours.*

—Some experienced educators think that a good many teachers in the public schools make a mistake in not urging the scholars to talk more—the laconic reply of "yes" or "no" on the part of a scholar not being conducive to the process of thinking. Questions should be put in such a manner by the teacher that the pupil will be bound to use one or more sentences, thus exercising the mind more and acquiring a better knowledge of the construction of the English language.

—A citizen stopped one of our pastors a few days ago and offered him a five-dollar bill, saying: "I was at your church last Sunday, the first time I have been in church for several years, and I liked your sermon so well that I want to pay for what I enjoyed." Inquiry brought out the fact that he had been of another denomination, and the pastor declined the money, but put him on the track of having a seat assigned him to occupy regularly in the Evangelical Church of his order.—*Hartford Religious Herald.*

THE BARE FACTS ABOUT FARMER ARMSTRONG.

We made mention of Mr. Frank Armstrong, of Dodge Township, last week, as the winner of $5,000 in the Louisiana State Lottery. The cash was received by Mr. Truman, banker, here on last Friday in full. It was one-twentieth part of the second capital prize ($100,000) which was drawn by ticket No. 21,658, for which twentieth part Mr. Armstrong had paid one dollar about a month ago. As stated before, Mr. Armstrong is a substantial farmer of about 55 years, has raised a family in Union county, nearly all the members of which are scattered away "doing for themselves," and as he lost his wife a few years ago, he is unmarried. On his fine farm of 240 acres there was a mortgage of about $2,000, which, if not already, will soon be paid. He will give $2,500 of the money to his son Harvey (who also had a ticket bought by his father at the same time as the lucky one, which proved a blank), and together they will stock the farm most abundantly.

Mr. Armstrong has not been a "lottery gambler." In 1885 he sent a few dollars—one a month for a few months, to New Orleans. At the first of the the year he commenced, calculating to spend a dollar a month during the season, "for luck." "Fortune is a fickle goddess," and while she passed by thousands, smiled on Farmer Armstrong.—[Afton (Iowa) Tribune, July 6.

—An inclination of one inch in fifteen miles is sufficient to give motion to water. An inclination of three inches per mile in a straight, smooth channel will give a velocity of three miles per hour, while three feet per mile would produce a torrent.—*Boston Budget.*

—St. Genevieve is the oldest town in Missouri, and just last week woke up and discovered near by a mountain 200 feet high of solid red, gray and rose colored granite

—It has been suggested that ropes used for scaffolding purposes, especially in localities where the atmosphere is apt to destroy hemp, should be dipped when dry in a bath containing twenty grains of sulphate of copper per litre of water, and kept in this solution about four days. The sulphate of copper absorbed will, it is believed, preserve them from attacks of parasites and rot.—*Arkansaw Traveler.*

CONCENTRATE YOUR VITALITY.

One on the secrets of health is the concentration of vitality. The recruiting of the vital principle is done effectually by BRANDRETH'S PILLS. "Health finds happiness in the mere sense of existence." BRANDRETH'S PILLS help nature to reassert her own when she has been forced to vacate her stronghold in the body. When an enemy attacks a fort all the forces are concentrated at the point of attack to resist the onslaught. So with the body. BRANDRETH'S PILLS concentrate all one's vitality to throw off the encroaching disease. Get BRANDRETH'S PILLS. Be sure to take no other.

Professor Proctor announces that he has discovered two new suns. Mr. Dana must look out for his laurels, also for the dignity of his feline associate.

PHYSICIANS HAVE FOUND OUT

That a contaminating and foreign element in the blood, developed by indigestion, is the cause of rheumatism. This settles upon the sensitive sub-cutaneous covering of the muscles and ligaments of the joints, causing constant and shifting pain, and aggregating as a calcareous, chalky deposit which produces stiffness and distortion of the joints. No fact which experience has demonstrated in regard to Hostetter's Stomach Bitters has stronger evidence to support than this, namely, that this medicine of comprehensive uses checks the formidable and atrocious disease, nor is it less positively established that it is preferable to the poisons often used to arrest it, since the medicine contains only salutary ingredients. It is also a signal remedy for malarial fevers, constipation, dyspepsia, kidney and bladder ailments, debility and other disorders. See that you get the genuine.

To the novel colors invented for women's clothes of "crushed strawberry" and "whipped cream" has been added the color of "slapped baby."

"Hope on, hope ever." How many delicate ladies there are who, while they attend to their daily duties, do so with aching heads, a sense of fullness, pain in the back and depressed spirits, who are "only keeping about," as the phrase is. Some day they "go into a decline," and leave their children motherless. To such we would say, "Cheer up." Timely use of Dr. Pierce's "Favorite Prescription" corrects all female irregularities, weaknesses, and kindred affections easily, pleasantly and quickly.

"What book has helped you most in life?" I asked my friend as home we took our way, one day, and he replied: "My pocketbook."

Irritation of the throat and hoarseness immediately relieved by "*Brown's Bronchial Troches.*"

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

You can't judge of a man's character by the clothes he wears, but they give you some idea of his credit.

All diseases of lower bowel, including pile tumors, radically cured. Book of particulars, 10 cents in stamps. World's Dispensary Medical Association, 663 Main Street, Buffalo, N. Y.

Patron to milkman—Why don't you reduce your rates? Milkmen—Can't afford to—unless I reduce the milk.

HELLO!

HELLO! Call 1340. SMITH'S CASH STORE, 115 Clay Street, San Francisco, and tell them to mail me the Home Circle (their price list) every month. My sister says it is the best place on the coast to buy everything a family needs; that their goods are cheaper and better, and more carefully packed, than any place she ever dealt. SAY—HELLO! Do you hear?

Yes, I know. I trade there myself, and so does everyone who has a family to keep and values economy and good living. I bought the finest tea there I ever drank, and only 50 cents. They call it the KINDERGARTEN. It is like what they charge $1.25 for at some places. The Coffee, Hams, Cheese, Spices, Bacon, and Potatoes I get there are superb. Smith says he has low priced goods for those who want them, but fine articles at reasonable prices has built up his large business, which exceeds that of any house in San Francisco engaged in the same line of trade. HELLO! Send it by first mail.

SEATON'S MAGIC SOAP
WASHING WITHOUT RUBBING

Quality Never Varies, Splendid for Flannels, Sets Color of all Prints, Fine on the Skin, Absolutely no Rubbing.

ALL PROGRESSIVE GROCERS KEEP IT.

This BELT or Regenerator is made expressly for the cure of derangements of the generative organs. The continuous stream of ELECTRICITY permeating through the parts must restore them to healthy action. Do not confound this with Electric Belts advertised to cure all ills from head to toe. It is for the ONE specific purpose.

For circulars giving full information, address Cheever Electric Belt Co., 103 Washington Street, Chicago, Ill.

The following words, in praise of DR. PIERCE'S FAVORITE PRESCRIPTION as a remedy for those delicate diseases and weaknesses peculiar to women, must be of interest to every sufferer from such maladies. They are fair samples of the spontaneous expressions with which thousands give utterance to their sense of gratitude for the inestimable boon of health which has been restored to them by the use of this world-famed medicine.

$100 THROWN AWAY.

JOHN E. SEGAR, of *Millenbeck, Va.,* writes: "My wife had been suffering for two or three years with female weakness, and had paid out one hundred dollars to physicians without relief. She took Dr. Pierce's Favorite Prescription and it did her more good than all the medicine given to her by the physicians during the three years they had been practicing upon her."

THE GREATEST EARTHLY BOON.

Mrs. GEORGE HERGER, of *Westfield, N. Y.,* writes: "I was a great sufferer from leucorrhea, bearing-down pains, and pain continually across my back. Three bottles of your 'Favorite Prescription' restored me to perfect health. I treated with Dr. ——, for nine months, without receiving any benefit. The 'Favorite Prescription' is the greatest earthly boon to us poor suffering women."

THREW AWAY HER SUPPORTER.

Mrs. SOPHIA F. BOSWELL, *White Cottage, O.,* writes: "I took eleven bottles of your 'Favorite Prescription' and one bottle of your 'Pellets.' I am doing my work, and have been for some time. I have had to employ help for about sixteen years before I commenced taking your medicine. I have had to wear a supporter most of the time; this I have laid aside, and feel as well as I ever did."

IT WORKS WONDERS.

Mrs. MAY GLEASON, of *Nunica, Ottawa Co. Mich.,* writes: "Your 'Favorite Prescription' has worked wonders in my case.

Again she writes: "Having taken several bottles of the 'Favorite Prescription' I have regained my health wonderfully, to the astonishment of myself and friends. I can now be on my feet all day, attending to the duties of my household.

TREATING THE WRONG DISEASE.

Many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, another from liver or kidney disease, another from nervous exhaustion or prostration, another with pain here or there, and in this way they all present alike to themselves and their easy-going and indifferent, or over-busy doctor, separate and distinct diseases, for which he prescribes his pills and potions, assuming them to be such, when, in reality, they are all only *symptoms* caused by some womb disorder. The physician, ignorant of the cause of suffering, encourages his practice until large bills are made. The suffering patient gets no better, but probably worse by reason of the delay, wrong treatment and consequent complications. A proper medicine, like Dr. Pierce's Favorite Prescription, *directed to the cause* would have entirely removed the disease, thereby dispelling all those distressing symptoms, and instituting comfort instead of prolonged misery.

3 PHYSICIANS FAILED.

Mrs. E. F. MORGAN, of *No. 71 Lexington St., East Boston, Mass.,* says: "Five years ago I was a dreadful sufferer from uterine troubles. Having exhausted the skill of three physicians, I was completely discouraged, and so weak I could with difficulty cross the room alone. I began taking Dr. Pierce's Favorite Prescription and using the local treatment recommended in his 'Common Sense Medical Adviser.' I commenced to improve at once. In three months I was *perfectly cured,* and have had no trouble since. I wrote a letter to my family paper, briefly mentioning how my health had been restored, and offering to send the full particulars to any one writing me for them, *and enclosing a stamped-envelope for reply.* I have received over four hundred letters. In reply, I have described my case and the treatment used, and have earnestly advised them to 'do likewise.' From a great many I have received second letters of thanks, stating that they had commenced the use of 'Favorite Prescription,' had sent the $1.50 required for the 'Medical Adviser,' and had applied the local treatment so fully and plainly laid down therein, and were much better already."

JEALOUS DOCTORS.

A Marvelous Cure.—Mrs. G. F. SPRAGUE, of *Crystal, Mich.,* writes: "I was troubled with female weakness, leucorrhea and falling of the womb for seven years, so I had to keep my bed for a good part of the time. I doctored with an army of different physicians, and spent large sums of money, but received no lasting benefit. At last my husband persuaded me to try your medicines, which I was loath to do, because I was prejudiced against them, and the doctors said they would do me no good. I finally told my husband that if he would get me some of your medicines, I would try them against the advice of my physician. He got me six bottles of the 'Favorite Prescription,' also six bottles of the 'Discovery,' for ten dollars. I took three bottles of 'Discovery' and four of 'Favorite Prescription,' and I have been a sound woman for four years. I then gave the balance of the medicine to my sister, who was troubled in the same way, and she cured herself in a short time. I have not had to take any medicine now for almost four years."

THE OUTGROWTH OF A VAST EXPERIENCE.

The treatment of many thousands of cases of those chronic weaknesses and distressing ailments peculiar to females, at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., has afforded a vast experience in nicely adapting and thoroughly testing remedies for the cure of woman's peculiar maladies.

Dr. Pierce's Favorite Prescription is the outgrowth, or result, of this great and valuable experience. Thousands of testimonials, received from patients and from physicians who have tested it in the more aggravated and obstinate cases which had baffled their skill, prove it to be the most wonderful remedy ever devised for the relief and cure of suffering women. It is not recommended as a "cure-all," but as a most perfect Specific for woman's peculiar ailments.

As a powerful, invigorating tonic, it imparts strength to the whole system, and to the uterus, or womb and its appendages, in particular. For overworked, "worn-out," "run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," housekeepers, nursing mothers, and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequaled as an appetizing cordial and restorative tonic. It promotes digestion and assimilation of food, cures nausea, weakness of stomach, indigestion, bloating and eructations of gas.

As a soothing and strengthening nervine, "Favorite Prescription" is unequalled and is invaluable in allaying and subduing nervous excitability, irritability, exhaustion, prostration, hysteria, spasms and other distressing, nervous symptoms commonly attendant upon functional and organic disease of the womb. It induces refreshing sleep and relieves mental anxiety and despondency.

Dr. Pierce's Favorite Prescription is a legitimate medicine, carefully compounded by an experienced and skillful physician, and adapted to woman's delicate organization. It is purely vegetable in its composition and perfectly harmless in its effects in any condition of the system.

"Favorite Prescription" is a positive cure for the most complicated and obstinate cases of leucorrhea, or "whites," excessive flowing at monthly periods, painful menstruation, unnatural suppressions, prolapsus or falling of the womb, weak back, "female weakness," anteversion, retroversion, bearing-down sensations, chronic congestion, inflammation and ulceration of the womb, inflammation, pain and tenderness in ovaries, accompanied

A PROSPEROUS COUNTRY.

Marvelous Mineral and Agricultural Resources of the Argentine Republic.

The Argentine Republic of South America has within a few years become a country of great interest to the millions of Europe seeking homes in the new world. The arrivals from foreign countries in 1880 amounted to 41,615 and steadily increased to 103,-189 in 1884, and exceeded 110,000 in 1885 and 1886. This is a larger influx of population than received by any other country than the United States, and larger in proportion to its population than ours. The Argentine Republic is located in the south temperate zone, in South America, and consists in large part of the basin of the great Rio de la Plata, a river extending far into the heart of the continent, and nearly connecting in its upper portion with the great Amazon. It is a well watered, fertile region, with an area of 1,000,000 square miles, or one-third as large as the United States exclusive of Alaska. Its present population is only about 3,000,000, of whom 400,000 or 500,000 are recent additions from Europe and from the United States. The smallness of the native population is for so inviting a territory a point most favorable to immigrants. It will be an easy matter for the progressive States of Europe to overcome the deleterious influence given to the country by its first Spanish invaders. If Germany wishes to go into the business of founding the colonies, the Argentine Republic offers better inducements than any other half-settled territory on either continent. In fact, a considerable and increasing portion of the immigration to the new republic is from Germany.

The country is divided into fourteen States, which in area, population and wealth seem to be an exact counterpart of what these United States were one hundred years ago at the close of our war for independence. Events move so much more rapidly now than they did at the outset of our National career that it is quite within reasonable prospect that young people now living may see this South American Republic become as popular and powerful as our own country now is. The agricultural resources of this country have never been half developed. The great pampas plains that are its chief characteristic are roamed over by millions of horses and cattle, hunted and slaughtered for their hides and meat. It is hardly to be supposed that the half-million, more or less, of recent immigrants to La Plata are attracted by the prospect of engaging in this occupation. The country will speedily outgrow it, and the virgin fertility of soil will be made to blossom with every variety of agricultural products.

The tendency of modern population to large cities in America, is shown by the fact that the largest city of the Argentine Republic, Buenos Ayres, has 300,000 people, and has doubled in size within the last twenty years. This is a much larger population than any city in the United States had one hundred years ago. Thirteen other cities of La Plata vary from 10,000 to 50,000. Railroads are beginning to be built, and there are more miles of telegraph lines than there were in the United States twenty years ago. The fact that its great river is navigable a long distance into the interior gives the country a great advantage when railroad facilities are added to those now existing. The trade of this young, growing country is valuable now, and must be increasing so as it advances in importance and wealth. Like all new countries, it imports largely of manufactured goods, and these are largely supplied by England. As the most progressive of the South American states, the Argentine Republic, is likely to surpass Brazil, which from its size now leads it. The greater part of the latter country is in the tropical regions, and its heat and unhealthfulness will repel the immigration from the temperate zones of Europe which the Argentine Republic attracts. The lines of immigration in all ages have followed the same latitude, showing that various peoples become attached to the variety of climate to which they have been always accustomed. It is probable that when emigration crosses the tropics it will be to seek the same climate that it leaves in the northern temperate zones of Europe. If this be true, the Argentine Republic will probably, in time, be filled with a population from the teeming millions of Central and Southern Europe, with very possibly a large sprinkling from enterprising citizens of our own United States.—*Boston Budget.*

Discovery of Buried Wood.

In boring a well on the farm of Mrs. Sarah Williams, some five miles south of Colusa, J. C. Frazier, who has the farm rented, struck a piece of wood at a depth of a 170 feet. The wood brought up by the augur was in an excellent state of preservation, and was pronounced "all oak." This place is only 50 feet above the sea level, so that the wood is 120 feet below the ocean's surface, If it was sunk there when this village was a lake or an arm of the bay, it was in pretty deep water. How long since this piece of wood was in a growing tree? The valley, of course, has grown, but without some convulsion of nature the growth has been slow—not, perhaps, over one foot per century. Then has it been seventeen thousand years since this oak tree grew? In the shadow of the infinite this is not long, but measured by the history of man, it is indeed a long space.—*Colusa (Cal.) Sun*

DOGS FOR THE ARMY.

Canine Messengers and Sentinels Especially Trained for War Duty.

The various powers of the dog have been tried to their utmost in Germany. It will be almost incredible to the inhabitants of a city where Mr. Henry Bergh dwells that its sister German city suffers the greatest cruelty to these faithful attendants of man without raising a protesting voice. True, there is a society for the protection of animals, to which an American left 100,-000 marks, but it seems one only in name. I have seen carts at which an ox might stare with horror, drawn by two ordinary dogs and a woman, all three half dead under the load. "Yes," said one of the owners, with whom I talked, "it is true; but a custom in Berlin can not be changed." No one seems to care for them. Men walk along the Linden and listen to the dogs' howlings from the ever-ready lash, and see their panting tongues, without a word of reprimand or sympathy. The Germans have also found another use for these worthy brutes, against which there is nothing to say.

Among the thousand and one inventions, appliances, and wonderful uses of men and beasts which German genius has devised to defeat France in case General Boulanger's successor becomes unpleasant, the dog plays a significant role, employed as messenger and sentinel. Experiments have been made for nearly a year now, and have proved highly satisfactory. The dog maneuver of the hunter batalion was decidedly the most interesting of the recent campaign. Several regiments have been furnished with the German shepherd dogs, known for their wisdom the world over. Each one is attached, so to speak, to the person of a soldier, in whom the dog soon recognizes his master, and who conducts his training. While doing duty the dog is kept with the sentinel, and easily learns the requirements of his post. A few of the experiments performed before Colonel von der Goltz Pacha, who represented the Sultan at the ninetieth birthday of the Emperor, and has since remained to witness the reviews, were surprising. A soldier, taking the dog from the sentinel, marched off on a reconnoitering expedition. After writing his observations and placing them in a cask about the neck of the brute, the latter was told to return to his master, which he did in an astonishingly short time. One dog employed in this service arrived at his post ten minutes before a mounted Uhlan charged with the same instructions, though the latter rode at a desperate speed. But even more than this was accomplished. With a message tied about his neck, as in the former case, the dog was told to seek a distant sentinel and bring a return answer. This he did with great speed, carrying his message directly to his master without fail.

It is a little wonder that Pacha Goltz was surprised at the success of the experiments given in his honor. And they are truly wonderful for the present, though bidding fair to become a commonplace institution in that great machine—the German army. The consequences and possibilities of the shepherd-dog service are apparent to all who know anything of military science, and make their citation superfluous. One thing is certain, that a future war between Germany and any of its neighbors will not be conducted without its dog-regiment, which, though not employed in concerted action, will perform service more valuable than the cats of ancient Egypt.—*Berlin Cor. N. Y. Tribune.*

INDEPENDENT JUDGMENT.

Why No Man Can Judge Fairly Who Judges All by Himself.

Independence of judgment involves a full knowledge and a fair estimate of more views than one on the point which is judged. No man can judge independently who judges all by himself, without hearing and carefully considering what others have to say on the subject before his mind. If there are, fairly, only two sides to a question, and a person hears one man on one side, and one man on the other side, he must be of the same opinion with one of those men in order to be absolutely independent in his judgment. And if, again, he hears only one man's argument, and that on the opposite side from his own former impressions, it may be a higher proof of his independence of judgment for him to surrender those impressions, and adopt the view thus newly presented to him, than for him to adhere to those impressions, now that he sees they are not well founded. Yet how prone a man is, who wants to have credit for independence of judgment, to adhere to his own earlier impressions, rather than to conform his views to the new light which he has received from another. A judge on the bench, as a rule, refuses to give a final opinion on a question submitted to him, until he has heard arguments on both sides of that question; in order that he may be more independent in his judgment, even though agreeing with one of the lawyers who has argued the case before him, than he could be by acting on his own unaided impressions and predilections. Real independence of judgment must, at times, *seem* as though it were a result of another's personal influence; yet it is better to be independent, even while seeming not to be, than to seem to be independent without being so.—*S. S. Times.*

—"It is curious," remarked a salesman in a Chestnut street store this morning, "what odd excuses people will make for not buying things rather than tell the truth."—*Philadelphia Bulletin.*

FRUIT ON THE FARM.

Timely Advice on Canning, Drying and Evaporating Orchard Products.

The business of canning and evaporating fruits and vegetables has been steadily growing for many years past, until it has now assumed immense proportions. If the work is done properly, which is not always the case, the fruits and vegetables will retain their fully-developed richness to an extent that early grown fruits and vegetables do not equal, and for this reason the evaporated fruit is often used after the early-grown fruit is placed on the market. This is a very good plan to follow, and is not only cheaper, but is also more healthy for the consumer.

Consumers in general are using canned and evaporated goods more and more each year, and as a natural consequence the evaporating factories are having quite a boom.

The canning process is easily done at home by the farmer's wife, and all who are conveniently situated should by all means put up enough fruit to supply their own family abundantly during the winter. Good sauce is quite a luxury, and is also quite health-giving in its effect on the human system, and oftentimes wards off disease by aiding in digestion, and in this way is not only valuable for what nourishment it contains in itself, but also acts as an appetizer, and by its steady use the other food is better assimilated.

It is much better for the farmer to put up what canned fruit he needs, and he will then know just what he has got, and feel better in using it than when he has to buy it from the factory. Of course the farmer should not expect to compete with the factories, and try to market his canned goods, unless it is done on a very extensive scale, but it is only a simple matter to put up what is needed of the different fruits and vegetables for family consumption. And when this is done, the farmer will have the advantage of selecting the fruit when it is in its best condition for canning, which is not always the case with factory goods. Besides this, when they are put up at home the best varieties can be selected, and absolute cleanliness assured.

Preserves are desirable to have as a change, and it is best to fix up a certain amount of this variety of sauce, but the simple process of canning is much easier and cheaper, and the fruit can then be used little at a time, as is desired, for table use.

There should be a supply of dried fruit also prepared for winter use, as it is very easy to accomplish and quite desirable to have, as a change, later in the season. Evaporated fruit is, however, far superior to dried fruit, and should not be classed with it by any means. The process by which it is obtained is altogether different, and like most other articles of superior value or quality, it requires more trouble and expense to secure it.

During the first process of evaporation intense heat is used, which will affect the outer surface of the fruit only, and will form an impenetrable coating, thus retaining the perfect flavor and other desirable qualities of the fruits. There are a great many different patterns and styles of evaporators that do good work, but the principal trouble is that they are quite expensive, and can only be used to profit where the business is done on a large scale, and as yet they are not cheap enough for family use.

Nearly all kinds of fruit, and many vegetables, can be evaporated to good advantage, and the field of operation is considerably more extensive than that compassed by the drying method. All the evaporation process does is to draw out the surplus moisture, and when the fruit is used on the table this moisture can be easily restored, and thus the consumer has a welcome substitute for the genuine article when it can not be obtained, and it often is very hard to tell the difference between them.—*Western Plowman.*

SCIENCE IN FARMING.

Why Agriculturists Have No Reason for Rashly Condemning It.

"Science be hanged! Book-farming be blowed!" Not a few farmers have growled it out thus pithily: "Science is no good to me." This complaint has been more loudly uttered in England than here, although something of this sort was shot off recently in the Connecticut Legislature. The cause of this vituperation is that science has failed to remedy all the farmer's woes. Why should it? According to the medical science certain remedies will cure certain diseases. Yet men die all the same of those very maladies. Whose is the fault if science has not accomplished more than it has, or all that it might? It takes two for scientific farming, the man whose researches discover the laws of nature, and the man who experimentally applies this knowledge. As science does not reach perfection in this world, its application will reveal defects. It depends upon the practical farmer's cooperation to discover these defects, and how to improve matters. The trouble has been that the scientist and the farmers were not in harmony. Jealousy and self-conceit have raised many a barrier. It is time this was changed. Agriculture has already reaped enormous benefits, often involuntary, from science. Science will not cure competition, indeed, it tends to promote it, but it will aid to getting greater results with less labor, and farmers will be wise not to ignore or discard it till they have thoroughly tested its suggestions and found them worthless.—*Our Country Home.*

—A recent writer on China puts the population of the Empire at 450,000,-000.

REVOLTING CRUELTY.

An Educated Russian Woman's Story of Privation and Suffering.

Mme. C——, nee Koutouzoff, was found guilty of opening a school for peasant's children, independent of the Ministry of Public Instruction. As her crime was not penal, and as, moreover, she was married to a foreigner, General Gourko merely ordered her to be sent over the frontier. This is how she describes her journey from St. Petersburg to Prussia. I shall give extracts from her narrative without comment, merely premising that its accuracy even to the minutest detail, is absolutely unimpeachable.

"I was sent to Wilno with fifty prisoners—men and women. From the railway station we were taken to the town prison and kept there for two hours, late at night, in an open yard under a drenching rain. At last we were pushed into a dark corridor and counted. After many oaths and much foul language the fire was lighted, and I found myself in a spacious room in which it was impossible to take a step in any direction without treading on the women who were sleeping on the floor. Two women who occupied a bed took pity on me and invited me to share it with them.

"When I awoke next morning I was suffering from the scenes of yesterday, but the female prisoners—assassins and thieves—were so kind to me that by and by I grew calm. Next night we were 'turned out' from the prison and paraded in the yard for a start, under a heavy rain. I do not know how I happened to escape the fists of the jailers, as the prisoners did not understand the evolutions, and performed them under a storm of blows and curses, those who protested—saying that they ought not to be beaten—were put in irons and sent to the train, in the teeth of the law, which says that in the cellular wagons no prisoner shall be chained. Arrived at Kovno, we spent the whole day in going from one police station to another. In the evening we were taken to the prison for women. Here I spent a week among murderesses, thieves and women arrested by mistake. Misfortune unites the unfortunate, and every body tried to make life more tolerable for the rest; all were very kind to me and did their best to console me. On the previous day I had eaten nothing, for the day the prisoners are brought to the prison they receive no food; so I fainted from hunger, and the prisoners gave me of their bread and were as kind as they could be. The female inspector, however, was on duty. She was shouting out such shameless oaths as few drunken men would use.

"After a week's stay in Kovno I was sent on foot to the next town. After three day's march we came to Mariampol; my feet were wounded and my stockings full of blood. The soldiers advised me to ask for a car, but I preferred physical suffering to the continuous cursing and foul language of the chiefs. All the same, they took me before their commander, and he remarked that I had walked three days and so could walk a fourth. We came next day to Wolkowsk, whence we were to be sent on to Prussia. I and five others were put provisionally in the depot. The women's department was in ruins, so we were taken to the men's.

"I did not know what to do, as there was no place to sit down, except upon the dreadfully filthy floor. There was even no straw, and the stench on the floor set me vomiting instantly. Here I spent two days and two nights, passing the whole time at the window. On the third day a soldier of the depot, a Jew, took me into his room, a tiny cell, where I staid with his wife.

"The prisoners told me that many of them were detained 'by mistake' for seven or eight months awaiting their papers before being sent across the frontier. It is easy to imagine their condition after a seven months' stay in this sewer without a change of linen. They advised me to give the jailer money, as he would then send me on to Prussia immediately. But I had been six weeks on the way already and my letter had not reached my people. At last the soldier allowed me to go to the post-office with his wife, and I sent a registered letter to St. Petersburg." Mme. C—— has influential kinsfolk in the capital, and in a few days the Governor-General telegraphed for her to be sent on instantly to Prussia. "My papers (she says) were discovered immediately, and I was sent to Eydtkunen and set at liberty." It must be owned that the picture is horrible. But it is not a whit overcharged. To such of us Russians as have had to do with prisons every word rings true and every scene looks normal. Oaths, filth, brutality, bribery, blows, hunger—these are the essentials of every ostrog and of every depot from Kovno to Kamchatka and from Archangel to Erzerum.—*Krapotkine's Russian and French Press.*

—Experiments are in progress in Russia, under the direction of the Government, with the view of finding a process of solidifying the petroleums used as fuel. The process so far employed consists in heating the oil, and afterwards adding from one to three per cent. of soap. The latter dissolves in the oil, and the liquid upon cooling forms a mass having the appearance of cement, and the hardness of compact tallow. It is hard to light, burns slowly and without smoke, but develops much heat, and leaves about two per cent. of a hard black residuum.—*N. Y. Examiner.*

—Most farmers can keep a few hives of bees to advantage. Honey, like fruit, should be often found on the farmer's table.

RURAL REALITIES

As Guy Carleton Found Them too Near New York.

It is now the golden time when the thoughtful man says unto himself, lo, it is hotter than beeswax in town, and I will arise and flee as a bird to the mountains; I will lay me down, languid with a midsummer night's dream, by the bank of the laughing waters, under the trees beloved by the slow stirring wind; I will view the coming of the chariot of day through the gates of pearl garlanded with roses; I will listen to the choir of happy birds, the drone of the wandering bee, the pipe of the nestlings under the eaves, the fiddle of the locust and the deep throated

boom of the bullfrog in his sedgy lair; I will watch the storm king build his towers and walls and battlements on high, hurling cloud against cloud and thunderbolt against thunderbolt till his wrath is appeased, and then to me shall be blown the sweetness and the coolness of wet fields, and through the long and languorous purple hour shall come twilight and the peace of him who liveth well; and under the solemn dome of dusk, under the young eyes of the stars, under the broad sheen of the rising moon shall I float down the river of rest to an infinite calm.

This is the city man's dream of a country heaven, but I have not found it.

I found the trees beloved by the slow stirring wind, but I found, too, that a large colony of painful ants had got there before me and was disposed to quarrel with intruders. I have watched the coming of the chariot of day through the gates of pearl, and I noticed the thermometer throw one leg over the eightieth rung, and then reach up and pull himself up to the ninetieth before the chariot had got fairly going. I have learned to love the drone of the wandering bee at immense distances, having discovered that that pampered insect considers it quite a joke to poniard a slumbering stranger without provocation.

I have seen an abundance of fresh vegetables in rural districts and miles of orchard bending under the wealth of pippin and cherry, but the frugal and far seeing farmer had mortgaged the entire lot, and the stranger had to content himself with a snuffle for yellow peas just picked from a Baltimore can.

These things have made me sad. It seems to me the honest granger should have nobler aspirations than to paint his house yellow, his barn blue and his well box green, insert a four line advertisement in the Sunday papers and steer unsuspecting citizens against his corned beef and malaria in the guise of health and economy. It seems to me somewhat unreasonable for a man to seek so far and fare so badly when he could just as well enjoy his flies and skimmed milk, his insomnia and profanity without leaving the city.

But the fact is every man bred in a city considers himself swindled unless he has two weeks of summer on a farm, just as the farmer thinks life not worth living without an annual tour through the joys of the Bowery in winter. It is an outbreak of inward grossedness, like the hives, and every man gets it. The whole pharmacopœia can furnish no remedy, and the only relief is to go and pursue the wayward fancy and come home full of sunburn, colic and repentance.

Go to the country, you toilers seeking for rest, but let it be country indeed, with no mingling of town. Seek your balm from sky and field, from sea and hill, from leaf and blossom and bird, and you will get it for the asking. Let the sun brown the cheek and hands of your daughters. Let your boys scurry through the tangle of woods, wild as the chipmunk they chase. Get as far as steam can carry you from the city and its worry, from the crowd and its tiresome spery; be a child of nature, a worshiper of haziness and sunshine—there is the sovereign healing you seek, and you will seek it in the gatherings of fashion in vain.—N. Y. World.

Very Sociable.

"The people of New York are not very sociable, are they?" said a western man, addressing an acquaintance who lived in the east.

"Well, I don't know but they are, although they may be a little peculiar in that respect. For several years I had my office in a very large building on Broadway. One day a fellow came in and asked if my name was J. W. McFiddleton. I told him it was, and then, after a few moments' silence, he said: 'My office is just across the hall, and ever since I saw your sign several years ago I have been intending to drop in and see you. I am your brother, you know, and—well, how are you getting along, anyway?' Yes," continued the eastern man, "they are a trifle peculiar, but after you get in with them you find them very sociable."—Arkansaw Traveler.

Goodby, Goosy.

"Little do you know how we bartenders are imposed upon. Woe is our lot. Today a six footer entered our saloon and called for brandy. He imbibed a large quaff.

" 'Has Goosy been in?' he asked.

" 'Whose Goosy?' said I.

" 'Goosy walks like this.'

"The six-footer drooped on his haunches, spread his legs apart like a painfully bandy-legged being and waddled towards the door. Suddenly straightening himself out, he howled at me 'Goodby, Goosy,' and fled a mile up the street before I found time to run from behind the bar."—Philadelphia News.

Dangers of Education.

Hotel Guest—I don't believe in this modern custom of tipping. I want you to understand that.

Waiter—I's been to school, sah, an' I happen to know there ain't nothin' modern about it, sah. The custom is as old as civilization, sah.

"Oh, come now."

"Fac', sah. I learned in history, sah, that one time a rich man like you named Caligula went somewhere to supper an' it cost him $400,000 before he got through, sah. By the way, sah, all the things you ordered is out, sah."—Omaha World.

In Need of a Prefix.

"Hello, old boy! Heard you're going to be married—and a fine girl, too, eh?"

"Well, yes, she has a very comely figure."

"Oh, but that's aside from the question. How about the incomely figure?"—Detroit Free Press.

Signs of Summer Flights.

First Beer Garden Waiter—Mrs. De Goode is off for the summer again.

Second Waiter—How do you know anything about that fine lady's movements?

"Mr. De Goode has just come in."—Omaha World.

UNRIVALED SCENERY.

Indescribable Grandeur of the Grand Canyon of the Arkansas and the Plains.

The Grand Canyon of the Arkansas excels in majesty any scene which it has yet been our privilege to look upon. How many ages or centuries or thousands of years the remorseless river was engaged in cutting its way through these everlasting mountains is a matter of conjecture. The channel of the river (at this point not a large one) pursues a tortuous way for many miles between the lofty rocks, which its ceaseless gnawings have severed. The solid walls, rising sometimes almost perpendicularly to the height of eleven hundred feet, the winding course of the canyon apparently closing us in a doorless prison, the skylight seeking to penetrate the depths of the abyss, and a splashing rain, all added to the beauty, the grandeur, the terror, the excitement, and the pleasure of the occasion. Our good engine, with remarkable ease and speed, climbing up the grade on the background of the enormous rocks, looked like a speck, a dot, a child's plaything. "The Royal Gorge," as it is called, is the culmination of the canyon. Here is scarcely room for the river alone, but man's ingenuity has overcome nature's obstructions, and a well-used thoroughfare is the result. Emerging from the canyon the road follows the Arkansas river to Salida. On our left are the snow-covered peaks of Sangre de Cristo, Spanish name meaning the "Blood of Christ." Here we leave the river and begin to climb and scale the heights of Marshall Pass over the great continental divide.

We wind along the mountain sides rising higher and higher. Our train is divided into two sections. Looking upward we see now a line of earth which marks the course of the road; now the first section of our train appears, leading us half a mile. Looking downward we see the course we have come; now one, now two, now three sections of the road appear at once, tier above tier. Looking outward we see the great slopes of the majestic mountains and the recesses of the valleys. The Rockies seem to open the doors of their secret chambers and to reveal to us their hidden beauties. At length, on the very summit, in a long snow-shed, through many of which we have passed, our panting, puffing engine, like a tired and overburdened animal, stops in its course, as if to gather strength for the struggle before it in carrying its load down on the other side. We are 10,878 feet (more than two miles) above the level of the sea.

The descent, with the loops of the road bending back and forth, and with somewhat milder scenery, is the reverse of the ascent. The train rolls on, and now darkness comes upon us. Our road lay through a gorge described as "grander, deeper, darker, and yet more beautiful than we had so recently passed through." It is called the black canyon. Sitting or standing upon the back platform of our car we were quite able to see the majestic outlines of this great gorge. Waterfalls, the swiftly-flowing river, the lofty and precipitous rocks reaching out their arms as if to crush us in their embrace, the Currecanti Needle—an abrupt and isolated pinnacle, symmetrical and graceful—are all discernible in the darkness, which lends to each a charm of its own. The morning light finds us on the great plains.

An awful, a terrible desert. Its desolation is simply indescribable. It extends for more than one hundred miles between the Grand and the Green rivers, and while dreary and somewhat monotonous, is by no means uninteresting. On the right and left are arid wastes of land, bearing here and there the scantiest possible growth of worthless weeds. The hills in color and in their wrinkled surface remind one of the hides of some gigantic elephant. The buttes, with thin, level tops, precipitous faces and barren appearance, rise continually on either side. In the Green river valley irrigation has begun to change the barrenness into fruitfulness. Onward we speed up the ascent of the Wasatch range, through Castle Gate, whose warders are the great rocks which stand at its entrance, up the Price river canyon, down which Sydney Johnston marched his army home from Utah after he had established the authority of our Government over the Mormon rebels.—*Cor. Chicago Times.*

CHEAPER FENCING.

An Important Question That Is Rapidly Growing in Interest.

The question of fencing has long been important to land owners, and it is rapidly growing in interest. The materials formerly used for this purpose are steadily becoming scarcer and dearer. Stone, rail, boards, and live fences were well in their day, but so were the scythe, sickle and flail, before the advent of mowing, reaping and threshing machines. The use of these valuable machines did not extend more rapidly than has metalic fencing. I subjoin the following extracts by prominent authors: "A farm of 160 acres, as fenced on many old farms, has 20 acres of land taken up in this worse than useless manner." "A hedge covers a great deal of ground and shades still more. It is not a cheap and durable fence." "Hedges occupy in many districts in England one-fifth of the soil." "The hedge destroys the value of the land for several feet on each side, by the exhausting of the roots. The necessary training is expensive and troublesome, and without it the hedge is valueless."

In 1872 the use of iron and steel fencing was unknown in this country, save for parks and lawns; plain wire had been used to some extent, but with unsatisfactory results. In 1873 the manufacture of wire with barbs attached began, and such was the popular demand for it that its consumption more than doubled each year, reaching over 80,000 tons in 1881. Many of the great railroads prefer to fence their tracks with metallic fencing. The United States Commissioners of Indian Affairs purchased barbed wire for several Indian tribes in 1883, and again in 1884. Nine years ago the statistics gathered at Washington show that the fences then in existence cost $1,744,-549,931. The additions since then must have raised the cost of the fencing of the country to fully $2,000,000,-000. The interest and repairs amount to over $2,000,000 a year, and rebuilding of decaying fences costs nearly as much more, making our fence tax far more than the cost of the army, navy, the general Government expenses and pensions, together with interest on the public debt.

With such figures is it not time to look about us for a cheaper and more durable fence? The question arises whether metalic fences remedy this evil to a great extent. There is occasionally an accident from the use of barbed wire fences. This danger may be remedied in a great measure by the style of putting them up. For a barbed wire fence, a ridge should be thrown up, leaving a ditch on each side. A field thus prepared with a ridge and ditch will require one less wire, which will cover the cost of making the ridge and ditching and prevent many accidents, as the attention of horses is arrested by a ditch. Four wires, with a good ridge, make a very efficient fence, and one comparatively harmless. Metalic posts are being used quite extensively with satisfactory results. Some assert that they are a protection to stock from electricity, the wires attracting and conducting the fluid to the posts and into the ground, as they are set two feet in the earth, reaching the moisture. At any rate the subject is worthy of thought.—*Cor. Ohio Farmer.*

WEBSTER AND POLK.

The Liberality of the Former and Picayunishness of the Latter.

In conversation a few days since with an old resident of Washington, who was proprietor of a large custom and ready-made clothing establishment on Pennsylvania avenue when James K. Polk was President, he said of all the great men of that time whom he knew or had business transactions with, Polk was the most picayunish, and Webster the largest-hearted. One day Webster came in to select cloth for a dress suit. Almost always beggars, mostly women beggars, watched him as he went in and out of his favorite resorts on the avenue, and approaching him with pitiful tales, never failed to get money, if he had it. This time he had hardly got inside the door when in came a poor old woman, and with tears trickling down her wrinkled cheeks supplicated for alms. Webster was more out of humor than was his wont, and cramming his big hands down into his small pants pockets and brought out a piece of money and said: "Here, take this and be off with you, or I'll have you arrested! It's all I have got for you." After selecting the cloth for his suit he put his hand in his pocket to make the accustomed advance payment. Turning the pocket inside out and looking at it, he said: "If I didn't give that woman a ten-dollar gold piece! Well, it's all the same! It'll do her more good than I could have got out of it. Charge the whole amount!" He rarely asken the price of any thing, and never intimated that it was exorbitant, as Polk always did. Of course, knowing his weakness in this direction, many tradespeople imposed upon him.—*Minneapolis Tribune.*

Early Information.

"I knew we were to have steak this morning," observed Dumley at the breakfast table.

"Did you?" responded the landlady, with a pleasant second-floor-front smile, "and how did you know it, Mr. Dumley?"

"I heard the cook pounding it."—*N. Y. Sun.*

—Ohio's wool crop, according to a recent report, was 25,000,000 pounds for the year 1886.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY SEPTEMBER 24 .....1887.

IRRIGATION BONDS.

Now that the Board of Directors of the Irrigation District have organized it may not be amiss to give a little consideration to what comes next. In the Act providing for the formation of irrigation districts Section 15 reads as follows:

SEC. 15—For the purpose of constructing necessary irrigating canals and works and acquiring the necessary property and rights therefor, and otherwise carrying out the provisions of this Act, the Board of Directors of any such district must, as soon after such district is organized as may be practicable, estimate and determine the amount of money necessary to be raised, and shall immediately thereupon call a special election, at which shall be submitted to the electors of such district possessing the qualifications prescribed in this Act, the question whether or not the bonds of said district shall be issued in the amount so determined.

The Section goes on to provide for the means of holding such special election. The law does not say in so many words that the amount of money to be raised by the first issue of the bonds shall be enough to complete all the necessary irrigating canals and works and acquiring the necessary property and rights therefor for the entire district. But it must be reasonably clear that such is the intent of the law; because if a less amount than enough for the whole were issued then a part of the necessary canals and works might be constructed in a short time and a part of the land owners would get use of the water and profit accordingly, while other land owners might be kept a long time; years perhaps, without water; and yet these would be taxed the same as the others from the beginning. It is not to be supposed that such an injustice as this would be was intended when the law was enacted. Now in order for the Directors to know just what amount of bonds should be issued, and for the voters to vote intelligently thereon, it will be necessary to have a working survey made by a competent engineer, and also careful estimates of the cost of the "necessary canals and works." To do this will cost several hundred dollars and without it the work of the Directors would only be a blind guess. But the Directors have no money at their disdosal for this purpose. Perhaps the end might be reached by the landowners in the district agreeing to make a pro rata contribution for the purpose of employing an engineer to make the necessary surveys and estimates. Everyone interested should give the matter serious consideration; no doubt the Directors will give respectful attention to every reasonable suggestion on the subject.

San Bernardino Interested

Our neighbors on the south are much interested in the extension of the C. & C. R. R. The San Bernardino *Index* says:—Should the Carson and Colorado railroad be extended south from Keeler, Inyo county, to tap Southern California, the road will not connect with the Southern Pacific at Mojave, but will connect with the A. & P. railroad at Barstow. The reason for this conclusion is that running south from Keeler by the way of Hayway meadows and Coyote holes, the route to reach Mojave, the road would have to pass through a barren and unproductive country. While on the other hand should the Carson and Colorado people conclude to build the road south from its present terminus they will undoubtedly run it through from Keeler to Darwin, thence through the Panamint mining district on to the immense borax and soda deposits of W. T. Coleman & Co., in Death Valley. Between the latter place and Barstow the road would skirt the rich mining districts in the northern part of San Bernardino county and southern Inyo, and thereby this route secure a local trade the entire length of the road. The distance would be about the same from Keeler to Barstow as from Keeler to Mojave, and it is the opinion of those who know both routes that Yerington, Mills and the other parties interested in the Carson and Colorado railroad will push the road through to Barstow. The people of San Bernardino valley should be alive to the issue and make a move in the matter in directing the attention of the company to the importance of connecting with the California Southern road at Barstow.

Ranch for Sale.

At Black Rock, twelve miles north from Independence, 520 acres of land for sale. Black Rock is one of the very best parts of Owens Valley. Four hundred acres of this land is held under U. S. patent; the remainder is located under the timber culture Act. One hundred and eighty acres are enclosed by a fence of cedar posts and barb wire. Sixty acres are now under cultivation, mostly wheat, oats and barley. A large amount of hay can be cut; blue joint, red clover etc. Several large springs of pure water on the place and good water rights additional. House, outbuildings and corrals. C. & C. railroad half mile distant from east line of land. Owens river eighty rods distant. This is a fine place for an energetic man to improve and will be sold at a bargain. Apply to

C. MULHOLLAND,

YOU can Live at home and make more money at work for us, than at anything else in this world. Capital not needed; you are started free. Both sexes; all ages. Any one can do the work. Large earnings sure from the first start. Costly outfit and terms free. Better not delay. Costs you nothing to send us your address and find out if you are wise you will do so at once. H. HALLETT & Co., Portland, Maine.

WONDERS OF THE DEEP.

CORAL SHELLS, and other MARINE CURIOSITIES. We have agents constantly employed in securing rare specimens of the above-named articles, and offer to the public as fine a collection for ONE DOLLAR as they can procure at any regular shell store for double the amount. OUR DOLLAR CABINET, containing over TWENTY VARIETIES of Shells, Coral, etc., will please both old and young. Carefully packed, and mailed postpaid to any address in the United States or Canada, on receipt of ONE DOLLAR. Address:

MARINE CURIOSITY SUPPLY CO.,
(Box 15) KEY WEST, FLORIDA.

INTENDING ADVERTISERS should address

NOTICE.

AGRICULTURAL DISTRICT NUMBER 18.

Notice is hereby given that all parties are invited to send for exhibition at the Fair of Agricultural District No. 18, of California, all kinds of manufactured articles of American production; all products of the soil; mineral products; objects of a curious nature, or such as are of interest to science; collections of native insects; fossils, rare books, or other printed matter or manuscripts. The Directors desire to make an interesting display and will welcome everything that will be likely to instruct or entertain the public. Full guarantee will be given for the safe return to the consignor of any article sent for exhibition at the Fair, which will begin at Independence October 4th and continue through the week. Anything consigned for exhibition should reach Independence not later than Saturday, October 1st and should be addressed to the Secretery.

C. MULHOLLAND,
Secretary Agricultural Dist. No. 18.

FINAL PRE-EMPTION PROOF.

D. S. No. 1109.

LAND OFFICE AT INDEPENDENCE, CAL.,
August 6, 1887.

NOTICE IS HEREBY GIVEN THAT THE following-named settler has filed notice of his intention to make final proof in support of his claim, and that said proof will be made before the Register and Receiver at Independence on September 27, 1887, viz: August Stecker, for the W ½ of S E ¼ and W ½ of N E ¼, Sec 22 Twp 13 S, R 35 E, M D. M.

He names the following witnesses to prove his continuous residence upon, and cultivation of said claim, viz: John C. Irwin, John A. Lank, Arthur Tanner and Alexander Clark, all Inyo county, Cal.

JOHN W. P. LAIRD,
o m14 Register.

FOR SALE.

A ranch of 320 acres, within three miles of Independence, the County Seat; nearly all enclosed by a three-strand barbed wire fence, and subdivided; a small dwelling house and a number of outbuildings; 10 acres set out to fruit trees, a portion of which are bearing, consisting of choice varieties of Apples, Pears, Apricots, Plums, Prunes, Nectarines, Cherries and Quinces, also, about two-thirds of an acre of bearing grape vines. Nursery stock enough on hand to set out from 10 to 15 acres of orchard. Received six first premiums on Apples, Pears, Plums, Prunes and Grapes, exhibited at the Eastern Slope Agricultural Fair, held in Sept., 1886. For price and terms apply to

J. W. SYMUES.
On the Ranch.

Independence, May 7, 1887.

AGENTS WANTED for the MISSOURI STEAM Washer

Active honest persons all over the country, with or without team.

JOHN C. EVANS, SHORTLAND, Mo., writes: "I stood up and sworn that a Washer saves more hard labor and money in a day than any Reaper and Mower that ever was put on any farm with one team can save in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house, if I had to take the feathers from under their wife and babies to pay for it."

JOHN R. DOUGE, JR., jeweler, Nonnat, Ill., writes: "You ask what I think of the Washer I bought last summer. 1st it is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $100."

I will ship a sample to thos desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

J. WORTH, 1716 Franklin Ave., St. Louis, Mo.

TAKE SIMMONS LIVER REGULATOR

For all Diseases of the

Liver, Kidneys, Stomach and Spleen.

This purely vegetable preparation, now so celebrated as a Family Medicine, originated in the South in 1828. It acts gently on the Bowels and Kidneys and corrects the action of the Liver, and is, therefore, the best preparatory medicine, whatever the sickness may prove to be. In all common diseases it will, unassisted by any other medicine, effect a speedy cure.

The Regulator is safe to administer in any condition of the system, and under no circumstances can it do harm. It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance; will promote digestion, dissipate headache, and generally tone up the system. The dose is small, not unpleasant, and its virtues undoubted.

No loss of time, no interruption or stoppage of business while taking the Regulator.

Children complaining of Colic, Headache, or Sick Stomach, a teaspoonful or more will give relief.

If taken occasionally by patients exposed to MALARIA, will expel the poison and protect them from attack.

A PHYSICIAN'S OPINION.

I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system. L. M. HINTON, M. D., Washington, Ark.

SEE THAT YOU GET THE GENUINE.

PREPARED BY

J. H. Zeilin & Co., Philadelphia, Pa.

FIRST ANNUAL FAIR OF Agricultural District No. 18. STATE OF CALIFORNIA.

Composed Of the Counties of

ALPINE, MONO & INYO.

TO BE HELD AT

Independence,

Commencing Monday, October 10th, and Continuing Five Days.

A. R. CONKLIN.....*President.*
C. MULHOLLAND.....*Secretary.*
O. I. MAIRS.....*Treasurer.*

BOARD OF DIRECTORS:

A. R. CONKLIN,	NATHAN RHINE,
WM. WALKER,	W. S. ENOS,
W. K. MILLER,	HARVEY BOONE,
T. J. GOODALE,	JOHN SHEPHERD.

FIRST DAY—Tuesday.

First Department.

In this department the same animal shall not be entered more than once, except in sweepstakes or as a junior member of a family exhibited with its sire or dam. Any stallion, mare, gelding or colt competing in a race will not be excluded from competing for premiums in their respective classes.

CLASS I.
THOROUGHBRED HORSES.

Best stallion, 3 years old and upward.....$20 00

CLASS II.
GRADED HORSES.

In this class none shall be awarded premiums but such as furnish proof of a cross, either of sire or dam with a thoroughbred

Best stallion, 3 years old and upward	$15 00
Best stallion 1 year old	10 00
Best mare, 3 years old and upward	10 00
Best mare, 2 years old	5 00
Best mare, 1 year old	5 00

CLASS III.
HORSES OF ALL WORK.

Best stallion, 3 years old and upward	$20 00
Best stallion, 1 year old	5 00
Best mare, 3 years old and upward	15 00
Best mare, 2 years old	7 50
Best mare, 1 year old	5 00
Best stallion and family, not less than three	20 00

CLASS IV.
TEAMS.

Best matched team	$15 00
Best single gelding, 3 years old and upward	7 50

CLASS V.
DRAFT HORSES.

Best stallion, 3 years old and upward	$15 00
Best matched team	15 00
Best single gelding	7 50

CLASS V.
SWEEPSTAKES.

Best stallion, any breed or age, Association Silver Cup, Engraved.
Best mare, any breed or age, Association Silver Cup, Engraved.

SECOND DAY—Wednesday.

CLASS VII.
JACKS.

Best Jack, 2 years old and upward	$7 50
Best Jennet, 2 years old and upward	2 50
Best Jack and family, not less than three	10 00

CLASS VIII.
MULES.

Best span owned by one person.....$10 00

CLASS IX.
CATTLE—BULLS.

Best bull, 1 year old and upward	$5 00
Second best bull, 1 year old and upward	5 00
Best bull calf	10 00

CLASS X.
COWS.

Best cow, 3 years old and upward	$10 00
Best cow, 2 years Old	5 00
Best heifer calf	5 00

CLASS XI.
SHEEP.

Best ram, 2 years old and upward	$5 00
Best lot of ewes, not less than five	5 00
Best lot of ewe lambs, not less than five	2 50

CLASS XII
GOATS.

Best lot of goats, not less than three.....$5 00

CLASS XIII.
SWINE

Best boar, 2 years old and upward	$2 50
Best boar under 2 years old	2 00
Best sow, 2 years old and upward	2 50
Best sow, 1 year old and under	2 50
Best pen of 5 pigs, any age or breed	2 50

CLASS XIV.
POULTRY ETC.

Best pair of fowls, any age or breed	$2 00
Best hen and brood of chicks	2 00
Best pair of bronze turkeys	2 00

THIRD DAY—Thursday.

Second Department.

CLASS I
AGRICULTURAL PRODUCTS.

All products exhibited in this Department must have been produced in Nevada, or in California east of the Sierra Nevada mountains, and by the exhibitor

Best 100 pounds of flour	$5 00
Best 100 pounds of wheat, any variety	3 00
Best 100 pounds of barley	3 00
Best 100 pounds of oats	3 00
Best 100 pounds of corn	2 00
Best 50 pounds of alfalfa seed	2 50
Best bale of timothy hay	2 50
Best bale of alfalfa hay	2 50

CLASS II.
VEGETABLES, ROOTS, ETC.

Best 10 pounds of sweet potatoes	$1 00
50 pounds Early Rose potatoes	1 00
100 pounds any variety of potatoes	2 00
12 parsnips	1 00
12 carrots	1 00
12 pounds turnips	1 00
12 beets	1 00
10 pounds tomatoes, any variety	1 00
½ doz. cabbage	1 00
50 pounds any variety of onions	1 00
½ doz. squash	1 00
pumpkin	1 00
sample of red peppers	1 00
½ doz. watermelons	1 00
¼ doz. cucumbers	1 00
¼ doz. cantaloupes	1 00
10 pounds of white beans	1 00
10 pounds of pink beans	1 00
10 pounds garden peas	1 00

CLASS III.
DAIRY AND FARM PRODUCE.

Best 10 pounds of butter in rolls	$2 50
for of butter, 20 pounds, 3 months old	2 50
10 pounds of cheese	2 00
10 pounds of lard	2 00
display of honey	Silver Pitcher
Apiary display	5 00
variety of fruit in jars	2 00
variety of jellies	Silver Butter Knife
variety of preserves	Set of Teaspoons
variety of pickles	Pickle Jar
Sample of hams and bacon, each	5 00

FOURTH DAY—Friday.

Third Department.

CLASS I.
HORTICULTURAL PRODUCTS.

Best ½ doz varieties apples	Glass Water Set
3 varieties apples	Fruit Knife
display pears	$2 50
peaches	2 50
plums	2 50
quinces	Sugar Tongs
grapes, four varieties	2 00

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, SEPTEMBER 24 1887

DIED.

HUGHES—At Lone Pine, September 17, 1887, John Robeson Hughes, aged 63 years.

Doctor Long has left Lone Pine, and is located at Visalia.

Mr. A. R. Conklin got back from Los Angeles on Wednesday.

Mr. and Mrs. Eibeshutz got back from San Francisco at the end of last week.

Gus. Stecker who was laid up several weeks by a hurt on his leg, is able to be about again.

There is a booming new mining camp in White Pine county, Nevada. The place is called Seligman.

Mr. T. C. Boland came up from Keeler Thursday morning and remained in town till last evening.

Thomas Crough came in from Darwin last Tuesday; he is unwell and will stay in town a few weeks.

Mr. C. Latta, of Carson has located some land near Independence; he left here for his home at Carson last Tuesday morning.

The attendance at the funeral of the late John R. Hughes was very large. Parties drove in carriages over sixty miles to attend.

Mr. R. L. Peeler has got a position in a bank at Fresno City. Mrs. Peeler will leave Independence in a few days to join her husband.

Mr. T. J. Goodale, of Fish Spring, was in town last Tuesday, attending a meeting of the Board of Fair Directors of which he is a member.

The fair ball will be given in the new pavilion. This will be the first time in the history of Independence that we had a suitable hall for such a purpose.

Four more horses were taken down to Owens Lake a few days ago to be put to work in the soda vats. Seven acres of new vats will be made this fall.

Mrs. Prairie left town on Thursday morning to return to her home in Canada. She had been at Independence some weeks on a visit to her brother, H. P. Cartier.

Judging by the loud and frequent applause, Mr. Frank Miranda must have made a fine address in the Spanish language at the celebration at Lone Pine last week.

Ledlie Harris Miller, son of Mr. and Mrs. J. M. Miller, of Mono Lake, died at Carson on the 15th inst. of intermittent fever. The young man was aged eighteen years.

Among other articles of marble that will be exhibited from the Swansea quarry is an oval table top of moss-agate marble. This is a beautiful piece of furniture; perhaps there is not another like it in the world.

Miss Naylor, who had been acting as telegraph operator at Lone Pine Station for some weeks, returned home last Saturday morning. Mrs. Scott, the regular operator having returned from a vacation. Miss Naylor is a very proficient operator.

Senator John P. Jones of Nevada, and others are investing large sums of money in improvements at Santa Monica. A 14 inch pipe is being laid to supply the town with water. The present population of the place is between 3,000 and 4,000.

Many years ago Mr. Hughes and Martin Mee were partners in business. For several weeks before the death of Mr. Hughes, Mr. Mee never left the bedside of his old friend, except to take food or snatch brief sleep when quite worn out.

Last Wednesday night the valley was treated to a display of lightning and thunder. There was enough commotion to remind one of Eastern thunder storms. Rain poured heavily for some hours. The roads are much improved by the rain.

Mr. H. L. Clark, returned from his trip to Visalia last Saturday. He met there Mr. W. Russell, brother to Mrs. Clark, and Mr. Ogburn, her uncle, and these gentlemen came with him to Independence. Mr. Russell will return to Yolo county a few weeks hence; it is the intention of Mr. Ogburn to stay in Owens valley.

On Wednesday of last week a young man named Daniel Busby shot and killed G. W. Cahoon near Three Rivers, Tulare county. No other person was near at the time of the shooting. Busby delivered himself into custody and said that he had shot in self defence, as Cahoon had advanced upon him with a double barreled shot gun.

The premium list for the Fair will be extensively altered, particularly where it applies to ladies' work. For all articles of needle work, fine art, displays of preserved fruits, and such other products as ladies make and exhibit, the premiums will be much increased. The revised list will be published next week. There will also be several changes of premiums for horses and cattle, some new classes being added to the present list.

Hon. J. F. Hallock left Independence last Saturday morning for his home at Carson. Mr. Hallock was more than well satisfied with Owens valley; he was pleased to say that all that had been told in favor of the country had been more than verified by what he had seen. He invested in land near Independence, and is more than likely to return and make his home here when his term of office as Controller of Nevada shall end.

The Directors of Irrigation No. 1, of Inyo county, having all filed the necessary bonds, and the same being approved, met for the first time at Independence last Thursday. The members of the Board are A. C. Harvey, W. L. Hunter, H. L. Clark, S. A. Densmore and C. B. Rawson. Mr. Hunter was chosen Chairman. A good deal of consideration was given to several important matters but no definite action was taken and the Board adjourned until next Tuesday.

The celebration of Mexican Independence at Lone Pine last Friday was one of the most successful ever held there. The attendance of the Independence brass band was an agreeable feature of the occasion, and the boys excelled their usual performance. Soon after supper, and when the company were in the high of their enjoyment, word was brought that John R. Hughes was dying, and as a mark of respect dancing at once ended and the company dispersed. This was the only drawback to an otherwise very agreeable meeting.

Darwin Notes.

The anniversary of Mexican Independence was duly celebrated at Darwin. This year there were over three times as many ladies in the town as at the same period last year. The ball was a fine affair; good music, and as men came from every mining camp for miles around, there were three gentlemen to each lady. This only seemed to add to the enjoyment of both sexes, however. At midnight a fine supper was served at the restaurant of Mrs. Buelna; after which dancing was resumed and kept up till near morning. The usual salutes were fired at midnight preceeding; and at sunrise and sunset on the 16th. On the afternoon of the 16th a large procession was formed and paraded up and down Main Street. The Spanish people did all in their power to make the affair a success; and particularly to make it pleasant for all others who attended. This was the most successful and enjoyable affair seen in Darwin for several years.

The Minnietta mine is turning out a good deal of fine ore. The mine is looking well and promises to continue a good ore producer. The ore is all too high grade to be smelted at home and is shipped to San Francisco.

From Lookout reports are of the same character as for several months past. Much ore is being got out, nearly all of which is of such high grade that it is shipped to San Francisco. The second grade ore is kept for home smelting.

Mr. Fitzgerald expects to start up the furnace at Lookout by November 10. Already a good deal of ore is accumulated at the dump.

The Defiance continues to yield as usual. More miners are wanted there. In fact men are wanted at every mine in the district.

Nevada State Fair.

The Nevada State Fair began at Reno on Wednesday and will be continued until next Saturday. The Managers of the Fair wrote many letters urging that a display of Owens Valley products be made as was done two years ago. That display did very much to bring about great improvements now in progress in the valley. The person who made the display gave a good deal of time and labor and spent quite a sum of money in the work. A display this year would have been of not less benefit to Inyo county. But the same person could not afford the expense, and as no help was offered the matter had to be dropped. Every one in Inyo county wants a "boom;" but booms are made, they don't "grow," like Topsy. Our "boom" is coming; but it comes purely on the merit of the country. Intelligent, united and persistent work would hasten it; indolence, ignorance and narrow prejudice may delay but it cannot prevent the rising tide of prosperity for Owens Valley. God has given a rich soil, a glorious climate, an abundance of water; multitudes of intelligent, industrious people are seeking homes. The facts are widely known and the result need not be doubtful.

Fair Again Changed.

During the past few weeks all the help that could be got has been kept at work upon the pavilion, the fair grounds and the race track. At the beginning of the present week it was evidently quite impossible to have the buildings and track ready for opening next week, and on Tuesday evening the Directors met and changed the time for holding the fair, putting it back two weeks. The fair will now open on Monday, October 10th, and will continue till Friday, October 14th, inclusive. The Directors were very reluctant to make this change, but were forced to do it by the impossiblity of getting ready sooner. The pavilion building is now under cover and is a large and handsome structure. The race track is rapidly coming into good shape; a large sprinkling machine was received yesterday from San Francisco and will be put in operation upon the track today. Every other means is being used to make a first class track; the ground is good and will make one of the best race courses in the State.

Passed Away.

John R. Hughes died at his residence at Lone Pine, at twenty minutes past 1 o'clock last Saturday morning. He was surrounded by friends and his end was peaceful and painless. Mr. Hughes had been ailing during the past year or two; for some months past he had been growing weaker and his end was not unexpected. His widow and some children by a former marriage survive him. He left some property, the exact value of which is not yet known. His remains were buried at Lone Pine last Sunday; the funeral services being conducted by the Masonic fraternity, of which Mr. Hughes had long been a member. John Hughes was one of the pioneers of Owens valley; a man of great generosity and kindness of heart, and with many devoted friends.

Anchored.

Mr. Charles T. Snow, late of Hawthorne, Nevada, came down to Owens valley a couple of months ago. He don't want to go away again; in fact he don't dare to go. Before coming here he was for years terribly afflicted with asthma; now he is longer winded than a politician, a local preacher or a bookpeddler. He used to wheeze and groan like an old accordeon, but now his breathing is long, easy and gentle, like a pair of new bellows blown by a lazy blacksmith. Mr. Snow is content to stay in Owens valley till he shall melt away into what Sairy Gamp called "a little sirup;" though, by the way, he is now of as ample girth as Falstaff.

What Irrigation Does.

The Riverside *Press* claims that within the limits of 6000 acres in that settlement there is not less than $15,000,000 worth of property. The assessed valuation of the settlement is $3,500,000. This vast amount of property has been created by irrigation. At the new settlement on the east side of Owens river near Independence, at least ten thousand acres will be irrigated inside of a year. The soil is as good as any at Riverside.

A Fine Specimen.

Mr. Frank Fitzgerald has sent up from Lookout a fine specimen of ore for exhibition at the Fair. The ore of which this is a specimen is taken from the Confidence mine; it carries $8.326 86 per ton in silver and $196 92 cents in gold. Total value of ore per ton, $8,583 82. This specimen weighs 23¼ pounds and is worth $80 92. It will be on exhibition at the pavilion.

A Washout.

The heavy rain on Thursday morning caused a washout on the C. & C. road at Swansea. An empty car was run back to Keeler and filled with ties which were taken up the road and thrown into the gap. Plenty of help was at hand but the train was delayed four hours.

American Club Meeintg.

Following are the minutes of a meeting held at Lone Pine on Thursday evening, September 15th, for the purpose of forming a Club of the American Party.

At 8 o'clock p. m. the meeting was called to order by W. T. Grant, Esq., member of the State Central Committee. W. K. Miller was chosen Chairman of the meeting and J. E. Reynolds Secretary.

Mr. Grant was called upon by the Chair and addressed the meeting with ability, setting forth the need for a new political party and the objects of the American Party.

Further discussion was invited from those interested in the objects of the meeting and Mr. Meysan, in response to invitation, said that while he favored the general principles which the American party advocated his own opinion was that they could be better accomplished by agitation within the two great existing parties. He deprecated the formation of a new party as likely to destroy one of the old ones. Mr. Grant replied to Mr. Meysan as to the comparative efficacy of the two modes of accomplishing what was sought, and whether the extinction of the old parties, or either of them, was particularly deplorable.

There was further discussion by the previous speakers and others.

A motion was made and carried that those present be invited to come forward and sign the Club Roll.

A resolution was carried that Mr. Grant, of the State Central Committee, appoint a committee of three to open a list of the voters of Lone Pine desiring to affiliate with the new party and join the Lone Pine Club. Mr. Grant appointed as follows: J. J. Stewart, W. K. Miller and J. G. Dodge. There being no further business the meeting adjourned sine die.

W. K. MILLER, Chairman.

E. F. ROWELL, Secretary.

A Great and Beautiful Cavern.

On their way back from Visalia, Mr. R. L. Clark and his friends visited a great cavern that was recently discovered in the mountains. The cavern is on Kawea creek, about fifty miles east from Visalia; the entrance to it being in the mountain side several hundred feet above the bed of the stream. There are many chambers, separated by narrow passages. In one of the chambers the petrifactions suspended from the roof are hollow stems of various lengths. By tapping these tubes with a stick they sound like a piano, and one of the party was able to play airs upon this most strange instrument. In an other chamber stands the exact form of an upright cylinder steam boiler, rivets, joints and all complete. In an other the floor is covered with what appears to be rows of delicate, fluted lace work. Forms equally strange are found in yet more chambers; all the petrifactions are snow white and sparkle when light is thrown upon them, as if encrusted with diamonds. The party explored the cavern to a depth of about a thousand feet; but being pressed for time they could not go further. How far the cavern may extend into the mountain is not yet known; a man named Pugh has claimed the place, and is making improvements that will admit of further exploration. This cavern can be readily reached by traveling on horeback from Owens valley; it is sure to become a favorite resort for tourists.

The Sheep License.

The State Supreme Court has decided that the Mono county sheep license is constitutional. For years past several counties in this State and in Nevada had tried in vain to find some way to make sheep owners pay something to the counties where their sheep pastured. Much credit is due to the people of Mono county for their perseverance in pushing this matter to a successful issue. It is a high distinction for their Attorney, R. S. Miner, Esq., that he should have succeeded where so many had failed to get a decision from the Supreme Court in favor of a law that appears to be a complete remedy for the difficult subject. It is nothing less than justice that where a vast number of sheep are pastured a good part of the year, to the great profit of the owners, they should be made to pay a reasonable part of the local taxation. And under this license law no injustice can be done the migratory herdsman; the permanent dweller in each county will be taxed on sheep the same as transient visitors. Against this the sheepmen can have no just grounds for complaint.

Small Blaze.

Near two o'clock last Saturday morning there was an alarm of fire at Lone Pine. The boys were on hand in a few minutes with hose and water; but the fire was confined to a little shed which was burned and was of little consequence.

Card of Thanks.

Mrs. C. W. Ober desires to return her most sincere and heartfelt thanks to the many friends who so kindly tended and nursed her husband during his fatal illness and for the consolation tendered at her bereavement.

Many sarcastic remarks are being made on the appointment of Marcus D. Boruck as private Secretary to Governor Waterman. Mr. Boruck has his own opinions of things, as every man has who is not a fool; but it is quite safe to believe that he will never advise the Governor to do a single act that an honorable man need be ashamed of. By long experience and wide acquaintance few men in the State are better fitted for the position to which he has been appointed than Mr. Boruck.

The Supreme Court of Illinois in confirming the death sentence of the Chicago anarchists has established a precedent that will preserve law and order from outrageous violation by ignorant, misguided fanatics in all parts of the Union. Enforcement of law is the best safeguard of liberty. The rich man can buy protection; the poor man must depend for protection upon public law; and the man who disregards law is the worst enemy of the poor.

Statitsics show that the consumption of whiskey has fallen off about one half in the United States since 1840. The consumption of wine has increased forty per cent, while beer in comparison is now drunk at the rate of about eight to one. Any change from the use of the more brutalizing liquor is something to be thankful for.

The horses at Los Angeles appear to be set wild by the boom. The local papers contain thrilling descriptions of teams running away nearly every day; and crashing into street cars and other vehicles.

James G. Fair is now President of the Nevada Bank of San Fisncisco, Mr. Flood having resigned from ill health. It is believed the change will lead to more interest being taken in mines and mining.

It is stated that Edison, the great inventor, will build a winter home near Oroville, Butte county, in this State. Every person who knows anything of the climate wants a home in California.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5.00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine

VALUE OF A STILL TONGUE.

Men Who Talk Too Much Expose the Secrets of Their Business.

[Scientific American.]

An old, experienced Wall street banker remarked in course of conversation with a reporter on one of our exchanges, a few days ago, that "a still tongue was often a fortune." The idea he wished to convey was that men who talked too much expose the secrets of their business. A silent man is generally the safest adviser; he thinks before he speaks, and weighs well his words. Some men are as ready with their opinions as a hungry man for dinner; all that is required is the opportunity to air them. Others are so voluble they tell all they know about their own business, and their neighbors' as well. Generally, you can take the measure of an inveterate talker, as it's wind and froth. On the other hand, the man who holds his tongue is not easily fathomed. "Still water runs deep," with but little noise and friction, while the shallows foam an fret with constant tumult.

As a rule, the silent man is methodical, painstaking, careful. He weighs his words and pounds accurately. In business he makes no fuss or parade; he transacts it, however, with diligence and prudence. Brag and vanity are twins; together they were born and together they will die.

Conceit and boasting are poor elements in trade; airs put on as soon as a little money is made usually have a chill. Boasting of big profits and a speedy fotune to every listener shows a lack of good sense and sound judgment. Men have been hung on their own testimony, and merchants have failed from too much tongue.

Joseph Bonaparte's Bordentown House.

[Philadelphia Times.]

On the 3d of January, 1820, the mansion was burned—no one knows how—and on that occasion all the pipes of wine and casks of liquor in the cellar were rolled through a passage to the creek and saved. Some of Joseph Bonaparte's fine wines are said to be still in existence in Philadelphia. So popular was the polite ex-king that on that occasion the ladies of Bordentown turned out with little else than their hose and with leather buckets filled with water mounted ladders and tried to put out the fire. It was a great loss, for the grand staircase, the statues, busts and rare paintings, the heavy chandeliers and hangings and tapestry fringed with real gold and silver, were all destroyed. A well-known Philadelphia lady, who visited the house, has left a record, in which she says:

After we had examined the books, the paintings on the walls and many rich vases which had belonged to Napoleon, the count touched a secret spring and several rows of skilfully-painted book-cases flew open and displayed a set of drawers. These he opened and drew out a number of caskets containing splendid jewels of all descriptions. Several clusters were jeweled handles of swords, other portions of crowns rudely broken off and more the lids of small boxes. He showed us the crown and rings he wore as king of Spain, also the crown, robe and jewels in which Napoleon was crowned. After our eyes were tired of the glare of diamonds and emeralds he touched another spring and opened another set of drawers, containing some of Napoleon's most valuable papers and letters, tied by ribbons and fastened by jeweled clasps.

"While we were wondering how to make our exit he approached another book-case (the room was lined with them) and the whole case flew back, forming an entrance into his sleeping apartment, which consisted of a chamber, dress and bathing room and a small studio or boudoir. The curtains, canopy and furniture were of light-blue satin, trimmed with silver. Over the bed was a splendid mirror and there were several others in the room. The walls were covered with paintings, principally of young females with less clothing than seemed comfortable for this cold climate. In every room of the house there were statues of Napoleon in different positions and various sizes. There were also statues of all the members of his family."

An Aged Tribunal.

Everything about the supreme court is impressive and awe inspiring. Even the two trim negro men who sit at the inner and outer doors and noiselessly open them by means of a cord attached to the door knobs, to allow persons to pass in and out, apparently perform that duty with a deep sense of their responsibility. The semi-circular chamber, with its stately columns of mottled Potomac marble, its half domed roof lighted by skylights, its substantial, old fashioned furniture and the rich upholstery of the sofas arranged upon the sides for the accommodation of spectators, recall historic scenes, glorified as they are viewed through the dim mist of time, and its walls seem ready to echo the voices of the past. The appearance and bearing of the nine elderly gentlemen who sit in a row upon a raised platform behind a long desk, clothed in their black silk robes; the absolute silence enjoined upon all not having to address the court, and the subdued monotones in which the business is transacted, make one feel that here at least are gravity and attention befitting the dignity of a great government.—American Magazine.

In Place of Dynamite.

Wood powder has recently been introduced as an explosive in the Belgian army in place of dynamite. The powder is obtained by treating ordinary sawdust with a mixture of nitric and sulphuric acids, which is afterward formed into cartridges by means of powerful presses. To protect these cartridges from moisture they are afterward covered with paraffined paper. The instantaneous production of the gases arising upon the explosion causes the air in contact with the face surface of the cartridge to act to some extent as a light tamping, and the power of the explosion is directed to the other face. In comparative experiments made with wood powder and dynamite it was ascertained that, for equal weights, charges of the first substance were at least as powerful as those of the second, and the results were more regular.—Boston Budget.

Benefits of "Grape Milk."

[Chicago Times.]

A gentleman living near Healdsburg, Cal., has for some time been experimenting in what is called "grape milk." His efforts have at last been rewarded. He has now on hand about 400 bottles of the pure grape juice, which he not only pronounces a good substitute for tea, coffee and other stimulants, but more beneficial to health. He speaks from experience, having discarded tea and coffee and drank nothing but "grape milk" for several weeks.

The first bank ever established was located at Venice, about 1150, and was known as "The Chamber of Loans."

It Came at Last.

"Say," he called, as he stood on the postoffice steps and beckoned to a pedestrian across the street.

The other man came over, was conducted to a seat on the window sill in the corridor, and the first continued:

"I was looking over my diary for 1886 today, and I find that on Feb. 13 I encountered you on Woodward avenue."

"Perhaps you did."

"You asked me if I thought the backbone of winter was broken. I was in a hurry, and took the query under advisement. I am very sorry that the matter slipped my mind, as I generally answer such questions inside of a month."

"And what do you want of me!"

"To apologize, sir, and to say to you that I am now ready to make my reply. Yes, sir, I think the backbone of winter is broken, and I shouldn't be a bit surprised if we had an early spring!"

The other got up and tried to say something, but the effort was a sad failure, and by and by he turned and walked off and went up the street and turned a corner without ever looking back.—Detroit Free Press.

Natural and Manufactured Ice.

It occurred to me a short time ago that manufactured ice was not as good as the natural ice, and I proceeded to investigate the subject. I found that on holding a piece of natural ice in one hand and a piece of manufactured in the other, that the difference in temperature could be readily demonstrated. I could hold the manufactured ice in my hand until it melted, but the natural article grew so cold that I had to drop it. It would seem at first thought that ice ought to be ice, but after a great amount of mental labor I was enabled to solve to my own satisfaction the problem of one kind of ice being colder than another. Water freezes at 32 degs. Fahrenheit, but after it forms into ice the temperature can be reduced until the lowest possible point is reached. As the ice becomes colder I suppose it gets harder and becomes more compact. I have never been able to test it accurately, but I believe that a cubic foot of natural ice will weigh more than a cubic foot of the manufactured.—Ice Dealer in Globe-Democrat.

The Cost of Solomon's Temple.

The talents of gold, silver and brass used in the construction of the temple amounted to $34,399,112,500. The jewels are reckoned to have exceeded that amount, but let them be estimated at equal to it. The vessels of silver consecrated to the uses of the temple were equal to $2,446,720,000, the vessels of gold, $2,726,481,015; the silk vestments of the priests, $50,000; the purple vestment of the singers, $1,000,000; trumpets, $100,000; other musical instruments, $200,000. Ten thousand men were engaged in hewing timber on Lebanon, 70,000 were bearers of burdens, 20,900 men were overseers, all of whom were employed seven years. Solomon bestowed on them $33,669,885. Food and wages, estimated at $1.12 1-2 per day, $469,385,440; the cost of the stone and timber in the rough, $12,726,480,000.

Climate of Tangier.

Like all countries of this latitude, devoid of proper forest growth the seasons are practically but two—wet and dry. From October to April the rains are frequent, the thermometer ranging from 50 to 60 degs. From April to October there is but little rain, and the thermometer varies from 65 to 80 degs. The climate is not dry, but the dampness is all a salt dampness from the Mediterranean, as a rule; and at times this east wind or Levanta is so strong that everything exposed to it becomes wet.—Tangier Cor. Philedelphia Call.

"Preventible" Accidents.

[St. Paul Pioneer Press.]

A physician who has for years occupied an official position which afforded him excellent opportunities for forming a correct judgment, states that the great majority of deaths from accident may be classed as "preventible." That is, the fatal accident might have been prevented by the adoption of simple precautions requiring but a small outlay of money and no waste of time. Speaking from his personal experiences and observations, he states that out of 100 accidents during his four years of service, at least seventy-five might be classified in the word above used, and many valuable lives might have been saved had it not been for common but dangerous custom and indifference.

Celebrating the Fourth.

A novel achievement was effected in Oregon on the Fourth, being no less than the illumination of the snow covered peak of Mount Hood with red fire. William G. Steel led a party to the summit, five men carrying twenty pounds each of red fire powder. Two men spent the night on the summit to touch off the illuminator at 11:30. It was plainly visible at Portland, fifty-one miles away, and at points much farther distant. The peak is 12,720 feet high, and the party crossed dangerous crevasses and had to cut notches in the snow part of the way.

To Cut Glass with Scissors.

Glass may be cut under water with great ease, to almost any shape, with a pair of shears or strong scissors. Two things are necessary for success. First, the glass must be kept quite level in the water while the scissors are applied; and secondly, to avoid risk, it is better to perform the cutting by taking off small pieces at the corners and along the edges, and to reduce the shape gradually to that required. The softer glasses cut the best, and the scissors need not be very sharp.—London Pottery Gazette.

The Curious Mandioca.

[Brazil Cor. New York Sun.]

The common people of Brazil live on jerked beef and mandioca. The former comes from Uruguay and Argentine, and 30,000,000 tons are imported every year. The mandioca is a curious plant, blending life and death in its elements. It resembles the sweet potato or yam, and if used raw is a deadly poison. Some years ago thirty-five drops of the raw juice was administered to a condemned criminal, and he died in the most horrible convulsions. The root is boiled and then ground to powder, resembling buckwheat flour in appearance, in which condition it enters into the composition of almost every article of cooked food used in Brazil. The tapioca of commerce is made by boiling the mandioca and then allowing it to crystallize.

High Rate of Mortality.

According to The Southern Practitioner, the City of Mexico, being entirely without sewers or drainage, the mortality is at the high rate of 50 per 1,000 of population annually. In Guanajuato, a city of 58,000 inhabitants the death rate is said to be 74 per 1,000.

A man without reproach, from whom the breath of scandal passes like common breath from any other polished surface, could afford to do what other common men could not.—Charles Dickens.

A SCIENTIST'S WARNING.

Synopsis of a Remarkable Lecture Delivered by Dr. H. E. Hammond Before the National Scientists' Convention.

"We call this an 'age of progress,' and so in many respects it is, but I do not hesitate to declare most emphatically that in many things that constitute TRUE happiness we are simply children. Let us see: We are startled constantly by the sudden death of some man who seemed the picture of health. He thought he was well. Occasionally his appetite was poor, but then in a few days afterward it was ravenous. He felt strange pains shooting through his body, but as they did not stay long he forgot them. His head pained him periodically, he was somewhat paler than common, and was unaccountably tired, but he felt comparatively well and vigorous. And yet he suddenly died! It is a shame to our boasted civilization."

THE SUDDEN DEATH.

Dr. Hammond then instanced a number of persons well known to him who had died in great agony, although they had experienced few symptoms and little pain, and continued:

"Why is it that so many little children are to-day stunted, and apparently blighted for life? Because those early and inevitable diseases, measles, scarlatina, etc., have so weakened certain organs that nature cannot do her work, and the child languishes, perhaps dies. Look at the list of women who die in childbirth, and why is it? Simply because their maternal organs have been so weakened by the most terrible of all diseases that they cannot withstand the fearful sudden strain that is brought to bear upon them. How many women escape monthly agonies? And yet nature never intended that pain or inconvenience should attend the operation of her natural laws. The solemn and terrible fact is that men and women drag along, die, and are buried, and their friends and the doctors say heart disease, apoplexy, pneumonia, congestion, convulsions, when the cause lay far back of these things and was Bright's disease of the kidneys. That was the inward cause; these are the outward manifestations. Every disease must have a root, just as certainly as every plant. Kidney disease is the great root from which most modern diseases, no matter what their name may be, actually spring.

"But because the kidneys are so important, so delicate, and so powerful, they require the greatest care in treatment. Ever since the day when Dr. Bright discovered the connection between morbid outward symptoms and internal decay, physicians, scientists, and chemists have sought for a pure and powerful relief. It has been a difficult, often a fruitless search. Many remedies are now before the public, but so far as I have been able to learn by chemical analysis and actual test, only one possesses absolute merit and power. I have seen a number of cases, and learned from unquestionable sources of many others, where the preparation Hunt's Remedy has been almost remarkable in its results. One case in particular was that of a prominent banker residing in New York, whose family physicians, assisted by the best counsel that city could produce, declared his case to be hopeless, and who was afterward restored to perfect health by the means I have named. I have not hesitated to use it freely among my patients, and from the results I have secured, I shall continue to do so."

THAT PUNY CHILD.

The doctor explained how men and women should live in order to meet this terrible malady, and instanced several additional cures which had followed the use of the remedy before referred to. In concluding he said:

"If men and women could only be aroused to a realization of their actual danger; to a sense of what is before them unless they take prompt and proper action, and then by a correct course of life and the use of just the right means seek to prolong their lives, most of the present suffering and untimely deaths might and would be avoided."

—A French instrument for recording the rolling of a vessel at sea was lately tried on the voyage of a steamship from Bordeaux to Brazil, and made a tolerably accurate register of the motion.—*Arkansaw Traveler.*

—A company at Mobile are compelled to run their large establishment night and day making staves, barrels and boxes for shipment North. The time was when this industry was practically confined to the North.

—A hinged lamp-post has lately been devised. It has the advantage that no ladder is required to enable it to be cleaned and repaired, and it can also be lighted by bending it over, the lamplighter carrying a key for the purpose.

—Elderly Spinster (in drug store)—"I declare to goodness I've forgot what I come in for! An' it was on my tongue's end jest a minnit ago." Clerk (trying to help her out)—"Er—face powder, ma'am, or hair dye, or—or—" (Exit Elderly Spinster.) — *Harper's Bazar.*

—A Common Trouble.—Little Boy—"Mamma, what did sister die of?" Mamma—"Brain trouble, dear, brought on by overwork at school before she graduated." Little Boy—"I suppose then, that is what they meant when they spoke of her as being 'finished?'"

—In a small town out West an ex-county judge is cashier of the bank. "The check is all right, sir," he said to a stranger, "but the evidence you offer in identifying yourself as the person to whose order it is drawn is scarcely sufficient." "I've known you to hang a man on less evidence, judge," was the stranger's response. "Quite likely," replied the ex-judge, "but when it comes to letting go of cold cash, we have to be careful."

—Two lads who worked a neat swindling act were tripped up in Chicago the other day. They dealt in stolen dogs, and while one was out "finding canines that were not lost," the other would be restoring the booty of the previous day to the owners, and receive the reward offered through the newspapers. When captured, the youngsters had eighty odd dogs on hand.

—A German naturalist has devoted a great deal of study to the violet, and has given us a very pretty biography of her. The violet droops her head, he tells us, to protect the honey from the rain; she surrounds it with hairs to keep out the inquisitive little ants, who would run away with it, and, having no wings or hairs upon their tiny bodies, would not help to convey the pollen to other blossoms.

LITTLE LAUGHS.

A man always thinks he is on the wrong tack when he sits down on one.—Irish Weekly Times.

It is queer that Queen Victoria did not confer the Order of the Bath on some of Buffalo Bill's Indians.—Pittsburg Chronicle.

Yan Phon Lee, the Yale Chinaman, is from Fragrant Hills, China. Fragrant Hills is probably the place where the dead animal man of Pekin runs his glue factory. Cities are cities, whether they be in China or America.—Louisville Courier-Journal.

This is the season of year when we are thrown into the society of the man who rocks the boat for fun if he goes out with you for a row on the lake or river. He never gets to be over 30 years of age, and generally participates in a double funeral. Beware of him.—Albany Journal.

Customer—Isn't it a trifle large, Levi? Levi—Larch, mine frent? Gracious! Uf you geeps dot spring coat on, unt your wife sees it, your bosom vill schwell mit pride so dot she'll hef to set dem buttons forvarts.—New York Mercury.

"I can't come now, maw," said the high school girl, when her mother called her to assist in some household duties; "and wish you wouldn't interrupt me again. I want to finish 'The Model Daughter; or, a Happy Marriage,' and then I must commence work on my graduating essay, 'The Duty Children Owe to Their Parents.'"—Norristown Herald.

We are filled with astonishment at the report that a Boston boy recently spelled "hazardous" "hazardess," and defined it as "a female hazard." But the Bostonians are weak if you take them away from their native Greek—Pittsburg Chronicle.

"I want to be an angel," sang a female voice in a side room, and thereupon a heartless wretch in an adjoining apartment broke forth with: "Johnnie, get your gun, get your gun, gun, gun."—Detroit Free Press.

What are the wild skeeters saying,
Sister, the whole day long?
Ever with buzzing and humming
The air seems filled with their song.
Why come the pesky old critturs
A-bitin' poor sinners like me?
I'm a mass of big lumps, A. M'ria,
From my head to the pan of my knee.
—New York Journal.

Cheek is the tight rope upon which crafty men often cross the chasm of ignorance to success—Washington Hatchet.

Politics makes strange bedfellows. And the bedfellows do not sleep. They lie awake watching one another.—Baltimore American.

It is used as an argument, either for temperance or the bicycle, that no bicycle rider ever comes home drunk on his bicycle.—Picayune.

Father of Fair One—We close up here at 10 o'clock. Brassheaded Beau—That's a good idea. It keeps fellows out who don't know enough to get inside earlier.—Tid Bits.

Literary Lodger (to new servant)—Oh, you are the new servant; and what might your name be? "Anner, sir." Literary Lodger—Hannah or Anna? Servant—Tain't neither, sir; it's Anner, with two haitches.—Fun.

Taking Him at His Word.

"Whar'd yo' git dat load er lumber, Br'er Jimson?"

"Down ter de Healin' Ba'm chu'ch."

"Dasso, Br'er Jimson! Why, has dey tored the buildin' down?"

"Oh, no, sah! Hit's dar yit, but I hearn Parson Blowhard say dat de pews was free, so I riz up 'arly this mornin' an' went down dar an' ripped up a p'ar of 'em an' fotched 'em erlong."—Yonkers Gazette.

A LUCKY MAN.

For several days it has been mooted round, and indeed we published the statement, that Mr. John B. Boyd of this city had been so fortunate as to draw the nice little sum of five thousand dollars in the June drawing of The Louisiana State Lottery, and all his old friends were rejoiced at Mr. Boyd's good luck, always reserving the usual exclamation "if it is true." To vindicate ourselves, and to give the public the information, we have interviewed Mr. Boyd on the subject.

Did you draw $5,000 in The Louisiana State Lottery, Mr. Boyd?

I did, on the one-twentieth of ticket No. 21,658.

What was the amount?

The second capital prize of the lottery in that drawing was $100,000. The twentieth was $5,000.

Did you get your money?

I did, in $20 gold pieces, with no delay or bother.

Who acted as your banker?

Wells, Fargo & Co. made the collection, at a cost to me of $65.

Had you other tickets in the same drawing?

Yes. One of them drew a small amount, say $200, but it was a fractional ticket and did not yield largely.

Mr. Boyd placed part of his winning in real estate at once, as he is an old timer, and in the abstract business for Woolwine, Sprigg & Nerney, he knew as well where to place it as these gentlemen themselves. We are only too glad of our old friend's good luck, and to hear that all was done by the Lottery people on the square, promptly and no growling.—*San Diego* (Cal.) *San Diegan*, July 7.

Connoisseur—I tell you what it is, McDaub, those buzzards are simply superb. You shouldn't paint anything but birds. Artist (disgusted)—Those are not buzzards; they are angels.

A TERRIBLE FIRE

arouses the apprehensions of a whole city. And yet the wild havoc of disease startles no one. Sad to relate, women suffer from year to year with chronic diseases and weaknesses peculiar to their sex, knowing that they are growing worse with every day, and still take no measures for their own relief. Dr. Pierce's "Favorite Prescription" is the result of life-long and learned study of female complaints. It is guaranteed to cure.

After a two-months' experience at a boarding house we have now no difficulty in understanding why Chinamen in this country insist upon swearing on a chicken in courts of law.

PHYSICIANS HAVE FOUND OUT

That a contaminating and foreign element in the blood, developed by indigestion, is the cause of rheumatism. This settles upon the sensitive sub-cutaneous covering of the muscles and ligaments of the joints, causing constant and shifting pain, and aggregating as a calcareous, chalky deposit which produces stiffness and distortion of the joints. No fact which experience has demonstrated in regard to Hostetter's Stomach Bitters has stronger evidence to support than this, namely, that this medicine of comprehensive uses checks the formidable and atrocious disease, nor is it less positively established that it is preferable to the poisons often used to arrest it, since the medicine contains only salutary ingredients. It is also a signal remedy for malarial fevers, constipation, dyspepsia, kidney and bladder ailments, debility and other disorders. See that you get the genuine.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

It is not until a man reaches thirty that he begins to wrap the small bills on the outside of the roll.

DECAY OF THE BONES,

with some thirty other symptoms, mark the progress of that terrible disease known as catarrh. It advances from stage to stage of fearful annoyances, and if neglected, is certain to end in general debility, and possibly in consumption or insanity. Dr. Sage's Catarrh Remedy will cure it at any stage. This medicine has been long before the public, and thousands have been restored to health by its never-failing virtues.

As a man and wife are one, the husband, when seated with his wife, must be beside himself.

CURED OF MALARIA.

22 FLORIDA ST., ELIZABETH, N. J., March 17, 1884.

I have been using ALLCOCK'S POROUS PLASTERS for the last five years. Some two years ago, after having been sick for upwards of six months with malaria, I found myself with an enlarged spleen, dyspeptic, and constantly troubled with a headache, and my kidneys did not act very well either. Having spent most of my money for medicine and medical advice, I thought to save expense I would use ALLCOCK'S POROUS PLASTERS, two on the small of my back, one on the spleen or ague cake, and one on the pit of the stomach, just under the breast-bone. I continued using the plasters about thirty days, changing them every week. At the end of that time I was perfectly well, and have remained so ever since.

GEORGE DIXON.

The man who wants to make his mark in the world must really do better than merely make his mark when called upon to write.

Premature decline of manly powers, nervous debility and kindred diseases, radically cured. Consultation free. Book ten cents in stamps. Address, confidentially, World's Dispensary Medical Association, Buffalo, N. Y.

Never chew a raw oyster. Simply place him in the mouth and look at the ceiling. Trust the oyster for the rest.

For Coughs, Colds, and Throat Disorders, use "*Brown's Bronchial Troches*," having *proved* their efficacy by a test of many years. *Sold only in boxes.*

Relief is immediate, and a cure sure. Piso's Remedy for Catarrh. 50 cents.

If afflicted with Sore Eyes, use Dr. Isaac Thompson's Eye Water. Druggists sell it. 25c.

Try Germea for Breakfast.

BABY'S SKIN & SCALP CLEANSED PURIFIED AND BEAUTIFIED BY CUTICURA.

FOR CLEANSING, PURIFYING AND BEAUTIFYING the skin of children and infants and curing torturing, disfiguring, itching, scaly and pimply diseases of the skin, scalp and blood, with loss of hair, from infancy to old age, the CUTICURA REMEDIES are infallible.

CUTICURA REMEDIES are absolutely pure, and the only infallible skin beautifiers and blood purifiers, free from poisonous ingredients.

Sold everywhere. Price, CUTICURA, 50c.; SOAP, 25c.; RESOLVENT, $1. Prepared by the POTTER DRUG AND CHEMICAL CO., BOSTON, MASS.

Send for "How to Cure Skin Diseases."

BABY'S Skin and Scalp preserved and beautified by CUTICURA MEDICATED SOAP.

Suffering Womanhood.

Too much effort cannot be made to bring to the attention of suffering womanhood the great value of Lydia E. Pinkham's Vegetable Compound as a remedy for the diseases of women. Such an one is the wife of General Barringer of Winston, N. C., and we quote from the General's letter as follows: "Dear Mrs. Pinkham: Please allow me to add my testimony to the most excellent medicinal qualities of your Vegetable Compound. Mrs. Barringer was treated for several years for what the physician called Leucorrhœa and Prolapsus Uteri combined. I sent her to Richmond, Va., where she remained for six months under the treatment of an eminent Physician without any permanent benefit. She was induced to try your medicine and after a reasonable time commenced to improve and is now able to attend to her business and considers herself *fully relieved.*" [General Barringer is the proprietor of the American Hotel, Winston, N. C., and is widely known.]

HALL'S SARSAPARILLA

Cures all Diseases originating from a disordered state of the BLOOD or LIVER. Rheumatism, Neuralgia, Boils, Blotches, Pimples, Scrofula, Tumors, Salt Rheum and Mercurial Pains readily yield to its purifying properties. It leaves the Blood pure, the Liver and Kidneys healthy and the Complexion bright and clear.

GOLDEN MEDICAL DISCOVERY
CURES ALL HUMORS,
from a common Blotch, or Eruption, to the worst Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin, in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. Great Eating Ulcers rapidly heal under its benign influence. Especially has it manifested its potency in curing Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Disease, White Swellings, Goitre, or Thick Neck, and Enlarged Glands. Send ten cents in stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections.
"THE BLOOD IS THE LIFE," Thoroughly cleanse it by using Dr. Pierce's Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, and vital strength, will be established.
CONSUMPTION,
which is Scrofula of the Lungs, is arrested and cured by this remedy, if taken before the last stages of the disease are reached. From its marvelous power over this terribly fatal disease, when first offering this now celebrated remedy to the public, Dr. PIERCE thought seriously of calling it his "Consumption Cure," but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption, but for all Chronic Diseases of the
Liver, Blood, and Lungs.
If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flushes, low spirits and gloomy forebodings, irregular appetite, and coated tongue, you are suffering from Indigestion, Dyspepsia, and Torpid Liver, or "Biliousness." In many cases only part of these symptoms are experienced. As a remedy for all such cases, Dr. Pierce's Golden Medical Discovery is unsurpassed.
For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy.
SOLD BY DRUGGISTS, at $1.00, or SIX BOTTLES for $5.00.
Send ten cents in stamps for Dr. Pierce's book on Consumption. Address, World's Dispensary Medical Association, 663 Main Street, BUFFALO, N. Y.

$500 REWARD
is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure. If you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption. Dr. Sage's CATARRH REMEDY cures the worst cases of Catarrh, "Cold in the Head," and Catarrhal Headache. 50 cents.

CARE OF CHILDREN.

The Necessity of Teaching Them System in the Daily Acts of Their Lives.

Children are apt to seek the society of other children at about the sixth year of their ages. This should be a watchful period of the parents, as friendships contracted at this time have a very decided influence on the mind, morals and manners of their child. Nearly every child is influenced for good or evil through early associations. If allowed to be constantly with the nurse, their language and manners, will, in nearly every case, be identical with those of the nurse. A mother should spend the greater portion of every day in the society of her children. If to rid herself of their noise she permits them to seek companions outside, she has no one to blame but herself if their manners and morals are corrupted. All children require companionship of those of their own age, but it is very essential that the parents should choose these companions.

Children can be readily taught to be neat and tidy in their habits, by example principally, for they imitate closely the actions of their elders. A closet or other convenient place should be given them exclusively for their toys, provided there is no play-room; then let it be understood that when play is ended, all toys are to be returned to their proper place. If this rule is disregarded, the withdrawal of a favorite toy for a time, as punishment, usually has the desired effect of causing them to be more careful in the future; this device may have to be resorted to more than once, but it usually is successful in the end.

Patience should be the watchword of every mother, for if she loses patience, she is herself, so to speak, lost for the time, and nothing is gained; she not only throws herself into a worried state of mind, but perplexes, saddens, and sometimes angers the child whom she so earnestly desires to guide and govern in the right way. If a mother is not naturally patient, she should by all means cultivate the virtue; by judicious use of it, much good will be gained in the end for mother and child.

It is a mistaken notion to coddle children, with the idea that they must be saved from all manner of care and trouble when at home, the mother often doing a great many things, endless errands, etc., thinking, "well, I will save them this now, let them enjoy home while they may." This is mistaken kindness. They will not think one bit less of home for being taught to take a little responsibility on themselves when there, and will be all the more fond of the mother whose cares they will thus learn to share.

Children should be taught system in the daily acts of their little lives and the habit will never forsake them in after life. A time for every thing—for playing, for eating, for sleeping. Punctuality in all things should be insisted upon. To be truthful, punctual and well-mannered augers well for the future of any child. It has been well said, "the child is father to the man." Alas, how few mothers think of this adage during the early training of their children, thinking that when grown up all the faults will disappear, exclaiming, when they turn out contrary to expectations: "I can not understand why this is so, I always was a kind mother!" A mother should not only be kind but firm, correcting at once any fault the child may have committed, not postponing the punishment until some other time on account of his being an unpleasant duty.—*Mrs. Ella L. Mumma, in Good Housekeeping.*

GROWTH IN CHILDREN.

An Interesting Chapter on the Subject of Variations in Human Stature.

The rate of growth in children varies according to sex. Thus, at the age of eleven or twelve years, boys are larger and heavier than girls; but from that age on the evolution of the girls is more rapid, and they soon overtake the boys and pass them, till the age of fifteen years is reached, when the boys regain the ascendency, while the girls remain nearly stationary. A curious relation has been discovered between the growth of children in stature and in weight. M. Malling-Hansen, director of the deaf and dumb institution at Copenhagen, has for three years weighed and measured his pupils daily; and he has observed that their growth does not take place regularly and progressively but by stages separated by intervals of rest. Weight also increases by periods after intervals of equilibrium. While the weight is increasing, the stature remains nearly stationary, and vice versa. The maximum of increase of stature corresponds with a minimum period of augmentation of weight. The vital forces appear not to work on both sides at once. These variations are subject to the influence of the seasons. During autumn and early winter, according to M. Malling-Hansen, the child accumulates weight, while his stature increases slowly; but during spring, stature receives a veritable push, while weight increases but little. Some local habits have an influence on the stature. Stendhal remarked that many Roman girls had deformed vertebral columns, or were a little hump-backed, and found that it was the result of a popular belief prevailing in Rome that parents could promote the growth of their children by punching them in the back!—*Popular Science Monthly.*

—The omission of a comma in the tariff act of 1872 entailed upon the Government a loss of about $200,000.

INVENTION OF PRINTING.

Gutenberg Entitled to the Credit of Inventing Movable Type.

Before the middle of the fifteenth century Europe had a cheap material, paper, an oily ink, developed for block-book printing, in place of the fluid ink, which could be used only with the brush; probably the press itself; skilled artisans, trained in the block-book work; most important of all, the demand caused by education. It lacked movable types that could be fitted evenly and readily together, for neither the porcelain letters of Pi-Ching nor the individual stamps of the early copyists had developed to this point. "The invention of printing" in its modern sense consisted in the simple production of such types, or, as De Vinne puts it, of the type-mold which should produce such types. Fifteen cities claim to be the birth-place of printing, but the honor rests between Haarlem, Strasburg and Mainz. The Dutch legend is that some time about or previous to 1440, one Laurent Janszoon Koster, custos or sexton of a church in Haarlem, while in the Hout, or Haarlem wood, cut letters on a beech tree, which suggested to him wooden types, from which he afterward developed metal types; and that a man in his employ, escaping with the secret to Mainz, originated the art there. Haarlem contains many portrait-monuments of Koster, and belief in him is an article of the Dutch faith, but later investigators claim that he is altogether a myth, made up, with much imagination and some rascality, of two Haarlem citizens, neither of whom was a printer, and of the "unknown printer" of much later days.

The German story centers in John Gutenberg, of the family called Gensfleisch—taking his mother's name in accordance with a German custom, because her family was dying out—as to whom there is a definite historical chain of evidence, including the records of two lawsuits. Nothing is certainly known of his first thirty years. He is supposed to have been born about 1399, at Mainz, whence his family were exiled, going to Strasburg. In 1439 he appears as a defendant in a lawsuit brought in Strasburg by an heir of one Andrew Dritzehen, to compel Gutenberg to admit him to the secret and benefit of an art into which the deceased had bought by payment to Gutenberg. This art seems to have been printing, and the evidence in the suit shows that Gutenberg sent his servant to Dritzehen's house, immediately on his death, to have a "form" of "four pieces," "lying in or about a press," separated "by turning two buttons," "so that no one might know what it is." We do not know, for Gutenberg won the suit and kept the secret. Different modern scholars construe "it" to be parts of the press, pages of type, matrices, or a four-part type-mold, such as is known to have been used by early printers. It is not definitely known whether Gutenberg printed any books in Strasburg (some fragments of a type Donatus being most plausibly connected with him there), which caused a German critic to declare that if Strasburg is the cradle of printing, "it is a cradle without a baby." By 1448 Gutenburg had removed to Mainz, for there is record of his hiring money, and in 1450 he made a contract with John Fust, a money-lender, to provide money for "paper, vellum, ink, wages and the other materials required," on half-profits, which contract was the basis of the second suit. In this suit, brought in 1455, Fust, who has been sadly confused with that later Dr. Faust, of Wittenberg, from whose wicked learning grew the Faust legend, foreclosing the mortgage, got possession of part of Gutenberg's implements and stock, and by help of Gutenberg's apprentice, Peter Schoeffer, who afterward married Fust's daughter Christina, took up the business of printing. There is a legend that this Schoeffer, and not Gutenberg, invented the type-mold, but recent investigators show that this invention was peculiarly Gutenberg's.

Gutenberg, who started a new printing office after the separation, by help of money from Conrad Humery, physician and town clerk, printed two editions of the Bible. He printed also an edition of the Donatus, several Letters of Indulgence (the earliest job-work) a broadside Calendar of 1457, a Catholicon of 1460, and many other things. He was alive in 1465, when Archbishop Adolph made him one of the gentlemen of his court, and was dead in 1468, for in that year Conrad Humery had succeeded to his effects.—*R. R. Bowker, in Harper's Magazine.*

National Floral Emblems.

Many nations and sovereigns have had plants and flowers as their emblems. The rose of England became especially famous during the Wars of the Roses, after which the red and white were united, and the rose of both colors is called the York and Lancaster; but when these flowers first became badges of the two houses I can not discover. The thistle is honored as the emblem of Scotland from the circumstance that once upon a time a party of Danes having approached the Scottish camp unperceived by night, were on the point of attacking it, when one of the soldiers trod on a thistle, which caused him to cry out, and so aroused the enemy. The shamrock of Ireland was held by St. Patrick to teach the doctrine of the Trinity, and chosen in remembrance of him. It is always worn by the Irish on St. Patrick's Day. The leek, in Wales, as a national device, has not been satisfactorily explained, otherwise than as the result of its having the old Cymric colors, green and white.—*Boston Budget.*

GERMANY'S NEW CANAL.

The Costly Waterway Which Is to Unite the North Sea and the Baltic.

It has been the dream of German statesmen for years past to open water communication between the North Sea and the Baltic. Those two bodies of water form a portion of the northerly boundary of the German Empire, but between them stands the Kingdom of Denmark. There is already communication between the two seas by way of the Eider river and the Kiel canal, and also by way of the Strecknitz canal, which furnishes an outlet from the Elbe river into the River Trave, and thence into the Baltic. But a broader, shorter and deeper avenue of connection was needed than these afford. This is to be furnished by the North Sea and Baltic canal, the work on which was formally begun a short time ago.

The new canal, which is to run through the province of Schleswig-Holstein, will be about 65 miles long, 197 feet wide at the surface of the water, 85 feet wide at the bottom, and to be of an average deep of 28 feet at mean high water. The cost of construction is estimated at 156,000,000 marks, or about $38,000,000. Prussia pays about a third of the expense of the work, the remainder being borne by the rest of the Empire. The canal, therefore, will be broad enough to readily permit the passing of one vessel by another, and be deep enough to float the largest war vessel yet constructed. It is estimated that the work will be completed in about seven years. The labor of construction will be greatly lessened by the fact that for a portion of its length the projected canal will pass through one canal already built. The latter will be simply widened and deepened. The whole work will be under the supervision of the Government.

During peace the canal will be open to the ships of all nations. It will shorten the route between any of the British, French or American ports and any point on the Baltic Sea by about 240 miles, which means a saving of time of about three days for a sailing vessel, and twenty or twenty-two hours for a steamer. The expectation is that the toll which will be exacted of trading vessels will pay the expense of maintaining the canal, not including interest on the investment. This tax, which will include pilotage, tonnage, lighterage and other expenses of that class, is to be at the rate of about eighteen cents a ton. The entire revenue from this source, it is anticipated, will reach a total of about $1,100,000 a year. An inducement for using this waterway, aside from the shortening of the distance between the two oceans which it will bring about, will be the greater safety which will beussured, the route around the Denmark capes through the Skager Rack and the Sound being more than ordinarily perilous at certain seasons.

Of course the primary purpose of the canal will be military, not commercial. Germany's two greatest naval stations are Wilhemshaven and Kiel. The former is on the North Sea, and the latter on the Baltic. The canal will shorten the distance between these points about 425 or 450 miles. It will render the voyage between them also much safer than it is at present in case of war. Under existing conditions a power like Great Britain or France, either of which is stronger than Germany on the water, might be able, by blockading the sound between Sweden and Denmark, to prevent all co-operation between a German fleet on the Baltic Sea and another on the North. When the canal is finished a blockader will run a risk of being attacked by the united fleets simultaneously. The only drawback to the canal from a military point of view is the possibility of its freezing so thickly as to render it impassable for about three months out of every twelve.—*St. Louis Globe-Democrat.*

DANGER FROM LIGHTNING.

An Interesting Report Prepared for the German Government.

From a recent report by Dr. Hellman on statistics of lightning damage in Schleswig-Holstein, Baden and Hesse, it appears that the danger from lightning in these parts (unlike the case of other parts of Germany) has been decreasing of late years. Soft-roofed houses are fired about seven times oftener than those with hard roofs. Windmills are struck 52 times, and church and clock towers 39 times oftener than ordinary houses with hard roofs. The marshy regions in Schleswig-Holstein are the most dangerous; and the land about inlets of the east coast the safest. With like conditions, the relative danger decreases the more houses are grouped together. In Baden the danger varies more than in any part of Germany (about Heidelberg it is 24, and in Waldshut 265 per million houses). In Hesse, the low plain of the middle Rhine is the most dangerous part. In the fifteen years 1868-83, there were killed by lightning for every million men in Prussia 4.4, in Baden 3.8, in France 3.1 and in Sweden 3.0. The geological nature of the ground, and especially its capacity for water, has important influence. Thus, calling the danger on lime 1, that for sand is 8, while for loam it is 22. This is partly why most of South Germany and Austria is less dangerous than North Germany. There are four factors affecting the lightning danger to buildings; two physical—unequal frequency of storms and geological character; and two social—variable population and mode of building. Of all trees oaks are most frequently damaged, beeches most rarely (in the ratio of 54 to 1).—*N. Y. Post.*

A Point for Rural Residents.

Country Editor—Yes, sir, in the notice of the vegetables you left on my table I said they looked nice when brought, but were found to be scarcely eatable when cooked. I remember now.

Irate Farmer—So do I, and I remember, too, that when my uppish neighbor, Farmer Grubbs, left the same kind of stuff here you came out with a big thing in the paper saying they were the finest vegetables you ever ate. I know, sir, that what I brought was just as good as his."

"Maybe they were when you brought 'em, but it was two weeks before I had a chance to try them."

"I see; they must have been pretty stale by that time. But how about Farmer Grubbs' vegetables?"

"Farmer Grubbs was thoughtful enough to bring along a load of wood to cook them with."—Omaha World.

Gallantly to the Rescue.

"Dey yain't a gemman on de groun' das perlite 'nough ter gib me a swing."

"Hol' on dah! Doan' be ser tare'ble sudden, Mistah Luffley!"—Judge.

Why Nature Weeps.

It is said that nature shudders
When a woman throws a stone,
And that when she sharpens pencils
Then all nature gives a groan.

But there's nothing that gives nature
More keen anguish and distress
Than to see a struggling father
With a babe he tries to dress.
—Krys in Judge.

Obliged to be Abstemious.

"Stranger," he said, as he tendered his pocket pistol, "join me in a drink. You'll find that the red old stuff."

"Thanks, no liquor," was the reply.

"Well, will you smoke a cigar?"

"Not any cigars."

An old gentleman who had observed all this grasped the stranger warmly by the hand.

"Sir," he said, "it fills my heart with joy to see a young man like you turn away from such vile destroyers."

"Yes, sir," the young man replied, "you see I'm a prize fighter in training, and I've got to go slow."—New York Sun.

O Busted Boom!

"Break, break, break! On the cold, gray rocks, O Boom! And I would that my arms could raise you from out your untimely tomb. Ah well for the cool headed man, who left all his cash in the bank, ah well for the man who refused to become a real estate crank. And the stately booms go on to their haven down in the grave; but alas for the touch of the vanished pile, and the sound of a wild boomer rave. Bust, bust, bust, in the flattened town, O Boom; but the tender grace of a stake that is gone has gone till the coming of Doom."—Atchison Globe.

He Wasn't Surprised.

"Has yer heerd what happened last week to Gabe Snodgrass?"

"I hain't heerd nuffin about him sence he left Austin, last week."

"Two trains run togedder, and Gabe's head was cut clean off."

"He's dead, I s'pose?"

"Of course he's dead, and he has been dead ever sence."

"Well, I ain't s'prised a bit. De las' time I seed him he was lookin' poorly, an' was complainin' of a misery in his chest, and he had a mighty 'spicious lookin' gumboil on his neck."—Texas Siftings.

Conscience Makes Cowards of Us All.

The great mesmerist and mind reader had hired a hall on Post street and people flocked to his exhibition. Among others Frank took his little innocent Hazel to the entertainment. She appeared uncomfortable for awhile, and at length came out with:

"Oh, Frank, dearest, can he really read people's thoughts?"

"Well, I guess so; at any rate he's going to try."

"Then, dear, let us get out of here right now; for if he reads mine I shall be turned out any way."—San Francisco Wasp.

Not Quite the Same.

On hunting woodcock he was bent,
And, though that doesn't need much grit,
He took "two fingers" before he went,
To brace his nerves a bit.

The liquor soon muddled his whirling brain,
As liquor will often do;
And the gun went off in a moment vain,
And it took two fingers, too!
—New York Sun.

Getting Late.

"Clara," he said, in a low, sweet, kiss me tone of voice, "do you see yon twinkling star?"

"I see plenty of stars," replied the tired girl, who was anxious to get to bed, "but I don't observe anything particularly 'yon' about them. Don't be foolish, George."—New York Sun.

Water, Water Everywhere.

First Pittsburger—Been away?

Second Pittsburger—Yes; just got back; spent some time at a prominent watering place.

First Pittsburger—Which?

Second Pittsburger—At Jay Gould's office.—Pittsburg Chronicle-Telegraph.

A Hot Weather Girl.

"I've got a splendid girl. I call her my hot weather girl on account of her name."

"What is her name?"

"Fan."—New York Sun.

Discounting the Future.

Teacher—Mary? and what is your last name?

Young Woman—I can't tell just yet; but I guess it will be Smith.—Boston Transcript.

Bostonian, but Easily Understood.

The small boy in a frolic
Robs the orchard of its apples,
And his in'ards cruel colic
Subsequently grimly grapples.
—Boston Courier.

WAGES IN JAPAN.

The Pay Asked by Japanese Laborers for an Inferior Kind of Work.

Since the table of wages in Tokio given in the third report of the royal commission appointed to inquire into the causes of the depression of trade and industry, is apt to be taken as it stands by the outside world, I shall give a few facts of such tradesmen as I have had dealings with.

Carpenters, 40 to 60 cents. The first figure is out of all question. For about a year I employed a carpenter off and on at 60 cents a day—that is, when time permitted. He would begin work at about 9 a. m., "work" till 6 p. m., and devote about three hours a day to smoking and thinking—he was a great thinker in his way—and eating, and the work he did in the remaining six hours with the awkward toys that pass for tools here, an English or an American carpenter would do in one hour, which brings a Japanese carpenter's wages to 60 cents per hour, or taking the day at eight working hours, to $4.80 per day. And I have employed carpenters at 75 cents and $1 per day with the same result.

Plasterers, 45 to 55 cents per day; to be had at that rate at about a week's notice. The year before last I had to employ two plasterers to repair a place in the wall of a house where a piece of plaster of about two feet square had fallen out. The two artists turned up at 10 a. m., and, sitting down upon a couple of empty wine-cases, lit their pipes. At about 10:30 a. m. one of them approached the damaged place within a yard, took a mental photograph of it, and sat down. At 11 a. m. a mutual friend appeared, who was warmly welcomed, and, after smoking a pipe or two, amused them by standing on his head, and by that time they had got very hungry and made a pause of two hours for tiffin. Pipes again. Then the one who had carefully sounded the wall knocked another piece of plaster down. Pipes again. By 5 p. m. they had made the hole about three times its original size, and were so thoroughly exhausted that they left off. Next day a stray drop of water, wherever it may have come from, lighted on one fellow's nose and made them conclude it was going to rain, so that no work could be done in the afternoon. Well, to cut matters short, those two square feet of plaster—that is river mud—cost me $3. An English or American plasterer would have sent one of his boys and boxed his ears if he did not come back in an hour.

Painters—space will not permit to go through the whole list—25 to 35 cents per day. I have some work for a painter at present, and am willing to give 40 cents per day, but the man will not work under 50 cents, and says it will take him eight or ten days to do the job. Now, I estimate the time in which the work can be done and should be done—and there are but few things but that I have done myself—at two and one-half or three days time of nine working hours, so that I would be paying at the rate of $1.50 to $1.66 per day, and have things at sixes and sevens for more than a week.

I could give instances of the same kind ad infinitum, but then the courtesy of newspaper editors does not and can not extend to writing books in the columns of their papers, and if I have thrust forward a few hard facts here, I have done so from the reason that those who contemplate trying their chances in this country in the near future may not be misled and afterward cry out in the bitterness of their disappointment that they have been deceived, and become blind to much that is good and to be appreciated in Japan. I am not thus disappointed—this to guard myself against any such suspicion—for I have returned to Japan of my own free will, knowing all this, and much that I have said here and much of similar import I have said to those whom the King has delighted to honor; yet I am as welcome at their palaces or residences as ever I was. I may hope, therefore, that the reason I have just given for making these remarks will be accepted, all the more as my bread would very probably be buttered much thicker on the other side.—*Japan Mail.*

Smart Florida Buzzards.

A good deal of wisdom is claimed for the buzzards of Florida. When suffering from cold they will warm themselves at fishermen's fires, and the other day, it is related, the carcass of an alligator that had been shot came to the surface of the water and was espied by a flock of buzzards. They swarmed about it in large numbers, but the wind was so strong that they could not keep a foothold upon it, as it turned and floated with every wave. They held a consultation, and as the result two of them flew at the saurian and fastening their talons in the body spread their wings sail-fashion and piloted the carcass to the shore of the lake, where the flock feasted upon it.—*Chicago Times.*

A Veritable Human Brute.

Colonel Yerger returned home very late and in a demoralized condition.

"Here you are again," said Mrs. Yerger, as she met him at the head of the stairs.

"Yesh, my dear, here I am," replied the Colonel, meekly.

"You are a brute. Here it is twelve o'clock. It will be almost daylight before I get through telling you what I think of you. Here I have to lose my sleep on your account, and I'll feel bad all day to-morrow. You are a vagabond on the face of the earth, etc., etc., etc."—*Texas Siftings.*

THE NEW AMERICAN.

The Species of Humanity Developed on the Great Plains of the West.

The American man, the Drawer imagines, only developes himself and spreads himself and grows "for all he is worth" in the Great West. He is more free and limber there, and unfolds those generous peculiarities and largenesses of humanity which never blossomed before. The "environment" has much to do with it. The great spaces over which he roams contribute to the enlargement of his mental horizon. There have been races before who roamed the illimitable desert, but they traveled on foot or on camel-back, and were limited in their range. There was nothing continental about them, as there is about our railway desert travelers, who swing along through thousands of miles of sand and sage-bush with a growing contempt for time and space. But expansive and great as these people have become under the new conditions, the Drawer has a fancy that the development of the race has only just begun, and that the future will show us in perfection a kind of man new to the world. Out somewhere on the Santa Fe route, where the desert of one day was like the desert of the day before, and the Pullman car rolls and swings over the wide waste beneath the blue sky day after day, under its black flag of smoke, in the early gray of morning, when the men were waiting their turns at the ablution bowls, a slip of a boy, perhaps aged seven, stood balancing himself on his little legs, clad in knicker-bockers, biding his time, with all the nonchalance of an old campaigner. "How did you sleep, Cap?" asked a well-meaning elderly gentleman. "Well, thank you," was the dignified response; "as I always do on a sleeping-car." Always does? Great horrors! Hardly out of his swaddling-clothes, and yet he always sleeps well in a sleeper! Was he born on the wheels? was he cradled in a Pullman? He has always been in motion, probably; he was started at thirty miles an hour, no doubt, this marvelous boy of our new era. He was not born in a house at rest, but the locomotive snatched him along with a shriek and a roar before his eyes were fairly open, and he was rocked in a "section," and his first sensation of life was that of moving rapidly over vast arid spaces, through cattle ranges, and along canyons. The effort of quick and easy locomotion on character may have been noted before, but it seems that here is the production of a new sort of man, the direct product of our railway era. It is not simply that this boy is mature, but he must be a different and a nobler sort of boy than one born, say, at home on a canal-boat; for whether he was born on the rail or not, he belongs to the railway system of civilization. Before he gets into trousers he is old in experience, and he has discounted many of the novelties that usually break gradually on the pilgrim in this world. He belongs to the new, expansive race that must live in motion, whose proper home is the Pullman (which will probably be improved in time into a dustless, sweet-smelling, well-aired bedroom), and whose domestic life will be on the wing, so to speak. The inter-State commerce bill will pass him along without friction from end to end of the Union, and perhaps a uniform divorce law will enable him to change his marital relations at any place where he happens to dine. This promising lad is only a faint intimation of what we are all coming to when we fully acquire the freedom of the continent, and come into that expansiveness of feeling and of language which characterizes the Great West. It is a burst of joyous exuberance that comes from the sense of an illimitable horizon. It shows itself in the tender words of a local newspaper at Bowie, Ariz., on the death of a beloved citizen: "'Death loves a shining mark,' and she hit a dandy when she turned loose on Jim." And also in the closing words of a New Mexico obituary, which the *Kansas Magazine* quotes: "Her tired spirit was released from the pain-racking body and soared aloft to eternal glory at 4:30 Denver time." We die, as it were, in motion, and we sleep, and there is nowhere any boundary to our expansion. Perhaps we shall never again know any rest as we now understand the term—rest being only change of motion—and we shall not be able to sleep except on the cars, and whether we die by Denver time or by the ninetieth meridian, we shall only change our time. Blessed be this slip of a boy who is a man before he is an infant, and teaches us what rapid transit can do for our race! The only thing that can possibly hinder us in our progress will be second childhood; we have abolished first.—*Charles Dudley Warner, in Harper's Magazine.*

America's Gretna Green.

Nearly every State in the Union has its Gretna Green, but few has one that so thoroughly deserves the name as Camden, N. J. The clergymen of that town who do so much marrying are J. Y. Dobbins, Methodist; Rev. J. J. Sleeper, Episcopal; Rev. J. J. Heisler, Methodist, and Rev. Isaac W. Bagley, Baptist. Mr. Dobbins averages 140 couples a month, and, as his average fee is $4 a couple, he makes about $6,720 a year. Mr. Sleeper unites about 60 couples a month, receiving about the same average fee; but as he has had a diagram lithographed showing the most direct route from the ferries to his house he will probably soon be doing a land-office business. Altogether, the clergy of Camden must make fully $25,000 a year out of the marriage business.—*Chicago Times.*

OLD MAN DUNDER.

He Tells the Sergeant About His Experience with a Monte Shark.

"What! you here!" exclaimed Sergeant Bendal the other day, as he looked up and found Carl Dunder standing by the desk.

"Vhell, I pelief it vhas my duty to come down und report on some case. Maype I vhas swindled again."

"I presume so. Most anybody can swindle you. It's a wonder you have a dollar left."

"I vhas awful green, eh?"

"Yes, you are."

"Und I vhas innocent like a shild?"

"About as innocent as a boy three years old. What's the matter now?"

"Sergeant, maype you haf seen a feller take three cards und throw 'em all around on a table like lightning?"

"I have."

"Und he likes you to bet dot you can pick oudt dot ace of hearts?"

"Yes. That's called three-card monte. How much did they get out of you?"

"A man comes in my place yesterday und says vhas I Carl Dunder. I vhas. All right, Mr. Dunder, but I like to show you a trick to play on der poys. It vhas called parlor magic, und eafery pody vhas wildt oafer her."

"I see! And he got fifty dollars out of you, I presume?"

"Vell, he take a seat at der table und pulls oudt three cards und does so—und so—und so, und he laughs all der time und says it vhas a good shoke on der poys. Py und py he like me to pick out dot ace of hearts."

"And you bet you could?"

"Of course."

"Mr. Dunder, you are a bigger fool than I thought for!"

"Sergeant, oxcuse me. If I vash a fool I can't help him. I bet dot man twenty dollars I pick oudt dot card. Shake comes oafer und holdts der money, und I pick out a card."

"And it wasn't the ace, of course?"

"Oh, but he vhas! I pick her right oudt ash slick as grease, und I put dot money in my west pocket. Der feller shumps oop and says dare vahs a big mistake, and he vhants me to try oafer again, but I was not on some try."

"You don't say?"

"Und he gets madt und says he put some heads on me if I doan' gif oop dot twenty. Vhell, I vhas a greenhorn und a fool, you know?"

"And you gave it up?"

"Oh, no! I take lot feller by der neck und make his heels preak two tables und fife peer glasses, und his coat and west vhas all in shmall pieces, und he cries out dot he gifs me ten dollar more if I let oop on him. Dot vhas wery reasonable, und I let him go."

"And you made thirty dollars?"

"You see for yourself. It vhas a twenty und a ten, und in dis package vhas his boot-heels und west-buckle und coat buttons. I like you to put on a ticket of 'Lost Property' und take sharge of 'em. Sergeant, good day."

"But, say, I want to talk with you some ——"

"Sergeant, I vhas a greenhorn und a fool, und I can't shtop any longer!"

"But, here ——!"

"Dot vhas all right. Mebbe I vhas some oldt Dutchmans from a pack county, und eaferypody can shwindle me, und maype I vhas oop to some shnuff. Good-pye, Sergeant. It vhas going to be a hot day, und Shake vhas all alone in der saloon!"—*Detroit Free Press.*

THE COUNTRY IS SAFE.

Puzzling Social and Political Problems Solved for Another Year.

The country, and incidentally the universe, is safe for another year. We have been in great peril, but our danger has been pointed out, and not only so, but the way to safety has at the same time been so clearly indicated that the wayfaring man need not err therein. An abyss of frightful depth has towered above us, overshadowing all this fair land with the deadly blight of its malarial breath in accents that chilled the heart with the Upas-like touch of its basilisk glance, that echoed from sea to shore. But you have saved us, my boy; you and your fellows have snatched us from this living grave, whose hungry breakers dashed their blinding spray and wreathed their angry flames in lurid tongues about our feet. You it is in this month of leafy June have told us of "The Perils of the Republic;" "The Labor Problem;" "The Duty of the Hour;" "The Decay of Patriotism;" "Work and Wages;" "The Deterioration of Manhood;" "The Labor Question;" "The Decline of Statesmanship;" "The Labor Agitation;" "The Weakness of a Republican Form of Government;" "Labor and Capital;" "The Downfall of Liberty;" "The Labor Problem; its Evils and Their Remedy;" "Corruption in Politics;" "The Labor Problem and its Dangers;" "Are we a Free People?" "The Labor Problem a National Menace." The perils that beset our path you have shown us; but you have also guided us into paths of safety. You have told us of "The Only Way to Good Government;" "The Safety of the Republic;" "The True Mission of the Labor Reformer;" "Reforms in the Ballot;" "The Coming Man," "The True Reformer;" "The Hope of Our Country;" "The Conservation of Popular Government;" "Labor Reform;" "The Outlook of the Hour;" "Labor Agitation a Blessing;" "Our Legacy for Our Children;" "What we Owe to Posterity;" and your sisters have nobly rushed to the rescue with assurances that "Night Brings Out the Stars;" and moreover that "Man is the Arbiter of His Own Destiny;" "Woman's Sphere;" "The Influence of Woman;" "Woman's Duty;" "Woman, the Hope of the World," and "Spring." Heaven bless you, my children; you have saved us; Heaven bless you! Come again next commencement.—*Burdette, in Brooklyn Eagle.*

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY SEPTEMBER 24 .....1887.

Ranch for Sale.

At Black Rock, twelve miles north from Independence, 520 acres of land for sale. Black Rock is one of the very best parts of Owens Valley. Four hundred acres of this land is held under U. S. patent; the remainder is located under the timber culture Act. One hundred and eighty acres are enclosed by a fence of cedar posts and barb wire. Sixty acres are now under cultivation, mostly wheat, oats and barley. A large amount of hay can be cut; blue joint, red clover etc. Several large springs of pure water on the place and good water rights additional. House, outbuildings and corrals. C. & C. railroad half mile distant from east line of land. Owens river eighty rods distant. This is a fine place for an energetic man to improve and will be sold at a bargain. Apply to

C. MULHOLLAND,

MISCELLANEOUS.

NOTICE.

AGRICULTURAL DISTRICT NUMBER 18.

Notice is hereby given that all parties are invited to send for exhibition at the Fair of Agricultural District No. 18, of California, all kinds of manufactured articles of American production; all products of the soil; mineral products; objects of a curious nature, or such as are of interest to science; collections of native insects; fossils, rare books, or other printed matter or manuscripts. The Directors desire to make an interesting display and will welcome everything that will be likely to instruct or entertain the public. Full guarantee will be given for the safe return to the consignor of any article sent for exhibition at the Fair, which will begin at Independence October 4th and continue through the week. Anything consigned for exhibition should reach Independence not later than Saturday, October 8th and should be addressed to the Secretary.

C. MULHOLLAND,
Secretary Agricultural Dist. No 18.

FOR SALE.

A ranch of 320 acres, within three miles of Independence, the County Seat; nearly all enclosed by a three-strand barbed wire fence, and subdivided; a small dwelling house and a number of outbuildings; 10 acres set out to fruit trees, a portion of which are bearing, consisting of choice varieties of Apples, Pears, Apricots, Plums, Prunes, Nectarines, Cherries and Quinces, also, about two-thirds of an acre of bearing grape vines. Nursery stock enough on hand to set out from 10 to 15 acres of orchard. Received six first premiums on Apples, Pears, Plums, Prunes and Grapes, exhibited at the Eastern Slope Agricultural Fair, held in Sept., 1886. For price and terms apply to

J. W. SYMMES.
On the Ranch.

Independence, May 7, 1887.

Office at Mr. Peeler's residence.

TAKE SIMMONS LIVER REGULATOR

For all Diseases of the

Liver, Kidneys, Stomach and Spleen.

This **purely vegetable** preparation, now so celebrated as a Family Medicine, originated in the South in **1828.** It acts **gently** on the **Bowels and Kidneys** and **corrects** the action of the Liver, and is, therefore, the **best preparatory medicine,** whatever the sickness may prove to be. In all common diseases it will, **unassisted** by any other medicine, **effect a speedy cure.**

The **Regulator** is safe to administer in any condition of the system, and **under no circumstances can it do harm.** It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance; will **promote digestion, dissipate headache, and generally tone up the system.** The dose is small, **not unpleasant,** and its virtues undoubted.

No loss of time, no interruption or stoppage of business while taking this Regulator.

Children complaining of **Colic, Headache,** or **Sick Stomach,** a teaspoonful or more will give relief.

If taken occasionally by patients exposed to MALARIA, will expel the poison and protect them from attack.

A PHYSICIAN'S OPINION.

I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system. L. M. HINTON, M. D., Washington, Ark.

SEE THAT YOU GET THE GENUINE.

PREPARED BY

J. H. Zeilin & Co., Philadelphia, Pa.

161 acres well improved with good dwelling and out-houses, farming machinery, horses, cattle, etc. Located in the most desirable portion of the valley. Good water title. For further particulars inquire of

AGENTS WANTED for the MISSOURI STEAM Washer Active, honest persons all over the country, with or without teams.

JOHN C. EVANS, BROCTLAND, Mo., writes: "I stand up and allow Old a Washer saves more hard labor as I money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. It will cut up any instrument that will take as much labor off of men as this Washer takes of the women, and save as much money as it does and cost no more. I could sell one at every house, if they had to take the feathers from under their wives and babies to pay for it." JOHN R. DODGE, JR., jeweler, Noble, Ill., writes: "You ask what I think of the Washer I bought last summer. Jd. It is the best machine ever invented by man. 2d. We have had as good dinners on Monday as on any other day. 3d. If you run short, you can not borrow. For $10?" I will ship a sample to the Solicitor an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents $125 monthly. Write for particulars. J. WORTH 1710 Franklin Ave., St. Louis, Mo.

FIRST ANNUAL FAIR OF Agricultural District

No. 18.

STATE OF CALIFORNIA.

Composed Of the Counties of

ALPINE, MONO & INYO.

TO BE HELD AT

Independence,

Commencing Monday, October 10th, and Continuing Five Days.

A. R. CONKLIN.....President.
C. MULHOLLAND.....Secretary.
O. I. MAIRS.....Treasurer.

BOARD OF DIRECTORS:

A. R. CONKLIN,	NATHAN RHINE,
WM. WALKER,	W. S. ENOS,
W. K. MILLER,	HARVEY BOONE,
T. J. GOODALE,	JOHN SHEPHERD.

FIRST DAY—Monday.

First Department.

In this department the same animal shall not be entered more than once, except in sweepstakes or as a junior member of a family exhibited with its sire or dam. Any stallion, mare, gelding or colt competing in a race will not be excluded from competing for premiums in their respective classes.

CLASS I.
THOROUGHBRED HORSES.

Best stallion, 3 years old and upward	$30 00

CLASS II.
STANDARD BREDS.

Best Stallion, 3 years and upward	20 00
Best Stallion, 2 year old	20 00
Best Stallion, 1 year old	15 00
Best Colt under 1 year	10 00

CLASS III.
ROADSTERS.

Best Roadster, 3 years and upward	20 00
Best Roadster, 2 year old	10 00

Will have to be shown to harness.

CLASS IV.
GRADED HORSES.

In this class none shall be awarded premiums but such as furnish proof of a cross, either of sire or dam with a thoroughbred.

Best stallion, 3 years old and upward	$15 00
Best stallion 1 year old	10 00
Best mare, 3 years old and upward	10 00
Best mare, 2 years old	5 00
Best mare, 1 year old	5 00

CLASS V.
HORSES OF ALL WORK.

Best stallion, 3 years old and upward	$15 00
best stallion, 1 year old	5 00
Best mare, 3 years old and upward	7 50
Best mare, 2 years old	2 50
Best mare, 1 year old	2 50
Best stallion and family, not less than three	20 00

CLASS V.
TEAMS.

Best matched team	$15 00
Best single gelding, 3 years old and upward	7 50

CLASS VII.
DRAFT HORSES.

Best stallion, 3 years old and upward	$15 00
Best matched team	15 00
Best single gelding	7 50

CLASS VIII.
SWEEPSTAKES.

Best stallion any breed or age	50 00
Best mare, any breed or age	50 00

SECOND DAY—Tuesday.

CLASS IX.
JACKS.

Best Jack, 2 years old and upward	$7 00
Best Jennet, 2 years old and upward	2 50
best Jack and jenny, not less than three	10 00

CLASS X.
MULES.

Best span owned by one person	$10 00

CLASS XI.
CATTLE—BULLS.

Best bull, 1 year old and upward	$5 00
Second best bull, 1 year old and upward	5 00
best bull calf	10 00

CLASS XII
COWS.

Best cow, 3 years old and upward	$10 00
best cow, 2 years old	5 00
best heifer calf	5 00

CLASS XIII.
SHEEP.

Best ram, 2 years old and upward	$5 00
Best lot of ewes, not less than five	5 00
Best lot of ewe lambs, not less than five	2 50

CLASS XIV.
GOATS.

Best lot of goats, not less than three	$5 00

CLASS XV.
SWINE

Best boar, 2 years old and upward	$2 50
best boar under 2 years old	2 00
Best sow, 2 years old and upward	2 00
Best sow, 1 year old and under	2 50
Best pen of 5 pigs, any age or breed	2 50

CLASS XI.
POULTRY ETC.

Best pair of fowls, any age or breed	$2 00
Best hen and brood of chicks	2 00
Best pair of bronze turkeys	2 00

THIRD DAY—Wednesday.

Second Department.

CLASS I.
AGRICULTURAL PRODUCTS.

All products exhibited in this Department must have been produced in Nevada, or in California east of the Sierra Nevada mountains, and by the exhibitor.

Best 100 pounds of flour	$5 00
Best 100 pounds of wheat, any variety	3 00
Best 100 pounds of barley	3 00
Best 100 pounds of oats	3 00
Best 100 pounds of corn	2 00
Best 50 pounds of alfalfa seed	2 50
best bale of timothy hay	2 50
Best bale of alfalfa hay	2 50

CLASS II.
VEGETABLES, ROOTS, ETC.

Best 10 pounds of sweet potatoes	$2 00
50 pounds Early rose potatoes	2 00
100 pounds any variety of potatoes	2 00
12 parsnips	1 00
12 carrots	1 00
12 pounds turnips	1 00
12 beets	1 00
10 pounds tomatoes, any variety	1 00
½ doz. cabbage	1 00
50 pounds any variety Irish potatoes	1 00
½ doz. squash	1 00
pumpkin	1 00
sample of any vegetable	1 00
½ doz. watermelons	1 00
½ doz. cucumbers	1 00
½ doz. cantaloupes	1 00
10 pounds of white beans	1 00
10 pounds of pink beans	1 00
10 pounds garden peas	1 00
Display of Agricultural Products	20 00

CLASS III.
DAIRY AND FARM PRODUCE.

Best 10 pounds of butter in rolls	$2 50
10 pounds of butter, 20 pounds 3 months old	2 50
10 pounds of cheese	2 00
10 pounds of lard	2 50
display of honey	Silver Pitcher
Apiary display	5 00
variety of fruit in jars	2 00
variety of jellies	Silver Butter Knife
variety of preserves	Set of Teaspoons
variety of pickles	Pickle Jar
Sample of hams and bacon, each	5 00

FOURTH DAY—Thursday

Third Department.

CLASS I.
HORTICULTURAL PRODUCTS.

Best ½ doz varieties apples	Glass Water Set
3 varieties apples	Fruit Knife
display pears	$2 50
peaches	2 50
plums	2 50
quinces	Sugar Tongs
grapes, four varieties	2 00
grapes	1 50
5 pounds dried apples	1 50
5 pounds dried peaches	1 50
5 pounds dried plums	1 50
exhibit of dried fruits in varieties	2 00

Fourth Department.

CLASS I.

Best set harness manufactured in district	$5 00
bridle made in district	2 50
pair boots made in district	2 00
pair lady's shoes made in district	2 00
½ doz. brooms made in district	2 00

Fifth Department.

CLASS I.

Best 4 bottles wine made in district	$5 00
second best	2 50
Best 4 bottles brandy made in district	2 00

Sixth Department.

Best patchwork quilt	10 00
Best crochet quilt	10 00
Best silk embroidery	5 00
Handsomest crazy quilt	10 00
Handsomest pillow sham	5 00
Handsomest sofa cushion	5 00
Handsomest tidy	2 50
Best specimen crochet work	2 50
Best display fancy articles	10 00

FIFTH DAY—Friday

Seventh Department.

CLASS I.

Best oil painting of any kind	$5 00
Best drawing, any color	2 50
Best crochet ornaments	1 00
Collection of paintings by the Ladies	3 00

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, SEPTEMBER 24 1887

BORN.

SCOVIL.—At Georges Creek, September 25, 1887, to Mr. and Mrs. T. B. Scovil a daughter.

Manuel Diaz was in town on Wednesday.

Increasing prepations are being made for the Fair.

The pavilion exhibition will be well worth seeing.

The second crop of alfalfa is now just about gathered.

Two thousand dollars will be expended in premiums at the Fair.

The Fair ball at the pavilion will be the grandest ever held in the county.

Quite a number of Independence people attended the Fair at Bishop Creek.

Messrs. Enos and Russell went to Round valley this week to look at stock cattle.

Mr. Janvier will commence school in the George's Creek District, next Monday.

The old school building at Independence will be sold at public auction October 1st.

John Kernagan was hanged in San Francisco last Friday for the murder of his sister-in-law.

O. C. Hill and Frank Leonard, of Bodie, were at Independence at the beginning of the week.

The Standard and Bulwer mill, at Bodie, has been started up again, after being idle a long time.

The daily *Alta* has been enlarged. The *Alta* is a clear, reliable sheet, unbiassed in its views, and newsy.

An inch and a half pipe has been laid to the race track. The large sprinkler and several teams are at work.

The blacksmith shop has been running night and day during the week. Reub. Spear is working with Matlack.

Mr. Arthur Smith came in from Darwin on Tuesday. He will remain at Independence until after the District Fair.

Messrs. Boland, McKinsey and Gould were on the train Tuesday morning on their way to attend the fair at Bishop Creek.

Miss Minnie Collins who had been in Los Angeles for some time came home with her mother to Warm Springs at the end of last week.

Mrs. R. L. Peeler left Independence last Tuesday morning to join her husband at Fresno city. Her mother accompanied her as far as Bishop Creek.

Miss Barnes, of San Francisco, has been engaged to teach during the ensuing school term at Independence. School will open on the 15th. of next month.

Charley Mate's pack train went over to Waceba on Wednesday, to pack out ore for Messrs. Hunter and Alexander. They have about eleven tons ready for shipment.

Mr. Scott Broder came over from Deep Spring early in the week, and is making Independence a visit. His partner W. A Greenly went to Bishop to take in the Fair.

Now is the chance for the ladies. One hundred dollars will be given in premiums for the best lady riders. Forty dollars for the best, thirty for the second, twenty for the third and ten for the fourth.

C. D. Cutless, John Powers, Charles Tibbets and Charles Whittick, all of the South Fork of Kern River, were at Independence at the beginning of the week, on business at the Land Office.

It is asserted by those who have experience that if cattle eat alfalfa after it has been rained upon; and before it is again thoroughly dried, they will certainly bloat. Rain at this season is so rare that many people may not have had experience in this matter.

Plumas, Shasta, Sacramento and other counties in our own state and several places in Oregon made extensive exhibits at the Nevada State Fair at Reno. Owens valley could have made a display that would have brought us honor and profit; but enough has been said on this subject.

The killing of Cahoon by Busby is creating considerable excitement in Tulare county. The Coroner's jury returned a verdict of shooting with criminal intent, and ordered arrest of Busby. Cahoon was an old man with a young wife, and "Dannie" Busby was a bright young man from Kansas. The inevitable result followed.

A ripple of excitement was caused Tuesday by John Erwin's dapple duns taking a too rapid turn around the corner resulting in a dumpout of the occupants of the vehicle, after which the animals circled to suit themselves. Erwin had his face badly cut but there were no serious results. The team and wagon were uninjured.

Frank Williams, his wife and children, arrived at Bishop Creek at the beginning of this week. Mr. Williams lived in Plumas county nearly thirty years; but having heard much about Owens valley at length determined to come and make his home here. Mr. Williams is an industrious man and will make a good citizen; for the present he has rented a place near Bishop Creek.

Mrs. Collins, of Warm Spring, returned from Kern County at the end of last week. She went to Kern to nurse a dying sister, and has brought back with her a little orphan niece, Mr. John Collins accompanied his mother; he says the hay crop is light in Kern and feed for stock very scarce. He knows of one instance where pasture for the fall and winter had been rented at ten dollars per acre.

By referring to the revised premium list published this week it will be seen that a number of changes have been made, the premiums in each case being extremely liberal. The new pavilion building will afford accommodation for the handsome exhibits that will be shown. It is placed in the center of a five acre lot enclosed by a board fence eight feet high; the stock sheds will be within this enclosure. By another year this will be levelled and set out with trees and shrubs, and lawn grass started making it a delightful promenade. This, together with the fine new school building and the water works are improvements that speak much for the prosperity of the town.

WATERSPOUT.

Loss of Life and Property.

On Wednesday night of last week a waterspout burst in the mountains near Walker's Pass. A terrible flood rushed down the canyon toward Kern river. In the canyon a sheepman was camped with two horses and a wagon; the man, the horses and the wagon were all swept away. The body of the man was found miles down the canyon a day or two after the flood. The bodies of the horses had lodged among rocks not far from where the man had camped. There is a farm in the canyon known as Canebrake, and occupied by a widow. It was a very nice place before the flood, but is now ruined. Part of the house was swept away, and the rest was moved from its foundation. The whole would have gone but for some large willow trees growing close to the house. When the waters subsided mud to a depth of a foot or more was found on the floor of the part of the house that was left. Marks left by the flood in the canyon showed that the water must have been at least thirty feet deep in places. Parties who have been in that region twenty years or more say they never saw anything of the kind before.

The Bishop Creek Fair.

The Fair at Bishop Creek opened last Tuesday. As usual at all fairs, exhibitors were behind with their goods and the pavilion was not filled up till the middle of the week. In the end, however, the exhibits made were such as any country might well be proud of. The season is too far advanced for a display of fruits other than apples and grapes; but of these, samples were shown that might be equaled, but not excelled. In vegetables and grain the display was equally creditable, the samples shown being all very fine. Mrs. Sneden showed two lots of peaches of different varieties that were fine, when the lateness of the season is considered. In the neighborhood of Bishop Creek much care has been given to horse raising and many very fine animals were shown. For quality if not for quantity the display of horses was quite equal to anything that could be seen at any other fair in the state. The Norman horses shown by Mr. Rowan, and the product from these fine animals, would take rank with the best of their kind anywhere. Mr. Sanger, of Alvord, showed a lot of draught mares that would be hard to beat; he also showed a thoroughbred Hambletonian stallion that there can be no doubt is one of the finest animals of that famous strain that ever lived. This is a grand horse. Many others had fine mares and geldings on exhibition; but no complete lists of animals exhibited has been provided. The race track is half a mile north of town; a great deal of work has been done upon it, but much more will be required to make it a first rate track. The ground is as level as billiard table and can be made as good a course as need be wished for. A sprinkling cart will be found a necessity. At the pavilion many very beautiful articles of ladies work were shown; some specimens of embroidery on velvet were lovely. In lace work and kindred articles the exhibits, while not numerous were beautiful. The premium lists were not available at latest reports.

Cliff Mine.

Greenly & Broder have developed a good mine at Deep Spring, in the Inyo range. They are taking out and shipping rich ore; the last shipment was of two lots; the first lot returned them 400.53-100 ounces silver per ton; the second lot yielded 1500.51-100 ounces per ton. The ore is shipped to the Reno reduction works. The silver is in masses of bright crystals mixed with fly quartz. At first sight these crystal like masses might be taken for ordinary galena; but no return for lead has yet been made from the ore. So far as opened this ore body gives indications of being extensive and proving a very valuable property. Mr. Greenly operated at Cerro Gordo in its best days, and he says this is the best mine he ever had anything to do with. In the same locality the same parties have found a vein of gold bearing ore that is very rich; samples of this or yielded over $1,000 per ton. The vein is very small and but little work has been done upon it. Deep Spring promises to be a big mining camp; it is about twenty five miles east from Alvord on the C. & C. railroad. The country is well watered and there is plenty of timber.

Dramatic.

The I. A. D, A. will give two unrivalled representation of the celebrated emotional dramas "Lady Audley's Secret" and "Led Astray" during the Fair. The very finest scenery has been obtained, and the stage appointments are unrivalled. An incredible amount of money has already been expended in the necessary arrangements and much more will be needed. The cast comprises the best elocutionary talent who possess to a great degree the ability to feel and exhibit the refined emotions of the two plays. The reserved seats are now nearly all engaged; parties desiring same should apply at box office without delay.

Irrigating in Stanislaus.

The Board of Directors of the Turlock Irrigation District, of Stanislaus county, has issued a call for an election to take place on the 8th of October, when the question of issuing bonds to the amount of $600,000, under the Wright Law, for the purpose of constructing an irrigating system, will be tested. The estimates for the work made by the engineer who had charge of the surveys, placed the cost at $467,444; but the Directors concluded to issue $600,000 worth of bonds in order to be sure of enough funds. Embraced in the Turlock District are 217.00 acres of land, which places the cost of the irrigation system at 3.30 per acre. This covers the entire expense for main canal and distributing ditches. A distributing ditch will be dug on every section line. At present the average price of land in the district is $20 per acre, but with plenty of water for irrigating purposes it is valued at over $100. There is probably not a township in California of equal extent that produces more wheat on an average. Owing to the dryness of the soil and climate but little else than wheat can at present be grown.

Mr. W. Graham and Mrs. Dr. Woodin, came down from Big Pine on Thursday. They have been camping west of that place at Coyote valley for several weeks. Mr. Graham's health is much improved,

Old cellars left from the fire are being filled up. The streets are being cleaned and the town put in presentable shape for the Fair.

Charles Walters and Pat. Keyes, came over from the White Hill on Thursday.

The last issue of the Bridgeport *Chronicle-Union* contains in full the decision of the Supreme Court in *banc* on the sheep license question.

Mrs P. M. Bowler, wife of the editor of the *Esmeralda News*, died at Hawthorne last week.

American Party.

A convention of the American party met at Philadelphia and adopted a platform. Among other things the platform declares the present system of immigration and naturalization of foreigners to be detrimental to the welfare of the United States, and demands the establishment of a Department of Immigration, the head of which will be a member of the Cabinet. It demands a revision of the naturalization laws making a continuous residence of fourteen years indispensible and requisite for citizenship, and excluding all Communists, Socialists, Nihilists, Anarchists, paupers, and criminals, but no interference with the vested rights of foreigners. It demands protection for the free common school system, and recommends a free compulsory education in all the States and Territories. It also recites that American lands should be reserved for American citizens, non-resident aliens being debarred from ownership in real estate and resident aliens holding a limited quantity in area and value. It condemns the donation of lands to private corporations. It also asserts that the surplus in the Treasury should be released to the people, and a judicious system of internal improvements and construction of fortifications and Navy are demanded. It reasserts the American principle of freedom of religious worship and belief; recognizes the right of labor to organize for protection and secure to itself, by lawful and peaceable means, greater rewards; demands a firm and consistent foreign policy, and vigorous assertion of our national dignity and rights, especially in the North Atlantic fisheries question.

Fair Notes

Mr. and Mrs. B. G. Smith, of Candelaria attended the fair at Bishop Creek.

A good many people from Independence attended the Bishop Creek fair.

The Bishop Creek Brass Band has greatly improved in their playing.

One of the Clydesdale mares shown by Mr. Sanger weighed 1692 pounds.

Mr. Al. Taylor, had a fine carriage team but did not enter them for the race.

The carriage team race was won by Mr. A. H. Allen, of Bridgeport. The horses are a very handsome pair.

Mr. H. A. Man had a very fine cabinet of minerals in the pavilion. Many of the specimens are of great beauty and richness.

The largest display of fruit at Bishop Creek fair was made by Mr. W. T. C. Elliott, of Big Pine. In variety, extent and beauty, the display would attract attention anywhere.

Mr. William Charles showed a lot of very fine specimens of Anglesite from the San Carlos mine near Independence. This is a valuable ore of lead and silver.

A fine display of grain could easily have been made; and yet in this line the showing was very meagre. Farmers should take a little more interest in this affair. The few samples of corn, wheat, oats and barley were excellent.

A very pleasant entertainment was given in the lecture hall of the Academy on Wednesday evening. The hall was crowded and every part of the concert was warmly applauded. While all parts were good, an old fogie will be excused for expressing his pleasure at hearing a beautiful rendering of "The Brook" and "Pass Under The Rod."

Mr. I. P. Yaney showed a very fine display of the celebrated agatized fossil wood from Arizona. Several of the specimens are polished, and show the most beautiful markings. One large piece of amethyst is encrusted all over with beautiful crystals of all colors from pale lilac to deep purple. This is a very fine specimen; the whole collection is well worth going far to see.

From California 1500 veterans attended the Grand Army meeting at St. Louis.

The mains for the water works were all laid this week and water was turned in.

The Standard-Bulwer mill at Bodie has been started up after a long season of idleness. There is some revival in the mines.

There will be a song service at the church Sunday evening at 7½ o'clock. Some new music will be on the programme. All are cordially invited.

The *Chronicle Union* states that quite a number of Monoites intend attending the District Fair. They will receive a hearty welcome.

J. W. McMurry, of Big Pine had a stroke of paralysis at the beginning of the week; he is reported to be improving. Dr. Woodin was telegraphed for to Independence, and has the patient in charge.

Much progress has been made during the past week in getting the pavillion ready. The sprinkling cart has been in frequent use at the race track, and other work is steadily kept up to put the track in good condition.

From a little patch of about thirty acres on his place at Alvord, Mr. Sanger this season gathered 600 sacks of first class barley. On the same patch as fine a crop of alfalfa as need be wished for is now ready for cutting. Until late in the spring the land was desert sage brush. There will not long be wanting plenty of inhabitants in a country where wild land can be cleared so easily and two good crops gathered from it the same season.

WONDERS OF THE DEEP.

CORAL SHELLS, and other MARINE CURIOSITIES. We have agents constantly employed in securing rare specimens of the above named articles, and offer to the public as fine a collection for ONE DOLLAR as they can procure at any regular shell store for double the amount. OUR DOLLAR CABINET, containing over TWENTY VARIETIES of Shells, Coral, etc., will please both old and young. Carefully packed, and mailed postpaid to any address in the United States or Canada, on receipt of ONE DOLLAR. Address, MARINE CURIOSITY SUPPLY CO., (Box 15) KEY WEST, FLORIDA.

Who Spends Money

For advertising in newspapers in these hard times, without first obtaining an estimate of the cost from Geo. P. Rowell & Co's Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents for 176 page pamphlet with list of newspaper rates and references.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine

Bee Keeper.

THE REFORMER.

Before the monstrous wrong he sets him down—
One man against a stone walled city of sin.
For centuries those walls have been a-building;
Smooth porphyry, they slope and coldly glass
The flying storm and wheeling sun. No chink,
No crevice lets the thinnest arrow in.
He fights alone, and from the cloudy ramparts
A thousand evil faces jibe and jeer him.
Let him lie down and die: what is the right,
And where is justice, in a world like this?

But by and by earth shakes herself, impatient;
And down, in one great roar of ruin, crash
Watch tower and citadel and battlements.
When the red dust has cleared, the lonely soldier
Stands with strange thoughts beneath the friendly stars. —E. R. Sill in The Century.

OUR NEWSPAPER HEADLINES.

American Originality and "Smartness" Astonish Our English Cousins.

In England sensationalism and anything approaching "smartness" are avoided; but in America the very opposite is the rule. Indeed, so much attention is paid to headlines in that country that there is engaged on the staff of every newspaper of importance a gentleman whose duty it is to supply headlines to articles and paragraphs. Some of these headline writers are paid large salaries and have a wide reputation.

Mr. George Augustus Sala once said that American journalists rarely take anything seriously; they are perpetually trying to be smart and amusing. Few people who have even an elementary knowledge of American newspapers will call into question the truth of Mr. Sala's assertion. The American journalist is nothing if not original, and this ruling passion is strikingly exemplified in the very headlines.

We have, for instance, never seen but one heading in English newspapers for those simple announcements which never fail to interest female readers—we mean the Births, Marriages and Deaths. In America, however, they use such headlines as Cradle, Altar, Tomb; Hatches, Matches, Dispatches, and so on; while one original genius sums up life thus—Births, Flirtations, Engagements, Breakings off, Marriages, Divorces, Deaths. Then, instead of the familiar heading, Poetry, we find Lays of the Latest Minstrels, or the Warblers' Corner.

The columns of clippings, however, afford scope for the most variety. One editor heads his column of jokes, Render unto Scissors the Things that are Scissors; while another follows with Aut Scissors aut Nullus. One Thing and Another, Drops of Ink, Various Topics, Microbes, Nuggets, All Sorts, Faggots, Pressed Bricks—these are a few others taken at random. Hash is, however, perhaps the most appropriate of the lot. These headlines appear very strange to us; yet it should not be forgotten that, nearly 100 years ago, The Times published weak jokes under the extraordinary head of "Cuckoos."—Chambers' Journal.

Hangers On in Journalism.

"I hate to see a man enter that room," said the city editor of a morning paper to an applicant for work. "Look at those young men sitting round that table; they are all waiting for me to give them assignments, and I have none to give. Why don't they come in here and suggest something themselves?" Most city editors in New York have the same feeling. They are overrun with applicants for places, and two-thirds of those who present themselves are utterly unfit for the work they wish to do. The space system of pay for local newspaper work intensifies the pressure. Any man with paper and pencil can write what may be published and paid for, and so when a man finds other doors closed against him he goes to a newspaper office. A good many women seek the same refuge. The patience of city editors under the infliction is marvelous. Perhaps it is partly accounted for by the fact that most of them do not have to edit the manuscript turned out by these beginners. It is handed over to those luckless wretches, the copy readers, and they generally make short work of it.—Cor. Philadelphia Record.

How Consumption is Communicated.

Professor Ruhle, of Bonn, in a recent paper on consumption of the lungs, states that in his opinion the most frequent manner of contracting this malady is from a diseased person through the sputa, also through the glands, exfoliations from the skin, or any way in which the poison may appear on the surface and be transported by means of pocket handkerchiefs, washing, etc. The fact that the attendants in hospitals who have the care of consumptives are seldom attacked with the disease, conviced the writer that it is not the air through which the germs are carried, but it is communicated in another mode, in fact, the way in which the members of the family kiss and fondle the patient and handle his linen. From one member of the family the special germ which excites the disease goes to another. Instances can frequently be found, on inquiry, where the parents transmit the disease to their children, in such cases the family physician should put in his word of warning.—Boston Herald.

The Jerry Builders in Rome.

The jerry builder is not to have it all his own way in Rome. The municipality has at last interfered and declared that overgrown, decrepit, insanitary structures are no longer to be run up like mushrooms and finished off, let and inhabited before the plaster is dry. The speculators and contractors who have hitherto been monarchs of all they surveyed protested against this interference with the vested interests of dishonest workmanship; but the S. P. Q. R. will probably stand firm, the evil having grown to intolerable and impossible dimensions. There is a grim satisfaction in knowing that the huge factories (for they resemble nothing else) which disgrace the Esquiline and the Prati di Castello are not quite so permanent as the Colosseum, and are scarcely more desirable as places of residence. They will rapidly crumble away, to be replaced, perhaps, with buildings more worthy of the Eternal City. But in the mean time, and for a generation or two at least, Rome is architecturally disgraced in the eyes of the civilized world. —Pall Mall Gazette.

His Sunday Nose.

"I once knew a sea captain who came from about here," he continued in a lighter strain, "who had an encounter with a shark in his youth and lost his nose, and for the sake of harmony rather than vanity he had a tin false nose made to look as much like the lost feature as possible. When he went to sea he tried always to make his crew recognize the Sabbath with appropriate respect and observance; he therefore ingenuously had a silver nose made for himself which he wore on Sunday, keeping the tin nose for week days, and the signal was always respected, so far as he knew. Perhaps he never heard that the sailors always called the Sabbath "Silver nose day," as they might well have easily been pardoned for doing.—Boston Post.

The Limitations of Our Senses.

We cannot see under a certain size or beyond a certain distance. The retina makes no accounting of the photographic dark beyond the violet, and knows naught of the heat dark this side the red. In the world of unheard sound about us some notes we cannot hear because they are too high and some because they are too low. We live in a world of odors, of which, to our grave loss, we smell a bare hundredth part of what a healthy dog smells. These limitations we daily act upon, and the use of all instruments of precision rests upon them.—The Century.

Boys' and Girls' Lunch.

A gentleman of leisure stopped recently near one of the coffee and pie stands that abound down town in the neighborhood of large employing establishments with the purpose of ascertaining what the boys and girls ate and drank at their noonday lunch. So soon as the whistle blew for 12 o'clock he found the stands swarmed and more coming. Many of the boys and girls came kettle in hand, which was filled with either "coffee" or milk, and after a light purchase of pie or cake the lunch was carried to the shop for consumption. The milk is necessarily good, as it wouldn't pay the proprietor of the stand to have it otherwise, and have an inspector with his lactometer to discover it. The "coffee" is not subject to official suspicion, and therefore is generally worthy of doubt. The pies, he fancied, must be good, as they are supplied by great manufacturers who turn them out by the thousands and can afford to put palatable "works" of varied ingredients into them, as by buying fruits and berries and sugar in big quantities they get them very cheap. As to the crust, it isn't any too rich. The cakes were dry, and what nourishment the girls that eat them obtain from the peculiar food is a puzzle. One accomplished young lady, who boasted of a thick bang, when questioned on the subject, replied: "Oh, we soaks 'em." A boy called for a piece of rhubarb pie, and washed it down with a glass of lemonade. He took his lunch after the style of other gentlemen—those who patronize down town Delmonico's, Nash & Crook's and the Astor house. He ate from the counter and called for his check. Possibly he tipped the waiter, too. —New York Times.

Professor Gray's Telautograph.

Professor Elisha Gray, of telephone fame, is perfecting an invention with wonderful possibilities, and one which promises great results. It has already reached that stage which insures its practical success, the experiments thus far proving eminently satisfactory. The "telautograph" is the name by which the instrument will be known, which, by the way, conveys a very fair idea of what the instrument really is. Once in operation it will be possible for the Chicago speculator to deliver to the New York broker a telautographic order to buy or sell 1,000 or 10,000 shares of railroad stock, an exact fac simile of the order being reproduced in that city at the same instant it is written here. If the Chicago man happens to be in New York and wants to send his wife a check for money he simply writes it out in that city, and the moment he is through it is in his wife's hands here. The electric current, of course, is an important factor in the invention, but the chief feature is the plate or instrument on which the writing is done. No particular kind of pen or pencil has to be used; in fact, a sharp pointed instrument of any kind, or even a piece of wood, will answer the purpose. The paper on which the writing is done and the autograph reproduced does not have to be prepared, for in the first instance it is the pressure on the plate which gives the impulse to the machine, while the reproduction is brought about by a tracing point, which may be a properly inked pen or even an ordinary lead pencil attached to a movable arm in the receiving machine at the other end of the line.—Chicago Tribune.

Wouldn't Sell His Drunk so Cheap.

Standing in the lobby of a hotel in Bangor not long ago I got into conversation with a gentleman who was representing a medical apparatus with a long Greek name. It is not my intention to give the arrangement for vapor baths a puff, but I do want to describe a rather funny incident that followed our conversation. My companion had just been describing to me how his process would sober off in half an hour a man on the verge of delirium tremens, and how many men never thought of going home to their families without having recourse to his machine. While we were talking a man, evidently very much under the influence of too potent libations, came in, and, leaning over the counter, began a rather thick conversation with the clerk. We sauntered over, and soon were on the best of terms with the devotee of Bacchus. After a while the man said he wished he could taper off and go home. Here was an opportunity, and the machine above referred to was explained to him. Five minutes later he had staggered up stairs, and stood ready to be cured. His coat was already off, when a drunken idea seized him. "Shay, what er th' cost of a bath?" he asked. "Two dollars," was the reply. "Well, hic, this drunk's cost twenty dollars, and no feller's goin' to get it for two dollars. I'll keep it first." And he did.—Lewiston Journal.

Bogus Jellies and Jams.

A physician who has studied "the small economies of life" tells how the jellies which some bakers put into their tarts and jelly cakes are made. No wonder grocers can sell them so cheaply. The directions are as follows: Take four quarts of water and half a pound of alum; boil two minutes; add thirty-two pounds of white sugar; boil five minutes longer; strain while it is warm (and the hotter it is the easier) through a coarse towel; when nearly cold, add two ounces of acetic acid and one-half a pound of real currant jelly. When cool, pack it in tumblers and label with a picture of a currant bush and a child picking currants. If you desire a vanilla jelly, add in place of the currant jam four twenty-five cent bottles of the extract of vanilla, and stir in when nearly cold. If you desire strawberry jam, prepare the alum and sugar as before, and add half a pint of the essence of strawberry; or, if lemon is desired, add essence of lemon. You can make what you like with these proportions of alum and water. This is the way to make the grocers' jelly and the jam that is placed on tarts in the confectioneries and the bakeries.—Boston Herald.

Rather an Exaggerated Type.

The German, the Frenchman, the Englishman, would not like to be taken for anything else; why should the American? I don't know, but it is so. I have never seen more than two or three Americans in Europe of whom I was able to believe that they would not be secretly pleased to be mistaken for Englishmen. Very often, indeed, I have had young men approach me in conversation in continental hotels or cars and confide to me in the purest Chicago or St. Louis idiom that they were English. One of these, I remember, a refugee in Paris from the earthquake panic on the Riviera last winter, gravely answered me, when I asked him what part of England he came from, "The county of Berkshyre." Of course this sort of young fool is familiar in America, and his folly is properly commented upon. But he is after all only an exaggerated type of the great average mass of Americans who swarm over the continent during the opera season.—London Cor. New York Times.

Imitative Ethel.

Little Ethel has a bachelor uncle, and she had noticed that when he wanted to be very emphatic he used a certain monosyllabic word of four letters. Not long ago Ethel was afflicted with quite a severe pain under her little apron, the result of too free an indulgence in the toothsome cucumber. When Uncle Jack came home at supper time he was informed of the grievous plight of his little favorite, and hastened to her comfort.

"Well, Ethel, my dear," he said, advancing to the sofa, "how do you feel now?"

"Pretty d—n miserable, thank you, Uncle Jack," she replied with an air of having said quite the proper thing under the circumstances.—Chicago Tribune.

SADLY MISTAKEN WOMEN.

The Great Cause of Female Unhappiness and Loss of Attractiveness Explained.

[Mother's Magazine.]

The question is often asked, why are the women of to-day so delicate, so feeble? Why do they fade so quickly, lose their color, and become prematurely old? Why do they suffer such pains and endure so much silent agony? There are, doubtless, many reasons, but they are all combined in the single word—Weakness. When we stop to calmly think of the amount of misery that is endured by the women of America at this very moment it is simply appalling. This is no idle assertion—it is the terrible truth. We will cite a case in point:

MRS. NICHOLAS.

Mrs. Alexander L. Nicholas, residing at Phenix, R. I., is a lineal descendant of the gallant General Nathaniel Greene. Blessed with a good constitution, she hardly knew what sickness or pain were until a few years ago. Her duties called her up and down stairs (that bane of womankind) very frequently, and she began to notice that her breath was growing shorter. This was followed by pains in the back, tired feeling, a sense of bearing down and frequent faintness. But Mrs. Nicholas had the plucky blood of her ancester in her veins and would not give up. There came a day, however, when she was forced to do so. We give the rest in her own words. In conversing with the writer she said:

"I cannot describe how sick I was. I had sharp pains shooting through my chest; it was almost impossible to draw a single breath, and my limbs were swollen almost to bursting. I consulted three doctors, two of whom admitted that they could not cure me, while the third pronounced my case dropsy. My limbs continued to swell; the water filled my lungs, and I never for a moment thought of ever recovering. For eight months I was unable to lie down, and could only sleep in my chair. When I was in this hopeless condition, my son, Lafayette G. Nicholas, of Providence, came to see me. Several years before he had been sick, but under the direction of Dr. George D. Wilcox, of Providence he had recovered. He insisted that I should employ the same means he had used so successfully, and as a last resort I consented to do so. In a short time I began to grow better; the swelling decreased, and finally disappeared; I regained my breath, then my health, then my strength, and I owe my life to-day to that grand medicine Hunt's Remedy, which alone was able to save me. This was the medicine, which, administered by Dr. Wilcox, restored my son and rescued me from the grave. I know it is pure, simple and good, and I believe it is the only remedy that will certainly regulate and cure the many troubles of women, and restore them to health, beauty and attractiveness.

RESTORED.

"I have thought a great deal about the health of women since I regained my health, and I wish I had the power to induce those who are suffering, and so many are to-day, to use the means I so successfully employed. If women were well and strong it would be a grand thing for the nation, and save untold suffering which is now being endured so patiently. The trouble is, many women do not know what ails them. They take cold and have unpleasant symptoms, but think that they will soon pass away but they do not. These are followed by more serious troubles, annoying, weakening and life-destroying, but still they take no steps to check them. How can women be so blind? Do they not know that such things are the beginning of end the unless taken in time?"

FEMALE MISERY.

The experience of Mrs. Nicholas, who is now in her eighty-fifth year, should be a warning to all who read her earnest words not to delay, but to use the best of all known means for preserving or restoring health before it is too late.

HOW TO GRADE LOTS.

The Handsomest Surface Which a Residence Property Can Present.

The advantage in appearance which a house has that stands up well above the level of the street or roadway, is now very generally understood, and consequently we find the foundation walls built higher than was customary some years ago. In order to increase the effect still more, it is now a very common practice in ordinary suburban lots to fill in soil sufficient to raise the surface a foot or two above the street, thus forming a terrace at the street line. We do not advise this practice for general adoption, but in some cases the peculiar circumstances make it desirable. Where the fall of the drainage is very slight, it is even necessary; where the grade of a street is lowered, and the grounds have already been planted, there is usually no other course but to terrace at the time. But a course that is necessary under the conditions named has been meaninglessly copied in many instances where there was no occasion for it, and we see the lots along the whole lines of streets piled up sometimes as much as three feet or more above the general level, even where it is necessary to build within a few feet of the line, thus requiring the entrance to the house to be by a flight of eight or ten steps. On larger grounds where are built villas or residences of much pretension in style and finish, and which occupy a sufficiently elevated site, and at considerable distance from the street, this method of grading up the front and terracing at the line is sometimes adopted, but the appearance is far less pleasing than an even grade over the whole surface; one effect is to shorten apparently the line of distance from the street to the house, and thus diminish the size of the grounds. A gentle and gradual rise from the street line to the front of the house is the handsomest surface a residence lot can present.—*Vick's Magazine.*

—Mrs. Dashaway—"I am to be married to-morrow evening, and I want a floral bell to hang in the drawing-room. Make it just like the two you sent me for as many previous weddings." Florist—"How would a chestnut bell in tea roses answer?"—*Texas Siftings.*

PERSONAL AND LITERARY.

—Webster's spelling-book has had a circulation of over 50,000,000 copies.

—Mrs. Ellen Wood, the authoress, left personal estate to the value of £36,000. In her case novel writing paid.

—George R. Sims is said to have contributed to the columns of almost every important periodical in England.

—Audubon's original and finely hand-colored illustrated work sold in folio at one thousand dollars a volume, and is now rare and valuable.

—James Robinson, the champion bareback rider of the world, is now 51 years of age. He remarks that in a year or two he proposes to electrify Europe with a new feat of horsemanship, as he first did in 1857.

—A fresh manuscript of the "Imitation of Christ" has been found in the Cologne City Library. It is a Low German translation in verse—the oldest translation of the book yet known, and gives the date 1434 as the origin of the "Imitation."

—Louis XIV., traveling, met a priest riding in great haste. Ordering him to stop, the King excitedly inquired: "Whence? whither? for what?" He answered: "Burges—Paris—a benefice." "You shall have it," said the monarch, delighted with his conciseness.

—General Sherman told the cadets at West Point that advice is the cheapest thing going, and that there was something of the humorous in seeing sixty-four young men about to enter life thinking that they knew all things. "But there are many lessons taught here of which the world hears nothing. 'Erect! Silence!'—these are the lessons that are never taught in our universities."—*Harper's Weekly.*

—In Paris, Oxford County, Me., is a copy of the will of Artemus Ward. Paris is the birthplace of Hannibal Hamlin. Artemus Ward was a compositor on the county paper, the Oxford *Observer.* His will directed that his body be buried at Waterford, about ten miles from Paris. After making a few bequests he gave the balance of his property to found a home for worn-out printers, Horace Greeley to be sole trustee. As there was no balance the home was never established.

—Charles II. asked Bishop Stillingfleet how it happened that he preached in general without notes, but always read the sermons he delivered before the court. The Bishop replied that the awe of seeing before him so great and wise a Prince made him afraid to trust himself. "But will your Majesty," continued he, "permit me to ask you a question? Why do you read your speeches to Parliament?" "Why, doctor, I'll tell you very candidly. I have asked them so often for money that I'm ashamed to look them in the face." —*Drake's Travellers' Magazine.*

—Creditor—what are you going to do now? Jeweler (who has just failed in his wife's name)—I am going out to Utah. Creditor—What do you mean to do 'way out there? Jeweler—Marry again and start my second wife in business.—*Jeweler's Weekly.*

FREAKS OF FORTUNE.

A Young Retail Clerk Makes a Winning and Quits Work.

"Yes, Mac has given up his place and retired," said one of the floor-walkers of a well-known retail store on Market street to a *Call* reporter yesterday afternoon, when inquiry was made for the fortunate attache of the establishment who had made a big winning in The Louisiana State Lottery Company's drawing of last month. Fortune is said to be fickle indeed in her choice of favorites, and as ever, she defies all systematic rules of selection when she casts about her kindly eyes in the search for the object of her favors.

James F. Macklin, the young gentleman referred to above, was conceded to be the luckiest man in San Francisco on the 13th day of last month. It was the day following the monthly drawing of The Louisiana State Lottery Company, and he found himself the possessor of a coupon numbered 11,607, entitling him to one-tenth of the capital prize of $150,000. Young Macklin, scarcely realizing the truth of the glad tidings furnished him in the despatches of the *Morning Call* of that day, in which the winning numbers were announced from New Orleans, kept his own counsel, and as soon as opportunity offered hastened down to Wells, Fargo & Co's Bank, where he presented his coupon for identification and collection. The proceeds of his prize, amounting to $14,850, were handed to him as soon as an answer was received from the lottery authorities in New Orleans, and he went on his way rejoicing.

Mr. Macklin says that he has carefully placed his capital, and proposed to live on its interest. He has moved from his former residence at 725½ Bush street, and rented an elegant suite of rooms near Powell and Ellis streets, and having resigned his position, proposes to thoroughly enjoy his good fortune. For some time his former fellow-employees were incredulous concerning his sudden legacy, and he smiled in secret satisfaction at their individual amazement, until finally the truth leaked out. Macklin has bought tickets off and on for some time past, but never invested more than a dollar or two in each month. His happy experience has infused a great spirit for wealth among all the retail clerks in the city, and each fortunate possessor of a ticket or coupon anxiously looks forward to the day of the next drawing with the dream and hopes of speedily becoming a Croesus. But there was more than one heavy winner among the San Francisco patrons of the lottery. It is learned that two coupons of ticket 15,322, which drew the third capital prize of $20,000 in The Louisiana State Lottery last month, were presented by two fortunate residents of this city to the officials of the Anglo-Californian Bank for collection. The money was promptly paid the winners by the bank as soon as the formality of communicating with the New Orleans authorities was complied with, the proceeds of each ticket being $1,980. Cashier Lilienthal of the Anglo-Californian Bank told the reporter yesterday that the prizes had been paid, and that it is the desire of the winners that their names be not made public.—*San Francisco* (Cal.) *Call*, Aug. 2.

—A Misunderstanding—"I say, stranger," whispered a Western man, who had strayed in an up-town theater where the play of "Romeo and Juliet" was going on. "I can't make head nor tail of this thing. What's the name of the play, anyhow?" "Romeo and Juliet." "Well, if I'd known that," said the disgusted Westerner, "I wouldn't have come in. I understood the feller at the door to say it was something about Omaha and Joliet."—*Life.*

—Henry (softly)—"Florence, do you think you could leave your happy home and loving friends and go into the far West with a worthy young man who has no wealth save his profession? (A pause.) I'm waiting, Florrie." Florence (tenderly)—"Yes, Henry, I think I could." Henry, (with a sigh of relief)—"Well, I'm right glad to hear you say that. You see my friend Joe is going West, and wants to marry, so I'll just mention your case to him." —*Life.*

FLORIDA, "THE LAND OF FLOWERS,"

is a paradise for the invalid, and the "Fountain of Youth" was once thought to be hid in one of its forest glades. It is now the haven of many consumptives, who find benefit in her genial warmth and fragrant flowers. The consumptive invalid need not necessarily go so far from home and friends to get relief. For if not in the last stages of the disease, Dr. R. V. Pierce's "Golden Medical Discovery" will restore to perfect health. For all chronic throat, bronchial and long diseases it is a most reliable specific. By druggists.

The St. Louis Street-sprinkling ordinance still hangs fire. It may receive attention after the Maxwell execution and the Grand Army of the Republic Encampment. St. Louis can stand only one sensation at a time.

PHYSICIANS HAVE FOUND OUT

That a contaminating and foreign element in the blood, developed by indigestion, is the cause of rheumatism. This settles upon the sensitive sub-cutaneous covering of the muscles and ligaments of the joints, causing constant and shifting pain, and aggregating as a calcareous, chalky deposit which produces stiffness and distortion of the joints. No fact which experience has demonstrated in regard to Hostetter's Stomach Bitters has stronger evidence to support than this, namely, that this medicine of comprehensive uses checks the formidable and atrocious disease, nor is it less positively established that it is preferable to the poisons often used to arrest it, since the medicine contains only salutary ingredients. It is also a signal remedy for malarial fevers, constipation, dyspepsia, kidney and bladder ailments, debility and other disorders. See that you get the genuine.

After running a lawn-mower for an hour this morning, he remarked that if ever he had said anything derogatory or unkind of the snow-shovel, he would most willingly take it back.

MOTHER'S SMILES ARE THE SUNLIGHT OF HOME.

There would be fewer clouds and brighter sunshine in many households if every dispirited suffering woman realized what a boon Dr. Pierce's "Favorite Prescription" is for all weaknesses and maladies to which her sex is liable. No lady who gives this wonderful remedy a trial will be disappointed by the result. It not only acts promptly upon all functional derangements, but by its rare nervine and tonic properties strengthens and repairs the whole feminine system. Price reduced to one dollar. By druggists.

Patient—Why do you watch the thermometer on the wall so closely? Nurse—Because the doctor said if the temperature riz I should give you the quinine.

A Cough, Cold, or Sore Throat should not be neglected. "*Brown's Bronchial Troches*" are a simple remedy, and give immediate relief. *Sold only in boxes.*

THE FATHER OF MANY ILLS.

Constipation leads to a multitude of physical troubles. It is generally the result of carelessness or indifference to the simplest rule of health. Eugene McKay, of Brantford, Ont., write:

I had for several years been a sufferer from constipation, had taken a great many different remedies, some of which did me good for a time, but only for a time, then my trouble came back worse than ever. I was induced by a friend, whom BRANDRETH'S PILLS had benefited, to try them. I did so, taking two each night for a week, then one every night for about six weeks. Since that time I have not experienced the slightest difficulty whatever, and my bowels move regularly every day. I believe firmly that for sluggishness of the bowels and biliousness BRANDRETH'S PILLS are far superior to any other.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

LIVING HONEY-JARS.

Industrious Insects That Constitute Themselves Actual Reservoirs.

If evidence were wanting that certain ants voluntarily make sacrifices for others the case of the honey ant would be sufficient. That ants should keep domestic animals and perform the hundred and one intelligent acts that they do is remarkable but that certain members of a tribe should either by election or selection constitute themselves actual living bottles or reservoirs for the rest seems beyond the range of possibility, yet such is the case. Many years ago a French naturalist, Mr. Wesmael, described a Mexican ant, Myrmecocytus Mexicanus, which was brought from Mexico by M. de Normann, making the remarkable announcement that in the division of labor certain ants were literally living honey-jars or storehouses for the others. This statement was deemed incredible at the time, but was confirmed by many observers as Lucas, Edwards, Saunders, Black and others.

Two different genetæ are now known, one Camponotus inflatus, from Australia, and the one already given which ranges from Mexico up to Colorado Springs, where in the Garden of the Gods they have been carefully studied by Dr. McCook. In this locality the nests of these ants may be observed as small elevations over the ridges of disintegrating rocks that form the characteristic of the wonderful garden. If we dig down and with hammer or axe cut into the stone we shall find in all probability among the swarm of ants several kinds and one remarkable for its enormously distended abdomen. This is one of the workers that by agreement, or in some way, has consented to hold a supply of food for the rest. The living bottles are kept by the other ants in a room by themselves, and are generally found clinging to the wall of their cell utterly helpless. Dr. McCook found by carefully watching them that these ants were chiefly night-workers, starting out in the evening about seven o'clock, and marching in lines to some low bushes in the vicinity. Examination showed that they were clustering about the small galls, formed by the gall fly, Cynips quercusmellariæ, from which they obtained their honey. Each ant upon taking a supply returned to the nest and there delivered it up to the ants with the large abdomens, who received it, holding it in bond, as it were, until wanted by the others. When the workers desired food they touched or caressed the living jars with their attennae, upon which it was produced by muscular contraction of the bottles and taken from their mouths by the hungry workers.

The nests contained, on an average, about two hundred of these honey bearers, representing about one-fourth of a pound of honey stored in this remarkable way. In Old Mexico strangers are sometimes presented at dessert with pellucid globes of honey to be eaten as we would eat a grape, the delicacy being the honey ant that is considered a bonne bouche by the Mexican epicure. The honey is believed by natives to have medicinal virtues.—*C. F. Holden, in Wide Awake.*

GENERAL LAFAYETTE.

The French Soldier's Devotion to the Interests of the United States.

During his visit to the United States Lafayette was given a suit of clothes by the people of the Carolinas, and it was thought a great thing then that these clothes were of home manufacture. The coat had gold buttons, and these were ornamented with the face of Washington. Lafayette used habitually a seal which contained the head of Washington surrounded by rays, and he had two swords given him while in the United States. One was given by the Ninth Artillery regiment, of New York, and it had a handle of ivory surmounted by an eagle's head of carved gold. The other was presented to him by Congress, and I am able to give you sketches of the blade of this. Its handle and mountings were of massy gold, admirably carved, and presenting a variety of subjects. It was given to Lafayette by Franklin's grandson, on the part of the American Congress, as a testimony of gratitude for the services which he had rendered the nation.

Lafayette died at seventy-seven. His life was a most eventful one throughout, and even his enemies admitted his greatness and his honesty. He named his eldest son after George Washington, and his grandsons figured in French politics as republicans. His son, George Washington Lafayette, came with him during his last visit to the United States in 1824, and he partook with him of the honors which Lafayette received as "the National guest." This journey throughout the United States lasted a full year, and it was a perfect ovation. City, village and hamlet poured out their inhabitants en masse to meet him, and he visited all the States then composing the Union. He stopped a few weeks at the White House, just before he left, and during this time he made the trip to Mount Vernon and also visited ex-Presidents Jefferson, Madison and Monroe at their respective estates. He left for France September 7, 1825, and President John Quincy Adams made a speech of farewell. He replied, closing his remarks with these words:

"God bless you, sir, and all that surround you. God bless the American people, each of their States, and their Federal government! Accept this patriotic farewell with an overflowing heart. Such will be its last throb when it ceases to beat."

Lafayette was buried in France in a private cemetery in Paris in 1834. Whether his remains have been removed or not I do not know.—*Frank G. Carpenter, in Cleveland Leader.*

IMPORTATION OF BIRDS.

The First Lot Brought to the United States for Colonization Purposes.

In the year 1852 some Brooklyn gentlemen (among them the present writer) assembled at the Brooklyn Institute, at one of the regular meetings of the Natural History Society, to consider the best means to rid the city of the insect pests than devastating the shade and ornamental trees. A committee, appointed to report on the subject, decided to import a lot of European birds, and the following were selected: Sparrows, blackbirds, skylarks, siskins, woodlarks, goldfinches, bullfinches, thrushes and robins. A sum of money was subscribed, and the late Mr. Perry, then secretary of Greenwood Cemetery, gave an additional hundred dollars toward the expenses. The writer, being about to sail for England, was appointed a committee of one to superintend the selection of birds there. On his arrival in Liverpool he communicated with Mr. Thomas Woodcock, a great lover of birds, then at Manchester, and the draft and list of birds were forwarded to him for their purchase. He promptly fulfilled the task, and the birds were soon on their way to New York in charge of an officer of the steamer. They arrived safely and were housed in the tower of the building at the old entrance to Greenwood. They did not seem to thrive there, so they were removed to the house of the late Mr. John Hooper, of Bergen street, Brooklyn, who cared for them till spring. The sparrows were then let loose in the city, and half of the skylarks on General Johnson's farm at the Wallabout, and the other half at Flatlands. The rest of the birds were taken to Greenwood in cages and hung up in the trees. They were well supplied with food, and the doors of the cages left open so that they could come or depart at pleasure, and a trusty person was engaged to watch the birds so that none should molest them. This plan was successful, as the birds roosted at night in the cages, going out in the daytime, and continued thus for about fourteen days. The blackbirds, goldfinches, thrushes, siskins, etc., soon disappeared from view, but the skylarks now seen at Flatlands are no doubt descendants of the birds then liberated, as their nests have frequently been found, showing they have become acclimated to our severe winters, which evidently destroyed the other birds. The above were the first birds imported into the United States for the purpose of colonization, that I am aware of.—*Cor. N. Y. Post.*

TURNING THE TABLES.

How a Railway Conductor Got Even with a Too Exacting Superior.

Almost every one will enjoy the manner in which a conductor turned the tables on the president of the road in the following incident, narrated by a Newark paper. But the president, though too much of a martinet, seems to have accepted the situation in a manly way. There is a general interchange of passes among railroad men, and the president and vice-president of the large railroads often have passes all over the country:

President Roberts is a very strict man. One very stormy day in winter he got on the New York division, and took a seat in the middle car. The conductor knew him, as we all do; and when he passed him, the president simply nooded. It was a catch; and Roberts was only trying to see if his man would break the rules, and not make him show his pass. The conductor fell into the trap. When he passed through the train again, Roberts arose from his seat and, tapping him on the shoulder, said: "See here, you have not seen my pass."

"No, sir," faltered the conductor; "but—but I know who you are."

"That makes no difference," retorted Roberts, with a frown. "The rules are made to be obeyed, and not to be broken. The rules laid down for your guidance say that any passenger who has neither a ticket nor a pass must pay his fare, or else you must eject him from the train."

"I know it," replied the conductor; "but"—

"No 'buts.' Now you may go."

"I haven't seen your pass yet, though," demurely remarked the ticket-puncher, wishing to demonstrate the thoroughness of his lesson.

"That's right," replied Roberts, approvingly. "Make no difference between the president of the road and the poorest passenger."

He reached into his inside coat pocket, and then into his vest pockets. His face grew red, and he fumbled around his hip pockets. The conductor grinned. Roberts' sallow complexion grew paler, and then redder. He went through his pockets again, but no passes.

"Humph!" exclaimed the president. "Singular! Just stop as you pass this way again."

The conductor stopped, and the president dryly handed him a five-dollar bill, and told him to take out the fare. He had left his book of passes at his office.—*Youth's Companion.*

—The world takes knowledge of her great men, and people crowd each other to do them honor, without even stopping to inquire the secret of their greatness. But when the good Lord makes up the choice jewels of His crown many mothers will be called for from quiet and humble homes, of whom the world has never heard.—*Chicago Inter Ocean.*

—Prof. Scott, of Rutger's College, is writing a history of New Jersey.

SHREWD UNCLE TOM.

A Celebrated Maine Wag Plays a Little Joke on His Son.

Thomas Wight, a famous wag of Oxford, during his declining years, deeded his old homestead to his son, Mark, and built him a house on the west side of the road, where he dwelt with his daughter.

At this time Mark owned a mare named Fan, a most beautiful animal, the pride of her master and pet of the entire family. One morning Uncle Tom asked Mark if he would loan him Fan to ride to Oxford Village and buy a little tobacco.

"Why, certainly, father," replied Mark. "When do you want to go?"

"Now," said the old man, "and what will you charge me for the use of Fan?"

"Thirty cents," said Mark.

"Well, here is your money," replied the father, "please harness the beast."

Fan was quickly led from the stable, her sleek, glossy coat glistening in the morning sunbeams, and, with head thrown aloft, her slim neck proudly arched, and her expanded nostrils seeming to scent the battle afar off, she constituted a scene for a painter.

Uncle Tom donned his big cap, and, after binding about his waist a stout piece of rope, he placed on his arm a small basket containing a T. D. pipe, a flint and piece of steel to light it with, as he discarded matches, a piece of bread and cheese, an almanac and an old singing book. This constituted his outfit, and he was then ready.

Fan immediately champed her bit, beating the turf with her foot as if eager to be off.

"Be still, Fan," said Mark, in his stern, sharp voice; "Betsy and I are not going to-day; the old man is going, so be quiet."

The intelligent animal rubbed her finely-molded head against the shoulder of her master, and then lovingly caressed him with her fine muzzle, as much as to say: "I understand," and then stood perfectly still.

Uncle Tom was soon seated in the wagon, and, seizing the reins with a nervous grip, he ordered Fan to use moderation, as he was a poor old man. Fan, well knowing her business, and contrary to her usual custom, assumed an ambling, mincing pace, and soon disappeared behind the adjacent hills.

When the old man arrived at his destination he drove straight to the hotel and ordered the hostler to unladen the beast, feed, groom and take care of her till called for. He then went to Mr. Baker's, completed his purchase, took his basket on his arm, and started homeward on foot.

"Where is Fan?" inquired Mark, as he saw his father approaching, pretty well tired out.

"She is at Oxford," quietly returned the father.

"What, sick?"

"Oh, no, she was well when I left her."

"Why didn't you bring her home?"

"Why, the thing is I had no right to. I merely hired her to ride to Oxford, and not home."

Mark saw and fully appreciated the joke. Laughing heartily, he started for Oxford on foot, a distance of four miles, claimed his mare, and, after paying the bill, drove quietly home without a word of complaint.—*Oxford (Me.) Advertiser.*

RUSSIAN PRISONS.

The Terrible Rate of Mortality Prevailing Among the Inmates of Jails.

The Russian Administration of Prison's has just issued its report for 1885. On the 1st of January, 1885, there were 94,488 persons incarcerated throughout the empire. In the course of the year 703,254 entered and 697,769 individuals were liberated, leaving a residue of 99,973 still in prison. Women formed about 8 per cent. of the convicted. Notwithstanding a certain amelioration of sanitary appliances in the jails, the rate of mortality remained stationary. Of the 88,002 prisoners who were treated in hospital, there died 2,189 men, 246 women, 546 children. In this respect the island of Saghalien stood in the worst position, its sick list showing a total of 66 per cent. on the year, but the number of deaths there are not given. Diseases arising from humidity, insufficient ventilation, and defective sanitary arrangements are the chief scourges of the state prisons. Among the 4,029 persons who passed through the prisons of St. Petersburg 2,675 were accused of theft, 139 of political offences, one of bigamy and one of apostasy. The largest number of offenders belonged to the artisan class; not one is specified as a peasant. The expenses of the penitentiary service in the whole empire amounted to 11,798,614 rubles, being a diminution of 521,239 rubles upon the expenditure of the preceeding year. This economy was partially effected by reducing the cost of the equipment of the prisoners. There was a falling off in the receipts derived from the products of the prisoners' industry from 133,750 rubles in 1884 to 103,536 rubles in 1885. Moreover the Coal Mining Company of Saghalien, which is supplied with convict labor, paid to the State 31,456 rubles for the rights conceded to it.—*London Times.*

—Excited fisherman to summer-hotel man—"There isn't a bit of fishing around here. Every brook has signs warning people off. What do you mean by luring anglers here with the promise of fine fishing?" Hotel man—"I didn't say any thing about fine fishing. If you read my advertisement carefully you will see that what I said was: "Fishing unapproachable."—*Burlington Free Press.*

THE LIME KILN CLUB.

A Competitive Poem Read and Objected to—Objection Overruled.

Waydown Bebee, chairman of the summer poetry committee, reported that he had received seventy-six competitive poems up to date, and that he noticed a marked improvement in style and sentiment over last year. The prizes would be awarded some time in September. The following, written by old Pete Whitefield, of the Florence hotel, Birmingham, Ala., was handed to the secretary to be read and filed:

THE FATE OF THE CHICKEN.

On a roost a chicken sat,
Come along—come along;
He was young and very fat—
Sing a song—sing a song.
Oh! you chicken! hev a care,
Fur Josephus draweth near.

Up the alley crept a coon—
Crept along—crept along—
By de light of harvest moon,
Ding-a-dong—ding-a-dong.
Oh! you chicken! doan' you know
Why dat darky creepeth so?

Now Josephus glideth in,
Hum-a-hum—hum-a-hum;
Now he rubs dat chicken's shin,
Dum-a-rum—rum-a-dum;
Now dat chicken's in a bag—
Limp and dead as any rag.

Elder Penstock arose to object. Time was when the colored man of this country might be connected with the chicken, but that day had long since gone by. He looked upon the poem as an insult leveled at the colored race. Why should a colored man be represented as stealing up the alley any more than a white man? And, above all, what member of the Lime Kiln club could sit still under the title of "coon?" He would move that the poem be scornfully rejected.

Samuel Shin supported the motion. It made his blood boil to be thus openly insulted in his own house, as it were.

"I shall rule de moshun as outer order," calmly announced the president. "So fur as my observashun extends, de cull'd man are jist as tightly connected wid chicken at de present time as eber befo'. I can't l'arn dat anybody has changed his taste from chicken to codfish if he could help it. As to de title of 'coon,' dar am no need of gittin' up on our high horse about it. We kin call de white folks foxes or rabbits if we want to. It doan' make us any blacker, nor shorten up our feet one bit. As I said, I shall oberrule de moshun."—Detroit Free Press.

LITTLE LAUGHS.

Absent minded business man to office boy: "Tommy, go up to my house and tell my wife I have forgotten my watch. Bring it back with you." He pulls out his watch and continues: "Now, Tommy, it is 9 o'clock; be back at 10."—The Epoch.

After the clouds, the blue;
After the drought, the due;
And after you've taken your summer vacation
The bills will shower on you.
—Burdette.

Omaha Mamma—Mercy, child! What has made your feet so dirty? Little Dot (ready for bed)—Isn't they clean? "They are coated with mud. How did that happen?" "I des it's 'cause I washed 'em."—Omaha World.

First Politician—How do you spell "boodle," Tom? Second Politician (gloomily)—They are beginning to spell it J-a-y-l.—Philadelphia Call.

An aged and wise Rochester negro is quoted as saying: "'Pears to me like dar was some kind of misdecomposishun in all dis talk about babies cuttin' teef. De way I cum to look at it, hit's de teef cuttin' de baby. Leas'wise, dat's de way it looks in de case ob cullud chil'en."—New York Sun.

You got ice cream and clams on tick,
That day beside the sea,
And when the landlord's bill comes in,
Then you'll remember me.
—Boston Courier.

He, very short (roaring with passion)—I tell you, madam, the brain of a man averages more by two ounces than that of a woman, and don't you forget it!" She, very tall (extremely calm)—Get a stool and come up into the higher atmosphere, William. You look warm down there.—Judge.

Coming home from a western trip W. J. Arkell, of The Judge, was accosted in a car by a countryman who had been for some time intently looking at the journalist's scarred face, the result of a burn in his youth. "Excuse me, stranger," asked the granger, "but how did you get that scar?" "I was bit," replied Arkell, with the soberness of a deacon. "That's what I thought," rejoined the countryman, as he walked away; "it shows where the teeth sot in."—New York Tribune.

"Kind sir, your daughter I would wed."
"Go to, go to," the father said;
And 'twas no sooner said than done,
For they went two and came back one.
—Washington Critic.

A Burlington girl is learning to play the cornet, and her admirers speak of her as "the fairest flower that blows."—Burlington Free Press.

Bagley—I understand that Stickem is in a very bad way with the cholera or something or other and Dr. Bleedem don't think he'll pull through. DeBaggs—Very sad, indeed. Do you think he's resigned? Bagley—No, I don't think he is. He is an officeholder and never resigns.—Philadelphia Call.

A Painful Truth.

The man who draws himself up to his full height and predicts that this country is going to the dogs, sir, and, sir, as a nation we are being relegated to fourth or fifth place, sir, doesn't expect you will accept his statements verbatim. He desires to inform you in a roundabout way that he got left on the nomination for alderman.—Detroit Free Press.

No Gooseberries This Season.

"Waiter," said a gentleman in the dining car, "have you any gooseberry pie?"

"No, sah; hain't carryin' any dis yeah, sah."

"Why is that?"

"Well, you see, sah, day's scarce dis season. Las' winter was so cole and stormy dat it wus mighty tough on de geese."—Washington Star.

A Timely Production.

Showing an ingenious bit of mechanism invented by our friend Hookem, by which a tired fisherman can enjoy a nap and be awakened by the slightest nibble at his bait. —Life.

The Reason Why.

Why do I love at early morn to wake,
When roses still are wet with night's damp dews?
Because I then can turn myself and take
Another snooze. —Boston Courier.

FUNNY MR. FRESHLEIGH.

Why a Humorously Inclined Law-Clerk Is Looking Around for a Job.

A rather prepossessing young lady entered the office of a well-known lawyer the other day and inquired:

"Is Mr. Brief in?"

"Won't be in for two hours," replied the dapper young clerk whom she addressed, surveying her from head to foot with an approving glance. "Any thing I can do for you?"

"Yes," was the reply, and the lady produced from beneath her wrap a handsomely bound volume. "I have here—"

"I thought so," interrupted the clerk, with a deprecating gesture. "I sized you up as soon as you came in. But its no use. We never fool away money on subscription books in this office. Didn't you see the sign outside; 'No Peddlers Allowed'?"

"Sir," began the visitor, "this book—"

"Oh," laughed the flippant young clerk, "I've no doubt it's the biggest thing out, but we don't want it. History of the United States, ain't it, from the time of the Mound Builders up to the present day? Big thing, I've no doubt, but we've no use for it."

"If you will allow me—"

"Really," said the youth, who was greatly amused, "I'd like to, but it's against the rules of the office to yield to the blandishments of book agents, no matter how young and good-looking they are. Couldn't think of looking at the book my dear. 'Life of Napoleon,' ain't it? That's a chestnut. One of our clerks bought one last month for four dollars, and yesterday he traded it off for a yaller dog, and then killed the dog."

"I wish to say—"

"Or may be it's a humorous work, with wood-cuts that look as if they'd been engraved with a meat-axe. No, we don't want it. We keep a humorist here on salary to amuse us."

"I"—

"Say, you're awfully persistent, my dear, but it won't do any good If old Brief were here you might talk him around, because he's a susceptible old duffer, and thinks every pretty woman who looks at him is in love with him. But I am not that kind."

"Sir, if you will"—

"Say, I hate to refuse you, 'pon my soul I do, but I'm broke, and that's the truth. Come around in about six months, after the old man has taken me into partnership. I'll be flush then, and I'll take a book, just to reward you for your stickativeness. I say, you're a mighty pretty woman to be obliged to peddle books for a living. I"—

Just then the attention of the loquacious youth was attracted by the frantic gesticulations of a fellow clerk in another part of the room, and he paused.

"You are Mr. Freshleigh, I presume?" said the lady.

"I—er—yes, that is my name," was the reply.

"I have heard my husband speak of you. I am Mrs. Brief. Will you please hand this book to Mr. Brief when he comes in, and ask him to take it to the binder's? Good morning."

The lady left the office; the mercury in the thermometer crept down out of sight; the office cat had a fit, and young Freshleigh fell in a faint.

The next day lawyer Brief advertised for a new clerk.—*Tid-Bits.*

What to Teach Your Boys.

Teach them how to earn money.

Teach them to be strictly truthful.

Teach them shorthand and typewriting.

Teach them economy in all their affairs.

Teach them to be polite in their manners.

Teach them history and political economy.

Teach them arithmetic in all its branches.

Teach them to avoid tobacco and strong drink.

Teach them to ride, drive, jump, run and swim.

Teach them careful and correct business habits.

Teach them how to get the most for their money.

Teach them by example how to do things well.

Teach them to avoid profane and indecent language.

Teach them habits of cleanliness and good order.

Teach them the care of horses, wagons and tools.

Teach them to be manly, self-reliant and aggressive.

Teach them to be neat and genteel in their appearance.—*N. Y. Ledger.*

New Method of Testing Milk.

A new test for water—that is, well water—in milk has recently been proposed by Herr Szilasi. This depends on the fact that sulphate of diphenylamine is colored blue by the action of an exceedingly dilute solution of a nitrate. As well water always contains more or less nitrate, its presence in milk can be detected. The test is carried out thus: Twenty minims of sulphate of diphenylamine are placed in a small porcelain vessel, and a few drops of the milk which is to be examined added to it. If this contains even five per cent. of average well water, a blue tinge will gradually distinctly appear. Sulphate of diphenylamine is easily procurable and cheap, so the test may be readily tried.—*N. Y. Post.*

PRINCE AND NIHILIST.

Strange Career of a Russian Nobleman, Orator, Author and Patriot.

There is now living, in a somewhat obscure lodging in London, a Russian nobleman, who asserts that his right to the Czar's throne is better than that of its occupant himself; but this nobleman is, and has long been, an exile from his native country, for he has for years been an active conspirator against the government of the autocrat. Both the character and the career of Prince Krapotkine are interesting and suggestive. His adventures have been many and startling; nor is it probable, though he has now passed middle age, that his restless career is yet finished. Prince Krapotkine has the blood of Rurik, the founder of the Russian monarchy, in his veins. There is no prouder or more ancient name than his in Russia. He inherited great landed estates and a princely fortune; yet he gave up wealth, lofty social position and luxurious repose, to embark in what he regarded as the cause of Russian liberty.

When quite a young man, Prince Krapotkine conceived an ardent love of scientific study. From boyhood he was serious, thoughtful and hard-working. He did not indulge in the costly pleasures which usually occupy the time of young Russian nobles. He went to Siberia, in order to make geological and geographical researches, and traveled far and wide in search of scientific knowledge. At last he found himself at Geneva, in Switzerland, where he engaged in labors on a new universal geography. It was while at Geneva that Prince Krapotkine became a Nihilist and joined in the great conspiracy to overthrow the Czar. He became the leader of the circle of Russian conspirators at Geneva, and, throwing aside his scientific work, gave himself heart and soul to the revolutionary cause. He soon became known as a fervent and brilliant orator, and in secret, out-of-the-way places would address his followers with burning harangues. A recent Russian writer says of him: "He is all fire and passion on the platform. When he rises, he seems almost as one transformed. He trembles with emotion, while his voice vibrates with an accent of profound conviction."

Krapotkine went to St. Petersburg, where his eloquence at secret meetings gained him many new disciples. At last the imperial police got an inkling of what he was doing. His house, which was a headquarters of the conspiracy, was watched, and he was arrested and thrown into the grim fortress-prison of Peter and Paul. Fortunately for the Prince, his health failed in his gloomy prison, and he was transferred to the Nicholas Hospital. It was here that he and his friends planned one of the most artful and romantic escapes recorded in history. He got well, but still pretended to be ill and weak. His keepers did not dream that the man who feebly dragged himself along, with the hollow face and tremulous voice of one at the point of death, was daily gathering his energies for an attempt at liberty.

"He was allowed to walk," says an account of the affair, "in the courtyard of the hospital, attended by a soldier. It was winter, and the hospital gate was left open and unguarded, for the bringing in of wood. A plan of signals with his friends was duly arranged by secret letters. The great difficulty was to evade the soldier, who kept in parallel line with the Prince, but always five paces nearer the gate than he. One day, some notes of a violin were heard. With a sudden movement, Krapotkine cast off his hospital coat, and made for the gate. The startled soldier forgot the gate, described two sides of the triangle, and allowed his prisoner to reach the exit before him. A carriage was in waiting, and Prince Krapotkine, his attire completely changed by the way, was rapidly driven to a place of concealment and safety."

A short time after this happy escape, Krapotkine turned up at Lyons, in France, where he was detected in a Socialistic plot. He was tried, condemned to five years' imprisonment and confined in the prison of St. Paul, in Lyons. Before his term was completed, however, he was released, and took up his residence in London, where he now is. All the troubles of his career have not dampened his ardor or decreased his revolutionary energies; and he is still one of the most formidable living enemies of the Russian despotism.—*Youth's Companion.*

Journalistic Intelligence.

Miss Birdie McGinnis, one of the reigning belles of Austin, is not a bad looking girl, but intellectually she is subject to a slight discount.

At a social gathering she was introduced to a distinguished journalist from San Antonio.

"Allow me to introduce you to Mr. Scoop, one of the most celebrated newspaper writers of the day," said her friend.

"Newspaper writer!" exclaimed Birdie, "I didn't know they wrote newspapers. All the newspapers I've seen were printed."—*Texas Siftings.*

—By passing hydrofluoric acid gas free from water, through glass tubes, lined with platinum, and cooled by immersion in liquid ethylene, Professor Kolszewski, of Krakau, finds that it becomes liquid. On allowing it to evaporate the liquid hydrofluoric acid solidifies at −102.5°. At−90° phosphorated hydrogen liquefied, and began to solidify at−133°. Antimonated hydrogen solidified—102° and melted at −91.5°.—*N. Y. Independent.*

THE UNKNOWN LAND.

Romantic Characteristics of the Natives of Patagonia.

Stern, wild and inhospitable are the shores of Patagonia and the adjacent island of Terra del Fuego. There have been few explorers who have penetrated into their unknown interiors, and the general knowledge of these countries is necessarily confined and of no reliable value. In the middle of summer the climate is cold, the winds bitterly cold, and snow squalls frequent, so that the dark and long winters can be more easily imagined than described.

In these inhospitable regions wander nomadic tribes, which manage to subsist on goat flesh and fish, bread being next to unknown, and vegetation being of the scantiest. There is a general impression that the Patagonian is a giant. I never saw one over five feet ten inches in height, and most of them were much shorter, and on the average stunted. The females have a muscular development equal to the males, and it is sometimes difficult to distinguish between the sexes, owing to the masculine appearance of the gentler sex, the women in most cases sporting an incipient mustache and beard, which on the male never grows very luxuriantly.

Both sexes dress alike. Bleak and cold as the climate is at the best of times, the usual dress consists of the skin of some wild animal loosely wrapped around the body. Little children can be seen running naked over the snow, their well-oiled brown skin apparently impervious to the biting winds. Those savages wandering to the Chilian settlement of Punta Arenas (Sandy point) have often been presented with various articles of clothing, but as a rule the aborigine discards shirts and trousers upon the first opportunity. The Valparaiso sewing circles industriously continue contributing boxfuls of clothing, but it is a mystery what becomes of the garments. Most likely there are second-hand dealers who barter rum for the "duds."

As the Patagonian tribes are nomadic, their temporary dwellings consist of the branches of trees interwoven so as to form a basket-work defense against the weather. Skins, old sails and blankets also give a shelter which seems to content the tenants, who are notoriously indifferent to the comforts or discomforts of home. Fish, of course, forms the staple food, and it is thought that few inhabitants are in the interior, most living near the sea for the sake of its food and the wreckage which occasionally strews the coast.

Many Horn-bound vessels which have never been heard of have doubtlesss been lost on the Patagonian and Fuegian coasts, and nearly every native has some trophy cast up by the sea on their iron shores. There is a story of a crew having succeeded in getting ashore from a stranded vessel and being murdered by the savages, with the exception of the captain's wife, who is said to be still alive in the interior, dragging out a miserable existence as the wife of some dusky chief.

Steamers passing through the Straits of Magellan are often met by the canoes of Indians (the women paddling,) who eagerly look for ship's bread or any other article thrown) them. I noticed one set of Indians had a handsome ship's boat, said to have belonged to some foundered vessel.—*Cor. San Francisco Chronicle.*

A BITTER COMPLIMENT.

A Congratulation That Was Worse Than an Outright Insult.

"Insults are hard to bear, but there are some compliments which are worse than any insult," said a veteran Italian patriot, who had shared the counsels of Mazzini, dined with Count Cavour, and talked with Garibaldi upon the most famous of his countless battlefields.

"I suppose you mean," suggested I, "that kind of a compliment that a French wit paid to an enemy who had come and scribbled 'Coquin' [blackguard] upon his door one night with a piece of chalk. Next morning the wit went to the fellow's house, and said, in the politest way possible: 'Monsieur, you left your name on my door last night, and I have come to return the visit.'"

"It was certainly a two-edged courtesy," replied Signor S——, smiling grimly; "but I think I can match it from my own experience. A good many years ago, in the evil days before King Bomba was overthrown and Italy freed, one of the King's Ministers—a rascal who had been stealing the public money with both hands ever since he first came into office—was rewarded for his 'services' (whatever they may have been) by being decorated with the cross of some Italian order. On the day he received it he found among his letters of congratulation (which of course came pouring in from every side) a small plain envelope, addressed in a handwriting which he well knew."

"Meaning your own, I presume, Signor S——," said I.

"We won't mention any names," answered the old gentleman, with a sly twinkle in his large black eyes. "The envelope, when opened, contained nothing but an Italian quatrain, which, if translated into English, might run somewhat as follows:

"'Thieves upon crosses fixed to be
In rude old times did law condemn;
In this enlightened age we see
The crosses fixed on *them*."

SATURDAY OCTOBER 8 ..... 1887.

SUPERVISORS' PROCEEDINGS.

MONDAY, October 3, 1887.

On the above named day the Board of Supervisors met at 6 o'clock p. m. Present, J. D. Harger, Chairman, J. R. Eldred and E. Robinson. Absent, Thos. Boland and J. C. Eddy.

The Board proceeded to consider the matter of the tax levy of Inyo county for the present fiscal year. Whereupon the Board adjourned till Tuesday, October 4, at 10 o'clock a. m. J. D. HARGER, Chairman.
Attest; P. H. MACK, Clerk.

TUESDAY, October 4, 1887.

The Board met at 10 o'clock, a. m.; present J. D. Harger, Chairman, J. R. Eldred and E. Robinson. Absent, Messrs. Boland and Eddy.

After due consideration of the matter of the tax levy for the present fiscal year it is ordered that a tax levy of three dollars on each one hundred dollars of the taxable property of Inyo county as assessed, be levied, to be collected and apportioned to the several funds as follows:

State Fund	60 4-5
Salary Fund	90
Hospital Fund	06
Bond Fund	60
School Fund	30
General Expense Fund	35 1-5
General Bond Fund	18

An order was made declaring the length of railroad in the county and the assessed value of the same in the county and in each lesser taxing district. Length of main track, 74¼ miles. Assessed per mile, $2,137 14-100.

For the Independence school District a special tax was ordered of 47 cents on each one hundred dollars of taxable property, The same to be placed to the credit of the school building fund.

For Warm Springs school district a tax of 53 cents was ordered for a similar purpose.

Ordinances were passed fixing rates for licenses issued within the county.

Ordered that 25 per cent. of the property road tax collected from all sources be set aside to the General Road Fund. Adjourned.

The Board met at 2 o'clock, the same members present.

Ordered that a notice be published for proposals for county printing.

WEDNESDAY, October 5, 1887.

The Board met at 10 o'clock a. m., the same members present.

The following bills were allowed:

J. R. Eldred	$51 65
J. D. Harger	52 20
E. Robinson	24 60

There being no further business Board adjourned. J. D. HARGER, Chairman.
Attest: P. H. MACK, Clerk.

ORDINANCE NO. 20.

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows

SEC. 1. Every person engaged in the business of raising, grazing, herding, or pasturing sheep in the County of Inyo, State of California, must annually procure a license therefor from the Tax-Collector, and make therefor the following payment:

1. Those owning or having in their possession and under their control 5,000 sheep or more shall constitute the first class and must pay $250 per annum for the first 5,000 sheep and for every additional 1,000 the sum of $50.

2. Those owning or having in their possession and under their control 4,000 sheep and less than 5,000 constitute the second class and must pay $200 per annum.

3. Those owning or having in their possession and under their control 3,000 sheep and less than 4,000 constitute the third class and must pay $150 per annum.

4. Those owning or having in their possession and under their control 2,000 sheep and less than 3,000 constitute the fourth class and must pay $100 per annum.

5. Those owning or having in their possession and under their control 1,500 sheep and less than 2,000 constitute the fifth class and must pay $75 per annum.

6. Those owning or having in their possession or under their control 1,000 sheep and less than 1,500 constitute the sixth class and must pay $50 per annum.

7. Those owning or having in their possession or under their control less than 1,000 sheep constitute the seventh class and must pay $25 per annum.

8. Those owning or having in their possession or under their control less than 500 sheep constitute the eighth class and must pay $5 per annum.

SEC. 2. Every person who shall engage in the business of raising, grazing, herding or pasturing sheep, or who commences or carries on in the County of Inyo, State of California, any business, trade, profession, or calling, for the transaction of which a license is required by any Ordinance of the Board of Supervisors of said county, without taking out or procuring the license prescribed by such Ordinance is guilty of a misdemeanor and shall be punished by a fine not exceeding $250, and unless said fine be paid shall be imprisoned in the county jail of said county until such fine be satisfied, such imprisonment not to exceed one day for each dollar of the fine.

SEC. 3 The Tax-Collector shall have the collection of the license provided for in this Ordinance, and it is hereby made his duty to collect the same, and he may enforce the collection as provided by Section 3,339 of the Political Code of the State of California.

SEC. 4. The County Auditor shall prepare and have printed suitable bank licenses for the Tax-Collector to carry out the provisions of this Ordinance with blank receipts for the Tax Collector when sold.

SEC. 5. The Tax-Collector shall collect a fee of one dollar for each license sold, which shall be paid into the Salary Fund of the county.

SEC. 6. All money collected for licenses under the provisions of this Ordinance shall be paid over to the County Treasurer as other moneys and placed to the credit of the Salary Fund of the county.

SEC. 7. This Ordinance shall take effect and be in force on and after 20 days from its passage, and all Ordinances, or parts of Ordinances in conflict herewith are hereby repealed.

SEC. 8. This Ordinance shall be published in the Inyo INDEPENDENT, a newspaper published in said Inyo County, at least four weeks, said publication to be made for a period of twenty days after the adoption thereof, and said Ordinance to take effect in twenty days from its adoption.

The above Ordinance was passed by the Board of Supervisors of Inyo County, State of California, at a regular meeting of said Board, October 4, 1887, by the following vote:

Ayes—Harger, Eldred and Robinson.
Noes—None. J. D. HARGER,
Chairman of the Board of Supervisors of Inyo County.
Attest: P. H. MACK, Clerk.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, OCTOBER 3 1887

Mike Lusky was up from Lone Pine during the week.

A good many people will come up from Darwin to attend the Fair.

Boys get in your saddle horses for the half mile race on Monday.

Los Angeles is to have a new Courthouse. The contract price is $410,500.

The old school house at Independence was sold last Saturday, bringing $42.

Mr. J. Wilson of Darwin, came in last Thursday and will stay in town till after the fair.

Mr. A. R. Conklin has gone to San Francisco to attend the meeting of the Masonic Grand Lodge.

A Teachers Institute will be held at Bishop Creek, beginning on the seventh day of November.

A new Post of the G. A. R. was organized at Independence last Wednesday evening. Eleven members joined.

Mr. John Clark and Mr. Asher Cohn came down from Bishop Creek last Thursday. They returned next day.

All produce shown at the Pavilion can be sold there at good prices; therefore farmers should bring plenty to exhibit.

Mr. T. Hutchinson came down from Bishop Creek on Thursday, to take care of his brother who has lost his reason.

No arrangement has yet been made for any base ball game during the fair. There has been some talk, but nothing definite.

Charles Leaman has been sentenced to be hanged at Genoa, Nevada, on Friday, November 25th. Leaman murdered a man named Scott.

Russ Mining District will be well represented at the Fair. A large lot of fine samples was brought in a day or two ago from the White Hill mines.

Mr. G. H. Parish, of George's Creek, was taken violently ill at the beginning of the week. His sufferings were intense for some time but he is now much better.

Mr. Henry Thompson and wife arrived at Camp Independence at the end of last week. He is the son of Mrs. C. A. Walter and has been absent from the county about four years.

The Supervisors have passed a sheep license ordinance, similar to that now in force in Mono county. The ordinance will take affect and be in force from and after the 26th of this month.

Fank Hutchison has been laboring under mental derangement for some time. Last Monday he was brought to Independence for examination and will be sent to Stockton. Mr. Hutchison was long a citizen of Bishop Creek.

Darwin district will be well represented in the mineral department at the fair. A very fine collection of specimens has already been forwarded for display. Cerro Gordo and Keeler should make a good display; it can be done yet if some body will try a little.

The boys have got even with the old school house; it's down, busted, knocked to smithereens. Ingraham has mopped the ground with it. The old shingles are flying about like the leaves of the forest when winter has blown, and this is about the only trace of the ragged old shanty that remains in sight.

The Carson *Union* says; A good display of Inyo fruit would have been a handsome thing for our District Fair. The destruction of our fruit crop in this region by the spring frosts, leaving us without the usual resources in this respect. A display from Inyo county would have helped the boom along the C. & C. railroad.

The Salt Lake and Los Angeles Railroad Company formed at Los Angeles last Friday. The Association is formed for the purpose of constructing a line of railroad from Los Angeles to a point on the boundary line of the State of California in a general northeastery direction, there to connect with a line coming from Salt Lake City. Two companies are now formed for the building of this road, the other company being at Salt Lake. It will soon be known how near to Owens Valley this road will come.

John A. Lank, Superintendent of the Pavilion, has selected the following ladies as his assistants during the Fair of the 18th Agricultural District at Independence. The ladies will please report to Mr. Lank at 9 o'clock on the morning of the first day of the Fair: Mrs. W. L. Hunter, of George's Creek; Mrs. J. J. Stewart and Mrs. A. C. Harvey, of Lone Pine; Mrs. W. C. T. Elliot, of Big Pine; Mrs. S. D. Thurston, Mrs. Allie Brown, Mrs. Johnson, Mrs. V. G. Thompson, of Independence; Mrs. C. A. Walter, of Camp Independence; Mrs. I. P. Yaney, of Bishop Creek; Mrs. A. O. Collins, of Warm Spring; Mrs. C. Parsons, of Round Valley; Mrs. J. J. Gunn, of Darwin.

A copy of the report of the Commissioner of pensions has been received. From this it appears that New York has the largest number of pensioners of any one State, the number being 42,013 and the amount paid per quarter, $1,317,484 34. Pennsylvania follows close, having 41,016, receiving $1;155.308 45. per quarter. California has 3,552 pensioners who receive $109,505 01 per quarter. Scattered through various foreign countries are 1,821 pensioners, receiving $73,798 57 per quarter. Not one of these foreign pensioners are in Ireland; the Irish defenders of the Union prefer to die in the country they fought for.

Darwin Mines.

The Defiance continues to yield plenty of good ore all of which is shipped to San Francisco, as usual. As fast as miners can be found they are put to work in the mine.

J. C. Eddy sent out a crew a few days ago to start up the mill at old Coso. There is ore enough on hand for a good run. Mr. Eddy has also got an interest in the Promontory mine, near Darwin, and more men will now be put to work there.

Mr. N. G. Fairman was in Darwin a few days ago. He reported favorably of the Panamint district. The mill is nearing completion but progress is delayed for want of more mechanics.

At the Lucky Jim the usual amount of work is being done and ore taken out. Chloriders in the District are making good wages. The condition of the whole Darwin district is as good as at any time for years past.

Irrigation Directors Meeting.

The Board of Directors of Irrigation District No. 1 met at Independence on Tuesday. All the members were present.

The minutes of previous meeting were read and approved.

C. B. Rawson offered the following preamble and resolutions:

WHEREAS, Joseph Seely is the owner of 25,000 inches of water measured under a four inch pressure, of Owens River, under a location dated January 13, 1886, for the purposes and uses set forth in said location notice, and whereas, it is shown that said Joseph Seely commenced work thereon within 60 days from the date of location and has prosecuted the work on the ditch therewith and with reasonable diligence since said time, and whereas, the water so located by the said Joseph Seely is necessary and required by Irrigation No. 1 of Inyo county for the purpose of carrying out the object of its formation, now therefore be it

Resolved, That the President and Secretary of said Irrigation District be authorized and they are hereby instructed to enter into a contract with the said Joseph Seely for the purchase and conveyance of said water rights to said Irrigation District, upon the following terms, to wit:

Said Seely agreeing to sell said water right and conveying the same by good and sufficient deed to said District upon said District paying to him the sum of $7,000 at such time as the money is received there for by said District from the sale of any bonds that may be sold by said District. And the said Seely is to keep possession of said water right and to prosecute the work upon the ditch connected therewith diligently and continuously at his own expense until such time as he shall convey the same deed to said district.

The Board adopted the preamble and resolutions as read.

On motion ordered that the President and Secretary are hereby authorized and instructed to employ A. R. Conklin attorney for said Board for the period of one year from this date at a compensation of $2,500 per year, and he is hereby appointed Secretary of the said Board until the expiration of the term of the present Directors. The amount above stated to be full compensation for both services.

Board adjourned until Wednesday, October 5th, at 9 a. m.

W. L. HUNTER, President.

H. L. CLARK, Secretary pro tem.

WEDNESDAY, Oct. 5, 1887.

Board met at 9 a. m., all the members present. Minutes of preceding day read and approved. The contract with Joseph Seeley as provided for in yesterday's proceedings read and submitted to the Board and by them approved, and was thereupon duly executed by Joseph Seely and the President and Secretary of the Board. The President reported that A. R. Conklin had been employed as provided for in the proceedings of previous day, the terms having been accepted by A. R. Conklin.

J. Gilchrist and Joseph Seely submitted an approximate estimate of the cost of the ditch at $160,000, with the further sum of $15,000 to cover all contingencies.

C. B. Rawson offered and the Board adopted the following:

Resolved, That the estimate of the cost of said ditch and incidentals be fixed at $160,000.

On motion ordered that A. R. Conklin be, and he is hereby directed to examine the title of Joseph Seely as to his location of 25,000 inches of the water of Owens River and to report at next regular meeting.

Board adjourned until next regular meeting.

W. L. HUNTER, President.

A. R. CONKLIN, Secretary.

Canal Estimate

The following is the detailed estimate of cost of irrigation canal, as submitted to the Directors by J. Gilchrist and Joseph Seely:

10 " 40 " "	17.600
10 " 30 " "	13,200
10 " 20 " "	8.800
8 " 10 " "	4,000
20 " 20 " " for distribut'g	35,200
10 " small cross ditches	5,090
Add for 1½ miles in black lava rock and about 6 miles along mountain side	30,000
Cost of dam and present vested water right	15,000
Bridges, flumes, flood-gates and weirs	20,000
Probable cost of survey and profile map	3.000
Superintendent say 12 months	2,500
Total	$159,980

No accurate survey has been made and the above estimate is therefore based upon guess alone. The actual cost may vary widely from the estimate. Before the question of issuing bonds shall be voted upon the matter will be very freely discussed.

Water Troubles.

There is serious trouble about water at Asuza, Los Angeles county. The water is taken from the San Gabriel river for irrigation. A local paper says there are two factions at the *locus in quo*, and the bone of contention is a water ditch where the water is taken out of the river in the canyon. One faction has fortified itself on the preciptous mountain side and therefrom dominates the ditch, by raining down great showers of rock on the opposite faction when they attempt to interfere with the water. Conflcits have occurred. Shovels have been freely used and craniums have been cracked. Fire arms have been drawn and attempts made to use them. Arrests followed. The situation is distressing and deplorable. The people thus in hostile array are of the best, and are in no manner to blame for the misfortunes which aflict them. We are fortunate in Owens valley in not having any serious disputes about water; we have the best watered country in all southern California.

Found Dead

A well known character commonly known as sister Brown was found dead last Thursday near the foot of Cerro Gordo hill, east from Keeler. The woman had been in Keeler and was on her way to her home at Cerro Gordo: she had left the road near Keeler to make a short cut, and when about one hundred yards distant from the point where she would have again got into the road, became exhausted, laid down and died. She had been missing several days before the body was found. The woman was aged about fifty years, and was a native of England. Coroner Matlack held an inquest and the Jury rendered a verdict in accordance with the facts. Coyotes had eaten most of the flesh.

Special Purses.

At a meeting of the Board of Directors of Agricultural District No. 18, held on Wednesday last, it was provided that a special premiums of $50 be given for a base-ball game, to be played at the Park on Monday afternoon. On the same day at 2 o'clock p. m. a half mile race for untried running horses. First horse, $40; second horse, $10. Five horses to enter; three to run.

In The Interest of Miners.

The law provides for a mineral collection in every Agricultural District. This collection is to include specimens of all ores and minerals found in the District, and is to be properly arranged and kept in a place provided by the Association. It is intended to illustrate the mineral resources of the county and is to be open at all proper hours to visitors. Suitable cases are to be provided for the safe keeping of the specimens. A good display of ores will be made at the Pavilion during the Fair, and as this is the place where the permanent collection will be kept a good start can be made in getting up such a display of the mineral resources of Inyo county, and of the entire 18th District as will fully illustrate the great value of our mining interests. An official record will be kept of the character and value of all ores, and of the name of the mine and district where found, and also the name of the person from whom the ores are received. Such a collection of minerals as the law provides for, and their continued public display under the care of the Association, will do much to promote our mining interests.

Hurrah for the Volunteer.

The victory of the Volunteer over the Thistle is particularly gratifying to every old seaman who has served under the stars and stripes. No man who went through the glorious actions where Farragut and Porter were leaders can read of the victory of the Volunteer without the blood tingling to the finger tips. The American is not the slave of precedent; he is not bound immoveably to do things in a certain way because others have done those things that way; he seeks new ways and finds them. When a new war ship is wanted the American citizen builds a Monitor; when the fastest yacht is wanted he builds the Volunteer. If other and sterner contests should arise the American volunteer will be found equal to the occasion, as he always has been.

New Irrigation Scheme.

Last Monday a party arrived at Bishop Creek to investigate a project for irrigating a large tract of land near the town. It is proposed to build a large dam in a narrow gorge in the mountains, a short distance below where two or three large lakes may be connected by raising the water. This would form an immense reservoir for the storage of water, a vast quantity of which now runs to waste a good part of the year. Plenty of land is available for the use of the water. The party left Bishop Creek on Tuesday, accompanied by Surveyor McKnight, to make a preliminary survey.

A Huge Specimen.

Some time ago Barnes and Kehoe loosened a cube of lead and silver ore in the White Hill mine that weighed two tons. Unfortunately no means were available for taking the mass of ore out of the mine without breaking it up; if it could have been preserved whole it would have been the finest specimen ever seen in a collection of ores and would no doubt have found a place in the State cabinet.

Cheap Fares

During the District Fair at Independence tickets will be sold at all stations south of Bellevile to Independence and return at one half usual rates. Returning these tickets will be void after October 18th and going south after October 17th. The tickets will be good on the train going south on the Monday after the fair, and going north next day.

A Startling Success

Extensive preparations have been made for the representation of the two dramas, "Led Astray" and "Lady Audley's Secret" by the I. A. D. A. next week. A well appointed stage has been erected in the new pavilion. "Led Astray" will be put on the boards Monday night, and will be a startling success.

Bring Plenty.

Farmers, you should make a good display at the Pavilion; therefore bring sacks of oats, barley, wheat, corn and potatoes. Every stranger in Owens valley says we have the finest alfalfa in the State. A few bales should be shown at the Pavilion.

Water.

The first building in town to be supplied with water from the new water works is the Independence Hotel. Mr. Levy has faucets put in various places through his buildings and in the yards and corrals. The water is very pure.

Unclaimed Letters.

Letters addressed as follows remain unclaimed at the Independence post office; L. A. Anger; J. Carpenter; D. N. Hukill; James Lane; Miss N. Strode; William Treglown.

NOTICE.

AGRICULTURAL DISTRICT NUMBER 18.

Notice is hereby given that all parties are invited to send for exhibition at the Fair of Agricultural District No. 18, of California, all kinds of manufactured articles of American production; all products of the soil; mineral products; objects of a curious nature, or such as are of interest to science; collections of native insects; fossils, rare books, or other printed matter or manuscripts. The Directors desire to make an interesting display and will welcome everything that will be likely to instruct or entertain the public. Full guarantee will be given for the safe return to the consignor of any article sent for exhibition at the Fair, which will begin at Independence October 4th and continue through the week. Anything consigned for exhibition should reach Independence not later than Saturday, October 8st and should be addressed to the Secretary.

C. MULHOLLAND,
Secretary Agricultural Dist. No. 18.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine

UNLOADING A BANANA VESSEL.

A Motley Lot of Jabbering, Perspiring Dealers—Grades of Fruit.

Forty years ago scarcely a bunch of bananas came to New York by vessel. Until ten years ago they were brought here only in little brigs and schooners. Now they come in great ocean steamers only. The larger quantity is received between May and September, but throughout the year the arrival of banana laden steamers will average four each week, or say 200 per year. An average cargo is 20,000 bunches, and the bunches will each average 200 separate pieces of fruit. But here was the Amicitia, from Baracoa, Cuba, and 200 sweltering, half mad Italian and "dago" Cuban fruit buyers. An entire cargo is disposed of as rapidly as it comes out of the hold. In the old times three to six days were required to unload a little schooner. Now a great steamer will discharge a cargo of bananas in ten hours. The consignee has notified every dealer in the city, and they are nearly all here, a motley lot whose jabbering, cursing and perspiration are something terrible indeed. They swarm over the steamer's deck and drive bargains as though their very immortal souls depended on the higgle haggling over that load, or that bunch, of bananas.

Gangs of from eight to sixteen men are required at each hatch, and these fellows who work in the hold in the most fearful stench ever whiffed by human nose receive 25 cents an hour. They are the lowest species of beings existing along the docks. They possibly get two days' work a week. That is enough. They live on bananas, swill and garbage, sailor boarding house rum, and lie along the burning pavements of South and West streets in sodden, open-mouthed stupor, with less manners and brains than swine. Relays are formed from the hold, and the bunches tossed thence, one at a time, being caught on their way out by each man with hands flat, palms upward and bowed forearms, which act as a sort of pillowing for the fruit.

The rapidity and safety of the movement of these bunches are marvelous. At each hatch on deck are a tallyman for the vessel, and a tallyman who is also a "selecter" for the consignee. The latter grades the bunches as they come flying from the hold with incredible swiftness and accuracy. A few feet below on the docks are scores of dealers' wagons, and, according to the grade, a constant stream of bunches flows into each. In these they are carried to the "sweat rooms" of the wholesalers, where they are hung much like curing tobacco, and kept at about 110 degrees of heat night and day for from three to five days, when the bunches, which were originally a livid green, are ripened and transformed to the tempting yellow clusters which lure us to the stalls of Lorenzo the Magnificent's descendants upon the streets.

The grades are simply "firsts," "seconds," "culls" and "ripes." "Firsts" are bunches containing the most and finest fruit. "Seconds" are all other prime condition, marked table bunches. "Culls" are the lowest grade fruit, and "ripes" comprise the overripe and partly decayed bananas. The "culls" are piled on deck in freckled, unsightly heaps, and you will have to wade ankle deep in "ripes" until they are sorted and corded, two tiers lengthwise, in old orange boxes, one-quarter of a cargo possibly being in this condition. The price secured for bananas by the vessel load is about $1.12 per bunch, and the retailer gets them at $1.40. As the bunches average 200 pieces each, any one can estimate the profits in the street banana trade.—Edgar L. Wakeman in Globe-Democrat.

Handling California Wheat.

In no country in the world can wheat be handled as cheaply as in California. During the harvest season there is no possibility of rain, and the wheat is put into burlap bags and stacked up in the field until the farmer is ready to ship. When sent to San Francisco it lies on the wharf until a ship is ready to take it on board. No shelter is needed, and there are no elevator charges, the bags being placed on board ship just as they came from the fields. In addition to the profit resulting from cheap handling, the owner has his profits considerably increased by the gain in weight made on the voyage to Liverpool. When the wheat leaves California it is dry as tinder, and in exactly the condition to absorb the moisture of the sea air; and, consequently, on its arrival in England a cargo of wheat will be heavier by many thousand pounds than when it left California. Wheat is never shipped in bulk, but always in bags, as when loaded in bulk it is about the most dangerous cargo a ship can carry. No matter how lightly it may be packed at first, it settles considerably within a short time, and then is very liable to shift. When shifting takes place a ship is as good as lost, as the change in the center of gravity throws her on her beam ends, and she is nearly certain to go to the bottom in the first moderate gale. Many ships were lost in this way, and now the shipment of grain in bulk is prohibited by law.—A. H. Smith in Globe-Democrat.

Sarah Bernhardt's Mouth.

Bernhardt has naturally an ugly mouth, large and with thin, pallid, formless lips. To rectify this she begins on the lower lip, paints a thin red line from the corner, widening it toward the middle and curving again into the other corner. This makes the mouth look much smaller and the upper lip full and rosier. The upper lip is treated in the same way, only she makes two sharp curves on each side off the center, which gives the proper Cupid's bow shape. The result is that her rosy mouth is reduced in apparent size, and looks like the bride's whose "lips were red, and one was thin," and she looks five years younger than she does without this little adventitious aid to her beauty.—New York World.

A Strictly Methodical Business Man.

A Boston man tells the following incident as illustrating the strictly methodical style of doing business which distinguished the early Boston merchants. Having occasion to settle an account with a well known honored firm he was sent by the firm which employed him to deliver a note on demand for $1,600. The word dollars was abbreviated so that it read dlls. Mr. Perkins, the dignified head of the house, received the document, and adjusting his spectacles, read it and handed it back to the messenger, saying: "Young man, we don't want 1,600 dolls in our business. Take it back and have it made dollars and I will accept it."—Philadelphia Call.

Picture Frames of Paper.

Black walnut is said to be getting very scarce in this country, but picture frames are now made of paper and colored like walnut, and are so perfect that no one could detect them without cutting them. Paper pulp, glue, linseed oil and carbonate of lime or whiting are mixed together and heated into a thick cream, which, on being allowed to cool, is run into molds and hardened.—Chambers' Journal.

Worthy of a Philosopher.

A youngster under 4 years old was going from home for awhile. His governess was to be left behind; and feigning deep sorrow at his abandonment of her, she asked what she was to do while he was away. "Oh, sit on a mossy stone and weep," was the quick and apt reply, worthy of a proverbial philosopher himself.—Arkansaw Traveler.

Fashions in Surgery.

M. Verneuil, the eminent surgeon of the Paris Academy of Medicine, sets forth in one of his recent public addrssses some of the changing methods or "fashions" which have characterized the history of surgery, instancing among other things the fact that in the Eighteenth century every man who had fallen on his head and was suspected to have cracked his skull was trephined, and that during the wars at the end of the last century and the beginning of this every gunshot wound of the extremities was treated by amputation. He went on to say that, at the time when he entered the medical profession, tenotomy was the rage, every tendon, every ligament, every muscle in every region of the body was cut—squinting, stammering, spinal curvature, bandy legs, even deafness was supposed to be thus cured.

We have, says M. Verneuil, trephined too much, tenotomized too much, resected too much, dilated too many strictures, excised the iris too often, operated a great deal too much in scraping cold abscesses; in proof of this he argues that in a great country like France, with 37,000,000 inhabitants, the operation of transfusing is now performed not more than half a dozen times and that of trephining not more than a dozen times in the year; that in every country nowadays the spinal and lingual muscles of the humpbacked and stammering are left alone; that in England, where resection was common, it is now hardly ever performed, and the eye surgeons now nearly all agree in leaving the iris undisturbed.

A Lesson from a Little Barefoot.

Mr. Matthew Arnold was greatly struck by this democratic government of our reading room when he was in Boston. He came in here one day and saw a little barefooted newsboy sitting in one of the best chairs of the reading room, enjoying himself apparently for dear life. The great essayist was completely astounded. "Do you let barefooted boys in this reading room?" he asked. "You would never see such a sight as that in Europe. I do not believe there is a reading room in all Europe in which that boy, dressed as he is, would enter." Then Mr. Arnold went over to the boy, engaged him in conversation, and found that he was reading the "Life of Washington," and that he was a young gentleman of decidedly anti-British tendencies, and, for his age, remarkably well informed.

Mr. Arnold remained talking with the youngster for some time, and as he came back to our desk the great Englishman said: "I do not think I have been so impressed with anything else that I have seen since arriving in this country as I am now with meeting this barefooted boy in this reading room. What a tribute to democratic institutions it is to say that instead of sending that boy out to wander alone in the streets, they permit him to come in here and excite his youthful imagination by reading such a book as the 'Life of Washington!' The reading of that one book may change the whole course of that boy's life, and may be the means of making him a useful, honorable, worthy citizen of this great country. It is, I tell you, a sight that impresses a European not accustomed to your democratic ways."—Boston Herald.

New York's African Colony.

We are getting quite an African colony among us. I do not allude to the long familiar settlement in Thompson street, which is American in all but color, but to a gathering of Moors, Arabs, Algerians and other samples of the lighter races raised on the north coast of the dark continent. I buy cigars from a gentleman from Morocco, and dicker for oriental rugs and bric-a-brac with a peddler from Tunis. There is a whole regiment of Algerians who meet in a certain wine shop popular with the Frenchmen of lower Sixth avenue, and Alexandria, Cairo and Arabia proper are all represented in the human kaleidoscope of the town. These North Africans are shrewd tradesmen. They seem to have been born with a genius for commerce. They take quite naturally to peddling, and travel from house to house and office to office with all sorts of wares that are just as likely to come from France as from Africa. The Moors appear to be the blackest in skin. Most of them are of a rich mahogany color, but with fine features and clearly cut lips. Some of the Arabs are also very dark. The Algerians and Tunisians look like badly sunburnt Italians. The Algerians talk a sort of pigeon French and the Moors a pigeon Spanish, but all of them pick up a smattering of English very rapidly—quite enough to drive a sharp trade for their own benefit in that tongue.—Alfred Trumble in New York News.

Table Etiquette in Zanzibar.

Talking of eating reminds me of the way the operation is performed by the Arabs. Five of them seat themselves round a large bowl of rice, surmounted by a skinny fowl, all being curried. Two seize the wings with their fingers and two the legs, and simultaneously tearing these off leave the carcass to the fifth, afterward taking out the rice by handfuls and dexterously conveying it to the mouth with a peculiar jerk. One mark of hospitality shown to guests when at table consists in the chief's rolling up some rice into a ball in the palm of his hand and aiming it at his guest's widely distended jaws. On one occasion this piece of civility was shown to myself, but not being an adept in the art of swallowing rice balls when so projected the effect was anything but what my kind entertainer anticipated, for, independent of being nearly choked, the grains were scattered, or rather sputtered, over the table in a manner that elicited roars of laugher even from the very grave Arabs. This, of course, was the last experiment of the kind tried upon me.—Overland Monthly.

Clocks in England.

Clocks are regarded as important and intricate institutions in this country. There are plenty of them everywhere, even in hotel chambers and apartments in lodgings. But they are usually wound by a man from outside, who comes daily or weekly, as the case may be, solemnly gives the required twisting, looks at the dial for a minute inquisitively, with his head on one side, like a bird inspecting some new kind of bug, says "thank you" and retires. I was telling an English gentleman that in America it is not considered necessary to call in an outsider just to stick a little crank in the face of a clock and turn it a few seconds. I then tried to force a trifle of gladsome variety into the conversation by narrating the story of the man who wound up a clock every night for thirty years, and then discovered that it was an eight day clock. But my English hearer only listened earnestly and remarked: "Aw, but the man must have been very much vexed."—London Letter.

A Parrot's Reasoning.

A New Orleans parrot, finding that two doves entered her cage and took all the food there the moment she left, thought awhile, and then on going out closed the door after her. The scientists have the floor.—Omaha World.

NEW INDUSTRY FOR WOMEN.

Sending Daintily Served Meals to Families Who Do Light Housekeeping.

A new industry for women is beginning to evolve itself in New York, which may yet do much toward solving the vexed servant girl question. Some three months ago a woman of a good old New York family, educated and capable, left a widow without money and having served no apprenticeship to any of the industries by which women earn bread and butter, began to think of putting her pride in her pocket and turning her notable housekeeping talents to account by looking for service in a family as cook.

Considering the matter further, it occurred to her that she could do no better. Securing with some little effort, the project being a novel one, a clientage of half a dozen families in her immediate neighborhood that were groaning under dyspepsia, induced by "light housekeeping," she began to send out, three times a day, delicately cooked and daintily served meals. Her venture was so immediately successful that she looked up a New England housekeeper and a couple of stout armed Swedish girls to help her, and her business sprang, almost in a single night, to the utmost dimensions that she could handle. Families that had tried the frizzled steaks broiled by the green girl, families that were starving on meals elaborated over the flickering gas jet, families that had eaten "table board" in the basement dining room around the corner, families whose pocketbooks groaned at the expense of the waiter load sent in from hotel or restaurant, families whose heads were business women without time for cooking, families tired of the annoyance of servants in a small flat, were glad to be supplied with honest home cooking, varied, palatable, and at a reasonable price.

She has twenty-one families on her list at present, I think, to whom she supplies just that wholesome round of breakfasts, lunches and dinners that the average house mother would offer to husband and little folks. Fruit in season, in the morning, oatmeal or wheaten grits, fish, steak or chops; a side dish, such as stewed kidneys, sausage, liver and bacon, eggs, coffee, tea or chocolate, bread and butter, milk and sugar. Soup, fish, a roast, three vegetables, dessert and coffee make up the dinner, all of which is sent out at a cost of $7 a week to a single person, $5 each for members of families, though as what is supplied for two is sufficient for three, the cost per household is not reckoned in multiples of that sum. In a way the experiment is one of co-operative housekeeping, for, practically, the cost of everyday living is divided among a number of families, purchases for all being made together, the labor for all systematized and simplified, and the waste of all minimized, the result being that each family saves nearly the full amount of its cook's wages, and is freed from the tyranny of Castle Garden besides.

Two other women, emulous of the first, talk of starting similar enterprises. The scheme is in its infancy, but whenever a sufficient number of families within a radius of a block or two as near the great flat houses can be interested in it, it has promise of an opening for an industry for women and of relief from divers perplexities for the families they serve.—Eliza Putnam Heaton in Brooklyn Times.

SCIENCE AND INDUSTRY.

—During the year 1886 American mills produced 1,350,000 tons of steel rails, valued at $40,000,000. The prospect for 1887 is still better.—*Pittsburgh Post.*

—The West Lebanon (Penn.) Rolling Mill Company has shipped a chain weighing twenty-five tons for use on a five-mast lake schooner. It requires two cars to carry it.

—A recent computation makes the velocity of the solar system in space only about 10,000,000 miles a year. By a different method another computer has determined the rate to be about 525,000,000 miles a year.—*Arkansaw Traveler.*

—A Birmingham (Eng.) firm are making oar-blades of the best sheet steel, highly tempered. These are declared to be much stronger than the ordinary wooden blades and, being much thinner, enter and leave the water cleaner. They are strongly fitted to wooden handles.

—A St. Augustine, Ga., letter describes the ice works at that place as having a capacity of 1,000 pounds per hour. The freezing cans make a mass of 200 pounds each, and are taken out in rotation, an average of five hourly, after thirty-six hours' exposure to the evaporation of ammonia, 240 cans being kept at work.—*Boston Budget.*

—The process of taking beautiful colored photographs has recently been perfected by an English photographer. A negative of the sitter is taken by a sentitized plate of electric light. From the negative a positive is produced on a chemically-treated basis by the aid of a solar camera and a spectroscopic arrangement. The image is produced in colors without the aid of hand-work or brush.—*Chicago Advance.*

—Last year (1886) the spots on the sun were so small and few that it may have been the minimum of the sunspot period of eleven years. So says the distinguished Italian astronomer, Prof. Tacchini. From the 31st of October to the 12th of December there were only six days when any trace of a spot could be discovered on the solar disc, and only a single tiny spot could be observed on those days.—*N. Y. Ledger.*

—It is said that a woman began the manufacture of sewing thread in England in 1722, and it would seem proper that the idea should have first come from that sex through whose hands nine-tenths of the thread passes that is used. Paisley has the honor of being the first town that embarked in the business. It was called "Nun's thread," was made of flax, and so rapidly increased in popularity that it was not long before it became an important branch of manufacture.

—A movement has been started to found a laboratory on the New England coast, where students, teachers, and investigators may find facilities for the pursuit of biology. It is now some years since the brief episode of the Penikese laboratory, which was founded by Mr. Anderson and intrusted to Professor Agassiz. During the interval, summer schools of science have multiplied, and a few of them have successfully maintained their modest usefulness.—*Public Opinion.*

—"They don't get the best of me," said Muggins, the grocer, in telling how he had defeated supposed attempts to overreach him; "no, sir, they don't get the best of me." "If you refer to your customers," replied a woman who had come in for a cent's worth of yeast, "I guess you are about right, Mr. Muggins."—*Boston Transcript.*

$15,000 IN GOLD

Is What a News Correspondent Gets for an Investment of $1.

As mentioned briefly in our issue of last week's *News*, W. S. Locke, some time past our correspondent at McMillan held a one-tenth ticket in The Louisiana State Lottery that drew the capital prize—$150,000. A reporter of the *News* visited Mr. Locke on Saturday last and gleaned the following facts: Mr. Locke has invested in this lottery for the last four months, buying a one-tenth ticket each time, spending in all four dollars. It was his intention to try his luck for one year at least and see what the result would be. On Tuesday, 19th ult., a rumor reached him that a ticket at McMillan had drawn $15,000, but Mr. Locke would hardly credit the news until a printed list containing the number of the prize winners was put in his hands. He at once telegraphed the number of his ticket to the New Orleans National Bank and received in reply that if he held that number he was entitled to the money. The ticket was immediately placed in the First National Bank of Marquette for collection and in less than a week $15,000 in gold minus the exchange, was placed to his credit. Mr. Locke has been in the employ of D. L. West, merchant of McMillan, for a number of years, attending to the railroad office at the same time. He says that he has never sent money for tickets otherwise than in a plain envelope addressed to M. A. Dauphin, New Orleans, La., and has always received his ticket promptly. That the scheme is run on the square is without doubt. Our correspondent and family will visit their old home in Canada for a few weeks where they have not been for eight years, after which they will probably locate on the line of the new Minneapolis railroad and go into the general merchandise business.

The many friends of Mr. Locke rejoice in his good fortune and while the *News* looses a good correspondent it glories alike with the rest.—*Newberry (Mich.) News*, August 4.

SCHOOL AND CHURCH.

—Of Edinburgh's 181 churches, 124 are said to be Presbyterian.

—A committee of the Board of Education of New York City has reported in favor of introducing manual training in its schools.

—Among the fifteen young theological students graduated from Auburn Theological Seminary a few days ago were a Hindoo, a negro and several Europeans.

—All the evangelical churches of Europe and America during the past year contributed $10,371,000, which is an advance of $350,000 beyond the preceding year.

—In Italy, for 28,000,000 inhabitants, there are 47,000 schools, one for every 600 people, at a cost of 8½d. per head. The average number of pupils at the schools is 40.

—The Gospel of Mark has been printed in raised characters for the use of the blind in China. Portions of the Bible have already been printed for the blind in 249 languages, using this invention of Dr. Moon.—*N. Y. Witness.*

—At the annual meeting of the Chicago Young Men's Christian Association the total membership was reported as 4,809; employment had been secured for 4,464 men and boys; the total receipts for the year were $38,548.

USEFUL AND HURTFUL MEDICINES.

There is a certain class of remedies for constipation absolutely useless. These are boluses and potions made in great part of podophyllin, aloes, rhubarb, gamboge, and other worthless ingredients. The damage they do to the stomachs of those who use them is incalculable. They evacuate the bowels, it is true, but always do so violently and profusely, and besides, gripe the bowels. Their effect is to weaken both them and the stomach. Better far to use the agreeable and salutary aperient, Hostetter's Stomach Bitters, the laxative effect of which is never preceded by pain, or accompanied by a convulsive, violent action of the bowels. On the contrary, it invigorates those organs, the stomach and the entire system. As a means of curing and preventing malarial fevers, no medicine can compare with it, and it remedies nervous debility, rheumatism, kidney and bladder inactivity, and other inorganic ailments.

The vineyards of Count di Mariflori, son of King Victor Emanuel, cover at Lucca nearly seven thousand acres. The Count is never known to speak of filthy Lucca.

Too well known to need lengthy advertisements—Dr. Sage's Catarrh Remedy.

A squall makes sail-boats capsize, but makes a baby's mouth one size larger.

Best, easiest to use and cheapest. Piso's Remedy for Catarrh. By druggists. 50c.

BEAUTY of Skin & Scalp RESTORED by the CUTICURA Remedies.

NOTHING IS KNOWN TO SCIENCE AT ALL comparable to the CUTICURA REMEDIES in their marvelous properties of cleansing, purifying and beautifying the skin, and in curing torturing, disfiguring, itching, scaly and pimply diseases of the skin, scalp and blood, with loss of hair.

CUTICURA, the great Skin Cure, and CUTICURA SOAP, an exquisite Skin Beautifier, prepared from it, externally, and CUTICURA RESOLVENT, the new blood purifier, internally, are a positive cure for every form of skin and blood disease, from pimples to scrofula. CUTICURA REMEDIES are absolutely pure, and the only infallible skin beautifiers and blood purifiers.

Sold everywhere. Price: CUTICURA, 50c.; RESOLVENT, $1; SOAP, 25c. Prepared by the POTTER DRUG AND CHEMICAL CO., BOSTON, MASS.

☞ Send for "How to Cure Skin Diseases."

HANDS Soft as dove's down, and as white, by using CUTICURA MEDICATED SOAP

IMITATORS AND IMPOSTORS.

The unequalled success of ALLCOCK'S POROUS PLASTERS as an external remedy has stimulated unscrupulous parties to put forth imitations, which they endeavor to sell on the reputation of Allcock's. It is an absurdity to speak of them in the same category as the genuine and original porous plaster. Their pretensions are unfounded, their vaunted merit unsupported by facts, their alleged superiority to or equality with Allcock's a false pretence.

The ablest medical practitioners and chemists and thousands of grateful patients unite in declaring ALLCOCK'S POROUS PLASTERS the best external remedy known.

A New York Police Justice the other day refused to let a Chinaman swear on a chicken and made him use a Bible.

SAVING THE LAWYERS.

"The first thing we do, let's kill all the lawyers." This is rather a blood-thirsty proposition, which we modify by offering to cure this worthy class of people. Most of them suffer (in common with nearly all others of sedentary habits) from the injurious effects of dyspepsia, indigestion, piles, loss of appetite, and other ailments caused by a constipated habit of the body. Dr. Pierce's "Pleasant Purgative Pellets" eradicate all these disorders in promptly removing the cause thereof, and induce a rare degree of comfort and health.

On the other side, politicians are occasionally given the freedom of a city; in America they take it.

BRONCHITIS.—Sudden changes of the weather cause Bronchial troubles. "*Brown's Bronchial Troches*" will give relief. *Sold only in boxes.* Price, 25 cts.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

No man should be expected to write dry jokes when you can wring water out of his shirt collar.

VICTORY AT LAST.

Consumption, the greatest curse of the age, the destroyer of thousands of our brightest and best, is conquered. It is no longer incurable. Dr. Pierce's Golden Medical Discovery" is a certain remedy for this terrible disease if taken in time. All scrofulous diseases—consumption is a scrofulous affection of the lungs—can be cured by it. Its effects in diseases of the throat and lungs are little less than miraculous. All druggists have it.

When it is known that a man will die game he should not be killed out of season.

Try Germea for Breakfast.

ROYAL

BAKING POWDER

Absolutely Pure.

This Powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the multitude of low-test, short-weight, alum or phosphate powders. Sold only in cans. ROYAL BAKING POWDER CO., 106 Wall Street, N. Y.

HALL'S SARSAPARILLA

Cures all Diseases originating from a disordered state of the BLOOD or LIVER. Rheumatism, Neuralgia, Boils, Blotches, Pimples, Scrofula, Tumors, Salt Rheum and Mercurial Pains readily yield to its purifying properties. It leaves the Blood pure, the Liver and Kidneys healthy and the Complexion bright and clear.

GOLDEN MEDICAL DISCOVERY

CURES ALL HUMORS, from a common Blotch, or Eruption, to the worst Scrofula, Salt-rheum, "Fever-sores," Scaly or Rough Skin, in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. Great Eating Ulcers rapidly heal under its benign influence. Especially has it manifested its potency in curing Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Disease, White Swellings, Goitre, or Thick Neck, and Enlarged Glands. Send to our address stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections.

"THE BLOOD IS THE LIFE." Thoroughly cleanse it by using Dr. Pierce's Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, and vital strength, will be established.

CONSUMPTION,

which is Scrofula of the Lungs, is arrested and cured by this remedy, if taken before the last stages of the disease are reached. From its marvelous power over this terribly fatal disease, when first offering this now celebrated remedy to the public, Dr. Pierce thought seriously of calling it his "Consumption Cure," but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption, but for all Chronic Diseases of the

Liver, Blood, and Lungs.

If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flushes, low spirits and gloomy forebodings, irregular appetite, and coated tongue, you are suffering from Indigestion, Dyspepsia, and Torpid Liver, or "Biliousness." In many cases only part of these symptoms are experienced. As a remedy for all such cases, Dr. Pierce's Golden Medical Discovery is unsurpassed.

For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy.

SOLD by DRUGGISTS, at $1.00, or SIX BOTTLES for $5.00.

Send ten cents in stamps for Dr. Pierce's book on Consumption. Address, World's Dispensary Medical Association, 663 Main Street, BUFFALO, N. Y.

$500 REWARD

is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure. If you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption.

Dr. Sage's CATARRH REMEDY cures the worst cases of Catarrh, "Cold in the Head," and Catarrhal Headache. 50 cents.

DUJARDIN'S LIFE ESSENCE

is a combination of Phosphorus, Albumen, Protogon, Lime, Soda and Iron, which act on the Brain, Nerves and Stomach, increasing the appetite, assisting Digestion, Curing Dyspepsia, in every form, Headache, Neuralgia, Insomnia, General Debility, Want of Vitality, Nervous Prostration and Impotence. In Hysteria and Epilepsy its effects are magical. In Consumption its nutritive qualities are beyond comparison with other preparations. Its action is shown by the increasing strength and weight of the patient, and the loss of cough and night sweats. It is a brain, nerve, and life giving tonic. Price, $1.50 per bottle.

☞ FOR SALE BY ALL DRUGGISTS.

BIG G Cures in 1 TO 5 DAYS. Guaranteed not to cause Stricture. M'f'd only by the EVANS CHEMICAL CO. Cincinnati, Ohio.

G has taken the lead in the sales of that class of remedies, and has given almost universal satisfaction. MURPHY BROS., Paris, Tex.

G has won the favor of the public and now ranks among the leading Medicines of the oldtom. A. L. SMITH, Bradford, Pa.

A RAJAH'S MANSION.

Description of a Visit to the Elegant Home of an Indian Prince.

When I was finishing a busy day, in company with Mr. May, we stopped at the house of a Rajah, on a side of Calcutta which I had not visited before. The magnificent home of a native Hindu Prince is always a place of interest. The fact that such a thing exists, is of itself remarkable. The English i ave had matters their own way, and, like the Clive, could easily have absorbed about all the wealth of the country. On the contrary, they have been just and moderate. Even the Princes who arrayed themselves against India during the mutiny have not been turned adrift without a rupee. Many of the noble families are to-day drawing pensions from the general treasury, and living in vast luxury. There are many others, however, who seem to have been in no way connected with the political complications of the country, and are in the undisturbed enjoyment of their vast estates. The English respect for native rights in India is one of the most remarkable illustrations of political justice in history. It is as far above modern Spain's treatment of her colonial possessions, or ancient Rome's procedure in relation to her conquered provinces, as Christianity is above and beyond either ancient or modern paganism.

The entrance from the street to this Rajah's home is large, and unguarded by servants. There is a large circular court, with a pond for marine fowls and fishes. In the trees there are parrots and other tame birds.

Our cards at the door of the great mansion secured us prompt admission. The furniture was rich, and mostly in European style, but there were some old pieces of elaborate Indian workmanship. Marble objects of ornament, and rich floors, and finely wrought wainscoting, and tall mirrors were to be seen on every hand. The rooms were in part in suits, and in part located singly, as quiet nooks for conversation and retirement. Some of the larger halls and chambers were in process of new decoration.

In India much of the work of embellishing, and even of the more solid decoration in stone, is done by artists in the house, and not in the distant workshops. The marble cutters, instead of finishing the objects away from the house, do it on the spot where they are to be used. It is no short task, therefore, to put a native house in order in India. Wood and stone are brought to the place in the rough, and the workmen, in large numbers carry out their plans within the eye of the owner of the house. In this Rajah's house was all the litter of a great Florentine marble workshop. Here was work going on in fine mosaic, the artists, no doubt, having come from Agra for the special purpose. There were many servants and overseers, some of them clad in picturesque oriental costume, and all having their specific duties.

The grandson of the Rajah, a courtly young gentleman, conversed with us a few minutes, and then withdrew. The intelligent attendant who had received us at first was in no haste, but gave us ample time to examine this immense building and all its appointments and the surrounding grounds. One thing here greatly astonished me—the apparent modesty of the wealthy native. If he has an ostentatious spirit, it is hard to detect it. He says nothing in praise of his rare birds, or fine mosaics, vast halls, or the immense boa constrictors, which wind about, or sleep in the meadow behind the close wire fence. He simply stands at a distance, or leaves a servant with you, and only bows his head in acknowledgement of any words of appreciation which you may say concerning any beautiful or surprising collection.—*Bishop John F. Hurst, in Chautauquan.*

ENJOYING A NAP.

Some Interesting Comments on the Natural Position for Slumber.

Passing along the street recently I saw a bootblack enjoying a nap. He had stretched himself across a little platform on which there was a chair for the accommodation of his patrons, and, with his legs hanging off the end of it and his head hanging off the other end, he seemed to be enjoying sleep as very few people in better circumstances and better bed ever enjoy it. But what interested me was the position of his head, for it brought to my mind a learned and highly interesting lecture on the subject of sleep which I heard several years ago at Farwell Hall, from Dr. Jewell. The doctor concurred in the orthodox view that sleep was the effect of anemia, or the retirement of the blood from the brain, and mentioned a good many facts that went to prove the truth of this theory. For instance, any ordinary sleeplessness, after lying down at night, may be cured by sitting up in bed, so that gravity will encourage the blood to leave the head. But all the facts that can be marshaled of that kind, seem to be more than offset by the single fact that the natural position for slumber is one in which the flow of blood to the head is greatly facilitated, while in many cases, as in the case of this bootblack, it goes on interruptedly when the circumstances all favor congestion of the brain. Almost every one has seen a man sleep in a boiling sun, with his head down hill, and his stomach and veins full of alcohol; and a great many people have found a cure for sleeplessness in a gentle stimulant of the circulation before retiring. The truth is that sleep is an enigma to the medical profession. The rest of us are content to know it, with the poet, as "tired nature's sweet restorer, balmy sleep."—*Chicago Journal.*

MARY ANN'S JERSEY.

A Close Old Farmer's Unpremeditated Act of Liberality.

Farmer Simpson was "nigh," in country parlance; he would "skin a flint" for his personal advantage. Even his daughters complained among themselves of his stinginess, the eldest threatening to go out to service, and leave him to fill her place with a hired handmaiden. "I don't even have decent clothes to my back," she said one morning, over the churn, to pretty Miss Deane, one of the summer boarders, and an "early riser."

"I've asked pa," she continued, "if he wouldn't give me what butter I could sell from one cow—and he's just drove home two noble ones—but, no; he don't care if my meetin' dress *is* all out at the elbows."

"It's a shame!" cried impulsive Jessie Deane. "If you even had a Jersey to wear with that blue skirt, you could get along without an entire dress. See here, Mary Ann, *I'm* going to ask him myself."

She ran lightly out to the yard where Farmer Simpson was milking, leaving Mary Ann to watch her in awe at such boldness.

"Mr. Simpson," said the self-appointed embassadress, "there is something you can give Mary Ann that would please her very much."

"Them plaguey cows ag'in!" muttered the farmer to himself. "What does she want of one on 'em?" But he added aloud: "What' that, Miss Deane?"

"Why, it's only one of these new Jerseys that every body likes so much?"

"She wants a Jersey? Wal, I vum! If she's goin' to pester me for any of 'em, I should think she might put up with a common critter."

"But these are very fashionable, you know, besides being so useful."

"Taint fashion, Miss Deane, 'taint fashion,'" said the farmer, shaking his head. "It's butter an' milk y've got to go by."

Jessie was puzzled, but she stuck to her point.

"I am going to have some things sent down next week," she said. "Do let me order a Jersey for her! I'd give it to her myself, but she's too proud to take it."

"Order a critter sent down from Boston! You forehanded folks do beat all! No, Miss Deane; if Mary Ann has got to have a cow, she can take old Shorthorn. I don't go to buyin' any fancy stock for her."

Then Jessie began to laugh, but she stopped in time to escape being thought crazy by Mr. Simpson.

"But can she really have old Shorthorn," she persisted, "and begin with to-day's milk?"

"I s'pose so," said the farmer, gruffly, ashamed to refuse; "but women folks do spend a powerful sight o' money!"

"Aha!" thought Jessie, as she tripped back through the wet path. "So Mary Ann can buy her Jersey herself!"

And she did. Moreover, her father is ignorant to this day of the important distinction between an article of dress and a "critter."—*Youth's Companion.*

LINCOLN'S FIRST DOLLAR.

An Incident Which the Great Man Considered One of the Most Important in His Life.

One evening when a few gentlemen, among whom was Mr. Seward, had met in the Executive chamber without special business, and were talking of the past, Mr. Lincoln said: "Seward, you never heard, did you, how I earned my first dollar?" "No," said Mr. Seward. "Well," replied he, "I was about eighteen years of age, and belonged, as you know, to what they call down South the 'scrubs;' people who do not own land and slaves are nobody there, but we had succeeded in raising chiefly by my labor, sufficient produce as I thought to justify me in taking it down the river to sell. After much persuasion I had obtained the consent of my mother to go, and had constructed a flat-boat, large enough to take the few barrels of things we had gathered down to New Orleans. A steamer was going down the river. We have, you know, no wharves on the Western streams, and the custom was, if passengers were at any of the landings, they were to go out in a boat, the steamer stopping, and taking them on board. I was contemplating my new boat, and wondering whether I could make it stronger or improve it in any part, when two men, with trunks, came down to the shore in carriages, and looking at the different boats singled out mine, and asked: 'Who owns this?' I answered modestly, 'I do.' 'Will you,' said one of them, 'take us and our trunks out to the steamer?' 'Certainly,' said I. I was very glad to have the chance of earning something, and supposed that each of them would give me a couple of bits. The trunks were put on my boat, the passengers seated themselves on them, and I sculled them out to the steamer. They got on board, and I lifted their trunks and put them on the deck. The steamer was about to put on steam again, when I called out: 'You have forgotten to pay me.' Each of them took from his pocket a silver half-dollar and threw it on the bottom of my boat. I could scarcely believe my eyes as I picked up the money. You may think it was a very little thing, and in these days it seems to me like a trifle, but it was a most important incident in my life. I could scarcely credit that I, the poor boy, had earned a dollar in less than a day; that by honest work I had earned a dollar. The world seemed wider and fairer before me; I was a more hopeful and thoughtful boy from that time.—*William D. Kelley, in Rice's Reminiscences of Abraham Lincoln.*

LEARNING TO THIN.

What Led Sir Isaac Newton to Invent the Attraction of Gravitation.

Sir Isaac Newton, of Newton Center, Mass., was one of the greatest thinkers that ever carried a thinker in his bootleg. Whatever he saw he endeavored to find out a cause for it. But as he was thinking all the time he didn't see a great deal. One day, as he was sitting in the garden, oiling up his thinker, he saw an apple fall from a tree. Most men would have supposed that it fell of its own accord, but Sir Isaac had been a boy himself long before founding the theological seminary which perpetuates his name, which, by the way, is a very easy one to spell. He at once began to wonder what made the apple fall; some foolish people say that he wondered why it didn't fall up instead of down, but that is all rubbish. Sir Isaac was no fool if he was a philosopher, and he knew that every thing falls down except a wig, and that false hair.

After (pronounced awfter) much thought and study upon the subject, he discovered the cause; he noticed that apples were more apt to fall down after school was dismissed than during study hours. So the next time he went into the garden he lay low, and when the apple fell he held his breath until the cause came swiftly over the fence to pick up the effect. Sir Isaac collared the boy, for it was he, and taught him how easily pain might be produced by the rapid impingement of a common apple switch upon exposed or only partially protected portions of the human form divine. He illustrated his theory with a few simple experiments such as a boy of ordinary intelligence could easily comprehend. This valuable discovery of Sir Isaac's has been a great boon to grown-up humanity. It is now universally known that apples are more apt to fall when there are a few boys at large in the vicinity than at any other time, and that apples will fall for a boy, when they might have defied the laws of gravitation for months longer. This sublime fact teaches us that modifications that are at first artificial are rendered spontaneous by heredity.

This incident of the apple tree, however, had one bad effect upon Sir Isaac. It led him to hate boys, and he devoted much of his time to making life a burden to them. With this revengeful object in view he invented the attraction of gravitation, and by a joint resolution of Congress, which he easily accomplished by persuading the members of the House that there was a big appropriation in it, he got it established as a fundamental law of nature, with jurisdiction over the tides, the seasons and the movements of the planets, and many other things which boys have since been compelled to learn. So it is that whenever a boy sees an apple he thinks of Sir Isaac Newton first, and then he thinks of some way to get the apple, and by and by he wonders if he can find the painkiller in the dark, and then he thinks how awful it would be to die there, all alone, in the night, and then he thinks if he lives till morning he will give the rest of his apples to his little brother, and thus you see quite a train of thought is awakened in the boy's mind by Sir Isaac's great discovery.

Sir Isaac never took out a patent on his discovery, but the Bell Telephone Company claims that the principle is covered by their invention and the patents relating thereto, and if the courts sustain this claim, as they probably will, every time a man picks up any thing that has dropped down, he will have to pay the telephone company a royalty, and every time he has any thing to do with the telephone company he will drop something.—*Robert J. Burdette, in Brooklyn Eagle.*

NO INTIMIDATION.

How a Country Constable Prepared Himself for a City Expedition.

There was a country constable in town yesterday in search of a fugitive from justice. The fugitive was a boy who was very lame in one leg and who had lost three fingers from one hand. The officer called at various places in his search, and at the Third street depot was inventoried by some of the hackmen. That proceeding disclosed the following stock on hand:

One big revolver.
One small revolver.
One pair of shackles.
One pair of hand-cuffs.
One "come-along."
One policeman's baton.
One constable's star.
One warrant for a small boy.

"Is he dangerous?" queried one of the hackmen, in speaking of the fugitive.

"I don't know as to that," replied the officer, "but here is the point. Suppose I arrest that boy on the street, and after I've got him shackled and handcuffed a crowd jumps in on me and wants to take him away. D'ye suppose I've come in here to be intimidated by any thing like two hundred infuriated men? You bet I haven't."—*Detroit Free Press.*

His Last Resort.

"I am poor," he said to a Chicago girl, "and you are rich; but true love levels such distinctions, and"—

She interrupted him with one of the most positive negatives, if such an expression can be allowed, ever uttered in the windy city.

"This, then, is my last resort," he said, desperately; and he displayed a silver-mounted revolver.

"You ought to get five or six dollars on it," replied the girl, encouragingly.—*Puck.*

—Senator Evarts was in the same class with Chief Justice White at Yale.

LIGHTEN THE WORK.

A Duty That Every Housekeeper Owes to Herself and Her Family.

Have you ever noticed while on the street how many women you pass with tired, weary expressions on their faces? They may be laughing and talking pleasantly, to all appearance as happy as any one could wish, but their sweetest smile can not conceal the weary, want-of-rest expressions that are stamped upon their features. These may, in some cases, be the effects of ill health or too close application to the demands of society, which quite frequently are the causes of ill health, but the majority of them are housekeepers, working housekeepers, many of them mothers of large families. To all housekeepers, but more particularly to the latter class, does this article refer.

It is a duty you owe to yourself and family to lighten your housework as much as possible, so that your husband and children may not be called upon to mourn the loss of wife and mother long before your natural time. Every year there are many women die from overwork, and most of them from unnecessary work. To be sure, this is not the disease set down as the cause of death on the certificate of the physician; there was probably pneumonia, typhoid fever or some other kindred disease, but could we get the opinion of the attending physicians, I have no doubt they would say that, were not the constitutions of many of these women dedilitated by overwork, they would have been living to-day. It is, I think, admitted by most physicians that, unless, the constitution is naturally weak, or weakened by excesses, the above diseases seldom prove fatal.

American women are not, as a rule, of as robust constitutions as those of other countries. Whether the women themselves are to blame for this or the climate of the country (that, by the way, is made to mother a good many ills she had no hand in making), it is hard to determine, but that the American women are not strong is an established fact. You, then, knowing this, have no right whatever to abuse your constitution by excessive work where there is no necessity for it. Don't have white clothes for the little ones to play in, but if you do have them, make them plain. Throw away all tucks and ruffles in every day wear for yourself and children. Don't wear lace or linen collars every day. They are not worth the strength in doing them up, and if sent to the laundry wear out in such a little while that they do not pay in the end. Use tourists' ruffling for every day. It can not be washed but it is very pretty, and when soiled can be thrown away, and in the end be much cheaper than collars that are washed every week. Particularly is this ruffling suitable to warm, sultry weather, as it retains its shape and is much cooler than linen collars, which are the most uncomfortable kind of neckwear for hot weather. With the exception of a few articles, don't iron but very slightly the plain clothes. Only the sheets for the spare bed need be ironed all over. The rest need not be pressed only at top and bottom. The plain underclothing need get but a slight ironing, and if the family is large, none at all. Some people prefer to wear their underclothing rough dry, claiming that it is healthier. The neatest and best housekeeper I ever knew was an old lady who would never have her underclothing ironed on this score. She never used an iron pot or kettle when she could get a tin or some other light ware to answer the same purpose. She claimed that though tin would wear out quicker than iron, yet in the end it was cheaper, for it saved both time and strength. It saved time, for when in a hurry whatever she wished to cook could be done in one-half the time than if iron were used, and it saved strength, for in lifting from one part of the stove to another it required very little exertion. Some may claim that the tinware is not conducive to health, but, however, if the tin is kept clean there is very little danger to be feared on that score.

Don't have heavy furniture, more particularly in your dining-room or kitchen. Light furniture, both in color and weight, will save a great deal of unneccessary work. Dark-colored furniture shows every speck of dirt that settles on it, and though there would not be enough to harm any body, yet the least speck is an eyesore to the housekeeper, who must keep continually at work to keep it clean. Light-colored furniture does not show dust in this way, and is much more preferable, and if of light weight the lifting of it is a very easy matter. Get all the labor-saving articles you can possibly afford. You will, very likely, find some that are of little account, but there are some that are excellent, and it will be worth your experiment with the others to find the articles you want. Above all things, don't cling to a certain way of doing things because your grandmother did it that way, when you can find an easier way of doing it. Do you suppose your respected ancestress would have done it the way she did if she could have known an easier one? Certainly not. Remember the world moves, and you are expected to move with it.—*Boston Budget.*

—The oat is a splendid food for young animals, because, compared with corn, straw, etc., it is rich in muscle and bone-forming elements, and this also makes it a splendid food for work animals. Corn should be fed sparingly to work animals during the summer especially, as it is a heating food. It will pay to make the grain ration of oats in the morning and at noon.—*Troy Times.*

—An anti-slang club has a large membership at Fort Worth, Tex.

OF HANDWRITING.

Experts Whose Occupation is Mostly Furnished by Anonymous Correspondents.

Those who read character by handwriting, and still more those who profess to be experts in handwriting, have most of their occupation found them by writers of anonymous letters. No doubt there has been a good deal of unreality and errors in the conclusions of experts, so much so that no opinion of this sort ought to be received in a court unless there is abundance of corroborative evidence. As a rule, every anonymous letter which is not at once consigned to the flames or waste-paper basket undergoes a rigid scrutiny of the handwriting. Unless a person is an expert, the opinions given on the subject of handwriting are often simply ridiculous. I showed a letter one day to a lady who was thought to be a great authority on such matters. She loaded the handwriting with every species of abuse. It was the writing of a bad tempered man, of a stupid man, of an ignorant man; there could be no relieving feature whatever in such handwriting as that. "And now, madame," I said, "will you look at the signature?" It was the signature of Macaulay. So if you wish to obtain an opinion worth having respecting the ownership of handwriting, it is far best for you to obtain a skilled opinion. You are not obliged to believe the experts, any more than if you are upon a jury, and it becomes peculiarly difficult to believe when two experts are swearing hard against one another. Nevertheless, if the opinion of an expert will not help you, there is no opinion on which you can safely go. A very remarkable case of identification of handwriting came to my knowledge some time ago. A gentleman had offered a very large sum of money for the discovery of a marriage register, the production of which was highly necessary in a heavy litigation. A clergyman from the country wrote to say that the missing register had turned up in the vestry box of his own parish. A solicitor and a well known expert were sent down to examine the document. The clergyman showed them the marriage register, and after a protracted examination they all went to lunch. Then an opinion decidedly unfavorable to the genuineness of the document was delivered by the expert in handwriting. It was quite modern handwriting and did not possess the comparative antiquity claimed for it. "Then how in the world did it get there?" asked the vicar. The expert had diligently examined the vicar's handwriting in his own note, and said quietly, "Why, you forged it yourself." The unhappy parson, being threatened with highly penal consequences, fled the country. I am sorry to say any thing against the cloth, but many of my readers will recognize this as a true story. The moral is, that if it is really necessary to trace and expose an anonymous communication, you had better use the best available means for doing so.—*London Society.*

SELF-EMANCIPATION.

How One of New York's Gilded Youths Redeemed His Manhood.

Here is a true incident which we commend to the consideration not only of boys, but of the fathers of boys.

Mr. P—— was a stock-broker in New York. His only son, Phil, was born to the expectation of vast wealth, and hence dawdled idly through college, and studied a little law as an amusement. His real training was as a society man. At twenty-two he could lead the german admirably; was an authority on women's gowns and hats, knew better than any other gossip in town which of the girls were "fly," and which were likely to catch the "big fish in the matrimonial pond." His father was, in his dainty speech, "Old Check-signer," his sister "the best-groomed yearling filly in the field."

He'd read nothing but the latest magazine, and *vers de societe.* He never voted; scarcely knew who was President, and took no interest in the great problems of national importance with which other men were struggling. His sole concern in life was the last cut in coats, and anxiety as to which balls or receptions he should attend next week.

On Black Friday Mr. P—lost every dollar of his fortune, and died soon afterward. Phil was almost penniless. He made his way to Colorado, and took up land, built a hut and lived in it. At bottom there was good manly stuff in the lad. Pain, loneliness, the great silent mountains about him, brought it out. No meals at Delmonico's had ever the relish of the flapjacks and bacon which he cooked himself after a hard day's work.

He suddenly awakened to the interests about him; the raising of great herds of cattle; the mining for gold; the moving of vast crops; the building of railways across the continent. The man developed in body and mind. He began, too, to keep step with the active, pushing, live men who are conquering the wilderness of the great Northwest. He is now a man of force and sound sense, with broad, grave, liberal views, taking part in all the work which will advance the West. If he remembers the puerile, trifling man milliner who led the german in fashionable Fifth avenue houses a few years ago, it is with a blush of shame.

How many manly American boys, the sons of wealthy, hard-working fathers, are sinking into the puny, aimless life of men of society in our large cities! The great West, with its countless opportunities, its scope, its vast interests, develop strong, helpful men out of unpromising material. "The bane, the antidote are both before them." They should consider well before they choose between them.—*Youth's Companion.*

—Five hundred Chinamen have deposits in a savings bank in Brooklyn. It is said that they never draw out any money.

SCHOOL AND CHURCH.

—There are now more than 350 medical missionaries, 230 of whom are in heathen lands.

—The whole number of churches in the United States is 132,435; the whole number of ministers, 91,911; and of communicants, 19,018,977.

—Bishop Kip has become president of the Associate Alumni of the General Theological Seminary of the Protestant Episcopal Church.

—Nearly two thousand women connected with different churches in Brooklyn, N. Y., have formed an auxiliary society with the hope of improving the condition of working women through united Christian effort.

—As a mere secular or pecuniary investment the Sunday-school pays a good dividend, and as a moral factor its value is inestimable. Train the boys and girls in right living and good citizenship is assured.—*Burlington Hawkeye.*

—There are now over 1,000 Young Men's Christian Associations in this country, with a membership of 140,000, expending for Christian work $785,000. The aggregate of property in buildings, libraries, etc., is over $5,000,000.—*Public Opinion.*

—A worthy schoolmaster of a parish school economized time by flogging all the bad boys on Saturday. On one occasion an urchin insisted upon knowing what he was to be whipped for. Because his name was on the list was the only answer given, but upon investigation the master of the rod discovered that he had picked up the wrong list and flogged all the boys of the confirmation class.

—Subjects of the graduating essays in girls' schools this year show that the old, endeared subjects upon the secrets of the universe have given way in themes practical. At the commencement in the normal school the subjects this year were: "Qualities Requisite for Superior Teaching," "Higher Education of Women," "Woman's Position," Woman's Heroism," and other topics of a similar nature.

—The Congregational Society on the Pacific coast employs twenty-two American teachers and eleven Chinese assistants. It has five schools in San Francisco and fourteen elsewhere. Last year the pupils numbered 1,279. The Chinese converted in these schools join the Congregational Association of Christian Chinese, the conditions of membership being the same as to a church. The association now has 420 members, 117 being also members of churches. Last year its contributions were $1,937.15.

—In the year 1886, 779 women attended lectures at Russian universities. Of these, 243 devoted themselves to philological studies, 500 to physics and mathematics, and 36 attended the special mathematical course. Of the total number, 587 were of the Orthodox religion and 139 were Jewesses. The greater number of them—437—were the daughters of nobles, officers and officials; 84 were the daughters of ecclesiastics, 125 of merchants, 117 of citizens, 10 of peasants, 4 of soldiers, and 2 only were foreigners.

SUICIDE OF SCORPIONS.

A Popular Belief or Superstition That Is Entirely Erroneous.

Dr. Bourne's experiments on these creatures have been long since substantially discounted by me. My object in making experiments was to test Goldsmith's assertion that if "a scorpion is placed in the midst of a circle of burning charcoal * * * it stings itself on the back of the head, and in this manner the undaunted suicide instantly expires." It does nothing of the kind. As to Byron's more glowing description or episode:

"The mind that broods o'er guilty woes
Is like the scorpion girt by fire.

One sad and sole relief she knows—
The sting she nourished for her foes,
Whose venom never yet was vain,
Gives but one pang and cures all pain,
And darts into her desperate brain;

and so, it would appear, shuffles off the mortal coil, along with all its throes and woes, etc.—again I say it does nothing of the kind. On the contrary, and as the outcome of hundreds of these experiments—experiments that were carried out by me in the presence or with the co-operation of a score or more of still living officers, not only at the Jaumari ball practice ground at Cawnpore, but also in sundry hill and cholera camps elsewhere in India—I came to the conclusion that this belief or superstition was entirely erroneous. I came to the further conclusion that its poison was all but inert, not only on itself, but also on small birds, bees, etc.; and as to its own individual behaviour in presence of fire, it was both stupid and cowardly. It either slunk away into any corner it could either make or find, or, moving about aimlessly within the circle, it either perished in the same or died without making any sign inside it.—*W. Curran, in Lancet.*

DEAD MAIL MATTER.

Strange Things Assembled in the Inventory of a Dead-Letter Sale.

No one can have a notion of what other people send through the mails until he looks over the inventory of articles to be sold at the Dead-Letter Office sale. There is something humorously absurd in the idea of dropping a sewing machine in a letter box. It suggests mailing a saw-mill, a steam engine or a yoke of steers. Yet sewing machines do find their way to the Dead-Letter Office.

Many curious secrets are unfolded in the Dead-Letter Office and there are reasons why the owners never come to claim property. There stands among the other "dead letters" a pair of number six "ladies' shoes." What an affliction for any lady to lay claim to! The lady thanks fortune that her name was not on the package, and allows them to be sold at auction. An old wig has been lying in the office for two years without a claimant, while the owner probably wears his hat in church. A pair of corsets made to embrace a thirty-three inch waist can find no one to confess to them. They stand around with several other pairs of similar size awaiting the auction.

But corsets and wigs and sewing machines are not the only curious things that turn up in dead letters. Besides innumerable pairs of shoes, suits of clothes, handkerchiefs, collars and cuffs, cheap jewelry, with an occasional lock of hair and an engagement ring, there are numerous ladies' bustles, brown hair switches, false bangs and frizzes, and even a few articles of underwear and pairs of garters. In one package there were two "damaged night dresses," in another a plug of tobacco, in another a package of hairpins and hair-combings. In yet another package there are six tin teaspoons and a second-hand tooth-brush. The number of packages marked "hair-combings" suggest that they are lovers' locks that some unsentimental clerk has thus viewed. Cosmetics appear in no small quantities. One "damaged hair switch" and several pairs of hoopskirts were miscarried in the mails. A gent's seersucker suit and a lady's chemise and unfinished dress also went astray. A pair of artificial teeth are unclaimed. A pair of artificial eyes are among the dead letters. Among other curious mail matter discovered through the dead letters are a fly net for horses, a lady's black cloth dolman, a man's old frock coat, cigarettes, old broken screw-driver, ladies' night-caps, gray hair waves, hair crimpers, ladies' woolen fascinators, four and a half pounds of cheap tea, an old knife-blade, a bunch of tangled thread, ladies' corset covers, thirteen old pewter spoons, a dog-blanket, a lady's old damaged silk dress basque, nutmeg grater, shoe brush, gent's dirty clothes and old straw hat, lady's blue jersey, a pair of bathing trunks, old felt hat, bird sling, toy gun, kettle cleaner and tinware, griddle lifter, a dozen potato parers, a sun bonnet, doll's corset, doll's overshoes, a small clock, a pair of pruning shears, a razor, and ninety-nine pounds of iron and metal castings.—*N. Y. Star.*

FOR STORMY WEATHER.

Directions For Making a Serviceable Muslin Poultry-House.

Every poultryman knows the aversion shown by the fowls to the poultry-house in the day-time. They prefer being outside in the storm to being confined in a closed, dark place; but they are very partial to a shed, or any kind of well-lighted shelter. A cheap arrangement can be made for them, which may be movable, by using shingling lath (one by three inches) and unbleached muslin. To make a muslin house ten by ten feet, proceed as follows:

A strip for the top, four for the bottom, and three for stripping one foot from the ground, making eight strips, ten feet long each, or eighty feet. One strip for the top of the entrance in front, eight feet long and twelve strips six feet long, for the ends and roof, the total being about one hundred and sixty feet of material, costing one dollar. A few boards on the front, with the same at the rear, completes all but the muslin, of which about twelve yards will be sufficient. Run the muslin from the bottom of the strip over the top, and fasten to bottom strip on the other side. Have nothing but the boards on the ends, so as to strengthen the frame, and also that the fowls may pass out at either end. Sew the muslin together with a sewing machine, and use it either crosswise or up and down. Draw it tightly over the frame, and paint it with any kind of cheap paint; or oil may be used instead. The structure need not cost over $2.50, and it will afford excellent protection against the winds and rains, as there will be plenty of scratching-room for an average flock. The muslin admits sufficient light, and is much better than glass for retaining warmth.—*American Agriculturist.*

—Ballet dancing is a pretty good business when you once get the hang of it. Thus Maure, the exponent of the Spanish fandango, gets $10,000 a year, Rosatti gets $12,000 and Subra $6,000. That's better by several thousand dollars than going to Congress, or even being President of a university, and pretty nearly as good as being a popular prima donna.—*Troy Times.*

—A Cincinnati critic witnessed the recent operatic performances in that city, and says: Dress suits were neither le rigueur nor de trop, but the major portion of the gentlemen in the auditorium wore them. Late comers were numerous, but the usual accompaniment of squeaky shoes was silenced by the heavy matting that covered the floor of the auditorium.

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.

INDEPENDENCE, CAL

SATURDAY OCTOBER 15th ..... 1887.

PREMIUM LIST.

FIRST PREMIUMS.

G. Sanger, standard trotter, Roderick.
W. S. Enos, colt under 1 year.
John S. Gorman, roadster 2 yrs, Valentine.
M. Muldoon, roadster, Bismark Jr., aged.
G. Sanger, graded mare, Jessy.
W. R. Tibbetts, all-work stallion, Prince.
J. H. Dodge, all-work, 2-yrs, Young Hero.
E. Robinson, all-work, 1-yr, Billy.
E. Robinson, mare and colt, Nelly.
W. S. Enos, gelding, 3-yrs, Snider.
John S. Goman, mare, 2-yr-old
Jacob Vagt, all-work filly, 2-yrs, Belle.
J. H. Dodge, buggy team.
W. S. Enos, saddle horse.
G. Sanger, draft mare, 3 years.
G. Sanger, draft stallion, 3 years.
W. S. Morton, draft stallion, 2 yrs.
G. Sanger, span of draft mares.
G. Sanger, sweepstakes stallion.
W. S. Enos, best mare, any breed or age.
G. Sanger, draft stallion, aged.
G. Sanger, mare and colt.
W. S. Enos, standard trotter, Lady Nelson.
W. S. Enos, roadster team.
Mrs. Enos, carriage team.
W. S. Enos, horse colt, draft, 3 months.
Shepherd & Son, best jack.
Shepherd & Son, jack and family.
Josiah Dodge, graded Holstein bull.
J. Brown, best bull calf.
A. N. Bell, best cow, 3 yrs.
A. N. Bell, best cow, 2 years.
A. N. Bell, best heifer calf.
E. Robinson, 5 graded merino sheep.
Horace Bellows, 3 Angora goats.
Jacob Vagt, boar under 2 yrs.
Jacob Vagt, sow under 2 yrs.
Mrs. H. L. Clark, Wyandotte chickens.
E. Robinson, Boar and sow, aged.
W. L. Hunter, sack of buckwheat.
" " cow pumpkins.
" " watermelons.
A. N. Bell, sack of flour.
W. R. Tibbetts, 100 pounds oats
C A Walter, 50 pounds alfalfa seed
A C Harvey, onions
" " carrots
T J Goodale, sack of wheat
" " bayo beans
" " white beans
John Baxter, turnips
W J Lake, 50 pounds Early Rose potatoes
S A Densmore, display agricultural products
" " parsnips
" " cabbage
" " varieties dried fruits
" " cantaloupes
" " vinegar
Jacob Vagt, squash
" " beets
" " bacon
" " hams
G W Parish, tomatoes
" " sweet potatoes
Wm Muth-Rassmussen, honey
" " apiary display
Maud Cook, preserves
Mrs J J Stewart, canned fruits
John Baxter, butter
" " dried apples
Mrs Enos, pickles
Mrs Brown, jellies
" " can of lard
S Zaun, wine
J W Symmes, apples
" " grapes
" " quinces
W Walker, plums
" " dried peaches
Mrs Sallie Bell, green pears
E. Robinson, jar of peaches
Max Cohn, gypsum
Miss T Walker, cabinet of minerals
A W Eibeshutz, gold, silver and lead ores
Miss Lena Thomson, crochet quilt
Miss L Darrah, patchwork quilt
Mrs H J Robinson, pillow shams
Miss Lena Thomson, crazy sofa pillow
Mrs Sanger, crochet cap
Mrs Weichart, display fancy work
Mrs J J Stewart, silk embroidery
Miss O'Hara, best collection drawings
Mrs H I Robinson, oil painting
Miss Adaline Meysau, crayon drawing

SECOND PREMIUMS.

A C Harvey, grapes
John Baxter, apples
" " chickens
T J Goodale, buggy team
E Robinson, saddle horse

The following were awarded special mention:

W R Tibbetts, sheaf of oats
John Baxter, egg plants
H L Clark, Kohl Rabi
N Rhine, display of minerals
A C Harvey, set of spurs
H Levy, carved cane
Angel Rossi, grape vines and wooden ware
Mrs Eibeshutz, toilet set
Mrs H L Clark, needle work 100 years old
Julius Roeper, specimens of rock crystals
W L Hunter, lot of curios
Miss Grace Gifford, crochet cover
Mrs A C Harvey, Spanish needlework

Beating Jack Rabbits.

A farmer in Fresno claims to have found a remedy that will prevent rabbits from injuring young trees or vines. The *Republican* says:—This person is Edward Roach of Washington Colony. Mr. Roach lives near the outskirts of the colony, and feeling that it would be a hopeless undertaking to try to kill all the rabbits which were swarming in from the uncultivated plains, he concluded to try and make his young vines and trees unpalatable to the taste of the hungry but fastidious rabbits. For this purpose he procured twenty-five pounds of sulphur and 50 cents worth of asafoetida, and dissolving both in water sprinkled the mixture on the foliage of his newly planted 10-acre raisin vineyard. The result was all that could be desired. Not a leaf in that vineyard was nibbled after the sulphur and asafoetida treatment.

From Lone Pine.

From Lone Pine came a fine display of fruits. Mrs. Kate Stewart sent several varieties of apples and other fruits, and a handsome lot of canned fruits. Mr. S. Zam displayed varieties of grapes, the bunches were very large. John Lubken sent some fine apples. Mrs. A. C. Harvey made a good display, and late as the season is made a good showing of peaches. Much very handsome needle work was sent, particularly what is called "drawn work." Two years ago a display of this kind of work was sent from Lone Pine to the State Fair of Nevada; it was much admired; no needle work in the Pavilion at Reno at that time was more highly praised.

The drama "Led Astray" was presented last Monday evening in the pavilion to a large and appreciative audience. At an early hour the seats were filled and the curtain rose promptly at 7.30. The stage and all its appointments were perfect and the play progressed smoothly throughout. A better Amateur selection for the cast could not be made, the leading characters being especially well filled.

GERMAN CAVALRYMEN.

THE NORMAL SCHOOL WHERE OFFICERS ARE INSTRUCTED.

Skill Imparted Which Makes Better Riders Than Are Seen in a Circus—How Efficiency Is Acquired—A Hunting Ground of 5,000 Acres.

There are two cavalry schools in Germany, one in Hanover and a minor one in Munich, but it is not to be imagined for a moment that either of them compares even in the least degree with West Point, except in the rather important matters of discipline and training. The exquisite lawns, the magnificent views, the appearance of historic associations, the beautiful grounds and cottages of the officers and professors at West Point, and the atmosphere of perfect refinement and good society that clusters like an aroma about it, as it might in kind about the country-seat of a wealthy and highly educated gentleman, are all wanting. On the contrary, the otherwise well constructed barracks of the riet schule, with long stables extending back and across an open rectangular drill-ground in the rear, have nothing about them suggestive of anything but their exact purpose.

When the officers enter the school they have already been well trained by those who have preceded them here, but they are put on the footing of raw recruits at once. The first year they ride three different horses every day, the object being to acquire a good seat, and skill in the use of the sword. The first horse is a so-called "stampferd" (a common, well-trained trooper,) belong to the school. The second horse is called a "charger," which in German military usage signifies a raw 5-year-old colt. The latter is to be trained and broken by the officer who rides him, and after being ridden five years becomes his private property, at which time he receives another to be trained in the same way. Each officer (they are at first all lieutenants) is also obliged to provide an extra horse, which must be so well trained that it can replace the charger in case of injury or indisposition.

HOW EFFICIENCY IS ACQUIRED.

Throughout the winter there are bi-weekly lectures on riding, veterinary surgery, and also on horse-shoeing, with thorough instruction in turning and fencing, in all of which complete practical efficiency is acquired. The second year, as far as the routine referred to is concerned, is a repetition of the first.

The non-commissioned officers ride two already well-trained horses daily, and are trained to become rough riders and trainers of new horses in their own regiments. The majority remain in the school only one year, though the twelve best are usually kept through the second year. The instructors in the non-commissioned officers department in the second year are the twelve best-trained lieutenants from the officers' department.

In view of the peculiar duty of a cavalry and artillery officer, the medium between the rough "riding of hunting and the steeple-chase on the one hand and the fine equestrianism of the haute ecole (high school) on the other is supposed to afford the proper training. Few better localities, therefore, could be chosen than Hanover, with a hunting ground which covers 5,000 acres, and is so full of grass-hidden ditches, boggy ground, and scattered marshy spots that it would perhaps puzzle the most skillful English rider to cross it in safety.

The school opens the 1st of October with hunting three times a week, the game being foxes, stags and boars. The young officers of the first year are not allowed to hunt at once, but have twelve preparatory "drags" with anise-seed bags in order to get acquainted with the country, and bring their horses into good hunting condition. The first actual hunting on St. Hubert's day, Nov. 3, is looked forward to with delight. The Hanover field is famous, and there are often a hundred and fifty riders at the meet in brightly-colored suits, and as the whole cavalcade goes dashing across the country, with the master of the hounds and his "whips" clad in scarlet, and the sixty deep-voiced English hounds baying through the echoing forests the spectacle is full of interest and excitement.

In the haute ecole (within doors) a superlative skill is imparted which makes better riders than are usually seen in a circus, and it has a direct practical bearing in the cavalry service. It would be impossible to describe its intricacies in a single letter, but its essential value will be understood when I say that a horse learns in the haute ecole to respond to the rider's control nearly as perfectly as the rider controls and directs his own movement, so that the animal becomes measurably the pliant instrument of his will.

TRAINED TO A WONDERFUL DEGREE.

He is taught to stop instantly in full course, without injury to his joints, by receiving the shock with his hind legs. He also learns to jump from "all fours" and alight a foot or two or three feet forward, as required, and is trained to a wonderful degree in making sudden, short turns, and in moving back and forth in a crowd to enable his rider in actual combat to use his sword effectively, to extricate himself readily, and to be sure that when he strikes his horse will be at the requisite distance from the mark; all of which, in spite of its marvelously graceful evolutions, gives a frightfully grim and premeditated aspect to the art of war. Both systems of training accomplish together the desired results, but in the haute ecole the rider become a master.

The kennels at the riding schools, where sixty hounds, with their accompanying terriers, sleep in a tiled room on a raised, straw-covered platform, and are kept scrupulously sweet and clean, form an interesting feature of the establishment, and as we watched the dogs bounding about in their play-ground, the great splendid fellows came to us singly as their names were called, with a gravity befitting their importance in the kaiser's military service.

Throughout the long, clean, well-lighted stables, another interesting point, there was a fresh, bright, continuous carpet of straw behind the horses, secured by a tightly-braided straw rope, with which it was interwoven, and the round beams, in lieu of partitions,, were wrapped in a glossy coat of tightly-braided straw, with a sort of loose straw apron hanging beneath. The horses, of course, are thoroughly groomed and glossy. The crowning glory, however, of the stables is the "jagd stall," which lies near where the officers, without stirrups or bridles, leap successfully, in a long narrow lane, over fences, bars, walls, and ditches on horses that alight with cat-like grace and softness. The jagd stall itself contains thirteen picked and trained "hunters" of the best breeds in comfortable box-stalls befitting their exceptional skill.—Berlin Letter.

A Cure for the Nose Bleed.

An old English charm for curing nose bleed is a curious one. If a person is subject to nose bleed he may effect a cure by going to a person of the opposite sex and requesting him or her to purchase a piece of lace, such as may be specified, for the person making the request. When the lace is brought the person must take it and neither pay for it nor return thanks for it. He must make a necktie out of the lace and wear it for nine days, and he will never have the nose bleed again.—Philadelphia Call.

ORDINANCE NO. 19.

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows:

All persons doing business within the county of Inyo shall obtain licenses from the Tax Collector of said county as follows:

SEC. 1. Auctioneers are divided into two classes and must obtain licenses from the Tax Collector as follows

First Class. Those whose average monthly sales amount to $2,500 and upward constitute the first class and must pay a license of $50 per quarter.

Second Class. Those whose average monthly sales are less than $2,500 constitute the second class and must pay a license of $10 per quarter.

SEC. 2. Persons engaged in banking, loaning money at interest, or in buying or selling notes, bonds, or other evidences of indebtedness of private persons, or in buying or selling State County or City stocks, or other evidences of State, County or City indebtedness, or stocks, notes, bonds, or other evidence of indebtedness of incorporated companies, or in buying or selling gold dust, gold or silver bullion, or gold or silver coin, are divided into two classes and must pay licenses as follows:

First Class. Those doing business in the aggregate to the amount of $10,000 per quarter, or over, constitute the first class and must pay a license of $25 per quarter.

Second Class. Those dying business in any amount less than $10,000 per quarter, constitute the second class and must pay a license of $15 per quarter.

SEC. 3. From each proprietor of a billiard table not kept exclusively for family use, for each table, $5 per and for each bowling alley, $15 per quarter for each alley; but no license must be granted for a term of less than three months.

SEC. 4. For each exhibition for pay for a theatrical performance, a caravan or menagerie, or any collection of animals, circus, or other acrobatic performance, $7. And for each show for pay of any figures, jugglers necromancers, magicians, wire or rope dancing, and sleight of hand exhibitions, $5 for each performance. The provisions of this Section do not apply to exhibitions given for the benefit of churches, school, or other charitable entertainments, by any amateur dramatic association or literary society of the town or district in which such exhibition or entertainment is given.

SEC. 5. Each pawn broker must pay a license of $25 per quarter.

SEC. 6. Each keeper of an intelligence office must pay a license of $10 per quarter.

SEC. 7. Every person who sells spirituous, malt or fermented liquors, or wine in quantities less than one gallon, must obtain a license therefor from the Tax Collector and make the following payment:

First Class. Those making sales to the amount of $1,000 or more as a monthly average constitute the first class and must pay a license of $30 per quarter.

Second Class. Those making sales of less than $1000 per month constitute the second class and must pay a license of $20 per quarter

SEC. 8. Every person who, at a fixed place of business sells any goods, wares or merchandise, wines or distilled liquors, drugs or medicines, jewelry or wares of precious metals, whether on commission or otherwise, (except Agricultural or viticultural productions, or the productions of any stock, dairy or poultry farm of this State, when sold by the producer thereof, and except such as are sold by auctioneers at public sale under license) and all persons who keep horses or carriages for hire (except such as are used in the transportation of goods) must obtain from the Tax Collector, and for each branch of said business, license, and pay quarterly therefor an amount of money to be determined by the class in which such person is placed by the Tax Collector, such business to be classified and regulated by the amount of the average Monthly sales made or hiring done, and at the following rates.

First Class. Those who are estimated to make average monthly sales or hiring to the amount of $2,500 per month or more constitute the first class and must pay a license of $9 per quarter.

Second Class. Those who are estimated to make average monthly sales or hiring to the amount of $1,250 and less than $2,500, constitute the second class and must pay a license of $4 50 per quarter.

Third Class. Those who are estimated to make average monthly sales or hiring of less than $1,250 constitute the third class and must pay a license of $3 per quarter.

SEC. 9. The sales of liquors and wines by persons licensed under the preceding Section must not be in quantities of less than one quart measure.

No license must be required of physicians, surgeons, apothecaries or chemists for any wines or spirituous liquors they may use in the preparation of medicines.

SEC. 10. Every traveling merchant, hawker, or peddler who carries a pack and vends goods, wares or merchandise other than the manufactures and products of this State must pay for a license $5 per month, and every such traveling hawker, merchant or peddler who uses a wagon and one or more beasts for the purpose of vending such goods, wares or merchandise of any kind must pay for a license $15 per month.

SEC. 11. Every person who keeps a stallion, jack or bull and whoever permits the same to be used for the purpose of propagation for hire must annually obtain a license therefor from the Tax Collector and pay therefor as follows.

First. Horses that are hired for the purpose of propagation by the season at $100 or more constitute the first class and require a license of $50.

Second. At $75 and less than $100 constitute the second class and require a license of $40.

Third. At $50 and less than $75 constitute the third and require a license of $30.

Fourth. At $35 and less than $50 constitute the fourth class and require a license of $25.

Fifth. At $15 and less than $35 constitute the fifth class and require a license of $15.

Sixth. At less than $15 constitute the sixth class and require a license of $10.

Seventh. For each jack, $10.

Eighth. For each bull, $10.

A license for propagation obtained from the Tax Collector under the provisions of this ordinance shall entitle the holder thereof to the right to go into any county of this State for the purpose of propagation without any further license or expense.

SEC. 12. Every person who commences or carries on in the County of Inyo any business, trade, profession, or calling for the transaction of which a license is required by any ordinance of the Board of Supervisors of said county without taking out the license prescribed by such ordinance is guilty of a misdemeanor and shall be punished by a fine not exceeding $250 and unless said fine be paid shall be punished by imprisonment in the county jail of said county until such fine be satisfied, such imprisonment not to exceed one day for each dollar of the fine.

SEC. 13. The Tax Collector shall have the collection of the licenses provided for in this ordinance, and it is hereby made his duty to collect the same and he may enforce the collection as provided by Section 3670 of the Political Code of California.

SEC. 14. This ordinance shall take effect and be in force on and after twenty days from its passage.

SEC. 15. This ordinance shall be published in the INYO INDEPENDENT, a newspaper printed and published in said county, at least two weeks.

The above ordinance was passed by the Board of Supervisors of Inyo county at a regular meeting of said Board October 4, 1887, by the following vote:

Ayes: Harger, Robinson and Eldredge.
Noes: None.
Attest: P. H. MACK, Clerk. J. D. HARGER, Chairman.

TAKE
SIMMONS
LIVER REGULATOR

For all Diseases of the
Liver, Kidneys, Stomach and Spleen.

This purely vegetable preparation, now so celebrated as a Family Medicine, originated in the South in 1828. It acts gently on the Bowels and Kidneys and corrects the action of the Liver, and is, therefore, the best preparatory medicine, whatever the sickness may prove to be. In all common diseases it will, unassisted by any other medicine, effect a speedy cure.

The Regulator is safe to administer in any condition of the system, and under no circumstances can it do harm. It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance; will promote digestion, dissipate headache, and generally tone up the system. The dose is small, not unpleasant, and its virtues undoubted.

No loss of time, no interruption or stoppage of business while taking the Regulator.

Children complaining of Colic, Headache, or Sick Stomach, a teaspoonful or more will give relief.

If taken occasionally by patients exposed to MALARIA, will expel the poison and protect them from attack.

A PHYSICIAN'S OPINION.

I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system. L. M. HINTON, M. D., Washington, Ark.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, OCTOBER 15.....1887

Mrs. Scott of Bishop Creek, showed very handsome embroidery and zephyr work.

Mr. and Mrs. J. G. Birchim, of Round valley, were among the visitors to the fair.

A fine display of ore from the Defiance mine; Darwin was made by Hon. P. Reddy.

Mrs. Sallie Bell, of Big Pine, had a very fine display of apples, pears, figs and walnuts.

Mr. J. W, Murphy of Darwin, came in on Tuesdays train, and will remain until Monday.

Miss Rachael Bell had a lovely display of flowers, many of them rare, and all beautiful.

Messrs Walter and Whitaker made a fine display of lead ore from the White Hill mines.

Miss Cartier had very elegant embroidered dresses; the work on these was of the finest kind.

There was a beautiful exhibit of ore from the Lucky Jim mine, Darwin, made by Mr. J. A. McKinsey.

Mr. and Mrs, C. H. Parsons of Round valley came down Wednesday to attend the fair at Independence.

Mrs. Kate Stewart, of Lone Pine had several very handsome spicimens of embroidery and other needle work.

The grapes shown by John Kispert would have attracted attention and been admired in the largest display ever made.

Mr. and Mrs. I. P. Yaney, of Bishop Creek, came down and stayed the whole week of the fair at Independence.

Jacob Vagt showed pumpkins of vast size; they are huge things and were planted and cared for entirely by a little boy, son of Mr. Vagt.

G. H. Parish deserves especial credit for having shown that Owens valley can beat the whole Pacific coast in raising large and fine sweet potatoes.

The display of silver ore ftom the Cliff mine, Deep Spring valley, made by Messrs Greenly and Broder, was very fine indeed; assaying $1608,87 per ton.

Mr. Horace Bellows of Olancha, showed a lot of pure blooded and graded Angora goats. The animals have fleeces as fine as silk and hanging down in wavy locks that nearly touch the ground.

The exhibit of Marble made by the Inyo Marble Company was vers nice; the specimens of Moss Agate Marble especially so. They exhibit a new variety of marble, the first of the kind ever found.

When our Pavillon was being built many were certain it was much larger than was necessary. Every one who attended the fair is now fully convinced that a large addition must be built for next year.

The greatest good that will result from our fair is the education it helped to give to our own farmers. No strangers could have been more surprised at the display of our products than our own people were.

J. H. Symons, S. A. Dunsmore and E Robinson were the principal exhibitors of fruit from around Independence. Their displays contained no many but such fruit as any country might well be proud of.

Dried pears shown by Mrs. Dunsmore looked more like confectionary than dried fruit. If such an article can be put upon the market in the same condition as this, there would be no limit to the demand for it.

Among other products shown by Mr. W. L. Hunter was a sack of as fine buckwheat as could be produced in Pennsylvania or any other eastern state. He also showed a very fine sack of rye. Mr. Hunter has proved that this would be a valuable crop here.

Mr. T. J. Goodale showed wheat in the sheaf. This was one of the finest things exhibited. The heads are of great size and the berries round and plump. This fine grain was grown with very little irrigation; it makes the best of flour and yields a high percentage.

In recognition of the good service done in the Legislature by Hon. A. J. Gould, in working for the passage of the act creating the 18th. Agricultural District, the Directors of the District have presented Mr. Gould with an Honorary Life Certificate of membership in the Association.

The potato display was "a big thing." J. W. Lake, W. L. Hunter, Jacob Vagt, C. A. Walter, Fred. Albers, T. J. Goodale John Kispert, John Lubken, and no doubt many others, showed fine samples. These names are mentioned only because the gentlemen live in widely separated parts of the valley.

Over three years ago the "Inyo Independent" began the work of agitating for a new Agricultural District. There were not wanting many who scoffed at the idea of having a good Agricultural Fair in Owens valley. We have the district; we have held the fair; it was such as the county may be proud of, and it would not now be possible to find a man who would not be ready to swear "I told you so."

Mr. Muth Rasmussen made a display that deserved careful study by every one interested in handling bees. A machine for making comb foundation, saving the bees that amount of work; and the combs in all the stages from the time the bees begin to work upon the foundation till the cells are filled with honey and sealed. Implements and a machine for making cans. Honey in every form for marketing. This was a very instructive exhibit.

During the week a gentleman was at the Pavilion daily who has been at many of the District fairs in the State. He said nothing impressed him so much in connection with our display as the remarkable variety. Los Angeles has not shown anything superior in grapes, and in several varieties falls far short of the quality of ours. The apples he had never seen equalled; the pears were as good as he had seen. Vegetables of all kinds; including roots, are of the finest; our potatoes he had never seen equalled. The mineral collection was the best he had ever seen at any district fair; and the specimens all came from mines only a few miles distant from the rich soil of the valley. He is confident that a great future awaits the country having such varied resources.

In the running race Tuesday Sandy, belonging to J. M. Horton won easily.

Miss Teresa Walker, of Olancha showed a large and valuable collection of ores.

Mrs. J. S. McGee, of Round valley, attended the Association ball last evening.

Mr. Dearborn and family, late of Aurora Mono county, have come to Lone Pine to settle.

Mr. Clark showed fine roots and vegetables: his specimens of Koh Rabi were immense.

Mr. T. Scovil had in an orange tree, Florida seedling; it was set last spring and made fine growth.

Groups continually stood around the very rich and beautiful collection of ores shown by Greenly and Broder.

Mrs. Gomez and Mrs. Brown of Olancha, each sent a piece of Spanish needle work; very beautiful work of their kind.

Mr. John Baxter made a fine display of wheat, oats, barley, corn, altalfa seed and other products. His fruit display was also very fine.

Snow has fallen to considerable depth in the high Sierras. The weather throughout the week has been cloudy but not disagreeable.

Very rich gold ores were shown by Pat. Keyes from Beveridge district. It is remarkable that these ores were found in connection with lead and silver.

Mr. and Mrs. J. P. Stewart, of Big Pine, passed through Independence last Wednesday on their way to Los Angeles. They expect to be gone a year.

The largest sweet potatoes ever seen in the county were shown by W. L. Hunter. He showed peanuts on the vines that could not be excelled any where.

Some very beautiful specimens of embroidery on velvet were shown by Mrs. Eibeshutz. The colors appeared to have the delicacy and perfect blending of natural flowers.

It is reported that San Francisco capitalists will build a hotel containing four hundred rooms at San Pedro, near Los Angeles. The harbor of San Pedro is being greatly improved.

Many agricultural products, as fine as any shown, were marked, "raised without irrigation." It will be found that much less irrigation is necessay than is now practiced in many cases.

Rev. Sisson will not get back from San Francisco before the end of next week; consequently no preaching at the M E Church on Sunday. The Sunday school service will be held as usual.

A very fine display of ore was made from the San Carlos mine. This ore is valuable, and is of such charactar as warrants the belief that the ore bodies in the mine are of great extent.

For variety, quality and quantity, the display at the Pavilion was the best exhibit of the resources of Inyo county ever gathered in one place. The farm, the orchard and mines were far and away better represented here than ever before.

M. Rollin persisted in annoying a limb of the law at Bishop Creek one day last week. Mr. Rollin is now laid up with a broken limb in consequence. The legal limb mopped the floor with Rollin's limb.

The display of Spanish needle work attracted as much attention here as at Reno two years ago. Miss Felicita Mendez; Miss Mary Aldi; Miss Carmalita Gonzales and Mrs. Louiza Salazar, each showed beautiful samples of this difficult work.

The Coroner's Jury in the case of the Mitchlstown massacre, has declared the Head Constable and five policemen guilty of wilful murder. The Tory Government will never let these tools of their tyrrany be punished as their crimes deserve.

On the ladies tournament the prizes were awarded as follows: First, Mrs. Kate Stewart; second, Miss May Shepherd; third, Miss Emma Duval; fourth, Mrs. Roeper. The merits of the ladies were so nearly equal that the awarding of these premiums was a very difficult matter. The Fair Directors were Judges and the awards were made by ballot.

No higher praise could be bestowed upon the management of the Fest fair of the 18th Agricultural District, than the many earnest protests that were made against the closing of the fair. Every body wanted to keep the pavilion open longer and continue the fair another day or two. The Directors thought best to close at the appointed time.

As notable an exhibit as the pavilion contains was a tree shown by Mr. A. C. Harvey of Lone Pine. This reached to the roof the building and was hung full of grapes and other fruits and looked like a very large Christmas tree. It was but an ordinary sage brush yet it was as good proof of the fertility of the soil as the fruits hung upon it.

Mr. W. A. Robinson, of Carson, spent the fair week at Independence. Mr. Robinson is a farmer, and took this means of knowing what Owens valley will produce. He said repeatedly that the country is much better than had been represented to him, or than he had expected to find it. He is likely to move here and make his home near Independence.

For the running race Monday there were four entries, and all started. The horses were Billy S. entered by El. Ober, Skin Hawk, entered by El. Rose; Kearsarge entered by Neil McLean; Baby B. entered by I. H. Mulholland. Coming down the home stretch the contest was confined to Billy S. and Baby B; the former winning took first money, the latter second. The race was a good one.

The State taxation for the current fisca year is 60.8 cents. This is the highest ever known in the State. Two weeks ago a State Senator was tried in San Francisco and convicted of the crime of bribing Jurors. An old book says "when the wicked rule the people mourn." When theives, bribers and suborners of perjury are allowed to manage political parties and to put their pals in office in the Legislature and in other offices, it follows as a matter of course that taxation should be high.

The first fair of the 18th. Agricultural District was formerly opened on Monday by J. W. P. Laird, President pro tem. Many more strangers were present than had been expected so early in the week. The people of the valley turned out in large numbers; the weather was beautiful and all the conditions favorable for a good fair. Horses and cattle, and all kinds of produce, and articles for exhibition at the Pavilion, were brought along so that the entry clerks were kept very busy the entire day.

Resume of Races.

MONDAY.

The Association race opened with a half mile dash for untried horses. Ed. Ober named Billy S., I. H. Mulholland, Baby B., Neil McLean, Kearsarge and Ed. Rose, Skinhawk. Billy S. took first money, Baby B. second money.

TUESDAY.

The first race was a dash of one mile, free for all. J. M. Horton named Sandy, W. Ober; Buffalo. Sandy ridden by Leslie Horton won race and purse. After the dash the first contest in the ladies tournament took place.

WEDNESDAY.

The two year old trotting race was first on the card. J. Roeper named Daisy Malone, J. S. Gorman, Valentine. Daisy Malone, driven by Robinson, was first under the wire and took first money. The second race was a dash of half a mile for saddle horses A. P. Smith named Billy S., M. Barragan, Muchacho and Frank Vinson, Pizen. The horses got off to a good start; Billy S. led to a few feet of the wire by several lengths when he flew the track. Muchacho, ridden by Chappo won the race and money. A match between Rig Pine and Kitty Roeper resulted in a tie. In the repeat Big Pine took race and money on a walkover.

THURSDAY.

The only race was a single dash of one mile for double teams. G. Sanger named Frederick and mate. T. J. Goodale, Prince and mate I. H. Mulholland, Theo T. and mate, R. C. Spear, Echo and mate. The latter team was drawn. Theo T. and mate driven by I. H. Mulholland led to the wire, taking race and first money.

FRIDAY.

Dash of half mile, free for all. J. M. Horton named Sandy, John Counts, Coalburner and A. P. Smith, Billy S. This was the great pool selling race of the season. The horses got off to a good start and ran for blood, Coalburner winning by eight inches from Billy S, Sandy three lengths behind.

The second race was a half mile and repeat; J M Horton named Queen, A P Smith Billy S and John Countz, Coalburner; Billy S was drawn; Coalburner won the first heat easily; the second heat was declared off because the flag did not fall; the Coalburner won the third heat in a gallop; Marshall Nayler rode Coalburner and Lester Horton Queen.

SATURDAY

The first on the card was a free trot for all of one mile. J M Horton entered Kirgsley, R C Spear Echo, Pete LaBarge No I C and G Sanger Jessie; Echo, driven by R C Spear, won easily.

The second race was for stallions, two in three, mile heats; M Muldoon named Bismark, G Sanger Roderick, J M Horton Kingsley and Fred Holbert Joe Gale. Bismark won the first heat, Kingsley second, Koderick and Gale distanced; Bismark won the second heat but it was declared dead on foul driving; Kingsley won the third and fourth heats and took the purse.

The Pavilion was thronged day and night.

Every race was filled and were warmly contested.

Both of our neighboring towns were well represented at the fair.

The effective playing of the band aided materially in the success of the fair.

A very pleasant social dance took place in Mair's hall on Tuesday eve.

Not an accident happened during the week to mar the general enjoyment.

With a little more rain the track would have been in splendid condition.

Hotels and stables were filled, but ample accommodation was found for all.

Angelo Rossi showed Zinfandel grape vines 7 months old and bearing bunches of grapes.

Elijah Robinson made a fine display of fruits, wheat, oats, corn, potatoes and other farm products.

There was the usual amount of kicking af the decisions of the judges, but no particularly wrong decisions were given.

Jack Horton owns the handsomest race mare east of the mountains. Queen is a flyer of the first order.

The drawings by Miss O'Hara were awarded the first premium. The works were entered by W. F. Matlack.

Miss Maggie Conklin made a display of fine art and needle work that was one of the most noticeable features in the Pavilion. The works are all of great merit.

In the baseball game between Big Pine and Independence for the Association purse the former club won easily. Jack Hall of Candelaria umpired the game and gave complete satisfaction.

The closest race of the season was a dash of a quarter on Wednesday afternoon between Kitty Roeper and a Big Pine mare. The horses ran neck and neck from the start and finished a tie. Kitty did not run a deciding heat and Big Pine galloped through and took the purse.

In the two plays rendered during the week one of the actors may be mentioned without disparagement to any of the others. This person is so quiet and reserved that no one expected much from him; but his rendering of the characters assigned him was natural, unaffected, dignified and in every way proper. Mr. Wallace Miller is the gentleman.

The people of Greenfield, Massachusetts, found a man and a brother in Ah Foo. He opened a laundry, joined the church and was a model Chinaman. Now those same people want to hang this man and brother. Several parents mourn the ruin of their little girls, enticed by this brute into his den, drugged and then debauched. This will be a terrible lesson to the sentimentalists of the east.

Several varieties of seedling apples were shown by Mr. T. J. Goodale, of Fish Spring that deserves attention from all who intend to raise apples. These varieties have qualities that make them highly valuable; they are large, fine flavored, good color, good keepers, and prolific bearers and well suited to our climate. Mr. Goodale finds them profitable apples to raise.

Many things at the fair were far beyond what had been expected; but the horse parade on Thursday was the most surprising of all. No fair ever held in the state, not barring even the State Eair, could make a display of better draught horses and mares; horses of all work; roodsters, carriage and saddle horses. Of standard trotters there were but few; and these were stallions shown by W. S. Enos and Gustav Sanger. These are first class animals of fine pedigree, and in a few years their progeny will enable us to compete with any part of the State in trotters. We have the best climate on the Pacific coast for raising fine horses.

Miss O'Hara, of Round Valley, exhibited a beautiful collection of her own paintings.

A dance will be given at Mairs Hall on Tuesday evening, October 18th. Music by Prof. Ford.

A dancing school will be opened at Mairs Hall on Wednesday October 26. See advertisement next week. Mr. Ford and Mr. Max Cohn will be the managers.

Miss Adaline Mayson of Lone Tine displayed a collection of pencil drawings of great merit. The pictures are really beautiful and few could believe that they were the work of a girl of twelve years.

It is quite likely that mistakes may be found in the published list of premiums. The report was made out under great presure for time. All errors will be corrected next week. Very many articles at the Pavilion well worthy of notice may have been overlooked; but please bear in mind that the reporter is also Secretary of the Association, and has many things pressing upon him at the same time.

In the ladies tournament on Tuesday there were seven contestants, namely, Mrs. Kate Stewart, Mrs. J. Roeper, Mrs. J. Willett, Miss Emma Duval, Miss May Shepherd, Miss Lena Thomson and Miss Lily Morton. All were very graceful riders. The deciding contest was had yesterday and no judges ever had to make nicer discrimination in awarding premiums. Any of the riders would take high rank at any similar contest.

On Friday evening the young people of the Amateur Dramatic Association had a very large audience to witness "Lady Audley's Secret." In fact the big Pavilion was crowded full to the doors; and at the play nothing but flattering remarks could be heard of the performances. Where all did so well it would not be just to make especial mention of individuals. The most flattering comments that could be made was the applause of the audience, and this was given heartly.

The first annual ball given by the Association was the finest affair of the kind ever had at Independence. For the first time in its history the town has a hall big enough to contain such a crowd as met there on Friday evening. The pavilion makes a grand ball room, and in future all large assemblies will meet there. It is the language of truth and soberness to say that this was not only by far the largest party ever seen in the county, but was in every way the most enjoyable. Hence forth the annual ball of the Association will be looked forward to as the social event of the year.

The biggest joke of the seasou was the double team trot on Thursday. Three teams started, the entries being by G. Sanger; T. J. Goodale and I. H. Mulholland, The Sanger team was the favorite; fifteen to one being taken. They are a pair of high bred and very valuable animals. Every body in Owens valley knows the team of Mr. Goodale, and all know what fine trotters they are. The third team was a little bay mare and a singed cat. Mulholland took the lead at the first turn and kept it with ease all the way around; winning without trouble. Both of the other teams broke repeatedly, and lost ground badly at every break. The winning team never made a skip but once, and that only for an instant. Like all unexpected results, this made quite a lively sensation, and the spectators cheered the winners lustily. The owners drove.

ORDINANCE NO. 20.

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows

SEC. 1. Every person engaged in the business of raising, grazing, herding, or pasturing: sheep in the County of Inyo, State of California, must annually procure a license therefor from the Tax Collector, and make therefor the following payment:

1. Those owning or having in their possession and under their control 5,000 sheep or more shall constitute the first class and must pay $250 per annum for the first 5,000 sheep and for every additional 1,000 the sum of $50.

2. Those owning or having in their possession and under their control 4,000, sheep and less than 5,000 constitute the second class and must pay $200 per annum.

3. Those owning or having in their possession and under their control 3,000 sheep and less than 4,000 constitute the third class and must pay $150 per annum.

4. Those owning or having in their possession and under their control 2,000 sheep and less than 3,000 constitute the fourth class and must pay $100 per annum.

5. Those owning or having in their possession and under their control 1,500 sheep and less than 2,000 constitute the fifth class and must pay $75 per annum.

6. Those owning or having in their possession or under their control 1,000 sheep and less than 1,500 constitute the sixth class and must pay $50 per annum.

7. Those owning or having in their possession or under their control less than 1,000 sheep constitute the seventh class and must pay $25 per annum.

8. Those owning or having in their possession or under their control less than 500 sheep constitute the eighth class and must pay $5 per annum.

SEC. 2. Every person who shall engage in the business of raising, grazing, herding or pasturing sheep, or who commences or carries on in the County of Inyo, State of California, any business, trade, profession, or calling, for the transaction of which a license is required by any Ordinance of the Board of Supervisors of said county, without taking out or procuring the license prescribed by such Ordinance is guilty of a misdemeanor and shall be punished by a fine not exceeding $250, and unless said fine be paid shall be imprisoned in the county jail of said county until such fine be satisfied, such imprisonment not to exceed one day for each dollar of the fine.

SEC. 3. The Tax Collector shall have the collection of the license provided for in this Ordinance, and it is hereby made his duty to collect the same, and he may enforce the collection as provided by Sotion 3.3.3.0 of the Political Code of the State of California.

SEC. 4. The County Auditor shall prepare and have printed suitable bank licenses for the Tax Collector to carry out the provisions of this Ordinance with blank receipts for the Tax Collector when sold

SEC. 5. The Tax Collector shall collect a fee of one dollar for each license sold, which shall be paid into the Salary Fund of the county.

SEC. 6. All money collected for licenses under the provisions of this Ordinance shall be paid over to the County Treasurer as other moneys and placed to the credit of the Salary Fund of the county.

SEC. 7. This Ordinance shall take effect and be in force on and after 20 days from its passage, and all Ordinances, or parts of Ordinances in conflict herewith are hereby repealed.

SEC. 8. This Ordinance shall be published in the Inyo INDEPENDENT, a newspaper published in said Inyo County, at least four weeks, said publication to be made for a period of twenty days after the adoption thereof, and said Ordinance to take effect in twenty days from its adoption.

The above Ordinance was passed by the Board of Supervisors of Inyo County, State of California, at a regular meeting of said Board, October 4, 1887, by the following vote:

Ayes—Harger, Eldred and Robinson.
Noes—None. J. D. HARGER,
Chairman of the Board of Supervisors of Inyo County.

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening, and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer. To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine

SILENT SORROW.

If she unclosed her lips and made her moan,
She would not be so weary with her woe—
A burden shared is lightened; even so
The weight is heavier that we bear alone,
An anguish pent within turns hearts to stone.
The fellowship of sorrow to forego,
To suffer and be silent, is to know
The blackest blossom from the black root grown.

And yet great joys and greatest woes are dumb.
Small is the sum that reckoning can compute—
The shallows babble, but the depths are mute—
The great mid sea our measure may not plumb;
King Love, King Pain, King Death, in silence come,
And, meeting them, we silently salute.
—Louise Chandler Moulton in Scribner's.

THE ANIMALS AT DINNER.

Statistics That Tell a Queer Story of the Poor Stomach's Abuse.

The observer of the animal human at its dinner in a public restaurant has a world of sarcastic enjoyment opened to him that he will not forsake. It is there that the somnolent porker finds himself outrivaled by beasts on two legs. To look at the subject of table manners at a public trough in a mathematical way is something unusual, but the experiment has been tried and the results presented with the firm conviction that they support Mr. Dickens and several other deceased foreign gentlemen in some of their pet theories. It has been found necessary to use assumed names, but that cannot detract from the interest of the statistics. They were obtained by a scientific gentleman at a first class trough, where from 200 to 300 persons are fed every day, and furnished to the St. Paul Pioneer-Press:

"Miss Juniper, pale and dyspeptic, ordered roast beef, potatoes, corn, peas, coffee and bread and butter. Began eating at 12:02, finished 12:12; time consumed, ten minutes.

"Miss Airy, weight probably 100 pounds, short and sallow, ordered tea and a ham sandwich. Began at 12:30, finished 12:34; time, four minutes.

John July, clerk, suffers from biliousness. Ordered porterhouse steak, eggs, cabbage, beans, coffee, pie. Commenced 12:15, finished 12:22; time, seven minutes.

"Jones Jonesby, gentleman, apoplectic, ordered corn beef and cabbage, potatoes, beer, strawberries and custard. Began 12:40, finished 12:45; time, five minutes."

No sane man would believe these statistics if he could not be assured that the writer had timed the individuals named, and that the records given are free from all exaggeration. There are four persons, all living sedentary lives, and having at each division of the day one hour for meals. They came to them faint and worn out. Their stomachs, naturally made delicate by years of wanton abuse, crave light food, slow eating and easy digestion. Do they get it? Imagine the horror of any well regulated and tenderly cared for stomach at having fired into it at the speed of a cannon ball such a mess as Jones Joneby devoured in five minutes—corned beef, cabbage, potatoes, beer, strawberries, custard. Then think of the agony of a sensitive, aching stomach at receiving such a "shake and mix" load as that. But if you are a doubter and refuse to believe that people can and do eat messes of that quantity in less time than you, who consider an hour short for your luncheon, go into any large restaurant at the noon hour, take out your watch and time the patrons. Then you will be converted. Clerks complain of dyspepsia, women of headaches, bachelors of biliousness, and a thousand others of no appetite. What is the cause? They are "bolters." They belong to that great family whose motto, displayed in all dining halls, is "Store your food down."—Herald of Health.

A Curious Reminiscence.

A curious reminiscence of Boston in the olden times is related by an old citizen. Mr. W——, a wealthy merchant in the Calcutta trade, who at his death left millions for his heirs, having some business of importance in New York, visited that city in the company of his son, who, unlike his father, had an inclination to see the sights of the great city. They stopped at the Astor house, then recently built. Everything was new to the old man, who after supper parted with his son with the paternal injunction that they were to meet at 9 o'clock p. m. Punctually at that hour the old Mr. W—— repaired to the office, and in his simplicity inquired, "Has my son Thomas arrived?" The clerk replied, "Who is your son Thomas?" "Why," said the old man, "Thomas W——, of Boston." "Not in," said the clerk. A half hour elapsed, and the old man, getting anxious, again approached the counter and inquired of another clerk, "Has my son Thomas appeared?" "Who is your son?" inquired the new clerk. "Why, Thomas W——, of Boston," answered the old man. "Not in," said the clerk. At 10 o'clock the tired and weary old man again made the same inquiry of another clerk, with the same result. "Well," said the old gentleman, "you can shut up your house; you needn't wait for him any longer. I'll go to bed," and up stairs he toddled.—Boston Budget "Saunterer."

Poisonous Bites and Stings.

For the treatment of poisonous bites or wounds made by insects, an eminent physician and lecturer advises as follows:

Apply hartshorn, cologne water or vinegar directly to the wound. A poultice of ipecac has been recommended for the same purpose.

This is all the treatment that is needed for bites of wasps and bees. Sometimes a person may be stung by a great many bees or wasps at once. In such cases fainting may be produced, and the patient will need internal stimulants, hartshorn, wine, brandy, or some liquor.

Poisonous wounds made by spiders, centipedes and scorpions are treated in the same way as those made by insects, that is, by the direct application of hartshorn to the wound, and when necessary, internal stimulants.—Boston Budget.

The Landlord's Explanation.

"Look here," said an irate guest at a summer resort, "your circulars say there are no musquitoes here, and last night I was nearly eaten up by them." "There were no musquitoes here when that circular was prepared, I assure you, sir," replied the hotel keeper. "And when was that?" "About the beginning of February."

—Guibollard is explaining the telephone to his wife. "Do you know, Zenobia, how this ingenious instrument is worked?" "No, my dear." "Well, you seize the apparatus with one hand and then you—speak with the other."—*Tid-Bits.*

—The nickname John Bull, given to Englishmen, is said to have been derived from Dr. Arbuthnot's satire, "John Bull," published in 1712.

PRINTING IN INDIA.

The Unrivaled Establishment of a Mohammedan Publisher in Lucknow.

The natives of India are rapidly adopting Western methods. In no respect is that fact more apparent than in the publication of books and serials. From the time when Carey landed in Calcutta, in the last decade of the eighteenth century, and set up his printing press in the little Danish suburb of Serampore, down to the present year, no Christian missionary has exhibited more energy and thrift than the Mohammedan and Hindu natives are now displaying for the propagation of their faiths.

The most striking illustration of this remarkable departure for strengthening the trembling fabric of the old religion of India is the great publishing house of Munshi Newal Kishore, in Lucknow. This is the fourth city in size in India, and is well situated as a distributing center, not only for the whole valley of the Ganges, but for the entire Indian peninsula. Kishore is, first of all, a school-book publisher. He seems to have the favor of the British Government to a remarkable degree, and fills contracts for supplying books in the Indian tongues to schools in large portions of the Punjaub. He is a Monammedan, and makes no secret of it. But, with the publisher's instinct, he keeps his religion in the background. He never puts his faith at the top of his bill-heads. He is a broad man—broad in every thing except Christianity, and it is not likely that the Gospel has a more vigorous hater in the whole Gangetic Valley than this wily man. But he is no bigoted professional. Bitter hater as he is of Hinduism and of all the numerous non-Mohammedan faiths, he seems as ready to publish books for the promotion of Brahminism and of its rival faith, Buddhism, as to issue apologies and text-books in behalf of Islam.

The Kishore Publishing House is situated on the Hazrat Gunge, the main street of Lucknow. The buildings are numerous, but low, mostly of one story, after the native fashion, and exceedingly plain. Many of them are mere sheds, where the work is done in full view of others on the premises. The roofs are of brick tiling. These buildings cover vast space, which is divided into many alleys and nondescript passage-ways, running at all angles with each other, and describing such curves as one can find in the denser parts of Lubeck or Nuremberg. I entered the premises by a long lane running at right angles from the main street. No one passing along the street would suspect, unless he should turn into the lane, the number of men hard at work at the farther end, or the wonderful magnitude of their operations. The orders are constantly coming in from all India, and even from Afghanistan, Arabia, and Turkey in Europe. The many people engaged in carrying on this business have all they can do to fill the orders and prepare for new ones on the way. Were the buildings covering such an area as this in Europe, and four or five stories high, yet turning out no more work than these primitive huts and sheds, their value would not be less than a half million dollars. But in Lucknow value those buildings and the ground covered by them would not sell for more than forty thousand dollars. The huts have no wooden floors. Mother Earth is the common resting-place. The men and boys in great numbers sit on the earthen floor in all possible positions, and carry on their work. They set type, read proof and bind sheets while sitting squat on the ground.

There is a great disproportion between the amount of type and the volumes printed. While there is an immense quantity of type used in Kishore's house, the lithographing of a whole book is a favorite procedure. I have a copy of the Koran, bought upon the premises, which is one foot long and eight inches broad, and I am quite sure that not a type was used in the printing of it. The plates are lithographs, and of excellent finish. As this particular volume was intended to be illustrated in colors, the difficulty was to supply the cuts. This, of course, could have been met by a separate impression. But that is not Kishore's method. All these blanks are filled by colored illustrations applied by hand. These are quite rudely done, and yet the pictures are striking, and to an Oriental eye must be attractive. For the Koran which I bought, having three hundred and seventeen pages, with numerous manual illustrations, bound in full leather, the price was only two dollars and a half.

But while a large portion of the work in this Mohammedan publishing house is done upon stone instead of type, there is also an immense amount of the usual type-setting and casting. The Arabic and some of the Hindu tongues are very favorable for engraving on stone. The whole alphabet, in several cases, consists of curves which can be easily executed by sharp tools. But when it comes to the Roman letters—and Kishore has his abundant uses for printing even English books — this shrewd publisher uses type, and his capable artisans know how to prepare plates from it quite as well as the English or American founders. — *Bishop John F. Hurst, in Harper's Magazine.*

To Clean a Pen.

A quarter or half lemon set firmly in a small shallow support and renewed from time to time will be found to remove the finish from new pens and to clean dried ink from old pens quickly and thoroughly.—The Writer.

Gen. Sheridan does not take kindly to the proposition to abolish Sunday inspections and dress parades. He thinks that both are conducive to good order and discipline and not inconsistent with piety.

In Virginia there is still a law on the statute books compelling a man who absents himself for a month at a time from church to pay a fine of fifty pounds of tobacco.

"If you wish to have a shoe of durable material," says one author, "you should make the upper leather of the mouth of a hard drinker, for that never lets in water."

THE ELECTRIC EEL.

A Fish that Has a Great Career of Usefulness Before Itself.

A South American gentleman whose name we have not the space to print, thinks he has found a way to make every man his own electrician. The scheme is nothing more—or less—than bottled eels. It is well known that in the South American rivers the electric eel is an established institution. The electric eel has had a great deal of fun up to date and has done precious little of a useful nature. Scientists have given the electric eel a very wide berth until they had a coroner's inquest that the animal was particularly dead. If you pick up an electric eel by the tail you are apt to regret your misplaced familiarity with it for some time to come. The examination of very dead eels has shown cautious scientists that each eel is provided with two positive and two negative electric cells each one-thirteenth of an inch in diameter, and besides these there are innumerable smaller electric cells. It will therefore not surprise the non-scientific reader to know that the eel spends its joyous life in perpetrating numerous positive electric cells on all who come within range of it. Nothing so delights an eel as to have an alligator swallow it. The moment the eel gets comfortably inside it turns on its battery of about a thousand horsepower on the sensitive innards of the astonished 'gator, who has never taken electrical treatment before. If it is a small eel the alligator thinks it is some new and awful kind of indigestion; if it is a big eel the 'gator floats to the surface and dies of frozen horror. It can stand a good deal but not a big eel. When the small boy is sitting on a South American wharf fishing for bass the eel likes to get on the hook and send a telegraphic message up the line to the boy. The boy springs into the air as if he had sat down on ten thousand needles and the eel gets away with the fishing line and pole.

The South American gentleman with the long name thinks the eels have had amusement enough with the people of his country. He has succeeded in bottling up enough eels to run a small electric light plant. Thirty eells of two eels each give one thousand volts of electricity. Just exactly how much a volt is no one but an electrician knows. It may be a barrelful or it may be a pound, but anyhow one thousand volts will kill three men in the most satisfactory manner.

These eels can be raised in a tank with water kept at the requisite heat. The South American with fifty jars of eels manages to light his large mansion at Achaguas, Venezuela.

By and by perhaps every householder will have his own tank of eels and be thus independent of both the electric light companies and the gas companies. There is evidently a great career of usefulness ahead of the electric eel. —*Detroit Free Press.*

A SUMMER INDUSTRY.

Chicago Women Making Toboggan Caps for Next Winter's Trade.

"That makes over three hundred," said the manager of a knit goods manufacturer, as a young woman with a bundle in her hands closed the door behind her. "I advertised for women to do crochet work at their homes, and I've fairly been besieged with applicants ever since."

"Why, is there a special demand for crochet work in summer?"

"Toboggan caps," was the laconic reply. "You see, we're getting ready for next winter's trade, and, as there seem to be no signs of the toboggan craze dying out, we want to lay in a good stock of the material to fill the demands of the jobbers. This crochet work is an excellent thing, by the way, and there's many a family in Chicago which is entirely supported by it. It doesn't require much skill, and a woman with any aptitude for that kind of work can easily crochet ten caps in the course of the day. We pay ten cents a cap, so you see a woman can make a nice little income out of the work. Strange to say, however, most of our applicants are married women, who are supported in comfortable style by their husbands. They have every thing they want except pin money, and they take this means of getting it. After all, it's a sort of an amusement for them, too. After their household duties are over, and they find their time hanging heavily on their hands, they can take out a cap and work on it. 'Why,' said a woman to me this morning, 'I think this is just a splendid scheme. I don't care if I don't make more than one dollar a week; it will keep me in ice cream.' Some firms require the crocheter to make a deposit before taking the work home, but we never do. I've been in the business over ten years, and I've never known the firm to lose an ounce of material. No, the people who do this kind of work are honest.

At this point a buxom young matron entered the manager's office leading a little girl by the hand. "Oh, Mr. ——," she exclaimed, "I want material for six dozen caps. We've started a society on the West Side, and we're going to have a capping-bee every day. It's just too delightful for any thing, and I'm going to make ever so much pin money this summer."

"That's just the way it goes," said the manager, after the applicant for material had departed. "Now, I know that woman. Her husband is head clerk in a big store down town and gets a salary of $1,800 a year. She has no need of money; it's only a freak in which she has induced some of her friends to participate. They'll soon tire of it, though, and then some one more in need of the money will receive the benefit.—*Chicago News.*

—Printed matter may be copied on any paper of an absorbent nature, by dampening the surface with a weak solution of acetate of iron, and pressing in an ordinry copying press. Old writing may also be copied on unsized paper, if wet with a weak solution of sulphate of iron mixed with a simple solution of sugar sirup.

—The site of the city of San Diego, Cal., comprising a tract of eight hundred acres, was sold about twenty years ago for $260.

A NARROW ESCAPE.

The Graphic Account of a Most Wonderful Occurrence.

[Kingston Correspondence Boston Globe.]

An event has taken place in this city so remarkable in its nature that I venture to describe it in full. The principal in the affair is Mr. Jere Smith, son of Mr. Cornelius B. Smith, of the State Insurance Department at Albany, who is well known, stands very high and is in every way reliable. I have had a long and most interesting interview with him, which I transcribed and send you in his own words, trusting it may prove valuable to your readers:

"During last year," he said, "I could not understand what was the trouble with me. I had always felt strong and hearty, but I gradually became aware that something was undermining me. I first began to feel drowsy and then in a day or two I would be unnaturally wide awake. Strange pains would come in different parts of my body. My head did not ache much but it usually felt heavy. I was sometimes hungry and sometimes I hated food, while my sleep was very irregular. I could not understand what it meant, but thought it might pass away after a time; but it did not. I don't see how I could have been so blind, but I suppose I was like most people who are troubled in the same way, and thought it nothing dangerous. After a while I noticed a peculiar color and odor about the fluids I was passing; that they were dark at times and very light at others. Finally I began to gain flesh, but I knew it was unnatural and that I was bloating. This frightened me, and I consulted physicians, who were very kind in their attentions, but did not help me in the least. My father than went with me to New York, and we consulted the eminent Dr. Keyes, who treated me for several weeks. At that time my condition was horrible. I was bloated from head to foot, it was almost impossible to breathe, and I could not sleep. In several places on my body the skin burst open, so great was the pressure from within. The agony I endured was indescribable. Then the doctor told me my case was hopeless, that I had Bright's disease in its worst form, and that I had only a few day to live."

PICTURE OF HEALTH.

"Fortunately I had a friend who accompanied me and would not see me die without a struggle. He did not urge, he insisted on my making one more effort, and I did so. I noticed an improvement at once; in four days the swelling greatly decreased and the pain wholly ceased. I continued to improve, and am a well man to-day, and owe my life to the marvelous effects of that wonderful preparation, Hunt's Remedy. I believe this is the greatest medicine that was ever discovered by man, and I only wish the whole world might know what it has done for me."

PICTURE OF MISERY.

"I know there are thousands of people troubled as I was and in just as great danger, but they do not realize it. Bright's disease is the most deceptive, the most horrible malady the world has ever known. It has no settled symptoms, but assumes every imaginable form. I had no idea it was Bright's disease that was undermining me until I began to bloat, and now that I am well and enjoying life, I feel like telling everybody about my miraculous escape. Is it any wonder this town is aroused over my resurrection."

Such is the account of probably as narrow an escape from death as was ever known. The first symptoms which Mr. Smith felt were such as many others feel but do not consider worth noticing. It is plain, however, that the early indications of a dangerous disease cannot be trifled with, but must be met promptly, and by such a remedy as has been proven to be indeed a friend in time of need. WINTHROP.

MISCELLANEOUS.

—The latest theory of a preventive against sea-sickness is to ride up and down on elevators as frequently as convenient for several days before embarking.—*N. Y. Mail.*

—Seven Indians—Big Thunder, the Crow chief, among the number—were drowned while attempting to cross the Missouri river ten miles north of Bismarck. Big Thunder was one of the most famous chiefs of the Crow nation, and his son, White Eagle, is said to have been with the party when the accident occurred. The Indians were crossing to join a band of their tribe, which started out to wreak vengeance on the Sioux, who killed a number of Crows several days ago.—*Chicago Mail.*

—William Hennessey, of Bridgeport, Conn., has been predicting for the last fourteen years that he would die on the 24th of November. People tried in vain to laugh or argue him out of the idea, and when the 24th came he dressed up in his best clothes and went out and sat down in the barn to wait for the summons. Some rotten beams gave way and the building fell in, but lo! and behold, William was pulled out unhurt, and has set out to live another fourteen years.—*Hartford Courant.*

—Palinkromes, or sentences that spell the same backwards or forwards, are becoming popular again. Some have been published recently in the *American.* Two good ones came through the New York *Graphic.* One, referring to Cerberus, is: "Dog, as a deified devil, lived deified as a god." The other is: "Eve damned Eden, mad Eve." Both of these are new and good. A Massachusetts editor recently got the craze, and after returning from a poor theatrical performance perpetrated this: "Stars, rats!"—*Baltimore American.*

—The other afternoon as Farmer Kellogg's oxen were drawing a heavy load up Spring Hill, Conn., the load shifted to the rear, raising the tongue of the cart and lifting the oxen nearly off their fore feet. Mr. Kellogg was unable to release them and the oxen were fast choking to death, when a passing neighbor came to Kellogg's assistance. They both mounted the cart tongue and managed to unyoke the oxen, but not before one of them was so thoroughly choked that he fell as though dead when released from the yoke. He soon recovered, however.—*N. Y. Sun.*

LUCKY CAIROITES.

The St. Louis and Tennessee river packet W. H. Cherry was here to-day, and her commander and clerk were in better spirits than usual, for a very good reason. They drew out of the City National Bank $2,000 the bank had collected for them on one-tenth of ticket No. 15,322 in the drawing of the 12th inst. of The Louisiana State Lottery. The ticket drew $20,000, making their share as stated. Capt. Lem. Hill, a Cairoite from 'way back, is the commander of the Cherry, and Harry Crane, son of Capt. John Crane of the T. B. Sims, the clerk. They are two as clever and popular gentlemen as run on the Western rivers, and their many Cairo friends will be happy over any good fortune that falls to their lot. Capt. Hill and Mr. Crane have never invested heavily in the lottery, but occasionally have bought a ticket or two in partnership, more for the little fun or excitement attending ventures on chance, however small, than from expectation of drawing anything of much importance, hence when their ticket, or fraction of a ticket, in the drawing of the 12th turned up worth $2,000, they were more surprised than anybody.—*Cairo* (Ill.) *Argus*, July 25.

—A large eagle made its appearance in the town of Richmond and attacked a small boy named John Donahower, about eleven or twelve years of age. The snow made it difficult for the eagle to strike young Donahower above his boots, but it fought the boy savagely. The lad had nothing with which to defend himself except the boots on his feet, which he used to good purpose in kicking the eagle until he killed it. It was a strange thing for an eagle to swoop down and engage in a struggle with a boy for his life.—*Winona (Minn.) Republican.*

USEFUL AND HURTFUL MEDICINES.

There is a certain class of remedies for constipation absolutely useless. These are boluses and potions made in great part of podophyllin, aloes, rhubarb, gamboge, and other worthless ingredients. The damage they do to the stomachs of those who use them is incalculable. They evacuate the bowels, it is true, but always do so violently and profusely, and besides, gripe the bowels. Their effect is to weaken both them and the stomach. Better far to use the agreeable and salutary aperient, Hostetter's Stomach Bitters, the laxative effect of which is never preceded by pain, or accompanied by a convulsive, violent action of the bowels. On the contrary, it invigorates those organs, the stomach and the entire system. As a means of curing and preventing malarial fevers, no medicine can compare with it, and it remedies nervous debility, rheumatism, kidney and bladder inactivity, and other inorganic ailments.

A woman always looks under the bed for a man. A man goes out between the acts to look for him.

The Nineteenth Century Club is an organization that will consist of an equal number of men and women. It is hardly to be expected that they will agree on all subjects; but it can surprise no one to learn that Dr. Pierce's "Golden Medical Discovery" is unanimously pronounced the most successful remedy extant for pulmonary consumption, as has been demonstrated in hundreds of cases; it positively arrests this disease and restores health and strength if administered in its early stages. By druggists.

A Legislature is berogued when it is elected, and prorogued when its days of deviltry and usefulness are ended.

THINGS WORTH REMEMBERING.

When you feel a kind of goneness about the stomach it is a sign that your food does not sit well and that you are about to have a fit of indigestion.

When you begin to feel nervous and are unable to sit still comfortably; when your clothes suddenly seem to lose their fit and become too tight in places, the fit of indigestion is surely upon you.

When this fit of indigestion is repeated from day to day it finally resolves itself into dyspepsia.

Chronic dyspepsia will surely make the happiest life a hell upon earth.

Remember that three to ten of BRANDRETH'S PILLS will cure the worst case of indigestion or dyspepsia, or both, and that a regular course of them, say two every night for a week or ten days will act as a preventive of either complaint.

Wife—In the game of lawn tennis, my dear, what is the most difficult thing to acquire? Husband—The lawn.

Young or middle-aged men, suffering from nervous debility or kindred affections, should address, with 10 cents in stamps, for large treatise, World's Dispensary Medical Association, 663 Main Street, Buffalo, N. Y.

If woman wants to know what sacrifices men will make for her let her take a seat in the smoking car.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

Try Germea for Breakfast.

Cuticura
A POSITIVE CURE
for every form of
Skin and Blood
Disease
from
PIMPLES to SCROFULA.

SKIN TORTURES OF A LIFETIME INSTANTLY relieved by a warm bath with CUTICURA SOAP, a real Skin Beautifyer, and a single application of CUTICURA, the great Skin Cure.

This repeated daily, with two or three doses of CUTICURA RESOLVENT, the New Blood Purifyer, to keep the blood cool, the perspiration pure and unirritating, the bowels open, the liver and kidneys active, will speedily cure

Eczema, tetter, ringworm, psoriasis, lichen, pruritus, scall head, dandruff, and every species of torturing, disfiguring, itching, scaly and pimply diseases of the skin and scalp, with loss of hair, when physicians and all known remedies fail.

Sold everywhere. Price, CUTICURA, 50c; SOAP, 25c RESOLVENT, $1. Prepared by the POTTER DRUG AND CHEMICAL CO., Boston, Mass.

Send for "How to Cure Skin Diseases."

PIMPLES, blackheads, chapped and oily skin prevented by CUTICURA MEDICATED SOAP.

HALL'S
SARSAPARILLA
Cures all Diseases originating from a disordered state of the BLOOD or LIVER. Rheumatism, Neuralgia, Boils, Blotches, Pimples, Scrofula, Tumors, Salt Rheum and Mercurial Pains readily yield to its purifying properties. It leaves the Blood pure, the Liver and Kidneys healthy and the Complexion bright and clear.
J. R. CATES & CO., Proprietors
417 Sansome St., San Francisco.

Some of the best blood in the land now runs through the mosquito's veins.

A WOMAN'S AGE.

A woman, it is said, is no older than she looks. Many women, however, look double their actual age by reason of those functional disorders which wear upon the nerves and vitality, and which, if unchecked, are liable to change the most robust woman to a weak, broken down invalid. Dr. Pierce's "Favorite Prescription" will positively cure every irregularity and weakness peculiar to the sex, and requires but a single trial to prove its surpassing merit. Price reduced to one dollar. By druggists.

Some of these days the American toy pistol will be introduced into French duelling warfare, and then somebody will get hurt.

Each year finds "*Brown's Bronchial Troches*" in new localities, in various parts of the world. For relieving Coughs, Colds, and Throat Diseases, they have been *proved* reliable. *Sold only in boxes.*

THE BARREL HAMMOCK.

Reliable Advice of One Who Has Experienced All of Its Pleasures.

Kind reader, did you ever swing in a barrel hammock—one of the genuine, home made country barrel hammocks, such as you find in the summering places of New Hampshire? If you have not one you missed something in this world which falls to the lot of but few men. Fall, did I say? Yes that is it. That's part of the pleasure of the hammock—the falling out.

But first, let me discribe this instrument of tor—pleasure. It is composed of six parts, barrel staves, two of rope, and two of cussedness. Two holes are bored through each end of the stave, and through these pass the rope, the ends being fastened to convenient trees, hooks, or posts like the ropes of a more peaceable hammock. A pillow is thrown in carelessly. This is done to tempt men and lead them on to death. Like a siren that pillow reaches out its every feather, and beckons you to come and enjoy its soft embrace; and you do so. And the end is not yet. You sit down in the middle first, imagining that the hammock has some feeling like its genus; but you are astonished at receiving a crack on each side of your cranium from the two respective end staves. It startles you at first, and you will doubtless feel a little hurt about it, but, like all the rest, you will look upon it as a little eccentricity of the article and swing your feet in to enjoy a reclining position. In doing so you find that your pant have lowered some slack down between the two middle staves, and that in turning around you are in danger of twisting a hole about the size of a dinner-plate in a spot which would inconvenience you. So you gather your robes about you, taking all the slack on top, and once more prepare to recline. This time you have missed your reckoning, for the pillow is about ten feet above you. How to get up there is the question. In vain you attempt to reach it. Each time the bottom of the stave with five of its neighbors flies up and hits you in the small of the back. Then you try to slide up. Digging your toes between two of the bottom staves and working slowly along, you manage to tear a hole in your vest, stick a nail in your ear, and grasp the pillow all at the same time. But you have got the pillow and you are happy.

There's a newspaper in your pocket, but how to get it is the question. You dare not move, for the pesky thing will kick you out, so you content yourself with reaching for a cigar in a convenient pocket, strike a match on a stave—Oh, these barrel hammocks are accommodating—and settle down for a smoke. In five minutes, under the soothing influence of the weed, your mind is at rest; you have forgotten the tricks that lurk in every individual stave of your couch, and are picturing to yourself the dash you will cut when, at home after vacation, with eight dollars per week of saved board money in your pocket, you will paralyze the clerks in the store with stories of "gay Newport, you know." At this juncture one of the young lady boarders rushes out, and with a "Mr. Jones, we are going," she plants her plump form down on the lower staves of the hammock. The upper ones rise in conjunction. Jones rises, too. Your cigar flies in the air and comes down in your eyes just in time to blind your sight as you descend from among the branches to terra firma.

"Blank, blank the blanked thing! who cut the rope, any way? Oh, excuse me, ladies." Of course you have to offer apologies at the tea table to smooth the matter over, but Miss Brown will always avoid you after that, for it is possible she had a suspicion that before the cigar struck you you saw her where the treacherous staves of the lower half of that hammock had placed her.

Reader, should you ever visit the country shun the barrel hammock. It cost one man five years of his life, a new vest and the acquaintance of a most estimable young lady. If you must use it, take it down and spread it on the grass, drive a railroad spike through each stave, and you have it.—*Cor. Newberryport (Mass.) News.*

A Careful Nurse-Girl.

The Hibernian's idea of being careful is sometimes rather peculiar. A lady who had recently engaged an Irish nurse-maid said to her one day, while walking in the garden:

"Mary, wrap the baby up very carefully, and bring him out to me."

"Yis, mum," glibly replied Mary, and straightway departed.

She presently returned, bringing the infant bundled and bound in a shawl-strap.

"You unfeeling creature!" shrieked the poor mother, frantically. "You will kill the child!"

"Not at all, mum, not at all. You towld me to be careful, an I am. The choild was so hivvy, I thought a shawl. shtrap was the safest way to carry him."—*Youth's Companion.*

—"Did ye ever hear the story of Pat and his employer?" asked a hackman as he declined to drink the third time. "No; tell us it, Vanderbilt," remarked the driver's "fare." "Well, Pat was out wid his master wan day and was asked to drink. He did. Then again, and he did. The third time Pat declined, and as he did so said what I think is very thrue, gentlemen: 'Wan, Sur, is good. Two is betther. But three is not half enough.'"—*Philadelphia Call.*

—The pleasantest thing in the world are pleasant thoughts, and the great art of life is to have as many of them as possible.—*Bovee.*

BEFORE THE CAMERA.

How Famous Politicians Behave in the Photograph Gallery.

A noted photographer in Washington tells some interesting stories about the bearing of our leading statesmen before the camera:

"I have posed all the members of the Cabinet and most of the Senators and Congressmen," said he. "Some of them fall into position with all the grace of professional actors, but the majority give me a great deal of trouble. Senator Edmunds is one of the worst subjects I have ever had, on account of the expression he invariably assumes at the critical moment. He will look pleasant while being posed, smile when told he is all right and beam on the black cloth while the artist is making his preparations, but the moment the cloth is removed a fierce look comes into his eyes, his muscles grow rigid and his whole appearance is that of a Sepoy about to be fired from a cannon. When requested to take on a more pleasant expression he complies with a smile, which lasts till the camera is again uncovered. Then again comes that fierce "I'll-die-if-I-must" expression. I could never catch a pleasant look on his face.

"Mr. Blaine is a model sitter. He falls into position gracefully and needs little aid from the poser. He is not easily pleased, however. He is a photographic critic of the keenest kind and can detect the slightest faults in the proofs. Sometimes it has taken a half dozen sittings to satisfy him.

"Senator Evarts does not look well in his photographs, because he insists on posing himself. He has a large nose, you know, and his chief anxiety is to conceal it as much as possible. Since a generous lofty nose can not, by any effort of art, be transformed into a delicate Grecian feature, the Senator is never satisfied with his photographs.

"Senator Sherman takes a poor picture, because he assumes a smile which is foreign to his features. If he would only look grim and stern, as he does outside the photograph gallery, his face would be impressive on pasteboard, even if it could not be called beautiful. But the Senator tries to look sweetly benignant, and the result is an expression bordering on the funny. This is invariably the case with stern men who try to smile before the camera.

"Secretary Whitney has had but one set of photographs taken since he has been at the head of the Navy Department, and those were for private distribution. Unlike most prominent men at the Capital, he does not care to see his face in store windows. Curiously enough, too, his pictures are the handsomest we have taken of Government officials. He is the only instance I know of in Washington public life of good looks and modesty going hand in hand.

"Secretary Lamar is fond of assuming a poetic, ethereal expression, which comes near to utter blankness. To add to the impression that he is a poet far above thoughts of earth, he rumples his hair and lets it fall so as to almost cover his ears. He is fond of seeing his face on pasteboard and distributes his pictures liberally.

"Senator Hoar takes well. He sits down, clasps his chubby hands, and lets his face resolve itself into sunbeams. He has the sweetest smile I have ever seen on the face of a public man. He never asks for proofs, being satisfied from experience that the camera does him justice because he does justice to the camera.

"Senator Sewell is rather troublesome. He always wants the positionist to pose him in such a way that the little bald spot on his head can be concealed. I have tried it, and in vain. The only way it could be accomplished would be for the Senator to place his face horizontally to the ceiling, but when I told him this he got angry.

"Senator Fry looks in his picture quite the heavy villain. He seems downright blood-thirsty when he faces the camera, and no amount of persuasion can soften his features. I have tried funny stories, humorous suggestions and little practical jokes; but to no purpose. He still looked as if it was his dearest wish to be let loose among his fellow-citizens with a derringer.

"Senator Wade Hampton is particular as to one point only—his handsome 'Dundrearies.' When we show him a proof, he glances at once at his side-face adornments, seems to count all the hairs, and if he finds one missing he has no criticism to offer. He passes many minutes fondly arranging his whiskers before taking the chair.

"Senator Beck takes, perhaps, the best picture in the Senate. His face is strong and handsome, his bearing manly and graceful, and his iron-gray locks are things of beauty. And isn't he proud of them, and dosen't he handle them tenderly? He knows that his photograph is something to be admired, so he does not by any means object to having it in the windows for sale. He gives us a call regularly every three months.

"It is a pleasure to pose Mr. Randall. He has natural grace, and perfect command of his features. He can assume any expression, unterrified by the instrument before him. Like Senator Hoar, he never has to come back for a second sitting.

"Mr. Morrison is quite the opposite. His expression when in the chair would excite the laughter of any looker-on except a 'positionist.' If the expression were translated into words it would read something like this: 'I've got my eye on you, my man, and, if you make a movement, I will send a bullet through your heart.'

"Speaker Carlisle is a good subject. He looks serious and natural, just as he does at his desk in the House of Representatives."—*N. Y. Commercial Advertiser.*

QUEER COUNTRY THIS.

Carl Dunder Jumps on the Wrong Man and Becomes Sick All Over.

"Sergeant, vhas some warrant oudt to arrest me?" softly inquired Carl Dunder, as he tip-toed into the Woodbridge street station house.

"Not that I know of—why?" replied Sergeant Bendal.

"Vhell, two or three days ago a strange man comes in my place. Vhas I Carl Dunder? I vhas. All right. Mr. Dunder I vhas of the Board of Health, und I like to look in your cellar for dead rats und cholera. Dot seems all right to me, und so I light der candle und he goes doun. He vhas gone a long time, und vhen he comes oop he says dot cellar vhas all right. He vhas in New York, Chicago, Toledo und odder places, und he neafer see sooch a clean place."

"Some swindler, of course."

"Vhell, in der afternoons anodder mans vhalks in on me. Vhas I Carl Dunder? I vhas. All right. Mr. Dunder, vhas dot sewer in your cellar all right? If he vhasn't, dot sewer-gas fills der whole place und you vhas taken to der bone-yard. Dot seems all right, and I let him go down. He vhas gone a good while, und vhen he comes oop he says he vhas in Buffalo, Cincinnati, Syracuse und Baltimore, und he neafer see sooch a sewer pefore.

"He was another swindler."

"Vhell, dis morning the third man comes in. Vhas I Carl Dunder? I vhas. All right. Mr. Dunder, I vhas der Fire Commission. Maype your cellar vhas all right if you vhas cut off by fire, und maype she needs some fire-escapes. Please light dot candle und I shall see. He vhas gone twenty minutes, und vhen he comes oop he wipes off his shin mit his elbow. Dot put some ideas in my headt, but he says he vhas in Kansas City, Omaha, Milwaukee and St. Paul and he neafer saw a cellar fixed oop like mine. In case of fire he could shump out like a rabbit."

"What a greenhorn you are!"

"Vhell, maype I vhas. I go down cellar pooty quick to look aroundt, und I find dot dose fellers drink three bottles of my wine und shteal some more. Dot vhas a game on me, sergeant."

"Of course it was."

"Vhell, I made oop my mind dot der next feller pays for all. Shust after dinner he comes in. He vhas sweet und shmiling. Vhas I Carl Dunder? I vhas. All right. Mr. Dunder I like to go down cellar to see your ——"

"What?"

"Shust aboudt dot time I shump for him, und in two minutes he vhas pulverized. I make a mop of him, und I smash two tables mit his heels. He crawls out doors after awhile, und vhen he vhas gone half an hour my telephone rings. Hello! Vhas dis Carl Dunder? He vhas. Vhell, Mr. Dunder, you haf almost killed der mans we sent to read your gas meter und she vhill cost you fife hoonered dollar to settle."

"No! And you pounded the wrong man?"

"Vhell, how can I help it? One day a false expressman brings me a shtone in a package und collects eighty cents. Der next day anodder man brings me a package, und after I lick him I find she vhas a bundle from der shtore. One man comes in und collects money to build a shurch. He vhas a shwindler, und I look oudt. I gif der next man some awful kicks, und he proofs dot he vhas a preacher. You see, it vhas all pecause nopody vhas like himself two times. Sergeant!"

"Well."

"I vhas going home und go to bedt. I vhas seek all oafer. If ten hoonered men come to shwindle me it vhas all right und I doan' say a word. If you ring oop my telephone to-night und I vhas hanged by der neck in de woodshed you can say dot I died because of seech a queer country."—*Detroit Free Press.*

IMPORTED GOLD LACE.

Where American Officers Obtain the Gaudy Parts of Their Uniforms.

It is a singular fact that the United States, while strong in resources, is entirely dependent upon foreign countries for the gold and tinsel which are used in decorating her officers of the army and the navy when on dress parade. A military officer, no matter what flag he fights under, must have a certain amount of glitter about his shoulders, or he can not do justice to the government which employs him. Epaulets and shoulder knots are as essential to a well-regulated army or navy as are the guns and ammunition used on the enemy. Yet, in spite of the fact that there are six or seven thousand officers in the service of the United States, who must have gold cord, gold lace, and gilded epaulets, there is not a single manufactory in the country where this "war material" can be made. Every piece used in the decoration of uniforms of the regular, as well as the vast quantity which goes to adorn the militia of the different States, comes from England. An officer of the Quartermaster's Department of the army tells me that the reason that none is manufactured in the country is the fact that the plant necessary to establish the business on a paying scale would cost a million dollars at least, and that there is no absolute evidence that the stuff could be made here as cheap as in England. At all events, no one has yet had the hardihood to risk so great a sum in the establishment of a business which must necessarily be restricted.—*Washington Letter.*

—Talent, lying in the understanding, is often inherited; genius, being the action of reason or imagination, rarely or never.—*Coleridge.*

—It takes about thirteen days for a letter to go from London to San Francisco.

SCIENCE AND INDUSTRY.

—There are $100,000,000 invested in the watch industry in this country.

—The canning and evaporating business is rapidly extending in the South.

—The eggs of a single sturgeon, counted by Frank Buckland, numbered 921,600 and weighed forty-five pounds.—*Arkansaw Traveler.*

—A French physiologist has been endeavoring by experiment to gain light as to the effect of baths upon the system. He finds that cold baths increase the demand of the system for oxygen, and so affect the action of the lungs as to double or treble the quantity of air passing through them in a given time.—*N. Y. Ledger.*

—A novel aid to instantaneous photography has been devised by two Berlin chemists. It consists of an explosive powder made of pulverized magnesium, chlorate of potash and sulphide of antimony. When this is ignited it will illuminate the darkest room with a flash lasting only one-fortieth of a second, but long enough to obtain a photograph of a person or object in the apartment.

—Salt brine is used in Sheffield, Eng., for hardening steel, says an exchange. The mixture improves with age and use, and to such an extent that its value is largely increased. In some cases these tanks are fifty years old, and have a value in proportion to their age. It appears that the constant dipping of the hot metal into the same solution alters in some way its character.—*Frank Leslie's Newspaper.*

—The manufacture of rubies has lately reached such perfection that the artificial product is often more valuable than the natural stone. The process employed is that of M. Fremy, who described it to the Paris Academy of Science. Discarding a method discovered by him some years ago, he now dissolves alumnia in fluoride of calcium, and obtains red crystals of alumina, or perfect rubies, which may be made of large size.—*Frank Leslie's Newspaper.*

—Starting on Dr. Dawson's assumption that one foot of coal represents fifty generations of coal plants, and that each generation took ten years to mature—a very moderate assumption—and taking the actually measured thickness of the coal measures in some localities at 12,000 feet, Prof. Huxley calculates that the time represented by the coal formation alone would be 6,000,000 years—sufficient to show that when we come to deal with geological time the unit of measurement is 1,000,000 years.

—A curious effect of the earthquake in the north of Italy and south of France has recently come to the attention of medical circles in Paris. A telegraph operator, who was sending a message at the time of one of the more severe shocks, lost his consciousness and remained insensible for ten minutes. On recovery he did not experience any great suffering, but in the course of two months symptoms of paralysis of the arm and face began to manifest themselves, and his condition has now become quite serious. It is supposed that he received a powerful shock of "earthquake electricity."—*N. Y. Ledger.*

TAKING A MUD BATH.

A Gentleman Describes the Sensations He Felt While Enduring It.

A well-known gentleman who lives at the Fifth Avenue Hotel came into the corridor from the street recently, looking as if he had been scourged for a week. He sat down, took a long breath, and lighting a long cigar began to puff vigorously. A reporter asked him if he was ill. He replied:

"Ill? No, I have just taken a dirt bath. Don't know what a dirt bath is? Then I'll tell you. I concluded that my system had run down and that I needed something to start my blood to circulating rapidly, in fact a general vitalizer. I was directed to take mud baths. These baths are very expensive. The attendant stood me up and began to cover me with what is known as Fuller's earth. I was encased in this substance with only my head sticking out. Then I was placed in a trough, a tube was inserted into the mud and an electric current turned on. The sensation was most unique and almost indescribable. The earth around my body soon became charged with electricity and snapped and coquetted with my skin in a most tantalizing way. At times there would seem to be a race of small tacks down my back, and then the sensation of a brush gently passing over me. My flesh simply acted as a conductor and enjoyed all the little pranks that a series of currents from a powerful electric battery can produce. After an hour I was stripped of the mud and 'massaged' for an hour by two stalwart attendants. A douche of water was then administered, and I went home. But the bath can not be finished in one day. I went back the next morning and was given a cold water bath and rubbed again very thoroughly. Then my feet were placed in water charged with electricity. The attendants then seized several large sponges, dipped them in the water and began to rub me. It was an electric bath, and the sponges fairly made me howl with the shocks I received. The next day I went back and finished the bath. I was placed in a vat of large-grained salt and rolled about until my flesh glowed with irritating excitement. A rub down and water bath then finished my mud bath. It takes only three days. I wanted to perspire, and I succeeded. Sometimes I dream I am closed up in an armor of mud and the perspiration comes from me in copious streams. If a man has three solid days to spare, I think nothing is more pleasant all around than to take a first-class mud bath."—*N. Y. Mail and Express.*

The Lime Kiln Club.

"I wish de world would let me alone fur a couple of weeks," said Brother Gardner as the echoes of the triangle died away. "It has got to dat pass whar' I am constantly lookin' fur sunthin' to happen, an' it is w'arin' on my narves.

"Ebery Monday mawnin' we kin look in de papers fur an item to de effeck dat de cholera am sartin to reach dis kentry.

"On Tuesday mawnin' we kin expeck to find dat somebody has diskibered a new comet, an' dat said comet ar' gwine to switch his tail around an' knock dis kentry all to smash.

"On Wednesday mawnin' we ar' purty sartin to find a medical report to de effect dat consumption has increased 50 per cent. in dis kentry in de last five y'ars, an' dat cull'd men all ober de kentry am droppin' dead wid heart disease.

"Thursday am de reg'lar day fur predictin' tidal waves, cyclones an' finanshul panics.

"Friday ar' sartin to bring de news dat de coal fields of de world will be exhausted in about 252,000 y'ars, ebery stick of wood be gone a y'ar later, an' dat de cull'd populashun kin prepare fur a sorrowful time.

"Saturday eands up de week wid a railroad slaughter, a big hotel flah, a steamboat collishun' an' de statement dat de germs of yaller fever hev appeared in watermellyons. Dis puts us all in a good frame of mind, an' when we go to church on Sunday an' h'ar de preacher tell how glad we orter be dat we are 'lowed to lib frew de week we feel dat he has struck de keynote.

"I tell you, I doan' care two cents whether de sun am 93,000,000 miles from de airth, or only 92,990,000. I doan' know whether de moon am inhabited or not, an' I doan' propose to lose any sleep ober it. Dis kentry may hev 2,000 miles of coast exposed to de attack of a furrein ironclad, but I ain't gwine to git up one minit airlier in de mawnin'. It may be dat de intellecktual standard of de world has decreased 10 per cent. in de las' decade, but Ize gwine to keep right on buyin' de same grade of codfish from de same grocer. Infidelism may be gainin' ground at de rate of 5 per cent. per y'ar, but me an' de ole woman am gwine to smoke de same kind of terbacker an' soothe our bunyons wid de same make of salve.—Detroit Free Press.

The Trap Would Be a Safeguard.

"Well, what on earth do you suppose that old lady up in 1,110 wants now? she has just rung again," said a clerk in one of the largest hotels in Saratoga to the senior proprietor, who had been several times appealed to to gratify the whims of a notional old guest.

"Well, I don't know. What does she want?"

"She wants a mouse trap."

"Well, get her a mouse trap."

"But you know there was never a mouse seen on that floor since the house was built."

"What difference does that make?" said the circumspect boniface. "It is not a mouse that she wants, it's a mouse trap—get her a mouse trap."

The clerk sent right out, got a three hole mouse trap for ten cents and the old lady was comfortable in mind for several hours.—The Saratogian.

Shear Nonsense.

—Judge.

Not a Centenarian.

Her principal assets were youth and beauty, and in the guileless innocence of a trusting heart she had bestowed her young affections upon an old, old man, whose coffers were literally overflowing with gold. And there was a grand party to celebrate the betrothal, to which all sorts and condition of people were invited, and things went, if possible, even merrier than a marriage bell. And during the evening there was sweet music, and sweeter singing, and then it was that the bride elect murmured in her most dulcet tones:

"I am going to ask you a favor, Col. Mooney. Do you remember 'My sweetheart when a boy?'"

"Remember him!" gasped colonel, "You don't suppose I am a centenarian, do you?"

And somehow they quite forgot to invite him to the wedding.—New York Mercury.

Plantation Philosophy.

Er 'oman wins er man by de way she acks;
er man wins er 'oman by what he says.

Sometimes er dozen wise men may git tergeder an' be foolish, but er dozen fools kain't neber git tergeder an' be wise.

De thoughts dat er pusson thinks fur no one but hisse'f air his best an' his wust. Dem whut comes between he gins ter de public.

It is sometimes easier ter flatter er wise man den it is er fool, fur de wise man may think dat yer's got some cause ter praise him, but de fool may know at onct dat yer's a liar.—Arkansaw Traveler.

Not Quite So Modern.

"I say, stranger," whispered a western man, who had strayed in an uptown theatre where the play of "Romeo and Juliet" was going on, "I can't make head nor tail of this thing. What's the name of this play, anyhow?"

"Romeo and Juliet."

"Well, if I'd known that," said the disgusted westerner, "I wouldn't have come in. I understood the feller at the door to say it was something about Omaha and Joliet."—Life.

A Promising Youth.

Magistrate (to Chinaman)—What is your complaint against this young man, John?

Chinaman (unable to collect a laundry bill)—He too muchee by and by.—New York Sun.

The Enamored Ornithologist.

I have a love—I call her dove—
And she is passing fair, oh!
Though plump is she, there are who say
She's what they call a sparrow.

Unto the duck I'd weave a song,
Yet how shall I begin it?
For, though her head is plumed with gold,
There's very little linnet.

Canary love be like this love
That keeps my heart a throbbin'?
It steels my thought by night and day
And all my peace is robin.

Oh, what a goose am I to quail
When near the pretty sinner;
For if I cassowary much,
I should pigeon and winner.

—Omaha World.

PRETTY TOUGH YARN.

How a Drowning Mariner Was Rescued by an Accomplished Messmate.

"Talking of life-preservers," said the truthful mariner, as he knocked the ashes out of his pipe, "you remember the old steamer Roustabout that used to run from Buffalo to Chicago. I was mate on her the year before she was lost. We were about sixty miles out from Chicago when Mike Lanagan, who was doing something up on the mast, fell, struck on his head on the roof of the cabin and bounced clear out into the lake. Well, the captain he see him fall and he stopped and backed that old Roustabout quicker'n you could say 'scat.' Mike went down like a plummet, for he was knocked insensible, and I knowed that there was no use to heave a life-preserver for him, so I jest hurried up the boys in getting the boat down, although I didn't expect it 'ud do much good. We had Jim King on board, passenger from Chicago. You remember Jim King, don't you?"

"Can't say that I do," remarked a bystander.

"Well, Jim was champion quoit-thrower in them days. He's dead now, poor fellow but Jim was a hoss on throwing quoits. I tell you quoits were a great game them days. Every village had a quoit club, and the boys on the farms used to throw hoss-shoes. It was somethin' like base-ball is these times, although I never could see as much fun in base-ball as I could see in a good game o' quoits."

"Oh, come off," cried the impatient listener. "What did Jim do, or did he do any thing? Did the man drown?"

"Now, don't be too fly. Whose tellin' this yarn?"

"Well, *you* don't seem to be."

"Go on! Go on!" said the crowd.

"Well, you know, in quoits a 'ringer' was when you put the quoit round the stake. It counted double. Well, Jim, he picks up the round life-preserver, it's like a great big quoit, you know, and as the capp'n came running aft, Jim he sings out: 'Capp'n, I'll bet you five dollars that I'll make a ringer on that man, if he comes up within the length of this line.'"

"Bet you twenty dollars you can't," said the capp'n.

"'Take you,' said Jim, and just at thet minit up bobs Mike's head about sixty feet astern. Jim threw, and I'll be durned if that life-preserver didn't go plump over on Mike's head clean down on his shoulders, and there it stuck. We got down the boat, and when we got to Mike he hadn't come to yet and didn't for some time after. He'd been a goner if it hadn't been for that ringer, although it took the skin offen his nose."

"Did the captain pay the twenty dollars?"

"Pay it? You jist bet he did. And Jim he handed it over to Mike, and Mike he blew it all in when he got to Detroit. I wish some of it was here now fur I'm mighty dry. Thanks. don't mind if I do."—*Detroit Free Press.*

GENUINE CONTENT.

Good Men and Women Who, "Having Nothing, Yet Have All."

In one of the great cities of the West which have sprung up into full life in as many years as men take to totter through babyhood, an old gray house preaches the unusual lesson of content to all passers-by. The street on which it stands is filled with solid rows of massive banks and importing houses, the most valuable property in the city. Niched in between two towering, splendid buildings are two acres of ground, planted in grass, and an old-fashioned garden, with a cow-house and a plain little dwelling, such as might be built for a few hundred dollars. It is the property of a poor man, who lives on a moderate salary earned by his daily labor. A few years ago he bought three acres of this ground for six dollars, and afterwards sold enough to build a home for himself and his wife upon the rest of the lot. He has been offered half a million for it, and refused.

"I have no children," was his answer. "I have all I want—a comfortable home, easy work, enough for our daily need. I do not wish to be rich."

Whatever we may think of his reasons, or the wisdom or folly of his course, there can be no doubt that he has acquired something beyond all jewels in value—content. If an honest man be the noblest work God, a contented man is assuredly the rarest.

There is an old story of a quizzical Irish nobleman, who put up a placard on a field: "This meadow shall be given to the man who can prove that he is absolutely satisfied with his lot." But as soon as the applicant had proved his content with his fortune, the joker asked him: "Then what do you want with my field?"

In actual life the contented men and women are those who are too much occupied with work for others to reflect upon their own wants or to cultivate their own ambitions. Love fills their brains and busy hands, and they, "having nothing, yet have all."—*Youth's Companion.*

—The King of the Belgians has lately invested $5,500,000 in the purchase of estates in Hungary and Austria. They are nominally to become the property of his Majesty's sons-in-law, the Crown Prince of Austria and Prince Philip of Saxe-Coburg-Gotha, but it is generally believed that this step has been taken in view of possible mishaps. The late King invested largely both in England and America, and his son has followed in his steps and has considerably increased the stores accumulated by his provident sire.

WASTED FERTILITY.

A Problem That Is Assuming a More Realistic Aspect Day by Day.

That the enormous crops taken from the land every year rob the soil of indispensable elements, every body is supposed to know; that stertility will follow if these elements are not restored every body ought to know. They abound in all vegetable matter—in offal and excrements, in the nightsoil and other materials that constitute the sewerage of cities. If these are saved and applied, the earth will yield fruits with constantly increasing abundance; but if, as at present, the larger share of these indispensable elements flow in sewers to the sea, or are wasted in other ways, can their place be supplied from any other source? Cities are rapidly multiplying and enlarging; their drafts on the soil are immense and increasing; if they persist in poisoning the fish instead of feeding the land they will inevitably be reduced to short rations. Dr. J. B. Lawes, acknowledged authority in scientific and practical agriculture, supposes a case: "If England were cut off from all outside supplies, could she feed her people from her own soil?" This brings to the front the deeply interesting matter of "intensive" agriculture. Small landholders (they ought to be multiplied a thousand-fold) are especially interested in knowing what the soil is capable of yielding, aided by all available appliances. Dr. Lawes thinks the British islanders can get necessary supplies from their own soil, but "great numbers" would have to be employed in the "production of manure." He adds: "Then would be the time when the sewage of London, evaporated to dryness or distilled, would give us some idea of the value of what a writer of a leading article in the London *Agricultural Gazette* calls the fertilizing power of 4,000,000 of the best-fed animals in the world." Dr. Lawes distinctly admits the "fertilizing power" of city sewage, but thinks under existing circumstances "the cost of labor and transit" will overbalance the benefits to be derived from the use of London sewage. It concerns us to inquire into the circumstances that make it unprofitable for Englishmen to save this sewage. The *Gazette* makes that very clear by saying: "England is now blockaded, not by hostile ships, but by fleets of food-laden vessels, which are cheapening our home products." England can't afford to save fertilizers because she can buy food of the United States and carry it 3,000 miles cheaper than she can raise it. How do we manage to sell food so cheap? By raising it on virgin soil without the expense of manure. Can we continue to do this? Diminished yields will soon stop that business. What are the results? We have sold our produce for the cost of labor expended and a small per cent on our investment, getting absolutely nothing as recompense for the terrible depletion of soil—nothing for the precious, priceless elements taken from it and sent away. A great many farmers to-day are at wits' end to know how to make their worn-out lands productive. They should not have persisted in raising crops—like wheat—that would not, besides paying all other expenses, furnish means to keep up and increase the fertility of the land.—*Major H. T. Brooks, in N. Y. Tribune.*

A TERRIBLE DISEASE.

The Only Hope of a Cure in Cases of Tetanus, or Lockjaw.

The medical name for lockjaw is *tetanus*. Sometimes it is only, or mainly, the muscles of the jaws that are affected in the disease, but commonly the rigid condition is much more extensive, often reaching to most of the muscles of the body. In its severer form it is one of the most terrible of diseases. The mind generally remains clear to the last unless it is blunted by opiates. The disease begins by a pinched look of the face. In a few hours the muscles of the jaws, neck, back and chest become rigid, and the rigidity at length extends to the limbs. This rigidity is permanent, and sometimes is so great that the body could be taken up like a stick of timber, or it may rest its weight upon its head and feet. From time to time spasms occur, lasting a few seconds, or several minutes. The seat of the trouble is in the nerves, and hence a spasm may be brought on at a slight noise, a touch, or even a breath of air.

As the muscles of respiration are usually affected, the breathing is greatly impeded, and often, for the time, rendered wholly impossible, the chest being held as in a vise. Death frequently results from this cause, the system being previously exhausted by pain and lack of sleep and nourishment. If the patient survives beyond the twelfth day he is likely to recover; but no known medicine is able to do more than promote sleep and benumb the sensibilities.

The cause is unknown. It may follow wounds, or be independent of wounds, the latter being the most hopeful cases. The wounds may be either severe or slight, but most wounds are not followed by tetanus. It is probable that, in persons of a peculiar nervous susceptibility, and under certain not well understood conditions, a poison is developed within the system. Hence, the only hope of a cure is to sustain the patient with stimulants, nourishment and sleep until the system can eliminate the poison.

In case of a severe wound, especially in the neighborhood of nerve centers, great care should be exercised in dressing the injury, so as to bring the parts well together, and the parts should be kept clean with mild carbolic acid solution, or some other good antiseptic wash.—*Youth's Companion.*

—Great shakes — carpet-beaters.—*Puck.*

H T Thompson, improved household table
A W Eibeshutz, mahogany show case
A Staudinger, exhibit Inyo marble
Mrs M Lewis, samples of knitted lace
Mrs Fernbach, knitted lace and patch quilt
Miss May Shepherd, quilt made at 12 years
Mrs Enos, hand painted toilet set
Miss Addie Lewis, samples Kensington

Frederick Douglass wants the Chinese admitted to the United States without let or hindrance. His reason is that they would make employers independent of white labor in the north and of Negro labor in the south. When Douglass was himself a slave he had more sympathy with laboring men; now that he is free and rich he fodies to riches and rank.

Development of the Feeble-Minded.

Mr. Richards, who electrified the national conference of charities at Washington last year by his eloquent plea for the feeble-minded, could take to his heart, as he did many years ago, a boy 8½ years old with a mind so blank that every sense—sight, hearing, taste, touch—all were mute; he had never smiled, did not know his own mother, could not stand on his feet or even roll over on the floor where he lay. Mr. Richards took him to the institution, bestowed every hygienic care upon him, but for weeks could not discover one conscious want. Think how full of wants the normal child is, and thus measure the complete torpor of this one's mind. Mr. Richards then decided, as he said, "to get down to him." An hour a day for three months he read aloud to him, as though reading to an intelligent listener, lying down beside him. Then one day he simply sat in a chair and read to himself. The child appeared uneasy. Mr. Richards had created a want! Lying down beside him he said: "You want me, Sylvanus" and the child breathed a responsive sound.

Two or three months more of patient reading aloud and again he took his place beside him in silence, and then saw the child trying to do something, and gradually lifted his finger and laid it on the reader's lips. Again the reading was continued, giving the child always the privilege of thus opening the lips. At last he gave his friend a smile of recognition. Mr. Richards said that smile paid him 10,000 times for all he had done, and he said to Dr. Howe: "If we can redeem one we will redeem them all over the country. Every state will found institutions for these unfortunates and every intelligent being shall feel that it is a privilege to enter this great work." We will not stop to trace the successive steps by which this child was led to walk, to talk, to grasp thoughts of God, the Creator, to feel a longing for mother-love, and finally to greet his own parent with a joyful, "Oh, my mother, I am glad to see you!"—Cor. Inter Ocean.

Singapore a City of Pets.

The city of Singapore is the chief entrepot of the Asiatic pet trade. All along the harbor the clamor of captive birds and monkeys hails the purchaser from hundreds of shops. Chinese trainers, Parsee wholesale dealers and Malay peddlers are ready to sell or buy anything from a parroquet to a hunting leopard. Singapore is the Cape Town of the Asiatic continent. Vessels of all nations call either for trading purposes or for supplies and repairs, for the harbor has the best dry-docks south of Canton, and the cheapest provision market of any Asiatic coast city. Splendid mangosteens, combining the taste of a banana and raspberry, can be bought for a few cents a bushel; sago and yam-roots are equally cheap, and, as the Malay trappers work for a shilling a week the menagerie dealers can afford to sell a monkey at a slight advance on the aggregate of his board bill.

The forests of half a hundred islands and peninsulas contribute to their stock in trade. The Malacca junks bring Gibbon apes, restless climbers with enormous arms and stumpy legs. Siam contributes lemurs and hanumans. Borneo an occasional orang; Java, parrots and wild peafowl; Papua, birds of paradise. Of the lemurs alone the local market terms distinguish some twenty different varieties, including the long tailed Tarsius and the Chirmundi Billi—"Bashful Billy"—a curious, phlegmatic variety of the genus Loris.—Dr. Oswald in Cincinnati Enquirer.

How a Horse Should Be Trained.

Mike J. Hester, assistant chief of the fire department, can break the stubbornest horse that ever stood on hoofs. He tamed the horse that Assistant Chief Finnerty is now driving, and that was a shyer, balker, kicker, biter, and everything else that could be mean in horseflesh. Hester made him as docile as a well-trained and good-natured dog. He trains all his horses to answer the word of command, and he can drive them, if he chooses to, without bridle. I know a gentleman who was riding with him to a fire one night when the bridle broke; my friend got cool as ice and pale as a ghost, but Mike called out to his horse, "Steady," when the animal slackened its pace, and then came the peremptory "Whoa," which brought the horse to a stand-still. Mike jumped and tied the bridle, and then resumed his run to the fire. He has all his horses trained so that when he makes his morning round of the engine-houses in his district, the horse follows him like a child.—Globe-Democrat.

Novel Use of the Stereoscope.

A novel use is made of the stereoscope to detect forged bank notes. A note of 100 francs was recently submitted to the experts of the bank of France as issued by a band of forgers, but the execution was so perfect that no defect could be discovered by the closest examination. A suggestion was then made to place the suspected note side by side with a genuine one in the objective of a stereoscope, the two images of which, as is well known, overlay each other and form a single picture. The result of the experiment was that the loop in a letter of a forged note did not exactly cover that of the genuine one, showing that they had not been printed from the same plate.—Galignani's Messenger.

Ruin of the Wrestling Business.

There is no wrestler in the country now who is making more than $2,000 a year, and there are many of them who do not get enough to provide good board and and clothes for themselves. The wrestling business has been ruin, principally by the class of men who have been in it, many of them without principle, who would wrestle in bar-rooms or do anything for a dollar or two. I made as high as $35,000 wrestling in one season, and I never made less than $5,000. I have announced that I shall wrestle no more, because I believe I have seen my best days, to use a common expression, and I can not get myself in condition now as easily as I once could.—Muldoon in Globe-Democrat.

The Amount of Travel in Cuba.

Cuba may not be very large, but her people do some traveling. During the past year the street car company of Havana transported 5,022,322 passengers, whose fares amounted to $720,363.15 in bank bills, and the number of persons, members of the company, of the police, and for other persons that traveled gratis on same, amounted to 40,094.—Chicago Herald.

Coating Wood Surface with Iron.

Coating the surface of wood with iron as a protection from the heat seems to introduce a new danger. The iron being a good conductor, the wood underneath is heated nearly as much as though uncovered, and is brought by repeated heating to an extraordinary degree of combustibility so as to become liable, according to Mr. Braidwood, to spontaneous ignition.—Chicago News.

A Big Exhibition in Switzerland.

Geneva, Switzerland, is to have a big exhibition in 1888. The main object of the exhibition will be to persuade people to go to Switzerland to spend their money.—Chicago Journal.

Regular Use of Oil at Sea.

It is announced that the vessels of the National line, including all the cattle steamers, have made arrangements for the regular use of oil in rough weather.—Chicago News.

A Party for the Dry Range.

The irrigationists have become strong enough in California to form a political party based on the use of the irrigation

ORDINANCE NO. 19

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows:

All persons doing business within the county of Inyo shall obtain licenses from the Tax Collector of said county as follows:

SEC. 1. Auctioneers are divided into two classes and must obtain licenses from the Tax Collector as follows:

First class. Those whose average monthly sales amount to $2,500 and upward constitute the first class and must pay a license of $50 per quarter.

Second Class. Those whose average monthly sales are less than $2,500 constitute the second class and must pay a license of $25 per quarter.

SEC. 2. Persons engaged in loaning, loaning money at interest, or in buying or selling notes, bonds, or other evidences of indebtedness of private persons, or in buying or selling State, County or City stocks, or other evidences of State, County or City indebtedness, or stocks, notes, bonds, or other evidences of indebtedness of incorporated companies, or in buying or selling gold dust, gold or silver bullion or specie, shall be divided into two classes and must pay licenses as follows:

First class. Those doing business in the aggregate to an amount of $50,000 per quarter shall constitute the first class and must pay a license of $50 per quarter.

Second Class. Those doing business to any amount less than $50,000 per quarter constitute the second class and must pay a license of $25 per quarter.

SEC. 3. Every keeper of a billiard table or pool table shall pay a license of $25 per quarter for each billiard table, and $10 per quarter for each pool table, and no licenses shall be granted for a term of less than three months.

SEC. 4. For each exhibition for pay for a theatrical performance, a caravan or menagerie, or any collection of animals, circus, or other exhibition performance, shall pay for each such show for pay and legitimate performances, magic shows, wire or rope dancing, and sleight of hand exhibitions, $5 for each performance. The provisions of this section do not apply to exhibitions given for the benefit of churches, schools, or charitable societies, nor to any amateur dramatic or choral entertainment by any amateur dramatic or choral society in Inyo County, in the town of District which such society or association of entertainment is held.

SEC. 5. Every pawn broker must pay a license of $25 per quarter.

SEC. 6. Each keeper of an intelligence office must pay a license of $10 per quarter.

SEC. 7. Every person who sells spirituous, malt or vinous liquors in less quantities than one gallon, must obtain a license therefor from the Tax Collector and must pay the following payment:

First Class. Those making sales to the amount of $1,500 and upwards shall constitute the first class and must pay a license of $50 per quarter.

Second Class. Those making sales less than $1,500 per month shall constitute the second class and must pay a license of $25 per quarter.

SEC. 8. Every person who has a fixed place of business selling goods, wares and merchandise, or who offered homes, drugs or medicines, jewelry, or other precious metals, another than admission or commission, except Agricultural or Horticultural productions, or the productions of any stock, dairy or healthy farm in this State, when sold by the producer thereof, and except such as are sold by auctioneers at public sale under the laws of this State, shall obtain a license from the Tax Collector for the fixtures such as are used in the transportation of goods, must obtain from the Tax Collector, and for each branch of said business, license, and pay quarterly therefor an amount of money to be determined by the class in which such person is placed by the Tax Collector, such business to be classified and regulated by the amount of Average Monthly sales made during some one month, and at the following rates:

First Class. Those who are estimated to make average monthly sales or dealing to the amount of $1,500 and upwards, shall constitute the first class and must pay a license of $50 per quarter.

Second Class. Those who are estimated to make average monthly sales or dealing to the amount of $1,500 and less than $2,500 constitute the second class and must pay license of $25 per quarter.

Third Class. Those who are estimated to make average monthly sales or dealing of less than $1,250 constitute the third class and must pay a license of $15 per quarter.

SEC. 9. The sales of liquors and wines by persons licensed under the preceding section must not be in quantities of less than a gallon at one time.

No fees shall be required of physicians, surgeons, apothecaries or chemists for any wines or spirituous liquors they may use in the preparation of medicines.

SEC. 10. Every travelling merchant, or any peddler who carries a pack and vends goods, wares or merchandise other than the manufactures and productions of this State, shall pay a license of $50 per quarter, and every such travelling hawker, peddler, or merchant who uses a wagon and one or more animals for the purpose of vending such goods, wares, or merchandise, or any kind of property, shall pay a license of $100 per quarter.

SEC. 11. Every person who keeps a stallion, jack or bull and who permits the same to be used for the purpose of impregnating mares, shall pay a license tax of $10 per license thereof, from the Tax Collector and pay the same as follows:

First. Horses that are hired for the purpose of propagating, to be sent at $100 or more each, shall be first class and require a license of $25.

Second. At $25 and less than $100 constitute the second class and require a license of $15.

Third. At $10 and less than $25 constitute the third and require a license of $10.

Fourth. At $5 and less than $10 constitute the fifth class and require a license of $5.

Fifth. At $1 and less than $5 constitute the fifth class and require a license of $3.

Sixth. At less than $1 for each service the sixth class and require a license of $2.

Seventh. For each jack, $10.

Eighth. For each bull, $10.

Ninth. No license for any stallion obtained from the Tax Collector under the provisions of this ordinance shall entitle the holder thereof to the right to travel with any of the stallions for purpose of propagating without any further license or exclusive.

SEC. 12. Every person who comes into or carries on in the County of Inyo any business, trade, vocation, or calling for which a license is required by this ordinance or any ordinance of the Board of Supervisors of said county, without having a license therefor, shall be prosecuted by the District Attorney of said county, and shall be punished by a fine not exceeding $200 and not less than $50 for each offense, or by imprisonment in the County Jail not exceeding one month, or by both such fine and imprisonment in the discretion of the Court.

SEC. 13. This ordinance shall take effect and be in force on and after thirty days from and after its passage.

SEC. 14. This ordinance shall be published in the INYO INDEPENDENT, a newspaper published and published in said county, at least two weeks.

The above ordinance was passed by the Board of Supervisors, by a duly of a majority voting of said Board October 4, 1887, by the following vote:

Ayes: Hunter, Robinson and Eldred.
Noes: None.
Absent: P. H. MACK, J. P. HARDER.

A. Best, P. H. MACK, Chairman.
Clerk.

NATHAN RHINE.

NATHAN RHINE,
(Successor to Harris & Rhine)
Merchant,
INDEPENDENCE

TAKE
SIMMONS
LIVER REGULATOR
For all Diseases of the
Liver, Kidneys, Stomach and Spleen.
This purely vegetable preparation, now so celebrated as a Family Medicine, originated in the South in 1828. It acts gently on the Bowels and Kidneys and corrects the action of the Liver, and is, therefore, the best preparatory medicine, whatever the sickness may prove to be. In all common diseases it will, unassisted by any other medicine, effect a speedy cure.
The Regulator is safe to administer in any condition of the system, and under no circumstances can it do harm. It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance; will promote digestion, dissipate headache, and generally tone up the system. The dose is small, not unpleasant, and its virtues undoubted.
No loss of time, no interruption or stoppage of business while taking the Regulator.
Children complaining of Colic, Headache, or Sick Stomach, a teaspoonful or more will give relief.
If taken occasionally by patients exposed to MALARIA, will expel the poison and protect them from attack.
A PHYSICIAN'S OPINION.
I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system. L. M. HINTON, M. D., Washington, Ark.
SEE THAT YOU GET THE GENUINE.
PREPARED BY

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, OCTOBER 22.... 1887

Mr. Wolfskill, of Yolo, spent the past ten days here.

Mrs. Stevens, of Bishop Creek, was in town some days this week.

Mr. B. F. Leete of Reno passed a few days in town this week.

Mr. Barnes came up from Cottonwood and spent a few days in town this week.

Mr. and Mrs. Elliott of Big Pine were at Independence at the beginning of the week.

L. Wood has ordered a large stock of gloves and will have them for all hands in a few days.

Mr. McKnight is surveying desert land along the river in the neighborhood of Fish Spring.

Preaching at the M. E. Church at 7.30 o'clock Sunday evening. Sunday school at 11 o'clock a. m.

The mill at Old Coso has been running the past two weeks. No result of the run has yet been received.

George W. Nelson, one of the pioneers of the Comstock, died at the Washoe county hospital last Sunday.

The dancing school will open on Wednesday evening with a soiree. Dancing will begin at 8 o'clock.

Mr. Andrew Dell, Mr. Wils Yandell and Mr. Len Yandell of Bishop Creek, were at Independence this week.

Judge La Mar, of San Jose, was at Independence during the week. He is counsel in some important cases now pending.

There's some talk of getting up a rousing thanksgiving party at Independence. The matter has not yet taken definite shape.

A knitted quilt shown at the Pavilion by Mrs. A. Stewart of Lone Pine was so handsome that the ladies are yet talking about it.

Mr. McIver bought six more horses from Mr. Sanger a few days ago, for work on the east side canal. The horses are fine animales.

Mrs. W. H. George, of Bishop Creek, was in town during fair week. Her excellent taste was found serviceable at the Pavilion.

Hon. Richard Rule, better known as "Handsome Dick" and well known in Virginia City, was married recently at Tombstone to Miss Anderson.

Miss Barnes, the teacher employed for Independence school, arrived from San Francisco this evening. It is not yet determined when the school will open.

Two bodies of armed men, about twenty five in each party, are reported to be camped in San Gabriel Canyon, Los Angeles, watching each other and ready for battle. The trouble is about water.

Mr. H. L. Robinson, has bought the place at George's Creek formerly owned by John Lubken. It is a fine tract of land, contains 320 acres, and will be irrigated by the Stevens ditch.

During the past two weeks ore has been taken out of the Defiance mine that carries from one hundred to one hundred and ten dollars per ton in gold, two hundred ounces per ton silver and forty per cent lead. The Defiance is showing up well in mine.

The trustees of the M E Church offer to let the building be used for school purposes till the new school house shall be built. Certain conditions are required for the safety of the Church which the school trustees have not yet agreed to comply with.

Many schemes have been proposed to take water from Lake Tahoe for irrigation and to furnish power in Nevada. The latest is to build an enormous syphon that would cary water enough to give 30,000 horse power and would irrigate a million acres of land.

The Directors of Agricultural District No 18 have put the Pavilion and grounds in charge of Mr. N. Rhine; parties wanting to rent the premises for temporary uses should apply to him. The Pavilion makes a fine ball room or temporary theatre. The grounds are well fitted for baseball games.

Some petty larcenist stole a specimen of polished marble from the Pavilion during the fair. This is a most contempible act of thievery; all the articles placed in the Pavilion were put there in trust to the Directors, and they feel deeply mortified and ashamed that a single article should be missing.

Said one energetic man, "I don't know anything about raising or handling fine horses, but I can learn. I'll go right home from the fair and go to work for next year; and mark, if I dont give the best blood my neighbors have got a lively turn then, or the year after." You can bet your pile that Johnnie will be as good as his word.

The fair has put new life into the farmers of Owens valley. All who attended were deeply impressed with the variety and excellence of the stock and products shown; and each went home with the determination to begin at once to prepare something for exhibition next year that will be better than anything of the same kind shown by his neighbors.

The Board of Directors of the 18th Agricultural District have tendered votes of thanks as follows; To Mr. John Lank for unremitting labors as Superintendent of the Pavilion, and for his successful management of a difficult position. To Mr. James Moffatt, as Marshall of the race track. Mr. Moffatt was always prompt and vigilant, and with the assistance of his aids, maintained admirable order at the track.

In gathering up the ores on exhibition at the Pavilion, the lots got badly mixed and many specimens are missing. The Directors earnestly request that when parties look over what they have taken away and find strange specimens, they will have the goodness to return the same to the Secretary. The Directors want to return every piece of ore to the rightful owner.

A great deal of complaint is made about the delay of mails in Nevada. It is alleged that the trouble is caused by want of sufficient trains on the Central Pacific railroad. The mails along the line of the C. & C. road are affected by delays on the C. P. When trains on the latter road are behind time at Reno, mails for the south fail to connect and have to lie over. Complaint has been made to the postal Department at Washington.

MINERALS AT THE FAIR.

The minerals exhibited at the Fair were of a large and varied character. The finest exhibits, however, were made by persons who did not compete for premiums. They desired to add to the attractiveness of the Fair without taking its funds. In some cases, however, fine ores were placed on the stands and premiums were awarded that were not taken by the exhibiters. A large collection of beautiful minerals was exhibited by Miss Theresa Walker, a young lady of about fourteen years of age. Each mineral had its number and in a reference book the history of each specimen is duly recorded.

GOLD QUARTZ.

These exhibits were superior to what are generally found in fairs, and especially the collection from Keynot by M. Lasky.

SILVER ORES.

The ores of this useful metal were unusually fine in quality and large in quantity. The most numerous and best specimens were from the Lookout, Darwin and Panamint Districts. The horn silver was especially fine. The crystalyzed blue carbonate of silver and copper were rich in quality and attractive to the eye. One handsome specimen of white carbonate of silver and lead, crystallyzed in a cavity, was a subject of admiration to all who examined it. This is the most delicate and beautiful of metalliferous crystals. The display from the three places named was very fine and its many varieties prove that these districts have an enviable future before them in the mineral production of this county. Another fine display was made by Messrs. Greenley and Broder, from Cottonwood canyon. The specimens of vitreous silver and brittle silver ores, interspersed throughout white quartz, were very rich and beautiful, even elegant to behold. They had another lot of specimens of silver ores, not so beautiful to the eye, but will stand the test of the smelter and have the advantage of being in merchantile quantity. Another fine display, certainly the finest of its class, was exhibited by Mr. W. H. Russell, from Phillips Hill, near Independence, out of the Lone Pine mine. It was composed of white and yellow carbonates of silver and lead, also of galena richly charged with silver. Also a large specimen of Fahlery coated with yellow carbonate, rich in sulphuret of copper and silver, all much admired. This young mine promises well for the future.

GALENA.

The best display of galena was certainly that exhibited by Mr. Alexander, from the White Hill mine. The specimens were very fine, of great purity of ore and crystal, and much admired by those who understood their value. A miscellaneous lot of minerals was exhibited by Mr. Ebeshutz, containing with others a pure specimen of cinnabar—mercury—silver and other ores, and also some from the counties of Alpine and Mono that attracted general attention.

GYPSUM.

Some large crystals of this mineral—sulphate of lime—were also on the stands; this is useful in neutralizing alkali in soils; it is also the raw material of plaster of Paris. A very fine crystal of lime and chalcedony was also attractive in the display.

There were a number of other minerals exhibited; silver, antimony, the various ores of copper, specimens of marble of various tints, all interesting, excellent in quality, and elegant in appearance. All the collective exhibits made the mineral department one of the most attractive at the Fair. The thoughtful visitor could see that in the not distant future the minerals of the county will give a market for the agricultural products now beginning to loom up in importance, as the products shown at the fair fully exemplified, and that the two interests will place Inyo county side by side with the first counties in this great State.

The purpose of It.

Every body concerned is proud of our fair. Warm commendations of the management continue to be heard on all sides. The excellence and variety of products, the fine horses and cattle, the beautiful displays in the Pavilion, where our ladies for the first time had a fair opportunity to show their love of the beautiful in art, and their skill in arrangement; all these continue to be discussed and commented upon with pleasure. But now, instead of resting satisfied with what we have done, let us realize the fact that we have only made a beginning. In many things we can far excell all that we have done. In fruits it may be that we will not in future be able to show anything finer in quality than we had this year; in fact it is difficult to believe that finer apples, pears and grapes will ever be produced; but we can make much larger displays of these. In other products, excellent as the displays were, careful selection of seeds and better cultivation will enable us to show much better specimens than any we had on exhibition. Unless our fair shall stimulate every one to work for the production of something better than we have; to spur us on in the march of improvement, it has failed of its purpose. But that it will accomplish this purpose, that everyone will be filled with brighter hope inspired to higher effort no one need doubt. Begin now to prepare for the second fair of the 18th. Agricultural District.

Dancing School

Mr. M. W. Ford and Mr. Max Cohn will give lessons in dancing at Mairs' hall on Wednesday and Friday evenings of each week. Tickets per month, including two soiree nights, for gentlemen, $4. for ladies, two dollars. On soiree nights ladies free. School will open on Wednesday evening, October 26th.

Farewell Party.

On Thursday evening a farewell party was given at Lone Pine in honor of Mr. and Mrs. Julian and Miss Zelia Meysan, sister to Mrs. Julian. The guests of the evening leave Lone Pine this morning for Los Angeles.

Last Monday Attorney General Garland made a motion in the United States Supreme Court to advance case No. 1,027, the United States against the Central Pacific Railroad Company--and set it for hearing at an early day this term. This case is one of seven similar suits brought for the purpose of having declared void seven patents issued to the Central Pacific Railroad Company for lands in San Joaquin and Calaveras county, Cal. The case involves the ownership of the homes of about 300 families, and will be decisive of 40 or 50 ejection suits pending in our State Superior Court.

Extracts From Agricultural Society By-laws

As there appears to be some uncertainty about the awarding of premiums attention is invited to the following. Article 8 of the Constitution of the Association reads:

PRIVILEGES OF MEMBERS. Any citizen of this District, being a member of the Society * * shall be permitted to compete for premiums in any or all Departments.

Section 5 provides that "any person who shall pay five dollars may become a member said membership to expire with the current fiscal year. Section 6 provides that any person may become a member for life on the payment of thirty dollars, or if already an annual member, by the payment of twenty-five dollars. Section 7 provides that "any person whom the Board shall propose may be elected an Honorory or Corresponding member and shall enjoy, free of charge, all the privileges of the Society except holding office." The following is from Rule IV: "All exhibitors who intend to compete for the premiums of the Society must become members of the same * * and no premium will be paid on any article at the park or hall unless properly entered and in the place assigned them for exhibition." The above provisions were ordered by the Directors to be strictly enforced; the exceptions being for persons under eighteen years, and these being allowed to compete. Some articles may have been put in the Pavilion without any attention to the foregoing regulations, and if so such would not be considered by the Judges in awarding premiums, no matter what the merits of the articles might have been.

No crime can be more fitly described as "terrible" than jury bribing. The recent exposures in San Francisco show to what an extent this crime was practiced there; these exposures will at least check the evil for a time. The arrest of Robert F. Morrow as one of the principal criminals made a lively sensation. In all probability the crime will be practiced much as ever a year or two hence. The breaking up of the Tweed ring in New York was followed by the still worse ring of Jake Sharp and his pals. The great bulk of respectable citizens take part in public affairs only by fits and starts. The professional thief, who works politics for a living is active always; and this is the class that manages conventions where men are nominated for office who select jurors, and who even occupy the place where justice ought to be administered.

A large ditching machine made in Chicago was landed at Independence Station last Wednesday. The machine is to be used on the east side canal. The builders of this machine claims for it that it will do a much greater amount of work than any other now in use. This machine is of the elevator class, that lifts the dirt and conveys it upon or beyond the banks of the canal. It will take some days yet to test its merits here. If successful more may be brought to the valley. It is claimed that several of the same kind are in successful operation in other parts of the state and in Colorada and Idaho.

Tax payers, read the notice given on another column by S. G. Gregg, tax-collector.

English City Society After Easter.

After Easter the full tide sets in. Everybody is up. The great houses are all open; the park is full in the afternoon; the Row is crowed every morning with a thousand horsewoman, the finest in the world, and the English women look better in the saddle than anywhere else. Luncheons are frequent; dinners innumerable. Forty people often sit at one sumptuous board, and the overflow sometimes reaches to side tables; clever people, if not of too high rank, contend for these cosy corners, when they can choose their partners. Balls now begin, to the sorrow of unfortunate chaperones, and the delight of the debutantes. The queen's drawing-rooms are crowded. Politics are everywhere discussed. Theatres and operas are abandoned by people of fashion, for you can not dine at 8 o'clock and go to the play the same night; while the opera has, for years, been given up to those who like music and to strangers, and others who fancy it is still the mode because it was so half a century ago.

But the whirling lasts only four or five weeks when Whitsuntide comes; and then another recess, and more than half the world flits again to the country, which by this time is enchanting. I used at first to find these constant interruptions to the round of society very provoking; just as one got in the swim there was a gate or a dike, and a halt; but after some years I like the fashion, too.—Adam Badeau's Letter.

Variations of an Author's Ability.

The often-quoted dictum that a man's first story is his best is false. If a man has talent his first story is novel, in the sense of putting things in a new light, with a language peculiar to himself. A man can't write differently from what he thinks any more than he can change his nose. I know of a novelist whose first story was superb, his second not so good, his third very poor; we took them all; but his fourth was as good as his first, and since then every novel he has written is better and stronger than the last one.

I think it would be wiser to believe that an author never ascends or descends beyond a certain line. His compass variations are very slight. A man's brains are like an iron furnace; that is a well-regulated and managed one. The crude ore comes in in about the same quantity, and the output is so much iron and so much slag. If a mental analysis were possible the proportions would be the same. Certain men have, to follow out the idea, bigger supplies of coal. Their fires are more rarely extinguished, therefore the iron-copper-gold turned out is larger. There is a natural check to all this kind of thing. If the working is too continuous, after a while the furnace tumbles down, or is burned out, and it stops—sometimes forever.—New York Times.

PROPOSALS FOR COUNTY PRINTING.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of the County of Inyo State of California, at the office of the County Clerk until Monday, November 7 1887, at 10 o'clock a. m. for the purpose of letting a contract for county printing for the year beginning January 1, 1888 and ending January 1, 1889, as follows:

1st. Printing and publishing delinquent tax list.

2d. Reports of Auditor and Treasurer.

3d. Notices of contracts to let by Inyo county.

4th Notices of special meetings of Board of Supervisors.

5th. Proceedings of Board of Supervisors.

6th. Notices of meetings of Board of Education.

And other legal notices required to be published by the county officers.

Proposals must be endorsed "Proposals for County Printing," and must be accompanied with a good and sufficient bond in the sum of $500. Said bids will be opened between the hours of 1 and 3 o'clock p m of said 1st Monday of November, and the Board reserves the right to reject any and all bids submitted.

By order of Board of Supervisors of Inyo county, October 4, 1887.

P. H. MACK Clerk.

DESERT LAND FINAL PROOF

D. E. No. 216

UNITED STATES LAND OFFICE, INDEPENDENCE, CAL. October 18, 1887

Notice is hereby given that Josiah G. Dodge of Lone Pine, Inyo county, State of California, has filed notice of intention to make proof on his desert land claim No. 216, for the S E ¼ of S E ¼ of Sec 22 Tp 15 S R 35 E M D M, before the Register and Receiver at Independence, the 3d day of December, 1887.

He names the following witnesses to prove the complete irrigation and reclamation of said land: Edward J. Reynolds, Charles Mates, Manue Silva and Joseph Blaney, all of Lone Pine, Inyo county, Cal.

JOHN W. P. LAIRD. Register.

Notice to Tax-Payers

Notice is hereby given that I have received from the Auditor of the County of Inyo, State of California, the Assessment Roll for the year A D 1887 and that the taxes therein are now due and payable in gold and silver coin of the United States; that the taxes will become delinquent on the last Monday in December, 1887 at 6 o'clock p m, and that unless paid prior thereto five per cent, will be added to amount thereof; that for the purpose of receiving such taxes I will be and and attend at the following named places on the dates named, to wit:

Bishop Creek, November 9 h.

Big Pine, November 10.h.

Darwin, November 14th.

Keeler, November 15th.

Lone Pine, November 16th.

Independence, on and after November 17th.

S. G. GREGG, Tax-Collector.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, STOCKLAND, MO., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm will last than 10 years in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, children, and work money as it does and cost no more, I could sell one at every house, if they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., peddler, ROMULUS, Ills., writes: "You ask what I think of the Washer I bought last summer. Ans. It is the best machine ever invented by man. Q. Do you make good dinners on Monday as on any other day. A. Yes, if I use the Washer. Q. How do you do it? A. I put in the dirty clothes, turn on the water, let the Washer do the washing, while I go to my garden or anything else I may prefer, rinse the clothes when I get ready, and they are as good as any other day. M. If you run them, you can not buy ours for $50?" I will ship a sample to them for trial on agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

J. WORTH, 1719 Franklin Ave., St. Louis, Mo.

Who Spends Money

For advertising in newspapers in these hard times, without first obtaining an estimate of the cost from GEO. P. ROWELL & CO'S Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents [illegible]

ORDINANCE NO. 20.

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows

SEC. 1 Every person engaged in the business of raising, grazing, herding, or pasturing sheep in the County of Inyo, State of California, must annually procure a license therefor from the Tax Collector, and make therefor the following payment:

1. Those owning or having in their possession and under their control 5,000 sheep or more shall constitute the first class and must pay $250 per annum for the first 5,000 sheep and for every additional 1,000 the sum of $50

2. Those owning or having in their possession and under their control 4,000 sheep and less than 5,000 constitute the second class and must pay $200 per annum.

3. Those owning or having in their possession and under their control 3,000 sheep and less than 4,000 constitute the third class and must pay $150 per annum.

4 Those owning or having in their possession and under their control 2,000 sheep and less than 3,000 constitute the fourth class and must pay $100 per annum.

5 Those owning or having in their possession and under their control 1,500 sheep and less than 2,000 constitute the fifth class and must pay $75 per annum.

6. Those owning or having in their possession or under their control 1,000 sheep and less than 1,500 constitute the sixth class and must pay $50 per annum.

7. Those owning or having in their possession or under their control less than 1,000 sheep constitute the seventh class and must pay $25 per annum

8. Those owning or having in their possession or under their control less than 500 sheep constitute the eighth class and must pay $15 per annum.

SEC 2 Every person who shall engage in the business of raising, grazing, herding or pasturing sheep, or who commences or carries on in the County of Inyo, State of California, any business, trade, profession, or calling, for the transaction of which a license is required by any Ordinance of the Board of Supervisors of said county, without taking out or procuring the license prescribed by such Ordinance is guilty of a misdemeanor and shall be punished by a fine not exceeding $250, and unless said fine be paid shall be imprisoned in the county jail of said county until such fine be satisfied, such imprisonment not to exceed one day for each dollar of the fine.

SEC. 3 The Tax Collector shall have the collection of the license provided for in this Ordinance, and it is hereby made his duty to collect the same, and he may enforce the collection as provided by Section 3 3 50 of the Political Code of the State of California.

SEC. 4. The County Auditor shall prepare and have printed suitable bank licenses for the Tax-Collector to carry out the provisions of this Ordinance with blank receipts for the Tax Collector when sold

SEC. 5. The Tax Collector shall collect a fee of one dollar for each license sold, which shall be paid into the Salary Fund of the county.

SEC. 6. All money collected for licenses under the provisions of this Ordinance shall be paid over to the County Treasurer as other moneys and placed to the credit of the Salary Fund of the county.

SEC. 7. This Ordinance shall take effect and be in force on and after 20 days from its passage and all Ordinances, or parts of Ordinances in conflict herewith are hereby repealed.

SEC. 8. This Ordinance shall be published in the Inyo INDEPENDENT, a newspaper published in said Inyo County, at least four weeks, and publication to be made for a period of twenty days after the adoption thereof, and said Ordinance to take effect in twenty days from its adoption.

The above Ordinance was passed by the Board of Supervisors of Inyo County, State of California, at a regular meeting of said Board, October 4 1887, by the following vote:

Ayes—Harger, Eldred and Robinson.

Noes—None. J. D. HARGER,

Chairman of the Board of Supervisors of Inyo County.

Attest: P. H. MACK, Clerk.

P. H. MACK,

COUNTY CLERK,

Working Classes ATTENTION!

We are now prepared to furnish all classes with employment at home, the whole of the time, or for their spare moments. Business new, light and profitable. Persons of either sex easily earn from 50 cents to $5 00 per evening and a proportional sum by devoting all their time to the business. Boys and girls earn nearly as much as men. That all who see this may send their address, and test the business, we make this offer: To such as are not well satisfied we will send one dollar to pay for the trouble of writing. Full particulars and outfit free. Address GEORGE STINSON & Co., Portland, Maine

THE BASSETT.

MY FRIEND AND MY BOOKS.

I bid my friend, the more that friend I love,
Into my reading room and by my side,
Glad, if some happy hours he may abide,
Nor he nor I take heed how swift they move:
This is, I wot, true friendship's charm to prove,
When two kinned hearts, in mutual faith allied
Mingle their thoughts and words in one warm tide,
That flows all doubts and jealousies above!

In fellowship so dear, one fault I own—
Discourtesy to friends, my guest before:
And till he came, enough for my delight;
Left now, alas! in disrespectful plight,
And mute, nor with reproachful look or tone,
Prone on their face and tossed upon the floor!

—William C. Richards in The Cosmopolitan.

PLUMAGE FOR LADIES' HATS.

Insectivorous Birds Not Used for That Purpose—Supply from Foreign Lands.

From time to time a great ado is made by the friends of the feathered kingdom because women will insist on decorating their hats and bonnets with the plumes and heads of unfortunate birds. Such decoration has long been pronounced ridiculous and in bad taste, but the words of the critics had no effect until they showed the farmers the danger which menaced them in the destruction of insectivorous birds. This agitation resulted in the passage of a law forbidding the killing of this class of birds, and in some states the penalty was made so severe that a woman would be liable to arrest if caught on the street wearing one of the protected birds. Even now, however, it is frequently asserted that the law is not enforced as it should be, and spasmodic efforts are made to stop the traffic in this line of goods. Investigation shows that the law is not violated so much as is commonly supposed.

Before a bird appears as the decoration for a bonnet, it passes through a good many hands. Soon after the hunter bags it, it is turned over to the commission or "raw stock" man, as he is termed, and then goes to some big manufacturing house, where it is made up for the trade. Then the jobber takes charge of it, and after perhaps one or two more transfers the real milliner gets it, and places it upon a bit of feminine headgear to charm the eyes of the masculine world.

There are in this city several commission or raw stock houses, which buy from hunters all over the country. One of these houses is located on Cortlandt street. A reporter went through the entire establishment without discovering an insectivorous bird. The staple birds in the trade are the tern and heron, although a good many gulls are used. The feathers of these birds are all of quiet colors, but that does not make the slightest difference, as the manufacturers turn out any color desired. All they want is that the feathers shall be strong and well shaped, and then they can turn out a more gaudily colored bird than nature ever produced in her most eccentric mood. In the great manufacturing establishments not a single feather is wasted, even the small feathers on the body being used in paste work. Such patchwork is naturally not noteworthy for strict adherence to nature, but it sells just as well nevertheless.

The commission man whose place was visited told the reporter that probably not one-tenth of the birds used by milliners in this country now are insectiverous, and most of the few that are used come from Africa or South America, where the supply is inexhaustible. The tern and heron, which are chiefly used, are fish eaters, and their loss will never be felt. The prices of these birds vary greatly from time to time. At present a tern skin, preserved by arsenic, just as it comes from the hunters, is worth from forty to fifty cents in the city. The aigret, or plume, of the snowy heron, is worth $18 or $20 an ounce, but only last February it brought $62 an ounce. It takes a dozen or more birds to supply an ounce of these plumes, but, of course, the common feathers are also used.—New York Commercial Advertiser.

Flowers in the Hat.

It is the custom in the Tyrol for a man, when he is engaged to be married, to wear a bouquet in his hat. The damsel gives him, every day or two, a fresh bouquet, picked from the flower pots in her window. Should she prove fickle, and jilt the swain, the other young men of the village assemble under her window and throw down the flower pots.

A stranger wonders, on seeing so many men with bouquets stuck in their hats, why they do not marry, especially as not a few of them are what we call "old bachelors." The explanation is that the village commune will not allow any person to marry, unless he can show that he has laid by a sum of money sufficient to support a family.

Sometimes a dozen or more of engaged young men and women, despairing of ever getting money enough to secure the commune's permission, go on a pilgrimage to Rome, begging their way on foot. When there they are married, but on their return to the native village they are fined as a punishment for breaking the law.—Youth's Companion.

A German National Dish.

Some German national dishes claim a long and honorable descent—for example, the famous Klosse or Knodeln. With us, instead of having refined these, we have had them handed down in the form of provincial dumplings, unwelcome and indigestible, these heavy masses having no connection with the good old Saxon light and delicate Klosse. Their chief ingredients were always eggs, bread coarsely ground, meat and fish. In later periods potatoes, rice and other vegetables have furnished varieties. The bread used for them must be light, without crust, either grated, crumbled or soaked in cold water or milk; they must be lightly handled, the fingers dipped in water while forming them into balls the size of an egg. Lay them apart, put them into gently boiling soup, water or milk, wet the spoon as each one is dropped, in chives, onions, parsley or spice. All Klosse must be served hot.—The Argonaut.

Protection Against Yellow Fever.

The problem of protection against yellow fever by inoculation seems in a fair way to solution by the Brazilian doctor, Freire, who has been seven years at work on the subject. According to a recent account, the number of persons already inoculated is 6,524. There have died from yellow fever in Rio de Janeiro, between Jan., 1885, and Sept., 1886, 1,675 persons, of whom eight had been inoculated (in 1884, the method being then imperfect). This gives a mortality of about 1 per 1,000 for the inoculated, and 1 per cent. for the uninoculated. It is remarkable that there has been no epidemic of yellow fever in Rio de Janeiro this year (a thing not known for the last thirty-five years). The microbe of yellow fever is called "Cryptococcus xanthogenicus." Dr. Freire gets a culture liquid for inoculation, on the principles of M. Pasteur's methods, and he injects about one gram of it subcutaneously.—Frank Leslie's.

PRESCRIPTION CLERKS' WORK.

Careful Druggists and Others Who Save Doctors from Blunders.

A prescription clerk with years of experience talked the other day about fatal errors made by those who compound drugs.

"Yes," said he, "a druggist who makes a blunder that costs a life may as well go out of business or move away to escape his reputation. But, let me tell you, such blunders are few in proportion to the opportunities for making them. Take my own experience, for instance. I made one year an average of the number of prescriptions I put up daily during that time. I found I had averaged forty odd per day—call it forty. Now that foots up about 14,000 for the year. A thoroughly competent prescription clerk is able to average five prescriptions each hour. Of course some prescriptions require a long time to fill, but others are put up very quickly, so that, if a man has them to do, he can average, as I say, five per hour.

"Well, now, there are over 500 stores in New York city employing two prescription clerks each. That makes 1,000 clerks, and if each averages, say forty prescriptions per day or 14,000 in a year, the total will be 1,000 times that, or about 14,000,000 prescriptions put up in this city every year. The total is more than that at the daily average I named, but let it stand for round numbers. Yes, the amount is large, but then multiply that by 20,000 to cover New York state, and I dare swear that with so many chances to kill somebody, there are fewer fatal blunders by druggists than are made by the same number of men in any other vocation.

"But a prescription clerk must not only guard himself against blunders liable to be made by himself, as he is frequently called upon to save physicians from fatal or disagreeable errors. How? Why, a clerk on reading a prescription may find that ingredients are disproportioned so that if the written order was obeyed somebody would soon be a subject for burial. For instance, a clerk may get a prescription for pills with poisonous ingredients. The physician has written the proper relative quantities of the drugs, but has in haste or heedlessness neglected to order how many pills to make of the compounded mass. He has neglected to write in his prescription whether the compound is to be made into one mighty pill or into fifty little ones. One of the latter might effect a cure, whereas the entire mass, if dropped down an unsuspecting throat, would be about the last the patient would ever swallow.

"What do we do in such a case? That depends upon who the physician is and what the customer may be. If the doctor be one whom we know we may right the error, if we are certain as to what should be done. That is, we may put up prescriptions daily for a physician, and so become acquainted with his methods and treatments. But, if we do not know the doctor, and if the customer is an educated person, we say to the customer: 'Doctor So-and-so has doubtless intended differently than he has written here, and we think you had best go back to him and say that your druggist desires him to see the prescription again before it is put up.' An educated person will at once understand that a physician, under stress of professional anxieties, may have made some little slip, and the doctor does not suffer. But if the customer be an ignorant person the action to be taken differs. We desire not to injure the physician, but if we were to say to an ignorant and uneducated customer that his doctor had made such blunder in his prescription that we could not put it up, why the customer would never forgive the medical man, but would out upon him as a quack. Yes, I'll tell you how we do. I'd say to that uneducated customer: 'Now, sir, one of the ingredients in this prescription is very difficult to get, and it will require some time—come back in three hours, and it will be ready for you.' Then we send the prescription at once to the doctor, who sees the error, corrects it, and puts us in shape to go ahead. But do you suppose the doctor likes it? Why, I have saved doctors from serious consequences before now, and had them fly into a passion at what they called impertinent meddling, and advise their patients to shun us as incompetents. But I have observed that the suggested change is made or the omission is supplied before the medicine is prepared. Other physicians, however, appreciate the service rendered them."

Then the experienced prescription clerk was asked if the pasting of one label over another was approved by the pharmaceutical code of ethics, whereupon the E. P. C. grew warm.

"A druggist who does that," said he, "is absolutely lazy. The recognized right way is always to soak off old labels—remove them entirely and neatly. I have in times of great haste scatched off a label with my knife. That was slovenly, but it was at least right and safe. No, all druggists do not do it, but they should. I know they do not, because I have myself soaked six labels from a bottle brought in for a prescription."—New York Sun.

Tunneling the Rocky Mountains.

One of the most prodigious engineering projects now on the tapis is that for tunneling the Rocky mountains under Tray's peak, which rises no less than 14,441 feet above the level of the sea. It is stated that at 4,441 feet below the peak, by tunneling from east to west for 25,000 feet direct, communication could be opened between the valleys on the Atlantic slope and those on the Pacific side. This would shorten the distance between Denver in Colorado and Salt Lake City in Utah, and consequently the distance between the Missouri river, say at St. Louis, and San Francisco nearly 300 miles, and there would be little more required in the way of ascending or descending or tunneling mountains. Part of the work has already been accomplished. The country from the Missouri to the foot of the Rockies rises gradually in rolling prairie until an elevation is reached of 5,200 feet above the sea level. The Rockies themselves rise at various places to a height exceeding 11,000 feet. Of the twenty most famous passes only seven are below 10,000 feet, while five are upward of 12,000, and one is 13,000 feet. The point from which it is proposed to tunnel is sixty miles due west from Denver, and, although one of the highest peaks, it is by far the narrowest in the great backbone of the American continent.—New York Sun.

The Mystery of Ozone.

The curious substance known as ozone, the nature of which was so long a mystery, and about which so many conflicting hypotheses have been devised, is now becoming well known to us. Ozone is a denser form of oxygen. Its specific gravity is 24, that of common oxygen being 16, and that of hydrogen 1. It is highly probable that its molecules contain three similar oxygen atoms. In the concentrated state it is a powerful irritant poison, and it is very unstable, decomposing with explosion and with evolution of heat, and exerting a most powerful action on oxidizable materials.—London Lancet.

AN ANSWER DEMANDED.

Is There a Hidden Cause for Most Suffering? A Careful Investigation.

The inhabitants of Boston and New England have been considerably awakened the past week over some important facts which have come out in articles in the papers as to the real cause of most modern diseases. Every one has known that there has been some mysterious cause for unexplained suffering that even the doctors could not account for. A hidden disease has been shown to be the real cause of most so called pneumonia, convulsions, apoplexy, etc. If this is true, it is of greatest importance that we understand it thoroughly. With this end in view, a representative of this paper has collected facts from various sources which are given herewith.

REPORTER AND DOCTOR.

Dr. J. H. Cutler, who resides at 20 Popular street, said: "I have, in common with all physicians, observed the alarming increase of kidney diseases leading to that fearful scourge, Bright's disease, and have been constantly seeking for the proper means of meeting it. I have been prescribing Hunt's Remedy for a great many of my patients with great success. I also administered it to my mother, and with much benefit."

Mr. Samuel Littlefield, 1482 Washington street, said: "I was troubled with kidney disease for years, which finally turned to gravel. I would be free from suffering for a long while, and then have the most terrible pains in my back. I also had inflammation of the worst kind in my bladder, and I was altogether in a fearful condition. I went to several physicians, but all to no purpose, and I found I was growing very feeble. A friend in Malden urged me to use Hunt's Remedy. He had been cured of gravel and liver complaint by its use, and believed it would help me. Well, its effect was wonderful, and I cannot too highly thank my friend for the timely recommendation he made. I wish I could make every one know and understand what a valuable medicine it is."

Mrs. Wm. Gray, 1416 Tremont street, said: "I was troubled with kidney disease for a number of years, at times being so bad from swollen limbs and pains in the back that I was completely under the doctor's care. I received only temporary benefit until I began using Hunt's Remedy, which cured me entirely, and I cannot say too much in its favor."

Captain Joseph L. Hayden, connected with the Walworth Manufacturing Company, residing at 924 East Fourth street, South Boston, spoke in the highest terms of Hunt's Remedy. "Many of my friends in Enfield, Mass., have used it with unusual results, and would not be without it, I employed it in my family when other remedies had proved wholly useless, and it was remarkable in its results. It completely cured my wife of pain in the back."

WELL WITHOUT; DYING WITHIN.

Mr. H. Burney, baggagemaster of the Eastern Railroad, declared that he had used Hunt's Remedy in his family for a long time, and would not be without it. He had not only found it good for kidney complaints (a trouble with which all railroad men are more or less afflicted) but his wife had used it successfully in a severe case of what was, apparently, dyspepsia.

The uniform testimony which was given to the worth of this Remedy in Boston was born out by equally strong statements from residents in the suburbs.

Mr. Joseph G. Bicknell of Cambridgeport asserted that he had been a great sufferer. The fluids he passed were thick with brick dust sediment, and were voided with the greatest pain. Within four days from the time he began using Hunt's Remedy he passed a gravel stone larger than a pea, followed by other smaller ones. A speedy cure was the result, and he cannot recommend the remedy too highly.

Mr. George P. Cox, proprietor of the last factory at Malden, had seen such wonderful effects of Hunt's Remedy among so many of his relatives and friends that he was enthusiastic in its favor. He had not only used it himself with the greatest benefit, but two cousins, William W. and John F. Cox, had experienced untold relief. He would not be without it if it cost $5 a bottle.

Such statements lead us to the inevitable conclusion that, while Bright's disease of the kidneys is the concealed and actual cause of many complaints which bear other names, it can be both met and cured. Let all readers look to their condition at once, and thoroughly convince themselves whether they are or are not in perfect health, and then use that means which has been proven, and is known to be both pure, efficient, and good.

A Real Estate Revival.

Eastern Youth—No, you'll never get me away from the east. I'm going to settle down alongside the old folks.

Omaha Real Estate Man (on a trip)—Well, I should feel that way too if I were in your place. By the way, I wish you'd ask your mother for some good waffle recipes. A young lady who belongs to the Housekeeping society wants them.

"The Housekeeping society!"

"Yes, all the pretty girls in Omaha are organizing a society of that kind. The object is to learn housekeeping thoroughly, and all have to promise that when married they will do their own house work. By the way, I can sell you a lot very cheap now."

"Give me a big one, with a house on it."—Omaha World.

An Unreasonable Mule.

Sam Johnsing, an Austin colored man, has a mule that balks. After Sam had belabored the mule for an hour the animal trotted off all right.

"Dar," said Sam confidentially to the mule, "dar, yer see. Ef yer would only do what's right we mout lib togedder jes' like two brudders."—Texas Siftings.

A Clever Customer.

Facetious Barber (to customer)—Your hair, sir, reminds me of the great George Washington.

Customer—Why so?

Facetious Barber—Because it can't lie.

Customer—Ah! upright hair, I presume. Very good.—New York Mercury.

Profound and Important.

You can be sure that the man who is put down as a religious fanatic was a fanatic before he got to be religious.—Louisville Democrat.

—A tragic incident recently took place in a prison-yard near Prague. A young soldier on guard, whose father and mother were sentenced, the former to twenty years' imprisonment and the latter to imprisonment for life, when he was but eight years old, recognized his father in one of the prisoners. He embraced the old man, but was repulsed by him, and in the evening from shame and grief shot himself dead with his rifle.

HAPPINESS OF FLIGHT.

The Pure Enjoyment Which Birds Take in Their Aerial Excursions.

May we not infer that all animals whose muscular development is greater in proportion to their bulk than that of man should derive from its exercise a greater intensity of pleasure, greater absolutely in proportion to the attainments and less interfered with by the greater muscular ease with which they are accomplished. If this is so the majority of the mammalia and almost all birds should in their powers of speedy movements on earth or lofty flight in the air possess resources of mental pleasure intense beyond ours and less subject to be dimmed by the pain of overstrained muscles. The power of flight is without doubt associated with pleasures which we can not directly gauge or estimate, but of the value of which our desires can give us some idea. That birds distinctly enjoy the exercise of their powers there can be no manner of doubt. Having once acquired the power of flight or inherited it from their sauropsidan ancestor, they have developed it far beyond all the requirements of their individual or specific life. If it were not pleasurable, then flight would be discontinued when it was no longer necessary. But, as a fact, bird life presents innumerable instances of the maintenance of the powers of flight in species to whose existence it is by no means essential. The skylark does not soar from mercenary motives; pigeons, domesticated for generations, fly about all day long, though they need to seek neither food nor shelter. It is not necessary to watch birds on the wing for very long to convince one's self that the act of flight is one of pure enjoyment, that it is cultivated and adorned with the refinements which characterize an "accomplishment." Such is the evolution of the tumbler pigeon, such the more refined and masterly hovering of some birds who possess the power of so balancing themselves on a slanting breeze as to remain motionless with respect to the earth, without apparently moving a wing or a feather, floating all the time, still and calm.—*Nineteenth Century.*

—A stout, red-nosed man offered to wager a ten dollar bill that he could close his eyes, and, simply by taste, name any kind of liquor in the house. The bet was taken. "This is genuine port," said the fat man, tasting from a wine glass; "and this is whisky," and so on. A wag then poured a few drops of water into a glass, and handed it to the taster. "This is—ah—ah—this is (tasting it several times)—by Jupiter! gentlemen, I lose the bet. I never tasted this liquor before."—*N. Y. Ledger.*

□—The volcanoes Popocatepetl and Ixtaccihutl, says a Mexican exchange, present a grand spectacle on clear mornings. They are covered with ice and snow from their tops to within a few hundred feet of their bases. This is a regular phenomenon of the summer months.

—Colonel William T. Shaw, a well-known Iowa volunteer officer of the war, is writing a history of the battle of Shiloh, which will be published in book form.

—"Johnny," says a fond mother to her boy," which would you rather do, speak French or Spanish?" "I would rather," said Johnny, rubbing his waistband and looking expressively at the table, "I would rather talk turkey."

TEXAS TO THE FRONT AGAIN.

Two Houston Men Invest $1 Each and Make $30,000.

The story of how The Louisiana State Lottery Company deals out fortunes every month is known far and near. Chances in the drawings are eagerly taken by all classes. How many persons have been suddenly made rich by this institution would be hard to tell—the number would almost seem incredible. It can be safely said, however, that residents of every State in the Union have profited by it. One of the many made happy by the last drawing was W. H. Anthony, a dairyman of Houston, Tex., who held one-tenth of No. 50,255, which drew the capital prize of $150,000, collected by Wells, Fargo & Co's Express through the firm of T. W. House of Houston.

The other tenth of this ticket was held by Mr. George H. Zapp of the same place. This gentleman, accompanied by his son, arrived in the city Wednesday night, and on presenting his ticket at the company's office the following morning was handed a check on the New Orleans National Bank. He was greatly in need of the money, and on the receipt of the news of his good luck he fairly wept with joy. Mr. Zapp is a native of Germany, but for the past eight years has made his home in Houston where he has been clerking in a cotton press. He is a large, fine looking man, 55 years of age, and has a wife and three children. He has not decided what use he will make of his newly found fortune, but will look out for some profitable way of investing it. Mr. Zapp has visited New Orleans before and will remain here several days to renew old acquaintances.

Apropos of Mr. Zapp's visit to this city it might be mentioned that his nephew, Mr. Orsini Zapp, of Round Top, Texas, came here on a similar errand in May, 1885. He was also the winner of $15,000. The money he put out in land and stock in Fayette county, Texas. To-day he is one of the most prominent farmers in that section of the country, and is blessed with a happy family and has all the comforts of life. An investment of $1 in The Louisiana State Lottery started him on the road to prosperity.—*New Orleans Picayune*, Aug. 13.

Uncle John—Why, my girl, you've grown like a cucumber vine! What progress are you making toward matrimony? Clara—Well, uncle, I'm on my fifth lap.

"Be wise to-day;" 'tis madness to defer." Don't neglect your cough. If you do your fate may be that of the countless thousands who have done likewise, and who to-day fill consumptives' graves. Night-sweats, spitting of blood, weak lungs, and consumption itself if taken in time can be cured by the use of Dr. Pierce's "Golden Medical Discovery." This wonderful preparation has no equal as a remedy for lung and Throat diseases. All druggists.

Polite New York Shoe Clerk—I am sorry, madam, but we haven't your size in lady's shoes in the store. If you wait a day or two we'll send to Chicago and get them for you.

USEFUL AND HURTFUL MEDICINES.

There is a certain class of remedies for constipation absolutely useless. These are boluses and potions made in great part of podophyllin, aloes, rhubarb, gamboge, and other worthless ingredients. The damage they do to the stomachs of those who use them is incalculable. They evacuate the bowels, it is true, but always do so violently and profusely, and besides, gripe the bowels. Their effect is to weaken both them and the stomach. Better far to use the agreeable and salutary aperient, Hostetter's Stomach Bitters, the laxative effect of which is never preceded by pain, or accompanied by a convulsive, violent action of the bowels. On the contrary, it invigorates those organs, the stomach and the entire system. As a means of curing and preventing malarial fevers, no medicine can compare with it, and it remedies nervous debility, rheumatism, kidney and bladder inactivity, and other inorganic ailments.

Gushing females may begin arranging their choicest bouquets. A heathenish and murderous Chinaman is in jail for shooting a Chicago policeman.

FRIGHTFUL WASTE.

Consumption carries off its thousands of victims every year. Yes, thousands of human lives are being wasted that might be saved, for the fact is now established that consumption, in its early stages, is curable. Dr. Pierce's "Golden Medical Discovery" will, if used in time, effect a permanent cure. It has no equal as a remedy for bronchitis, coughs and colds. Its efficacy has been proved in thousands of cases. All druggists.

It may be necessary to cauttion Jay Gould's folks against feeding that baby with watered milk.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

Coughs, Colds, and Sore Throat quickly relieved by "*Brown's Bronchial Troches.*" 25 cts. a box.

BABY'S SKIN & SCALP CLEANSED PURIFIED AND BEAUTIFIED BY CUTICURA.

WHAT WE WANT
WHAT WE WANT
WHAT WE WANT

is trade—customers, and plenty of them; the kind that are ready and willing to pay cash for supplies, want good value for their money, and when they get it appreciate the trade and stay with us year after year. We can always suit better when we learn to understand each other. To secure this we must deal fair and square with everybody, and this we try to do. We must change with the markets, but always try to go down as well as up. Flour in last list $6.25, now $5.25 for the very best grades, and not likely to be lower. Ask for Last Price List free. Smith's Cash Store, 115 and 117 Clay street, San Francisco, Cal.

DUJARDIN'S LIFE ESSENCE

is a combination of Phosphorus, Albumen, Protogon, Lime, Soda and Iron, which act on the Brain, Nerves and Stomach, increasing the appetite, assisting Digestion, Curing Dyspepsia, in every form, Headache, Neuralgia, Insomnia, General Debility, Want of Vitality, Nervous Prostration and Impotence. In Hysteria and Epilepsy its effect are magical. In Consumption its nutritive qualities are beyond comparison with other preparations. Its action is shown by the increasing strength and weight of the patient, and the loss of cough and night sweats. It is a brain, nerve, and life giving tonic. Price, $1.50 per bottle.

☞ FOR SALE BY ALL DRUGGISTS.

A TWENTY YEARS' EXPERIENCE.

770 BROADWAY, N. Y., March 17, 1886.

I have been using ALLCOCK'S POROUS PLASTERS for 20 years, and found them one of the best of family medicines. Briefly summing up my experience, I say that when placed on the small of the back ALLCOCK'S PLASTERS fill the body with nervous energy, and thus cure fatigue, brain exhaustion, debility and kidney difficulties. For women and children I have found them invaluable. They never irritate the skin or cause the slightest pain, but cure sore throat, croupy coughs, colds, pains in side, back or chest, indigestion and bowel complaints.

C. D. FREDRICKS.

Now is the time when the managers of fall fairs fall foul of each other.

The huge, drastic, griping, sickening pills are fast being superseded by Dr. Pierce's Purgative Pellets."

If anybody is seeking more lovely weather than this he will not find it this side of California.

GOLDEN MEDICAL DISCOVERY
CURES ALL HUMORS,
from a common Blotch, or Eruption, to the worst Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin, in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. Great Eating Ulcers rapidly heal under its benign influence. Especially has it manifested its potency in curing Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Disease, White Swellings, Goitre, or "Thick Neck," and Enlarged Glands. Send ten cents in stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections.
"THE BLOOD IS THE LIFE." Thoroughly cleanse it by using Dr. Pierce's Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, and vital strength, will be established.
CONSUMPTION,
which is Scrofula of the Lungs, is arrested and cured by this remedy, if taken before the last stages of the disease are reached. From its marvelous power over this terribly fatal disease, when first offering this now celebrated remedy to the public, Dr. PIERCE thought seriously of calling it his "Consumption Cure," but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption, but for all Chronic Diseases of the
Liver, Blood, and Lungs.
If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flushes, low spirits and gloomy forebodings, irregular appetite, and coated tongue, you are suffering from Indigestion, Dyspepsia, and Torpid Liver, or "Biliousness." In many cases only part of these symptoms are experienced. As a remedy for all such cases, Dr. Pierce's Golden Medical Discovery is unsurpassed.
For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy.
SOLD BY DRUGGISTS, at $1.00, or SIX BOTTLES for $5.00.
Send ten cents in stamps for Dr. Pierce's book on Consumption. Address,
World's Dispensary Medical Association, 663 Main Street, BUFFALO, N. Y.

$500 REWARD
is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure. If you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption.
Dr. Sage's CATARRH REMEDY cures the worst cases of Catarrh, "Cold in the Head," and Catarrhal Headache. 50 cents.

De dog mighty often runs so fas' dat he falls ober de rubbit and den lets him git er way.——It's er putty hard matter fur er man dat's got on er po' suit o' cloze ter be in er good humor wid de worl'. De strawberry is nearly allus sour when de seed bergins to show.—*Arkansaw Traveler.*

MUTILATED MONEY.

The System of Redemption Adopted by the U. S. Treasury Department.

I am often asked whether this or that piece of mutilated money is redeemable. It is safe to say, unless the money's identity is entirely gone, that it is redeemable. In fact, one may say that money in the shape of ashes can be restored. It is a fact that after the Chicago fire ashes were redeemed. It came about in this way: It is customary in banks to do money up in packages, say of $10,000 each, and in the big fire of course hundreds and hundreds of these packages were reduced to ashes. But the shape of the package remained, and wherever the package could be sent on to Washington without crumbling the ashes, the money was sure to be replaced. It was done by nimble-fingered women in the Treasury Department, whose trained touch and sight are wonderfully acute. It is well known that the ashes of a newspaper, if dampened, will show traces of the printing. So was it with the bills. These women would moisten the package of apparently useless ashes, and to their experienced eye the number and character of the bill would at once appear as if they had touched it with a magic wand. So thousands and thousands of dollars were redeemed by these patient women. A friend of mine, a country merchant, afraid of banks, placed a large sum of money in bills in a stone jar on a shelf in his store, where he thought it would be quite safe. When he went to look at it one day some time after, it was a mass of fragments. Mice had got into the jar and chewed the bills into the minutest parts. Then they had mixed them all up, and altogether it was a fearful looking mess. He sent a cigar-box full of it to me. I forwarded it to Washington, and what do you think? Out of the $1,145 originally in the pile, a little over $1,000 was redeemed, the parts beyond recall being only the mere fibers of the bills. So the man lost only $100 by his foolishness. The reclamation of such money is done entirely by women, whose patience especially fits them for the monotonous work.—*Bank President Law, in St. Louis Globe-Democrat.*

RELIGIOUS AND EDUCATIONAL.

—There are 672 colored preachers in the city of Raleigh, N. C.

—The test of your Christian character should be that you are a joy-bearing angel to the world.—*Beecher.*

—We never graduate in religion, because the nearer we are to God the more we see there is to be learned.

—Wesleyan University receives $25,000 from the estate of Oliver Hoyt, and Cornell College, Iowa, receives $10,000.

—The Rev. Dr. A. C. Hirsch, of Cincinnati, has accepted the Presidency of the University of the Pacific at an annual salary of $3,000.

—More than one-half of the Congregational ministers in the United States engaged in pastoral work are home missionairies—1,571 in all. The proportion is increasing.

—There are few signs in a soul's state more alarming than that of religious indifference; that is, the spirit of thinking all religions equally true, the real meaning of which is, that all religions are equally false.—*F. W. Robertson.*

—The Episcopal Church in Virginia claims to have 6,000 colored communicants, who have 30 places of worship exclusively their own. In West Virginia, ten years ago, the Episcopal churches had 1,300 communicants, now the number is 2,719.—*United Presbyterian.*

—If a member is bent on running your church, let him run, only keep him in the right track. If he takes a notion not to do that, then cut the traces. But so long as he is headed in the right direction, don't be too particular about his gait or paces.—*Interior.*

—There is a law in Washington Territory compelling the teachers of public schools to teach physiology and hygiene, and if they do not teach the same they can not draw school money; also, if the pupils will not study those studies they can be expelled from the school.

—A teacher of one of the Boston primary schools was instructing a class in the first rudiments of geography, and, speaking of the poles, she said: "I wonder if any of you can tell me the names of the poles?" "Yes, ma'am; I can," said a bright little fellow, the son of a well-known electrician. "Well, Johnny, what are they?" "Pos'tive and neg'tive!" came the authoritative response.—*Golden Days.*

—A typographical error appeared in the Portland *Sunday Times*, a few years ago, which resulted more happily than is usual in such cases. In announcing a church supper and concert, the word concert was perverted to dance. A young man who read the item and was attracted by the dance, strolled into the vestry. He became so much interested that he afterward attended church services there, professed religion, and is now a highly esteemed clergyman.

WIT AND WISDOM.

—Happiness is not perfected until it is shared.—*Jane Porter.*

—Successful treachery is worse than honest defeat.—*American Merchant Traveler.*

—The man without enemies may not be much of a man, but he has a soft time of it.

—Politeness is money, which enriches not him who receives it, but him who dispenses it.

—The wise head that makes a sight draft on a sensible heart, will have his paper honored with full payment of common sense.—*Whitehall Times.*

—The strongest men are the most tender-hearted. The coolest and sweetest waters flow from under the greatest rocks.—*W. W. Battershall.*

—This is the time of year when the snowshovel, bedecked with cobwebs, sits in the cellar window and leers at the lawn-mower as it rattles painfully over the places where the grass has been kept off.

—A crank in Savannah, Mo., shot at the woman who refused him, but the ball was stopped by her bustle, made of old newspapers, and she was uninjured. Now is the time to subscribe.—*Marden Gazette.*

—She Could Climb a Tree.—

There was a young lady in Worcester,
Who was chased by a big Shanghai rorcester:
So frightened was she
That see "shinned" up a tree!
No one being present to borcester.

—*Boston Globe.*

—Sunday-school scholar to teacher: —Did you say the hairs of my head are numbered? Teacher—Yes, my dear. Sunday-school scholar—Well, then (pulling out a hair and presenting it), what's the number of this one?—*Our Country Home.*

—"My dear," said the elegant Mr. Smoothemdown to his wife, "why this unprecedented delay in the preparation of the matutinal refreshment?" "You old fool you, if you mean why breakfast ain't ready, it's because you was too lazy to git up and split the wood."—*Detroit Free Press.*

—As long as we are young, suffering and sorrow is a hurricane which robs us of our health. As we grow old, however, it partakes more and more of the nature of a zephyr, which merely adds one more furrow in our wrinkled faces and one more white curl to our hair.—*Indianapolis Journal.*

—"Do you not often wonder, George," she said, softly, as they stood at the gate, "at the infinite number of stars, where that vast, silent, eternal procession is going and whence it came?" "Ye-es," replied George, rather hesitatingly, "but don't you find that to look at the sky for any length of time makes the back of your neck ache?"—*N. Y. Sun.*

CHARMING NIAGARA.

A Few Words About the Neighborhood of the Famous Falls.

While hundreds of tourists visit the Falls of Niagara every season, not one in a thousand actually sees the river. But with the "freeing of Niagara," celebrated by New York State and Canada, July 15, 1885, the river experienced a new birth. Hereafter, in the true spirit of this international bond, the traveler, having enjoyed restored nature at the points comprised within the limits of the International Park Survey, may explore Niagara river to where, actually freed from its high, precipitous mural boundaries, it pours the waters of our upper inland seas into the broad Ontario. Here culminates the historic interest of the Niagara frontier, as at the Whirlpool modern rock-readings tell us to seek a clew to its geolggical past. For of few other rivers may it be said that they have a threefold charm, appealing alike to artist, historian and man of science.

True lovers of Niagara hope that the day is not far distant when the International Park will consist of not merely a mile strip on the American bank, but a grand double boulevard, running from Buffalo to Youngstown, and on the Canadian cliffs from the Horseshoe Falls to Queenston. As a site for country villas, Lewiston Ridge, with the unnumbered beautiful drives in its neighborhood and its picturesque historical associations, must, as the cities of Western New York grow in wealth and population, become not less famous than the cliffs of Newport.

Below the cataract, the Niagara, although comparatively few tourists discover this fact, has a beauty and grandeur no less imposing than the falls themselves. Not content with its mighty plunge of 165 feet, the river goes surging and tossing downward another 104 feet in its rocky bed over the obliterated falls of a preglacial stream, the remains of a third cataract being still perceptible in the Whirlpool Rapids. At the Whirlpool the river untwists itself like some mighty serpent from its sinuous contortions in this concave prison, to pour itself an emerald-green wave into a channel at right angles with its former course, and henceforth trends northeast with many a gentle curve.

Not until we reach Lewiston Ridge do we turn our backs on the Niagara's stupendous exhibition of power. From this heighth, described by Father Charlevois as "a frightful mountain which hides itself in clouds on which the Titans might attempt to scale the heavens," is a view worthy the expansive canvas of a Bierstadt. The table-land terminates abruptly in an escarpment. Beneath stretch boundless meadowlands as rich as any in agricultural England. They slope gently to the river, which, coming headlong down the gorge, with the leap and roar of the Whirlpool upon it, gradually subsides into a tranquil stream as the bold outlines of the banks above Lewiston fall away into broad, smiling plains. Across the gorge is the Bunker Hill of Canada, crowned by its lofty shaft. Few monuments in the world have so imposing an effect in the landscape as the lonely form of Brock towering in the blue clouds far above the heights of Queenston.

Nestling under the shadow of her mountain is Lewiston, so named in 1805 for Governor Morgan Lewis, of New York. At the extreme north, beyond the village of Youngstown, and commanding the angle at the headland of river and lake, we descry the whole ramparts of Fort Niagara, whence the gallant Pouchot, begirt with enemies, looked out in 1758, vainly attempting to discover moving among the trees the battalions of his allies from the Detroit river. Exactly opposite Fort Niagara lies "fair Newark, once gay, rich and beautiful," presenting to the water's edge her ancient front of crumbling fortresses and gray church towers.—*Jane Meade Welch, in Harper's Magazine.*

ANIMAL DEVELOPMENT.

The End Which All Breeders of Live-Stock Should Work For.

The kind of food furnished to young animals during the earliest part of their existence has an important influence on their character and usefulness in after life. Nearly all breeds are just what their respective breeders make of them, and the profit derived from their culture is governed, to a great extent, by the way they are fed and managed when very young. Since so much of their future usefulness and value in after life depend upon their treatment when young, it would amply pay the breeder to give them a little extra attention at this time, and see that every want is supplied in the best possible manner.

The trouble generally is that the breeder is too anxious to have his young stock grow fast, and oftentimes he is found forcing them along to early maturity with fattening food. This will give them a sleek-looking appearance, and this is just what a great many breeders are working for, but which really is a detriment to the utility and value of the stock in question. What should be aimed at by all breeders in raising their farm stock is a large frame well supplied with strong muscles, and of course this can only be obtained to best advantage by feeding on the right kind of food from the start. Fatty food should always be guarded against, as excessive flesh is quite burdensome to the young animals, and not what they should have at all.

It is not the nature of young stock to be overfat, and when they are found in this condition it is a sure sign of overfeeding, or injudicious feeding, to say the least. The food they eat at this stage of their life should be of such a nature as to develop bone and muscle rapidly, and this is the end which all breeders ought to work for, as it is much more profitable for all concerned.—*Farm, Field and Stockman.*

LITTLE LAUGHS.

Paris claims to have 2,500,000 rats. The annual crop of kid gloves promises well.—Tid Bits.

Agent—Is the lady of the house in? Servant Maid—There are two of us. Which do you want to see?—Tid Bits.

The long and the short of the haul business is that the railroad corporations are doing it.—Milwaukee Journal.

"A toad who disgraces his own warts," is what one Mississippi editor says in alluding to one of his colleagues.—Lowell Citizen.

A fashion writer says the next generation or two of women will abolish corsets. They will have to, or the next generation of corsets or two will abolish women.—Binghamton Republican.

Helen M. Coke writes that "Kisses on her brow are the richest diadem a woman's soul aspires to." And yet the fellow who kisses a young lady on her brow while her rosy lips are making motions like a patent clothes wringer is not the man for the position.—Texas Siftings.

They tell of a very cultured divine in Boston, who, instead of saying, "The collection will now be taken up," impressively remarks, "The accumulation of moneys will now ensue." But a Philadelphia clergyman, a great athlete and lover of sports, forgot himself once and said: "Here endeth the first inning—let us pray."—Texas Siftings.

A gas trust seldom trusts anybody for gas.—Chicago Tribune.

Omaha rejoices and is glad. The city water is now thin enough to run down hill.—San Francisco Alta.

Visitor—How much your hair is like your mother's! Little Girl—Oh, no it isn't! Mamma's comes off and mine don't!—Yonkers Statesman.

As man and wife are one, the husband, when seated with his wife, must be beside himself.—Philadelphia Herald.

Awake from sleep at midnight hour,
He shoots from bed just like a rocket;
The sight his senses all o'erpower—
His wife is going through his pocket!
—Hartford Sunday Journal.

A man recently astonished his wife by coming home with two black eyes. "What have you been doing?" said she. "Getting a pair of sock-," he replied.—Life.

A bright story in grammar is told of a little school girl. "Quarrel," she parsed, "is plural." "Why?" "Because—why it takes two to make one."

[One Touch of Nature, Etc.

There are some evils all must share
And equally endure,
Some miseries the rich must bear
As often as the poor.

When blazing are the solar fires
And shirts to shoulders stick,
The fat rich man blows, puffs, perspires,
As much as lab'rer Dick.

The poor man bathing in the pool
Dreads not the noonday glare,
There he can keep himself as cool
As any millionaire. —Boston Courier.

She—I do.

He—And I may speak to your pa?

She—No. Speak to ma. Pa ain't anybody in this house.—Boston Courier

An Exoduster's Song.

On Canada's quiet banks I stand,
And cast an anxious eye
To that unhappy bank beyond,
Where all my ledgers lie. —Tid Bits.

SLEEPING WONDERS.

Feats Accomplished by Some Men While in the Arms of Morpheus.

Sleep in most individuals lasts for the space of eight hours. Exceptions to this statement are numerous; whether these arise from duty or laziness we shall not venture to examine. Sir E. Codrington, the famous naval officer, when a midshipman, could watch on deck for nineteen hours; this left only five for sleep, which in his case was most profound—so profound that no noise was sufficiently strong to waken him; yet if the word "Signal!" was whispered in his ear he awoke and was on deck instantly.

Reporters in the House of Commons require great exertions to keep themselves from sleeping. A few years ago a distinguished member of the "gentlemen in the gallery" took down a speech while asleep. His statement rests on his oath. Calvin tells of a friend of his reading aloud to him while asleep. The organ of vision was alone active.

Coleridge, the dreaming philosopher, composed "Kubla Khan" (one of his poems) while fast asleep. Next morning he was sure there had been an acquisition to his literature, but was too negligent to write the stanzas. A few days afterwards he attempted to recall the verses, but they had for the most part fled, and the poem as it now stands is but a fragment.

Every one knows that extreme fatigue induces sleep, and this in spite of surrounding relations which, in ordinary circumstances, would hinder any one from resting. Previous to the shortening of the hours of work, factory children frequently fell asleep while working at the machines, although well aware that they would incur severe punishment by doing so. The North American Indian, at the stake of torture, has been known to go to sleep on the least remission of agony, and will slumber until the fire is applied to awaken him.

It is on record that, during the heat of the battle of the Nile, some of the over-fatigued boys fell asleep upon the deck, and during the attack upon Rangoon, in the Burmese war, the Captain of one of the steam frigates most actively engaged, worn out by the excess of continued mental tension, fell asleep and remained perfectly unconscious for two hours, within a yard of his largest guns, which were being worked energetically the whole period.

Habit and time, place and circumstances predispose us all to sleep. The celebrated pedestrian, Captain Barclay, when accomplishing his extraordinary feat of walking one thousand miles in as many successive hours, obtained at last such a mastery over himself that he fell asleep the instant he lay down. The doctor's wife never hears the door-bell during the night, although the noise is sufficient to rouse the wearied husband; but should a child in the nursery cry, then the mother, oblivious of all other sounds, hears at once the infant's voice.

It is related that the Abbe Faria, who acquired notoriety through his power of inducing somnambulism, was accustomed merely to place his patient in an armchair, after telling him to shut his eyes and collect himself, and pronounced in a strong voice, "Dormez!" which was usually successful.

There seems to be no limit to the wonders displayed by man in sleeping. Concerdet, the mathematician, solved one of his most difficult problems while asleep—a problem, too, which puzzled him during his waking hours. A professor of theology in the University of Basle once wrote a sermon while asleep. He found it in his desk next morning. The preceding night he could not grapple with the subject as he desired, but the performance of his sleeping hours was quite satisfactory to him.

Jenny Lind was one of the most celebrated singers of her time. No one could rival her powers but a factory girl, who sang sometimes better than the famous Jenny. The girl could not attempt any difficult piece when awake, but when sleeping she sang so correctly, so like the renowned artiste, that it was difficult to distinguish between their voices. On one occasion Mad. Lind heard the girl, and even tested the accuracy of her powers by giving her a long and elaborate chromatic exercise. This the sleeping girl performed, much to the wonder of the famous Swedish singer.—*London Telegraph.*

A TWO-INCH MISS.

Narrow Escape of an Alabama Church from Destruction by a Cyclone.

The Colonel had contributed fifty cents at Decatur, a quarter at Birmingham, thirty cents at Verbena and thirty-five at Bessemer—all for the "rebuilding of colored churches destroyed by cyclones," and when we got to Sheffield and an ancient darkey struck him again with the same old chestnut, he turned on the man with:

"See here! Where is that church?"

"'Bout ten miles from heah, sir."

"When did the cyclone hit it?"

"Las' September."

"I don't believe it! I believe you are lying to me! Now, then, will you tell me the truth for half a dollar?"

"Y-yes, sah."

"Very well. Was that church building blown down by a cyclone or not? I want a straight and truthful answer."

"An' you'll gin me fo' bits!"

"Yes, I will. You only wanted two bits for the church, while here are four for the truth."

"Den, sah, I shall let de church slide an' stick to de troof an' hope fur de Lawd to forgin me! Dat sighclone jist missed de church by two inches, but I fought dat was clus 'nuff to collect a few dollars on!"—*Detroit Free Press.*

—Check boldly enters where modesty dare not pull the door-bell.—*Whitehall Times*

GETTING NEW COINS.

Where the Bright Pennies Come From and How They are Circulated.

"Where do the new pennies come from?"

The question is asked daily. Every one has a dimly defined idea that they are turned out of the United States mint, but under what conditions they are put into circulation few people seem to know. Ross W. Drum, cashier of the Tradesmen's National bank, United States depository for Pittsburgh, was asked the question the other day.

"Any one can get them by applying to the United States Treasurer or an Assistant Treasurer, and sending the money." The Treasury regulations on the subject of minor coins read thus:

The Treasurer and Assistant Treasurer will pay out for lawful money any minor coin not needed in the current business of their offices.

"Do the banks put most of them in circulation?"

Not now. They formerly did, but of late years many mercantile houses have been making a practice of getting their own pennies from the Treasury Department. This was rendered necessary in making change by the practice of making prices in odd numbers, as ninety-nine cents, forty-nine cents and similar prices. This of course puts a large number of pennies in circulation and the stores must have them on hand, and they have taken to buying their pennies in large amounts."

"How is other coin procured from the mints?"

"Upon receiving an original certificate of the Assistant Treasurer in New York for a deposit of one hundred dollars, or any multiple of one hundred dollars, made for the credit of the Treasurer in general account, the Treasurer will cause a like amount in gold coin to be sent from the mint at Philadelphia at the consignee's expense.

"Upon the receipt of currency or gold coin the Treasurer or an Assistant Treasurer will cause to be paid to applicants in cities where their respective offices may be situated, standard silver dollars in any required amounts. To applicants outside of cities in which the Treasurer or an Assistant Treasurer may be situated, the same will be forwarded at the expense of the Government in sums or multiples of five hundred, upon receipt by the Treasurer of an original certificate issued by an Assistant Treasurer or National bank depository that a deposit of currency or gold coin has been made to the credit of the Treasurer on general account.

"Fractional silver coin will be forwarded from the office nearest to the place of the destination by express at the expense of the Government in sums or multiples of five hundred dollars, under the same conditions that govern the issuance of silver dollars. Also by the Treasurer or Assistant Treasurer, by registered mail free of charge, in sums or multiples of seventy dollars, at the risk of the party to whom sent, upon receipt of currency or gold coin.—*Pittsburgh Dispatch.*

PUBLIC OPINION.

The Most Powerful Influence Exerted Against Human Progress.

Public opinion is "collective mediocrity." It finds expression in manner, habits, usages, laws and literatures, which react upon it and tend to give it comparative fixedness in its elementary characteristics, in spite of its proverbial fickleness. This complex body of thought, like an organism in which many parts coalesce and become co-ordinated in one structure, although subject to modifications in the later accretions, becomes like "the cake of custom" hardened with age. It is not strange, therefore, that in some of the older countries, like China, it is hardly possible for the reformer to make so much as a dent in public opinion, in favor of the removal of barriers to progress and the introduction of the ideas and methods of a more advanced and progressive civilization.

Even in the most enlightened communities to-day, public opinion is the most powerful influence constantly exerted against intellectual development and moral and social progress. It prevents free and impartial discussion of unpopular views, and intimidates into silence and conformity with prevailing beliefs and observances the great majority of those who hold these views; thus directly discouraging independence, sincerity and consistency of thought and speech if not indeed making these qualities the exception among those who hold decidedly unpopular views, and silence or acquiescence and a temporizing course the general rule.

All original thought must come from individuals. All great moral and social reforms must receive their first impulse from the few and not from the many. Nothing, therefore, is more imperatively demanded in the interest of progress, than the freest and fullest expression of those opinions which clash with the conversation of the day, as a counterpoise to the tendency of an arbitrary and despotic public opinion to make all think alike, and thus to produce "intellectual peace at the price of intellectual death." It is not simply the right, it is the duty of those in advance of their fellow-men to speak their honest thought, and in a way to be understood. Loyalty to conviction and courageous devotion to the highest conceptions of truth, regardless of public opinion or personal interests, is a demand of the times, both in public and private life. There is a vast amount of truth not likely to be popularly received for a long time and they who defend it, in spite of the pressure of public opinion, perform a service the value of which can not be overestimated.—*Open Court.*

TEA ADULTERATION.

Inferior Grades Improved by the Free Use of Poisonous Chemicals.

During the last twelve months there has been a marked increase in the consumption of tea in this country. It is estimated that about two million more pounds were sold this year than last. As a result a demand for cheap priced teas has arisen, and this has induced adulteration to a very large extent. Along with the adulteration, too, is the free use of chemicals to improve the appearance of inferior grades. These, in many cases, are injurious to the system, and are sometimes used in such quantites as to prove serious irritants. A case of poisoning of this kind was reported recently, and physicans say that the nervousness which some think is caused by drinking tea freely, is in reality the effect of adulterants.

A tea dealer in this city gave the writer some facts concerning tea adulteration. He said: "A great demand for cheap teas began with the system of giving presents with it in retail tea stores, of which there are now very many. All sorts of expedients are adopted to reduce the price of tea brought to this country. The principal form was that known as 'lie tea,' or false tea. It is just what its name implies. It consists of any non-poisonous leaves rolled up and dried so as to resemble real tea, and mixed with inferior tea leaves. In China the children are sent out in the early spring to gather the young leaves just when they are beginning to grow. These are rolled up in the same way as tea leaves. The mixture can only be detected by an expert, and considerable quantities of it were sold in this country prior to the establishment (made necessary by its importation) of a tea inspector at this port a few years ago.

"Another common form of adulteration consists of using exhausted tea leaves. These are dried and rolled up again into their former shape. They have to be colored slightly, and then form an adulterant almost impossible of detection. This manner of reducing the cost of tea is frequently resorted to in this city so as to avoid the scrutiny of the inspector. As none but the natives is familiar with the regular methods of coloring teas, these exhausted teas when made up in this country are treated often with dangerous chemicals and coloring matters.

"In teas such as gunpowders, where the leaf is rolled up into small, round particles, the natives simply use mud as an adulterant. When it is mixed up with the tea the pieces of dry earth can scarcely be noticed.

"But the most dangerous thing to the consumer of tea are the expedients that are used for improving the appearance of the inferior teas. As a rule, a well-looking tea is preferred, and consequently every effort is directed to give it an attractive appearance. Black teas are generally safe enough, being uncolored. Green teas, however, are artificially colored. Highly-polished, bluish-looking leaves are, as a rule, the most dangerous, being so made by chemicals. Indigo is much used to impart this tint, but many think it is more readily attained by Prussian blue. Very minute quantities are used, of course, but tea colored in this way can hardly fail to prove deleterious if much of it is taken. Copper also is used for the same purposes."—*N. Y. Commercial Advertiser.*

A TOOTHSOME DISH.

A Reliable Recipe for Making Genuine Beef a la Mode.

Six or eight pounds of the round of beef, half a pound of fat salt pork, three tablespoonfuls of butter, two onions, half a carrot, half a turnip, two tablespoonsfuls of vinegar, one heaping tablespoonful of salt, half a teaspoonful of pepper, two cloves, six allspice, a bit of stick cinnamon, a boquet of sweet herbs, or a teaspoonful each of dried thyme and sweet marjoram, four tablespoonfuls of flour and two quarts of boiling water. Cut the pork in thick strips as long as the beef is thick, and draw them through it at regular intervals with a larding needle, or the holes can be made with a steel or a boning knife and the slips of pork pushed in. Chop the vegetables fine; melt the butter in a large saucepan and add them to it, let them cook for five minutes; dredge the meat with the flour and brown thoroughly on both sides. Take it out, add one quart of the water and let it boil a minute, stirring steadily. Then put back the meat, add the other quart with all the remaining seasoning; cover closely, and simmer gently for four or even five hours. Then take up. Draw the saucepan forward; skim off all the fat from the gravy, and boil it rapidly for ten or fifteen minutes in order to reduce it. For a pint of gravy allow one tablespoonful of browned flour, though many prefer it unthickened. The juice of a lemon is an improvement. Put whatever is left between two plates and press with a heavy weight. It is even better cold than hot. Save every particle of gravy, as it can be used in a final mince or in soup.—*Christian at Work.*

—"I guess I'd better withdraw from the church for two or three months," said a Dakota man to the minister. "Why, how's that, brother; what's the matter?" inquired the pastor. "I feel three or four cyclone lies sort of working around in my mind and they've got to come out. Just give me a leave of absence for, say ninety days, and I'll be back with you again. I believe they will be some of the thunderingest cyclone lies ever told, and I don't want to disgrace the church.—*Dakota Bell.*

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY SATURDAY.

INDEPENDENCE, CAL

SATURDAY OCTOBER 29 .....1887.

THE SHEEP QUESTION.

A responsible citizen of Bishop Creed sends a communication on the Sheep License Ordinance just passed by the Board of Supervisors, which is given elsewhere. The Supreme Court has decided that such ordinances are constitutional and within the powers of Boards of Supervisors to pass. Therefore the action of the Board in this case is legal.

For many years bitter complaint has been made that the sheep owners paid no part of the taxes in the counties where their flocks grazed and where their large profits were made. This ordinance will enable each county to get some return for the product of its soil, and for the protection afforded the men and their flocks. Therefore the ordinance is just.

Our whole system of Government rests upon the theory that the major ity shall rule. A very large majority of the people of the mountain counties favor these ordinances. Therefore the adoption of this ordinance by our Board is politic.

It is now many weeks since the Supreme Court decided in favor of the Mono county ordinance. Every one knew as soon as that decision was published that the Supervisors of Inyo county would adopt an ordinance similar to that of Mono county. The sheep men had plenty of time to arrange their contracts accordingly, or move their sheep from the county if they preferred. Therefore they have not been taken unawares; and by continuing in the county after the decision of the Supreme Court was published they admit that their business is able to bear the license tax.

But be the ordinance wise or otherwise, our Supervisors could not afford to leave the same unpassed after a neighboring county had imposed the tax, and after the Supreme Court had decided in favor of it. No one will contend that it would be just to offer a premium to sheep men to bring their flocks here, when so many citizens are opposed to them. Yet this would have been the effect of a failure to pass the license ordinance, now that it is in force in Mono county, and will soon be in force in other counties. If these ordinances are injurious to the public welfare let us have a general law, operating impartially in all counties alike; but till we have such a general law it is unjust to berate Boards of Supervisors for adopting the ordinances.

In reply to the assertion that Mr Ricky procured the passage of the Mono county Sheep License Ordinance the Bridgeport "Chronicle-Union" says: "The people of this county have been for years trying to find a way to make sheep owners pay a part of county expenses, but were unsuccessful until the license ordinance was thought of under the provisions of the County Governments Act. Mr. Ricky had nothing to do with the ordinance, and the Supervisor from his district was opposed to its passage. We all know that the sheep business is one of the most profitable in the State, and those carrying it on should be made to pay their quota of county expenses just as much as the merchant or any other business man is required to do by taking out a license."

Merchants who sell large quantities of goods to sheepmen need not dread that the License Ordinance will curtail their profits. While pasturage can be had for nothing, and without the investment of one dollar in land, there will not be one sheep the less brought into the county. As for the the farmers who sell hay or rent pasture, they are equally safe. A citizen of Kern county who was at Independence recently, said that pasture was being rented there for $10 per acre for the season. The sheepmen will keep their flocks in Inyo county as long as pasture costs such a price west of the mountains, with license or no license.

In Mexico Americans are being murdered at a good, or rather at a deadly rate. Within a few months several men who went to that country to invest money in mines have been murdered, but so far no one has been punished for any of the crimes. Our own Government does not appear to be doing anything in the matter. Mexico is a good country for Americans to keep away from; at least till it has a government that will give strangers protection! or till we have a government at home that will exact full satisfaction, not only for the murder of one of our citizens, but for any injury or insult done to an American in any part of the world.

The Sheep Ordinance.

Bishop Creek, Oct ober 24th.

In the matter of what is now known as the Sheep ordinance, I have to remark 1st. —That our Board of Supervisors acting in conformity with the decision of the Supreme Court of our state in the case of Mono county v. s. Miranda, passed the present ordinance for Inyo county which took effect on the 24th inst. A Board of Supervisors sitting as a legislative body having under consideration the adoption of a law which would be in its nature an entirely new departure from anything theretofore known in their deliberations; it might have been reasonably supposed that the interests of both the cattle and sheep industry would have been impartially weighed, and although the board might have felt it its duty to pass the Mono county ordinance into a law applicable to Inyo county, yet it would not have been amiss for these solons had they have had the interests of all parties concerned before their wisdoms to have considered the question as to whether or not they were adopting an *expost facto* law: whether or not they were abridging contracts, and confiscating property, and to permit the unjust action of this law, there is no virtual remedy. Thus where parties had bought and paid for pasturage before the Board had met, with a view to feed their flocks until the same had been exhausted, nevertheless our Board disregarding those contracts [of which said contracts, some of the board were advised] passed an ordinance tabooing the sheep men, and in effect ordering them to leave the county at an impossible date; and why was this? It would seem to a disinterested observer, for the simple purpose of blackmailing a class of our fellow citizens to the tune of 5 cts per head on their sheep, or in other words after they had come into our county legally and legitimately, a trap was sprung upon them, and they and their sheep, like the rat in the fable, had to grow as lean as when they came before they could get out, by this mode of extortion.

If our Board had been actuated by any other principle except that of prejudice against the sheep men they would have taken into their wise heads both the present and the past; they must have known that the custom for many years past among the owners of sheep has always been to buy pasturage from our farmers and feed their flocks until the rains had fairly set in on the west side of Sierras and then the migration would have commenced. Surely if the board were endowed with ordinary intelligence they should have known that the shepherd is essentially nomadic, and that he must seek food and pasturage for his herds in view of clime and seasons; in this respect then how unjust, how outrageous is this ordinance which confiscates property at one fell swoop, and from which there is no appeal, against which there is no remedy! Having said thus much as to the unjust operation of the present ordinance as applied to the sheep men in Inyo county, I wish to give the public a few figures as to how this law would work if adopted throu'out our state.

The sheep and wool industry in the State of California aggregates $40,000,000. The amount of state and county taxes collected for state and county purposes upon this plant may be readily estimated at $600,000. Now let us suppose that every county in the state should follow in the lead of Mono county, viz. impose as a privilege for engaging in the business of sheepraising, which includes the wool industry, and 5 cts per head on each lamb thrown every year is imposed and an additional 5 cts in each county into which the flocks are driven, is it not apparent that the sheep business will become extinct in our state.

Now let me ask our Board of Supervisors is it to the interest of Inyo county to follow in the footsteps of Mono county? I have already said and am ready to prove the fact that this sheep and cattle question, so far as Mono county is involved, is run in the intesest of one man viz Hon. Tom. Rickey. Have we a Rickey among us? I hope not. In point of fact the true interest of Inyo county is to cherish the sheep industry as against all outside influences and a few figures will show this to be true. There are today in our county about twenty five or possibly more herds or flocks of sheep, these feed entirely upon the public lands belonging to the government of the U. S. Their owners for supplies, expenses of all kinds, exclusive of pasturage, disburse with our merchants, hotel keepers, etc. at least $20,000, perhaps this is a low figure; outside of this outlay they certainly expend as much more in buying feed and pasturage from our farmers and ranch men. The aggregate amount of ready money left among us by these migratory people is not easily estimated, but there is nothing more certain than they help a great number of our hard up people, and but for them our delinquent tax list would run up into figures very discouraging. More anon.

FAIR PLAY.

The people of Carson know how very much each father and mother may be concerned in how their neighbors train or neglect their children. If in any community there is even one family of children left to grow up without any training in morality; without any cultivation of the conscience: never taught to reverence truth, to fear God or respect their fellow creatures, every other family in that community is in imminent danger of being brought to shame and sorrow. No other form of selfishness is more selfdefeating, more certain to bring punishment with it; than the selfishness of indifference to the moral and religious training of children, our neighbors as well as our own. We will take a lively interest in sewage and drainage in order to protect our loved ones from diphtheria or scarlet fever; but what are these plagues compared to the horrible evil that has come upon so many families in Carson. It would be interesting to know how many of these fathers and mothers of outraged children have ever taken any active interest in trying to have the sons of their neighbors taught to respect virtue, to reverence truth, to be manly and honorable, to be unselfish, to imitate such men as Sir Phillip Sydney and Washington. In a word, to grow up such men as the example and teachings of Christ alone can make. If we sow the wind of neglect, we shall reap the whirlwind of outrage.

ORDINANCE NO. 19.

The Board of Supervisors of the County of Inyo, tate of California, do ordain as follows:

co All persons doing business within the county of Inyo all obtain licenses from the Tax Collector of said unty as follows:

SEC. 1. Auctioneers are divided into two classes and must obtain licenses from the Tax Collector as follows

First class. Those whose average monthly sales amount to $2,500 and upward constitute the first class and must pay a license of $50 per quarter.

Second Class. Those whose average monthly sales are less than $2,500 constitute the second class and must pay a license of $10 per quarter.

SEC. 2. Persons engaged in banking, loaning money at interest, or in buying or selling notes, bonds, or other evidences of indebtedness of private persons, or in buying or selling State County or City stocks, or other evidences of State, County or City indebtedness, or stocks, notes, bonds, or other evidence of indebtedness of incorporated companies, or in buying or selling gold dust, gold or silver bullion, or gold or silver coin, are divided into two classes and must pay licenses as follows:

First Class. Those doing business in the aggregate to the amount of $10,000 per quarter, or over, constitute the first class and must pay a license of $25 per quarter.

Second Class. Those doing business in any amount less than $10,000 per quarter, constitute the second class and must pay a license of $15 per quarter.

SEC. 3. For each proprietor of a billiard table not kept exclusively for family use, for each table, $20 per ann for each bowling alley, $10 per quarter for each alley; but no license must be granted for a term of less than three months.

SEC. 4. For each exhibition for pay for a theatrical performance, a caravan or menagerie, or any collection of animals, circus or other acrobatic performance, $5. And for each show for pay of any figures, puppets necromancers, magicians, wire or rope dancing, and slight of hand exhibitions, $3 for each performance. The provisions of this Section do not apply to exhibitions given for the benefit of churches, school, erotic or charitable entertainments, by any amateur dramatic association, literary society of fine lawn or district in which such exhibition or entertainment is given.

SEC. 5. Each pawn broker must pay a license of $25 per quarter.

SEC. 6. Each keeper of an intelligence office must pay a license of $10 per quarter.

SEC. 7. Every person who sells spirituous, malt or fermented liquors, or wine in quantities less than one gallon, must obtain a license therefor from the Tax Collector and make the following payment:

First Class. Those making sales to the amount of $1,000 or more as a monthly average constitute the first class and must pay a license of $25 per quarter.

Second Class. Those making sales of less than $1000 per month constitute the second class and must pay a license of $20 per quarter.

SEC. 8. Every person who, at a fixed place of business sells any goods, wares or merchandise, wines or distilled liquors, drugs or medicines, jewelry or wares of precious metals, whether on commission or otherwise, (except Agricultural or mechanical productions, or the products or any stock, dairy or poultry farm of this State, when sold by the producer thereof, and except such as are sold by auctioneers at public sale under License) and all persons who keep houses or vehicles for hire [except such as are used in the transportation of goods] must obtain from the Tax Collector, and for each branch of said business, license, and pay quarterly therefor an amount of money to be determined by the class in which such person is placed by the Tax Collector, such business to be classified and regulated by the amount of the average Monthly sales made or hiring done, and at the following rates:

First Class. Those who are estimated to make average monthly sales or hiring to the amount or $1,500 per month or more constitute the first class and must pay a licen e of $25 per quarter.

Second Class. Those who are estimated to make average monthly sales or hiring to the amount of $1,250 and less than $2,500 constitute the second class and must pay a license of $15 per quarter.

Third Class. Those who are estimated to make average monthly sales or hiring of less than $1,250 constitute the third class and must pay a license of $10 per quarter.

SEC. 9. The sales of liquors and wines by persons licensed under the preceding Section must not be in quantities of less than one quart measure.

No license must be required of physicians, surgeons, apothecaries or chemists for any wines or spirituous liquors they may use in the preparation of medicines.

SEC. 10. Every traveling merchant, hawker, or peddler who carries a pack and vending goods, wares or merchandise shall be a resident of this State or a citizen of this State must pay for a license $5 per month, and every such traveling hawker, merchant or peddler who uses a wagon and one or more assistants for the purpose of vending such goods, wares or merchandise of the kind must pay for a license $15 per month.

SEC. 11. Every person who keeps a stallion, jack or bull and who permits his mare to be used for the purpose of propagation for it he must annually obtain a license therefor from the Tax Collector and pay therefor as follows.

First. Horses that are hired for the purpose of propagation by the season at $100 or more constitute the first class and require a license of $25.

Second. At $75 and less than $100 constitute the second class and require a license of $20.

Third. At $50 and less than $75 constitute the third and require a license of $15.

Fourth. At $25 and less than $50 constitute the fourth class and require a license of $10.

Fifth. At $10 and less than $25 constitute the fifth class and require a license of $5.

Sixth. At less than $10 constitute the sixth class and require a license of $3.

Seventh. For each jack, $10.

Eighth. For each bull, $10.

A license for propagation obtained from the Tax Collector under the provisions of this ordinance shall entitle the holder thereof to the right to go into any county of this State for the purpose of propagation without any further license or expense.

SEC. 12. Every person who commences or carries on in the County of Inyo any business, trade, profession, or calling for the transaction of which a license is required by any ordinance of the Board of Supervisors of said county without taking out the license prescribed by such ordinance is guilty of a misdemeanor and shall be punished by a fine not exceeding $250 and unless said fine be paid shall be punished by imprisonment in the county jail of said county until such fine be satisfied, such imprisonment not to exceed one day for each dollar of the fine.

SEC. 13. The Tax Collector shall have the collection of the licenses provided for in this ordinance, and it he is duly made it a duty to collect the same and he may enforce the collection as provided by Section 3743 of the Political Code of California.

SEC. 14. This ordinance shall take effect and be in force on and after twenty days from its passage.

SEC. 15. This ordinance shall be published in the INYO INDEPENDENT, a newspaper printed and published in said county, at least two weeks.

The above ordinance was passed by the Board of Supervisors of Inyo county at a regular meeting of said Board October 4, 1887, by the following vote:

AYES: Hanger, Robinson and Eldred.
NOES: None.
ABSENT: None.

J. D. HANGER,
Chairman.

Attest: P. H. MACK,
Clerk.

TAKE SIMMONS
LIVER REGULATOR
For all Diseases of the
Liver, Kidneys, Stomach and Spleen.

This purely vegetable preparation, now so celebrated as a Family Medicine, originated in the South in 1828. It acts gently on the Bowels and Kidneys and corrects the action of the Liver, and is, therefore, the best preparatory medicine, whatever the sickness may prove to be. In all common diseases it will, unassisted by any other medicine, effect a speedy cure.

The Regulator is safe to administer in any condition of the system, and under no circumstances can it do harm. It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance; will promote digestion, dissipate headache, and generally tone up the system. The dose is small, not unpleasant, and its virtues undoubted.

No loss of time, no interruption or stoppage of business while taking the Regulator.

Children complaining of Colic, Headache, or Sick Stomach, a teaspoonful or more will give relief.

If taken occasionally by patients exposed to MALARIA, will expel the poison and protect them from attack.

A PHYSICIAN'S OPINION.

I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system. L. M. HINTON, M. D., Washington, Ark.

INYO INDEPENDENT.

INDEPENDENCE, CAL.

SATURDAY, OCTOBER 29 1887

Billy Farrell has leased a mine at the White Hill from Barnes & Kehoe.

Mr. G. W. Parish is again very ill. It is feared that he may not recover.

George Lewis has gone to Keeler to be employed at the reduction works.

Mr. June Smith and wife of Big Pine, were in town during the week.

Ed. Walker came up from Olancha last Wednesday and stayed in town a few days.

Mrs. A. R. Conklin has got home after an absense of several months in Los Angeles.

The dancing school will be postponed till the new school house shall be finished. Masons hall is at present occupied as a school room.

Mr. J. W. McMurry was in town a few days this week. He still looks week from his recent illness.

George Thorpe came in from Panamint some days ago. He says the new mill was about finished when he left there.

At the M. E. Church Rev. T. E. Sisson will preach at 7.30 o'clock Sunday evening. Sunday school at 11 o'clock forenoon.

A switch is being built from the station at Keeler to the reduction work; three miles below and on the shore of Owens Lake.

Gustave Sanger was in town during the week. He brought down a lot of horses he had sold to the East Side Canal Company.

Rev. T. E. Sisson and family arrived at Independence at the end of last week. They will be glad to welcome all friends at the M. E. Parsonage.

Manuel Diaz has gone to San Jose; it is expected that his mother, who has been at San Jose for some months, will accompany him on his return home.

Mr. Tibbets sold his farm a few days ago. The Curtis farm adjoining has also been sold to the same party. Mrs. A. R. Conklin is the buyer.

Mr. A. R. Conklin got back from San Francisco at the end of last week. At the session of the Grand Lodge of Masons he was elected Senior Warden.

Frank Vinson left town last Thursday morning for Gridley, Butte county. His father died recently and he goes to take charge of the business and property.

Robert Hamilton was pardoned out of the Nevada State prison last week; he was convicted in 1878 for robbing the stage between Eureka and Tybo, and sentenced for fourteen years.

Mr. W. T. C. Elliott, of Big Pine has yet some grapes of good quality that he will deliver on board the cars in 20 pound boxes at 60 cents per box. He has also a lot of fine winter apples. Address as above.

The mill of the Candelaria Water Works and Milling Company was started up a few days ago on ore of the Georgene Company. It is expected that the mill will now be kept running continuously on ore of the district.

We are to have a fire company; the boys met last night [Friday] and resolved that they would. This is something that has long been needed in the town; every encouragement and assistance should be given the company, and doubtless will be.

Mr. Jacob Vagt of Camp Independence had been working so quietly in raising good horses, that the animals he showed at the fair surprised his neighbors more than strangers. One mare and family of three colts attracted particular attention, they are fine animals.

Jacob Riem, an old time resident of Virginia City, was found mortally wounded near Sacramento on Thursday of last week. He had been hunting, and when found lay beside a fence, his gun with both barrels discharged lying near him. It is not known if it was a case of accident or suicide.

The New York *World* makes the amazing suggestion to have Roscoe Conkling as the democratic candidate for the Presidency, if Blaine shall be nominated by the Republicans. The *World* appears to think that Mr. Cleveland could not carry New York against Blaine, but that Conkling could.

There is not an intelligent person in the state who will not believe that the eleven jurymen who were for the conviction of Robert F. Morrow for the crime of jury bribing were right. That there was one man on the jury who refused to convict will but strengthen the belief that the crime is yet practiced.

Hon. E. B. Washburne died at the home of his son in Chicago last Saturday. Mr. Washburne will live in history as the man who was mainly instrumental in putting U. S. Grant in a position where his ability first had a chance to be known to the nation and to the world. He was aged seventy one years.

The Supreme Court of the United States after listening to argument failed to discover any illegality in the trial and condemnation of the Chicago anarchists. Only the Governor of Illinoise can now save the anarchists from the punishment decreed them, and it is beleived that he will not interfere.

Here is an item for those who buy lottery tickets. John A. Morris, the owner of the Louisiana Lottery, will present his daughter with a million dollars in cash on the occasion of her approaching marriage with Thurlow Weed Barnes, of New York. It must be quite a relief to the thousands who have bought lottery tickets and never heard of their money again, to know that it is not all lost, part of it is in that million dollars.

In the year ending June 30th 1886 nearly thirty eight million pounds of raisins were imported into the United States. The cost of the raisins was $2,782,600. The duty at 2 cents per pound amounted to $759,986. No country in the world is better suited to the production of raisins than Owens valley, and the above figures show what an opening there is in our own county for all we can produce.

A number of gamblers were arrested recently in Virginia City for alleged violation of the clause in the act restricting them from dealing games of chance on the first floor of their premises. Last Saturday Judge Rising dismissed the indictments against the men on the ground that they had paid their licenses to deal on the floors where they were located at the time they were arrested.

The School Matter.

In view of the fact that the action of the Trustees of the M. E. Church has been criticised in the matter of using the church for school purposes, pending the building of the new school house, we deem it just to ourselves and to the public, to publish the conditions under which we consented to let the church be so used. The building was offered free of rent on the following conditions: The school trustees must be responsible each and all, for any injury to the building or its contents by the school or any of its members. If such injury is done, the school trustees must pay for the repair or renewal of what has been injured. The church building must be properly cleaned every Saturday, while used by the school, and when no longer wanted, must be vacated in as good condition as regards cleanness and repair, as when first occupied. Maps, blackboards and other paraphernalia, belonging to the school, must be placed in such positions, that they will in no way interfere with the regular church service or the sunday school. The school trustees must, before the school term begins, erect a temporary fence between the s. e. corner of the church building and the front fence; and also in the gap between the n. e. corner of the building and the north fence; said fences not to be nailed to the church building, so as in any way to injure or disfigure it; and must remove said fences as soon as the church building is no longer wanted for school purposes. The scholars shall have no admittance to the parsonage grounds. A temporary water-closet must be provided for the use of the scholars, outside the parsonage grounds. The church trustees reserve the right to forbid the use of the church building for school purposes at any time, when they find that these rules are disregarded. When the school is ready to vacate the church building, the school trustees must notify the trustees of the church to that effect, so that the latter may inspect the building to see if everything is in good order before releasing the school trustees from the responsibility which this agreement places upon them. The school must occupy its own furniture, which must be placed in the center of the church, the long seats may be placed at the sides and if necessary, some of the short seats piled on top of them; while as many as possible of the short seats, nearest the pulpit, remain in their original positions.

H. L. CLARK
WM. MUTH-RASMUSSEN.
J. W. SYMMES.

Ended.

In the case of Broder and others against Conklin and others; last Tuesday the Court sustained the demurrer to the second amended complaint. This virtually ends the case in favor of the defendants, so far as the Superior Court is concerned. When this suit was begun it made some local excitement. Good lawyers held, however, that the case could only end as it has done. Whatever may have been the original rights or wrongs in the case the defendants have been in quiet possession of the property for several years, long enough to bar all proceedings for recovery under the statute of limitations. If any one is allowed to remain in undisputed possession of property a certain length of time, the law holds that to be proof sufficient that that they are justly entitled to it. Judgement was given for defendants in the sum of $1,725; this to cover various expenses incurred in the suit. The point upon which judgment was given is as follows: Some time ago the Court ordered both parties to file briefs on the demurrer; this order the defendants complied with, but the plaintiffs failed to do so. On this the judgment reads: "And it appearing to said Court that more than twenty days have elapsed since the defendants filed their brief and served a copy thereof on said plaintiff, and the plaintiffs having failed to file their reply, and the Court being fully advised in the premises, doth hereby order and declare that said demurrer to said amended second complaint is and the same is hereby sustained, etc."

The Comstock.

There are good times in store for the Comstock. The *Enterprise* says: "By the 1st of November from 50 to 100 men will be employed on the new workings of the Con. Va. It is the intention of the management to largely increase the ore production this winter, and the prosperity we have all been looking for is surely close at hand. This additional supply of miners in the old bonanza is merely a prelude to what will be done in every other mine on the lode. More men will be seen both above and below ground, than have been seen for many years. And, after all, the number of miners employed is the gauge by which to measure Virginia's success."

Owens Valley people rejoice to hear of good times on the Comstock.

Bad Stat of Affairs.

A very shocking report comes from Carson that the crime of outraging little girls is fearfully prevalent in the town. The *Appeal* stated last week that a physician had stated that he believed there were over fifty children in the city under 13 years of age whose persons had been violated by men. This is a shocking state of affairs to exist anywhere, and more especially in a town so small as Carson. The beast in human shape who commits this most cowardly of all crimes should at once be put out of existance. The neglect of moral and religious training of the young is sure to result in crime and debauchery. Conscience and honor are the results of training; where the young are left to grow up like weeds or wild grapes nothing but a harvest of evil deeds need be expected.

A Little Fun.

The Virginia *Chronicle* undertook to condense an item from the "Inyo Independent;" here it is "The situation in Darwin district Inyo county, is represented as unusually favorable. At the Lucky Jim chloriders in the district are making good wages. The Defiance continues to yield plenty of ore, which is shipped to San Francisco. As fast as miners can be found they are put to work. The stamp mill at Coso is in operation crushing ore from the Promontory mine." The boys at Darwin will appreciate the funny points of the above.

Vague Opinions.

In fruit raising much that is done rests only upon opinion, without having any solid basis upon actual experiment. In some instances fruit growers have cut away all the border growths of trees about their farms and along the watercourses, on the theory that these trees harbored and fed a great many fruit-pests. Pomologists are now in favor of the theory that forest trees and other natural growths about orchards are not unfavorable to them, but on the contrary are of positive benefit.

Runaway

Last Tuesday evening Mr. M. W. Ford, the band leader, got into a two wheeled cart in town to drive to the Fort; he was accompanied by little Hattie Vagt. The horse started on a run; the cart struck the porch at Mairs' hotel and upset, throwing both persons out. Neither was much hurt. The horse kept on a run till he ran up on the porch at Doctor Blair's residence, when he stopped. All the plasters in the drug store would not mend the cart.

The Bridgeport *Chronicle-Union* says surveyors are yet in the mountains in that neighborhood, looking out for a route for a railroad through Mono county. The surveyors are supposed to be in the employ of the Denver and Rio Grand Company. It is said that a good route has been selected and 2,000 men will be at work next year grading the road from Oakland; and that 2,000 more men will be working from Salt Lake City.

Seven years ago G. J. Griffith was a poor man in Bodie. The Los Angeler *Express* says he recently sold in that city property to the amount of $969,500. Mr. Griffith owned some shares in a mine at Bodie; by shrewd maneuvering he managed to increase their value; sold out at the right moment; went to Los Angeles and engaged in the real estate business; married the daughter of millionaire Mesmer, and now is a millionaire himself.

In Virginia City much sickness prevails at all times. The *Enterprise* says the wretched sewerage undoubtedly breeds fevers during the warm months. When cold weather sets in we simply exchange fever for diptheria—a jump from the frying pan into the fire. This has been the experience of the Comstock for years, and it is an experience which will be repeated so long as we labor under the false impression that a pine box will last a life time.

Justice Field and His Brother.

Justice Steven J. Field was in New York the other day. In the office of his erratic, energetic and impatient brother, Cyrus W. Field, he complained of his health. "What is the matter with you?" said Cyrus. "O," groaned the justice, "I do not believe I will live the year out. I feel that I am failing very fast." "Why don't you go to Europe for a rest?" snapped his brother. "I can not afford it," said the justice. "You can't," was the reply. Here Cyrus W. hit a bell a nervous tap. A messenger appeared. His employer said: "Here, go and get two passenger tickets to London and return via the Cunard line."

In a few moments the messenger returned with the tickets. "There," said Mr. Field, tossing the tickets to the justice, "what excuse have you got now?" "Really," said the justice, "it is very kind of you, but I do not feel that I can stand the expense of the journey." Cyrus W. at once wrote out a letter of credit on his London agent for £1,000, payable to the order of his brother. He tossed this over to him. "How do feel about going now?" said he. The justice jumped three feet in the air. He said, "I am better. I shall live for the next fifteen years and down all my enemies yet."—Washington Letter.

Custom of "Grace Before Meat."

This custom is more prevalent in Scotland than in England. With "goody" people grace is said not only before breakfast and dinner, but even when the slightest refreshment is taken. Indeed, in the Highlands, especially in Sutherland and Ross-shire, it is customary when a "dram" is taken to ask a "blessing" over the "mercy." A story is told of a Highlander to whom a "snuff" was offered. The fragrant mixture was put on the back of his hand, and, as it was a something to take, he said it would only be right to ask a blessing over it. The good man closed his eyes and began slowly to repeat the blessing or short prayer. A gust of wind, however, blew the snuff from off his hand, on which he remarked, "O, it couldna' be a mercy at all when it wouldna' wait for God's blessing to be asked over it."—Notes and Queries.

Sugar Industry of Java.

At the rate of increase which has been going on for the past few years, Java will soon produce as much sugar as Cuba. The sugar-planters of Java appear to be making money in spite of the low prices now obtaining, and claim that it is a more profitable crop than coffee. There are only about 100 sugar-mills in Java, but the land suited to the cultivation of the sugar-cane is practically unlimited.—Chicago Times.

NEW ADVERTISEMENTS

NOTICE TO SHEEP MEN.

Notice is hereby given to all persons engaged in the business of raising, grazing, herding and pasturing sheep in the County of Inyo, and who have not procured the license required by Ordinance No. 20 of the Board of Supervisors of said Inyo county, are liable to a fine of two hundred and fifty dollars, or imprisonment in the proportion of one day for each dollar of said fine, and that they will be proceeded against as provided in said Ordinance.

S. G. GREGG,
Tax-Collector.

PROPOSALS FOR COUNTY PRINTING.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of the County of Inyo, State of California, at the office of the County Clerk, until Monday, November 7, 1887, at 10 o'clock a. m. for the purpose of letting a contract for county printing for the year beginning January 1, 1888 and ending January 1, 1889, as follows:

1st. Printing and publishing delinquent tax list.
2d. Reports of Auditor and Treasurer.
3d. Notices of contracts to let by Inyo county.
4th. Notices of special meetings of Board of Supervisors.
5th. Proceedings of Board of Supervisors.
6th. Notices of meetings of Board of Education.

And other legal notices required to be published by the county officers.

Proposals must be endorsed "Proposals for County Printing," and must be accompanied with a good and sufficient bond in the sum of $500. Said bids will be opened between the hours of 1 and 3 o'clock p m of said 1st Monday of November, and the Board reserves the right to reject any and all bids submitted.

By order of Board of Supervisors of Inyo county, October 4, 1887.

P. H. MACK, Clerk.

DESERT LAND FINAL PROOF.

D. E. No. 216.

UNITED STATES LAND OFFICE,
INDEPENDENCE, CAL.
October 18, 1887.

Notice is hereby given that Josiah G. Dodge of Lone Pine, Inyo county, State of California, has filed notice of intention to make proof on his desert land claim No. 216, for the S E ¼ of S E ¼ of Sec 22, Tp 15 S, R 36 E, M D M, before the Register and Receiver at Independence, the 3rd day of December, 1887.

He names the following witnesses to prove the complete irrigation and reclamation of said land: Edward J. Reynolds, Charles Mates, Manuel Silva and Joseph Blancy, all of Lone Pine, Inyo county, Cal.

JOHN W. P. LAIRD, Register.

Notice to Tax-Payers

Notice is hereby given that I have received from the Auditor of the County of Inyo, State of California, the Assessment Roll for the year A D 1887, and that the taxes therein are now due and payable in gold and silver coin of the United States; that the taxes will become delinquent on the last Monday in December, 1887 at 6 o'clock p m, and that unless paid prior thereto five per cent. will be added to amount thereof; that for the purpose of receiving such taxes I will be and and attend at the following named places on the dates named, to wit:

Bishop Creek, November 9th.
Big Pine, November 10th.
Darwin, November 14th.
Keeler, November 15th.
Lone Pine, November 16th.
Independence, on and after November 17th.

S. G. GREGG,
Tax-Collector.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without teams.

JOHN C. EVANS, Stockham, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 160 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I can't sell one to every house. I'd buy had to take the feathers from under the wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, Nemaha, Iowa, writes: "You ask what I think of the Washer I bought last summer. Yes, it is the best machine ever invented by man. $1. We have just as good dinners on Monday as on any other day. $4. If you run short, you can not buy corn for $100."

I will ship a sample to them, leaving an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

J. WORTH, 1719 Franklin Ave., St. Louis, Mo.

Who Spends Money

For advertising in newspapers in these hard times, without first obtaining an estimate of the cost from GEO. P. ROWELL & Co's Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents for 176 page pamphlet with list of newspaper rates and references.

ORDINANCE NO. 20.

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows

SEC. 1. Every person engaged in the business of raising, grazing, herding, or pasturing sheep in the County of Inyo, State of California, must annually procure a license therefor from the Tax-Collector, and make therefor the following payment:

1. Those owning or having in their possession and under their control 5,000 sheep or more shall constitute the first class and must pay $250 per annum for the first 5,000 sheep and for every additional 1,000 the sum of $50.

2. Those owning or having in their possession and under their control 4,000 sheep and less than 5,000 constitute the second class and must pay $200 per annum.

3. Those owning or having in their possession and under their control 3,000 sheep and less than 4,000 constitute the third class and must pay $150 per annum.

4. Those owning or having in their possession and under their control 2,000 sheep and less than 3,000 constitute the fourth class and must pay $100 per annum.

5. Those owning or having in their possession and under their control 1,500 sheep and less than 2,000 constitute the fifth class and must pay $75 per annum.

6. Those owning or having in their possession or under their control 1,000 sheep and less than 1,500 constitute the sixth class and must pay $50 per annum.

7. Those owning or having in their possession or under their control less than 1,000 sheep constitute the seventh class and must pay $25 per annum.

8. Those owning or having in their possession or under their control less than 500 sheep constitute the eighth class and must pay $5 per annum.

SEC. 2. Every person who shall engage in the business of raising, grazing, herding or pasturing sheep, or who commences or carries on in the County of Inyo, State of California, any business, trade, profession, or calling, for the transaction of which a license is required by any Ordinance of the Board of Supervisors of said county, without taking out or procuring the license prescribed by such Ordinance is guilty of a misdemeanor and shall be punished by a fine not exceeding $250, and unless said fine be paid shall be imprisoned in the county jail of said county until such fine be satisfied, such imprisonment not to exceed one day for each dollar of the fine.

SEC. 3. The Tax-Collector shall have the collection of the license provided for in this Ordinance, and it is hereby made his duty to collect the same, and he may enforce the collection as provided by Section 3250 of the Political Code of the State of California.

SEC. 4. The County Auditor shall prepare and have printed suitable bank licenses for the Tax-Collector to carry out the provisions of this Ordinance with blank receipts for the Tax Collector when sold.

SEC. 5. The Tax-Collector shall collect a fee of one dollar for each license sold, which shall be paid into the Salary Fund of the county.

SEC. 6. All money collected for licenses under the provisions of this Ordinance shall be paid over to the County Treasurer as other moneys and placed to the credit of the Salary Fund of the county.

SEC. 7. This Ordinance shall take effect and be in force on and after 20 days from its passage, and all Ordinances, or parts of Ordinances in conflict herewith are hereby repealed.

SEC. 8. This Ordinance shall be published in the Inyo INDEPENDENT, a newspaper published in said Inyo County, at least four weeks, said publication to be made for a period of twenty days after the adoption thereof, and said Ordinance to take effect in twenty days from its adoption.

The above Ordinance was passed by the Board of Supervisors of Inyo County, State of California, at a regular meeting of said Board, October 4, 1887, by the following vote:

Ayes—Harger, Eldred and Robinson.
Noes—None.

J. D. HARGER,
Chairman of the Board of Supervisors of Inyo County.

The Process by which the Sparkling Gems Are Obtained in South Africa.

In an interview with a reporter, J. G. Doolittle, of Colorado Springs, who has spent many years in the diamond fields of Africa, said: "The process of mining for diamonds is much different to the ideas the people of America have of mining. It is not carried on as similar work would probably be done in this country. They don't sink shafts and honey-comb the bowels of the earth into long tunnels and little chambers. Diamond claims are most generally about three hundred yards square, and every inch of the dirt in that space is dug up, carefully looked through and then carted away. The richest stones are found in a bed of clay about two hundred feet below the surface, but the earth from the top down to the clay is studded more or less with clusters, consequently that is the reason miners excavate their entire claim instead of sinking shafts. The industry is very expensive, therefore the men who do the digging make very little money out of it as compared to the diamond merchants and traders. They are the men who make the fortunes. In answer to a question he admitted that natives were hired to do the work, but as a general rule they are so indolent and unreliable that operations proceed very slowly. "Does it get hot in the mines? Well, I should say. It would roast the life out of a white man." When the fields near Kimberley, in Griqualand West, were first discovered, an attempt was made to work them with white men, but it soon proved disastrous, and the operators were compelled to employ native negroes, Zulus and Basutos. They stood the heat all right, but became such consummate thieves that the claim owners lost considerable money through them for a long time at first. They would conceal the stones about their person and at night carry them out. Finally a law was adopted and put into force compelling the diggers to work without clothing of any kind on them. This for a time proved to be of little benefit, and the bosses were puzzled to find some scheme that they could use that would prevent the robberies. It was discovered, after depriving the diggers of their clothing, that they could conceal stones between their toes, keep them there all day and get away with them at night. Now every man's feet are carefully examined when he leaves the mines of an evening, and no more robberies are perpetrated."

When asked how miners judged the value of a diamond in the rough, Mr. Doolittle replied that every firm kept a supply of alum on hand, and all specimens are compared with lumps of that material, and the closer a stone resembles the color of alum the more valuable it is considered. The stones, however, always have a peculiar shape. They are either eight or ten-sided, run to a point, and one side of the point is invariably flat. Nowadays the product of these particular mines is sold at Kimberley, a town that has sprung up near there, where many London merchants have located. A few diamond cutters have also opened shops there and do a good business. The market there is generally active, and miners receive their own price; but that is regulated by the customary opinion of those who claim to be judges. But the diamond cutter is the only man who can judge the real value of a stone. The miners go to the dealers with their products divided into two classes, and then they sell at 60 to 125 and as high as 150 shillings a stone. The dealer who buys divides his purchases into four classes, and generally puts the price up on the very best stones, so that he realizes about double what he paid. By the time a stone goes through the cutter's hands, is mounted and placed on the market, it has reached a figure six or eight times larger than the miner realized. Mr. Doolittle said that he was in Kimberley when the great Rhode stone was found, and a dealer there offered Mr. Rhodes £125,000 for a half interest in it, but he refused to accept the offer. The stone would not bring that amount now, but its owner has made a great deal of money off of it exhibiting it through Europe. The stone is said to be about the size of a hen's egg. Very often specimens that have every appearance of being diamonds of the first water prove to be entirely worthless and crumble to pieces in a very short time after being exposed to the air.—*Omaha Republican.*

Changed His Mind.

"William!" said the old gentleman at the breakfast table.

"Sir!"

"I am not pleased to see you so much in the company of young Jobson. He is a dissipated young man, and he gambles. I should prefer that you avoid his society."

"He gambles, father, I suppose. He can afford to. He has just made $100,000 in the wheat corner."

"Well—still—you had better be careful."

After a little while William rises from the table.

"William!"

"Sir!"

"If Mr. Jobson is disengaged this evening you can bring him up to dinner. Perhaps a little good example may save him—and, William, you can just tell him something about the new mining company I am floating.—San Francisco Chronicle.

—A tragic incident recently took place in a prison-yard near Prague. A young soldier on guard, whose father and mother were sentenced, the former to twenty years' imprisonment and the latter to imprisonment for life, when he was but eight years old, recognized his father in one of the prisoners. He embraced the old man, but was repulsed by him, and in the evening from shame and grief shot himself dead with his rifle.

—"Do you see that couple in the gondola out there?" said a young man to his companion, as they strolled past the lake in Central Park. "Well, the lady is a young widow, whose husband has not been dead six months, and that fellow is courting her in the gondola. What a shame!" "O, perhaps he's only gondoling (condoling) with her," said the other.—*N. Y. Ledger.*

—Blackberry Pudding: A pint of flour, a pint of warm water, a pinch of salt and a quart of blackberries; flour your pudding well and boil for one hour.—*The Farmer and Manufacturer.*

SUGGESTIVE FACTS.

Rev. Hippolytus Smoothtext's Model Anniversary Sermon.

Last Sunday Rev. Hippolytus Smoothtext, B. A., of the Church of St. Sleepers, preached an anniversary sermon which we can commend to all pastors who are given to preaching anniversary sermons as a model of its kind. True, it did not possess that unfathomable depth of bottomless profundity and limitless breadth of encyclopedical erudition so characteristic of the discursive expositions of Rev. Philetus Dobbs, D. D., but nevertheless, taken all in all, it may be considered a model anniversary sermon. Especially instructive and suggestive were the statistics which, so far as we have observed, were of a kind never before introduced in a discourse of this nature, and it is to this model feature of the sermon that we desire especially to direct the attention of young ministers, who have yet to make their mark in anniversary efforts. Rev. Hippolytus Smoothtext, B. A., in reviewing the work of his pastorate, stated among other things, that he had, during the year of his Christian ministry, just closed, preached 104 sermons, 18 mortuary discourses, solemnized 21 hymeneal ceremonies, delivered 17 lectures, of which 16 were on secular and all the others on religious subjects; made 32 addresses of which all but 27 were on matters most nearly touching the vital religious concerns of the church; had read aloud in public 156 chapters of the Bible, 149 of which were very long ones; had made pastoral calls, 312; taken tea on such occasions, 312 times; distributed 804 tracts; visited the sick several times; sat on the platform at temperance and other public meetings 47 times; had the headache Sabbath morning and so compelled to appear before his people in a condition of physical pain, nervous prostration and bodily distress that utterly unfitted him for public preaching, 104 times; picnics attended, 10; dinners, 37; suffered from attacks of malignant dyspepsia, 37 times; read 748 hymns; instructed the choir in regard to selection of tunes, 1 time; had severe colds, 104 times; sore throat, 104 times; malaria, 104 times; had written 3,120 pages of sermons; declined invitations to tea, 1 time; started the tunes in prayer meetings, 2 times; started the wrong tune, 2 times; sang hymns that nobody else knew, 2 times; received into church membership, 3; dismissed by letter, 49; expelled, 16; strayed or stolen, 37.—*Burdette, in Brooklyn Eagle.*

THE LIMEKILN CLUB.

Brother Gardner Makes a Few Wonderfully Practical Remarks.

"Dar' am sartin things I should like you to remember," said Brother Gardner as State Rights Smith finally got over his fit of coughing and the hall became quiet. "In de fust place, de man who lies will knock a man down fur callin' him a liar jist as soon as a man who tells de troof. In de nex' place, if a man says you lie, an' you doan' lie, how do you prove you doan' by hittin' him?

"What men lack in argyment dey will try to make up either in ridicule or bulldozin'.

"When you h'ar of a pusson wid a confidenshul friend, you hev found somebody to be sorry fur.

"A man may hev your respect an' admiration fur half a century on general principles, an' yit lose all in half a day by refusin' to indorse your bank note.

"Moas' ebery man has his weak side, an' moas' of us, except de drunkard, ar' hypocrites. We hide our weakness, while he exhibits his.

"I like to believe all men honest, but I nebber take de same patent medicine fur liver complaint an' de toofache, no matter how de label reads.

"If eber I open a bank I shan't hunt fur a cashier widout any small vices. I hev seen de time when a chaw of plug terbacker stopped my hunger fur my neighbor's new pertaters.

"It ar' easy 'nuff to make friends in a new nayburhood. All you hev to do is to be a cheerful lender. Your enemies will appear when you stop lendin' an' begin to borrow. Let us now take de reg'lar purceedin's an' purceed to bizness."—*Detroit Free Press.*

Hinting a Proposal.

When a lover is approaching the goal of matrimony he sometimes finds it difficult to announce his intentions. In any such case, he might find it advantageous to adopt the following circuitous route, unless he can find another one still more roundabout:

A young native of Aberdeen, bashful but desperately in love, finding that no notice was taken of his frequent visits to the house of his sweetheart, summoned up courage to address the girl thus. "Jean, I wis here on Monday nicht."

"Ay, ye were that," acknowledged the girl.

"An' I wis here on Tuesday nicht."

"So ye were."

"And I wis here on Wednesday."

"Ay, an' ye were here on Thursday nicht."

"An' I wis here last nicht, Jean."

"Weel," said she, "what if ye were?"

"An' I am here the nicht again."

"An' what aboot it, even if ye cum every nicht?"

"What aboot it, did ye say, Jean? Did ye no begin to smell a rat?"—*Youth's Companion.*

Hints for Pall-Bearers.

When a man is asked to act as a pall-bearer at a funeral he ought to seek out the other pall-bearers before they assume their crape and their mournful air, and practice the lock-step with them for an hour or so, or at least until he can be confident that they are going to keep step when they lift up the coffin and start off with it. I was a pall-bearer recently, and my arms and knees pain me now with the recollection. When a party of pall-bearers take up a coffin and step out of time the weight comes principally upon the two end bearers, and it is no easy thing for two men to sustain by the shaft handles of a coffin the weight of the casket itself and the corpse within.

MISCELLANEOUS.

—Agricultural implements have been in such great demand in Manitoba that nearly every dealer has completely sold out.

—It is shown by official returns that the production of anthracite coal in Pennsylvania the last fiscal year was nearly thirty-six millions of tons.

—The total number of postmasters receiving less than $1,000 per annum is 50,582. Of that number 48,003 are paid between $400 and $520 a year.

—"Jones, do you know 'Rienzi's Adress?'" asked Smith. "No, I don't," was the reply, "but you might find it in the directory."—*Pittsburgh Chronicle.*

—It must be hard on a talkative woman to marry a barber. Whenever she'd think she had the last word, he'd be sure and have the "next."—*Charlestown Enterprise.*

—The largest cornfield in Florida is found in Volusia County. It consists of 300 acres and is what is known as the old Starke plantation at Spring Garden. It will yield from thirty to fifty bushels per acre.

—A young hopeful of five summers had stopped before a toy shop while out walking with his mamma. "You don't mean to buy me that wooden horse, mamma?" "Why not, darling. It's very pretty." O, yes, but it's too cheap."

—Stranger—"My stars! There's a land slide." Omaha Man—"Where?" "Up there." "Impossible." "It's there, I tell you, going yet. Look! Look!" "Oh! That's nothing but the pumps throwing Missouri water into the reservoir."—*Omaha World.*

—Mrs. Mat Crawford, living near Dranesville, Marion County, Ga., had seventeen hogs killed by one stroke of lightning one day last week. There were twenty-one hogs all huddled up near the house. After the lightning flash only four were found alive.

—"I have a poem, sir," he said to the editor, "which, if acceptable to you, I would like to receive some remuneration for." "Certainly; if we use it we will pay for it." "What are you paying for poetry?" "If it's good we give two circus tickets."

—The Macon (Ga.) library has an elevator which carries the mail from the street into one of the front windows. When the carrier blows his whistle the elevator drops to the sidewalk, the mail is put in and into the library it goes, and thus a walk up the stairs is saved.

MANGEL-WURZELS.

A Crop Whose Value as Food Far Surpasses That of Corn.

When preparing for a crop of mangels, I choose a good piece of land, that has a deep soil, and is a little sandy so that it will not bake up hard when the summer sun comes on it, but it must be dry and not boggy. As early in the spring as it can be got in good order to work I use a roller to crush the lumps down fine, before furrowing out. From 2 feet to 2 feet 6 inches from center to center is a good distance between the furrows, and the seeds are dropped about 8 inches apart in order to let the hoe pass between. In manuring for this crop I use 40 loads to the acre, of good rotten manure. I prefer that made from corn fodder, as it is less likely to have seeds of so many kinds of weeds that are in manure made by feeding hay. It is better to be a year old or more, as then the young plants will flourish in a dry spell. After the land is furrowed out, haul the manure and let it be spread right in the bottoms of the drills, and not too far ahead of the covering up again.

Plant the seeds close after the covering of the manure; 2 or 3 seeds in each place with the finger and thumb. If more seed no harm done, as in the soft fine soil they can easily be pulled out in the thinning, for which the best time is when the plants are large enough, and a good soaking rain has come. Be careful not to loosen the earth too much around the plant left, as generally after a good shower of rain the sun shines hot and would dry up the young roots. Plant from 3 to 3½ pounds of seed to the acre. Buy the seed of good reliable dealers. After the seed is planted it is a good plan to roll the rows, so as to press the earth down to keep it from drying around the seeds, and the seed will start to grow the sooner. In thinning out leave one to a place. The plants that are pulled out will do to fill in the places where the seed missed growing. In doing this be sure and have all the roots down as straight as possible. If the plants are of good size cut off the tops of the outside leaves as they would be sure to wilt and fall over on the ground. The straighter the newly set plants can be kept the better they will do.

During the last of the summer when grass is scarce, I strip off all the outside leaves and feed to the cows or sheep. This will help the roots to develop in size, and also furnish feed for the cattle. I let them stay in the ground as long as the frost stays away, but before the hard frosts come I get them up and store them away where they can not freeze and where I can get to them in the winter for use. A good way to do, if the cellar is small, is to pile them up against the end of the barn, secure them from frost on the outside, and have a small doorway cut through from inside. If fastened every time it is used the roots will be kept from freezing and the cows or ewes in lambing time will have needed food. Let any one try it and he will say it pays better to grow one acre of roots than four acres of corn. I would rather have them for my cows than six acres of corn.—*J. Mill, in Ohio Farmer.*

A Curious Old Anchor.

A curious old anchor, very probably lost by the early French missionaries, was found at the head of Green bay. It appears to have been constructed from a young maple tree having three branches from the root. Another bar was fastened on. Thus far it is like a round topped stool with four legs. On the bottom of these legs were fastened, with mortise and tenon, the flukes, which were bars of oak crossing each other.—New York Sun.

A FATAL DELUSION

The Fancied Security and Appalling Perils of People Revealed.

The eminent scientist and author, Dr. Joseph F. Edwards of Philadelphia, relates the following wonderful experiences:

"During my term as resident physician on the medical wards of the Philadelphia Hospital, it was a common occurrence for an ambulance call to be received from one of the down town station houses. Upon reaching the place designated, we would be shown a man or woman who has been found unconscious on the street and supposed to be intoxicated. He would be removed to the hospital, where he would linger unconscious for twenty-four or twenty-six hours and then die. In a majority of these cases a post-mortem examination would reveal a most horrible state of affairs which I will explain hereafter."

AN AMBULANCE CALL.

"A lady in apparently good health, who rarely complained and then only occasionally, of some slight and transient ill-feeling, as nearly every one does at some time or other, took a long walk with her husband, and upon returning home, feeling particularly well, went to her room to remove her bonnet, and, while standing in front of the mirror, fell to the floor in a convulsion, followed by twenty-four hours of unconsciousness and death without a return to consciousness. A post-mortem examination revealed the true cause in a most horrible form."

"A young married man for years suffered from dyspepsia, for which he consulted many physicians. After suffering in this way, and having no other symptoms of disease, he awoke one morning to find a very slight swelling, scarcely more than a puffiness under one eye. In less than a month he was dead.

Now the real and terrible cause of all these deaths was Bright's disease of the kidneys, and they might all have been avoided had the unfortunate victims known what a horrible malady was fastened upon them. But Bright's disease has no symptoms of its own. It steals into the system like a thief, and deceives its victim by showing the symptoms of nearly every other disease.

But what can be done?

Take it in time.

If you feel unaccountably tired; if you have peculiar pressing pains; if your appetite is uncertain; if your head aches occasionally; if your sleep is irregular; if the fluids passed are profuse or scanty, do not delay, but use the best known means for escaping agony and death before it is too late. For this purpose there is a remedy, and the only one that has ever proven absolutely certain. Hunt's Remedy has never been equaled, and it is the only absolute one known to the medical profession. There are thousands of men and women to-day who enjoy perfect health who would be in their graves had it not been for this wonderful remedy, and there are thousands of others who require it without an hour's delay. This is no idle statement, but truth drawn from cases which are beyond question.

LIKE A THIEF.

It is said that at a late hanging in Louisiana the Governor's special messenger arrived on the scene at the last moment bearing a reprieve, whereupon the fortunate culprit remarked: "No noose is good news."

LUCKY PEOPLE.

Winners of the Louisiana State Lottery Big Prize.

Two of the coupons of the ticket which drew the capital prize in the last drawing of the Louisiana State lottery are held by persons in this State. George Smith, a grocer, residing at the corner of Fifteenth and Kirkham streets, in Oakland, was lucky enough to purchase one of the coupons, and now rejoices in the receipt of nearly $15,000 as the result of his investment. Mr. Smith has long been known as a reputable merchant and as a prominent member of several German organizations of that city. The possession of such unexpected wealth in no degree affects his usual equanimity, and his demeanor under such circumstances proves him to be eminently fitted to bear such a stroke of good fortune. Some years ago, when beginning his present business in a small way, he contracted certain debts, which, on account of misfortune, he was never able to pay. The very first thing that he now proposes to do is to liquidate every dollar of his past indebtedness and again stand before the world, owing no man anything. In the spring he proposes to pay a last visit to the fatherland and to return to this country and continue his present business in Oakland.

The other coupon of No. 50,255 was sold to Mrs. Sam Fountain in company with another lady residing near Tehachapi, in this State.

In both instances within five days after the announcement of the drawing the money was in this city to the credit of the parties holding the tickets.

It is a singular fact that neither of the coupons were held by the original purchasers. The one held by Mr. Smith was first bought by Police Officer Anderson of Oakland and the other one was bought by Elmer Stearns, a telegraph operator at Tehachapi, and by him resold to the fortunate owner.—*San Francisco* (Cal.) *Chronicle, Sept. 3.*

Labor conquers everything except the walking delegate.

"I WOULD THAT I WERE DEAD!"

cries many a wretched housewife to-day, as, weary and disheartened, she forces herself to perform her daily task. "It don't seem as if I could get through the day. This dreadful back-ache, these frightful dragging-down sensations will kill me! Is there no relief?" Yes, madam, there is. Dr. Pierce's "Favorite Prescription" is an unfailing remedy for the complaints to which your sex is liable. It will restore you to health again. Try it. All druggists.

A small hand is said to be a sign of refinement. How vulgar, then, must be the man who holds four aces.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

Piso's Remedy for Catarrh is agreeable to use. It is not a liquid or a snuff. 50 cts.

Try Germea for Breakfast.

THE SAN FRANCISCO MECHANICS' FAIR.

The twenty-second annual Industrial Exposition of the San Francisco Mechanics Institute, opened at their great pavilion in that city on Sept. 1st, and will continue until October 8th. The displays are even more extensive and elaborate than usual, and especially is this true of the exhibits of fruits, vegetables, grain, etc., made by the different counties of the State. Even pioneer Californians are not fully aware of the wonderful and varied resources of this great country until they see grouped together in one grand display, the products of the vineyard, orchard and farm. But aside from these important displays there is a creditable showing of improved machinery and implements, of every description, showing that everything the world produces in this direction may be had as readily and as cheaply in California as in any other section. Among the notable displays may be noted the following:

AGRICULTURAL IMPLEMENTS.

The largest space devoted to any one firm is occupied by the display of agricultural implements of Messrs. Baker and Hamilton. The extreme right side of the building for a length of 100 feet and a depth of twenty-five feet is full of large, well-made machinery, much of which is kept continually in motion. The combined harvester, stationary or road engines, occupying a central position, has been tested repeatedly, and this season from Yolo county, Salinas valley and other places many testimonials as to its efficiency have been received. The Benicia header for cutting grain, made at the works of the firm at Benicia, is also shown in motion, and is generally allowed to be the best machine of its kind on the coast. A new four-gang plow is a model of compactness and utility. The wheels can be raised or lowered independently; the draft is from the center and by a trifling alteration it can be changed from a four to a three-gang plow. Young's combined harvester in motion, and the Tiger and Benicia mowers, also in motion, are three fine machines, well worthy of inspection by the large grain-grower anxious for speedy and cheap labor-saving machines. In the way of road-carts, the well-known firm of Sacramento, San Francisco and Benicia, has some novel and useful vehicles. The Benicia road-cart is a good, plain, substantial cart. The "Modoc" is a novelty which is as free from any horse motion as a four-wheeled vehicle, while for breaking in colts it is unsurpassed. The variety of the machinery and the class of workmanship are a credit to the industries of the Pacific coast, and it is no wonder, when such machinery is turned out, that the firm of Baker & Hamilton has acquired the reputation which it possesses throughout the coast as well as beyond the Rockies.

BYRON MAUZY PIANOS.

One of the handsomest displays is that of Byron Mauzy of 922 Market street, sole agent for Sohmer, Peck & Son, Newby & Evans pianos. The ash, mahoghany, rosewood and ebony cases attract much attention.

A brother in prayer meeting in a neighboring town, the other night, prayed for the absent "who were prostrated on beds of sickness and sofas of wellness."

USEFUL AND HURTFUL MEDICINES.

There is a certain class of remedies for constipation absolutely useless. These are boluses and potions made in great part of podophyllin, aloes, rhubarb, gamboge, and other worthless ingredients. The damage they do to the stomachs of those who use them is incalculable. They evacuate the bowels, it is true, but always do so violently and profusely, and besides, gripe the bowels. Their effect is to weaken both them and the stomach. Better far to use the agreeable and salutary aperient, Hostetter's Stomach Bitters, the laxative effect of which is never preceded by pain, or accompanied by a convulsive, violent action of the bowels. On the contrary, it invigorates those organs, the stomach and the entire system. As a means of curing and preventing malarial fevers, no medicine can compare with it, and it remedies nervous debility, rheumatism, kidney and bladder inactivity, and other inorganic ailments.

There is nothing consolatory for the patient suffering from a severe cold in the head to be told that "colds always attacks the weakest spot."

DANGER AHEAD!

There is danger ahead for you if you neglect the warnings which nature is giving you of the approach of the fell destroyer—consumption. Night-sweats, spitting of blood, loss of appetite—these symptoms have a terrible meaning. You can be cured if you do not wait until it is too late. Dr. Pierce's "Golden Medical Discovery," the greatest blood-purifier known, will restore your lost health. As a nutritive, it is far superior to cod liver oil. All druggists.

Young Housewife—What miserable little eggs again! You really must tell them, Jane, to let the hens sit on them a little longer.

WHAT BRANDRETH'S PILLS DO.

In BRANDRETH'S PILLS the true life medicine has been found, composed as they are of numerous vegetables so combined that each multiplies the virtues of the rest. They never can do any harm. Their action is always the same, no matter how long or in what doses they are taken. They purge away the waste particles of the system. They recruit the animal vigor and arrest the progress of decay. They purify the blood. They stimulate the liver. They invigorate digestion. They open the pores. They make the bowels do the work of the kidneys, thus giving those organs an ofttimes needed rest. One or two at night for a week will demonstrate their power and is generally sufficient to cure ordinary diseases.

People are not apt to feel proud of all the good traits their children show, and wonder where they got all their bad ones.

PLEADING FOR THE BOYS.

A Philanthropic Boston Clergyman's Gratifying Victory.

There is one of our churches—it won't do, for reasons of state, to tell which church it is—that has an entry-way or vestibule, with a flight of stone steps, which is found very convenient by small street urchins, newsboys and the like to rest in, to fall asleep in sometimes, and, horrible to relate! to crack peanuts in. The litter of shells left by this juvenile congregation was the occasion of terror and disgust to the honored sexton of the church, a person of rather set notions, who proceeded to take the necessary steps to clear the vestibule of the nuisance, driving the boys away and warning them with dire threats never to come again.

It happened, however, to the sexton's great astonishment, that the pastor of the church showed a disposition to side with the boys. He liked to find the little fellows there; he liked to think of the church over which he ministered providing a safe harbor, with nothing in it of evil influence or suggestion, for these human waifs. Somehow the old church seemed to be, in his mind, fulfilling the purpose for which it was designed when it sheltered from the wind the street boys with its old walls in the winter, or cooled and rested their hot and weary bodies with its dark stones in the summer. The minister talked to them sometimes, and felt that their resorting there gave him a sort of friendly hold upon them.

So he protested with the sexton.

"Couldn't you come around once in awhile after the boys have been there and sweep the steps off?" the pastor ventured to ask.

Sweep the steps off for the benefit of those young hoodlums! The sexton managed to restrain his emotions, but with difficulty. No; he thought it would be quite impossible for him to keep the steps clear of the rubbish that those boys left there. It was too much to ask, and, as the matter was, the condition of the steps was a scandal to the church. He proposed that a railing or some other means be provided that would effectually shut out the interlopers.

It was the minister's turn to be stubborn. He intimated that the boys should have a chance to come there as long as he remained pastor of the church. He asserted his authority. The sexton appealed from the decision of the pastor to the governing committee of the church. There the matter was argued; and in spite of the pastor's appeal in the boys' behalf, and his insistence that their habit of resorting to the church steps might give him an opportunity to do much good, the committee thought more of the church steps than they did of the boys, and decided the dispute in the sexton's favor, instructing him to drive the boys away and take the necessary steps to keep them away.

Then there was a ministerial crisis right away. The pastor appealed the matter to the church. A meeting was held, and the question considered in all its bearings. The pastor pleaded the case almost with tears in his eyes, and certainly with humanity in his heart. He carried the day, and was triumphantly sustained by the church. And now, it is said, you may find plenty of boys, almost any day, lingering around the steps of the church resting and gossiping, but few peanut shells. As the minister's particular friends they do not betray his confidence in them.—*Boston Transcript.*

REFORM IN JAPAN.

American Ideas Gaining a Strong Foothold in That Country.

Americans have a general knowledge that there have lately been great reforms in Japan, but it is not so well known that the lives of the present and late Mikado together form one of the most startling chapters in modern history. Only thirty-seven years ago Japan was not really an empire; it could hardly be said to have a central government. The ancient political system had completely broken down and nothing else had taken its place. At Tokio the Tycoon held his court, but his power was weak and local; at Kizoto the Mikado had even less power. There was political chaos. By the operation of the old feudal system the Daimios, or local nobles, had attained a practical independence, each ruling his own territory despotically—in short, Japan was a loose and almost lawless confederacy. This is no place to describe the series of masterly measures by which the Mikado destroyed the local sovereignties; suffice it that it was thoroughly done, the Daimios were thoroughly disarmed, and the revived empire of Japan entered on an extraordinary era of progress. English and American ideas were rapidly adopted. Even the European dress was introduced, though travelers with an eye to artistic effect think the Japanese ladies have lost more than they gained by the "reform."

A serious attempt was even made to introduce the English language, by reason of its greater convenience in writing; but the learned men soon decided that the irregularities of English spelling and grammar more than offset the other advantage. Japan is already known to us almost as well as the countries of Europe, and their appreciation of Americans grows with acquaintance. They honored General Grant as they had never done any foreigner, and on that occasion the Mikado for the first time appeared in public—an astounding innovation in Japan. Soon after he publicly awarded the prizes at the Japan university, and since then has lived much like the monarchs of Europe.—*Harrisburg Telegraph.*

VISITING THE CONVICTS.

Pathetic Scenes Witnessed Nearly Every Day at Sing-Sing.

An old Irish woman, her face covered with wrinkles, tottered into the room. She was accompanied by a young woman carrying a baby, while a little child walked by her side. They seated themselves on one of the benches, and soon a tall fellow entered and approaching the old woman he stooped over and kissed her. She partly arose from her seat and putting her hand on the man's shoulder said brokenly: "Ah, me boy!" Then she began to cry, and rolling her handkerchief into a ball, mopped her eyes with it from time to time. The man turned to the younger woman, who was his sister, and, indifferent to his mother's sorrow, began laughing and talking and playing with the children. He took the baby in his arms and kissed it while it crowed over him and poked its little fingers into his eyes.

On another bench in one corner sat a plump-looking Irish girl with a pretty face. She was not alone long, for soon a convict peered sheepishly through the doorway, and recognizing her advanced awkwardly to her side. There was a resounding kiss, and the two sat down and talked cheerfully together. There was not a vestige of sorrow between them, notwithstanding they were both very young and only married a short time before their misfortune overtook them. There is no time to indulge in sorrow in a meeting of thirty minutes' duration once in two months. They have only time to talk and hope, and so they talked.

On the same bench there sat a group which ordinarily should be beyond a thought of hope. There were two women, the oldest the mother of two convicts, the youngest the wife of one. Both the young appeared together and smilingly and affectionately received the greetings that awaited them. They were the two Kahout brothers who were some time ago convicted of arson and sentenced to confinement in the State prison for life. The oldest is only twenty-seven and the youngest twenty-five, and both have nothing before them but a long waste of years. Yet the thirty minutes allowed was spent in the most cheerful conversation, and the eyes of all gleamed happily when the moment for the parting kiss arrived.

A certain convict, considerably above the ordinary grade, was visited by his wife, who was richly, though modestly, dressed. She was accompanied by their little girl. In such cases the warden supplies the man with a blue blouse to conceal the prison garb, believing that it does no harm to shield a sensitive man from unnecessary mortification, while the sensibilities of little children advancing toward a reasoning age are thereby spared disagreeable impressions and memories in years to come. The convict entered and affectionately kissed his wife and child, with whom he conversed throughout the thirty minutes to which they are limited on such occasions. At last the moment for parting came. As he moved away the child took hold of his blouse, looked up appealingly into his face and asked: "Papa, when are you coming home?"—*N. Y. Tribune.*

A Monster Universal Lathe.

One of the finest and most powerful tools that mechanical science has yet achieved has just been finished at Mulhouse for the French navy. It is a two-carriage universal lathe which is a complete machine shop in itself, being capable of performing the most varied operations—such as mortising, shaping, boring and molding—with the most perfect accuracy. It is wonderfully adapted to the delicate and complicated working of pieces for armor-plating turrets, of helix supports, of rudders, of cranked shafts, of pistons, etc., for modern war vessels, and it handles and shapes immense masses of steel almost as skillfully as a carpenter carves small blocks of wood. Its weight is more than three hundred and forty tons, and it is driven by an engine of twenty-five horse-power. Comparison of this tool with one of seventy-six tons, which was a mechanical marvel some twenty-five years ago, gives a striking illustration of the almost incredible progress of our generation.—*National Labor Tribune.*

The Federal Supreme Court.

Every thing about the Supreme Court is impressive and awe-inspiring. The semi-circular chamber, with its stately columns of mottled Potomac marble, its half-domed roof, lighted by skylights, and the rich upholstery of the sofas arranged upon the sides for the accommodation of spectators, recall historic scenes, glorified as they are viewed through the dim mist of time, and its walls seem ready to echo the voices of the past. The appearance and bearing of the nine elderly gentlemen who sit in a row upon the raised platform behind a long desk, clothed in their black silk robes, the absolute silence enjoined upon all not having to address the court, and the subdued monotones in which the business is transacted make one feel that here at least are gravity and attention befitting the dignity of a great Government.—*American Magazine.*

—A recent analysis of a popular hair "renewer" shows that it was made of sixty grains of sugar of lead, sixty grains of sulphur, a little glycerine and water, with a drop or two of perfume. The sulphur gradually combines with the lead, forming a brown or black sulphide of lead, which slowly darkens the hair—slow in action that the purchaser may persist in its use. Cost, three and a half cents per bottle; retail price, one dollar.

RELIGIOUS AND EDUCATIONAL.

—Piety belongs to the wise, and is a great promoter of happiness.

—Since 1852 seventy-five Sandwich Islanders have gone as foreign missionaries.

—Trinity church, New York City, will erect a mission building at 209 Fulton street, five stories high, to cost $400,000.

—A writer in the *Nineteenth Century* proposes the establishment of a well-endowed kitchen college for the systematic training of domestic servants.

—In the morning when you awake, accustom yourself to think first upon God, and something in order to His service; and at night let Him close thine eyes.—*Jeremy Taylor.*

—Gain a little knowledge every day; one fact in a day. How small a thing is one fact—only one. Ten years pass by. Three thousand six hundred and fifty facts are not a small thing.

—There are seventy-six guilds in London endowed by wealthy benefactors for the benefit of different trades. The annual income of these endowments amounts to $1,000,000.—*Chicago Advance.*

—In yielding to one temptation the way is opened for so many; nothing will serve us day by day but a humble trust in Him who is able to keep us from falling, and earnest striving to watch as well as pray.—*Rural New Yorker.*

—The New York Chinese Mission has between 4,000 and 5,000 Celestials in its Sabbath-schools. About sixty have joined the various churches. The first Sabbath-school for these people was founded in New York eighteen years ago.—*United Presbyterian.*

—It is said that the Christian natives of the South Sea islands prepare their Sunday food on Saturday. Not a fire is lighted, neither flesh nor food is baked, nor a tree is climbed, nor a journey by land undertaken on God's holy day.—*Indianapolis Journal.*

—Less than a score of years have passed since the founding of the First Congregational Church in Springfield, Mo., and already they have a strong and flourishing college of conspicuous promise, and five churches with an aggregate membership of 554.—*Public Opinion.*

—During the past year from $70,000 to $75,000 have been raised from all sources for the College and Seminary of the Reformed (German) Church at Lancaster, Pa. For the Nevin Memorial $40,000 is needed; for the endowment of the Alumni Professorship, $20,000, and for the chemical laboratory, $20,000.—*N. Y. Witness.*

—Like those fair New England lakes, greened around with meadows, of translucent depth and silver sand, on whose surface armies of white lilies, golden-crowned, unfold to the sun, so the Christian's heart should be. All its feelings and affections should open into life like those white lilies, and deep amid the blossom petals should be seen the golden crown of love.—*Beecher.*

WIT AND WISDOM.

—The fewer our wants the nearer we resemble the gods.—*Socrates.*

—Revenge is sweet, but it leaves a bad taste in the mouth.—*Philadelphia Call.*

—Doubt others more and yourself less, and you will have more back-bone to sell.—*Pomeroy's Democrat.*

—How much better is the love that is ready to die than the zeal that is ready to kill.—*Thomas T. Lynch.*

—All men try to get the earth, but the earth gets them. This is not a joke; it is the grave truth.—*Peoria Transcript.*

—Many men have a knack of making and saving dollars, but know absolutely nothing about the best things of this life.—*Drovers' Journal.*

—Good temper, like a summer day, sheds a brightness over every thing. It is the sweetener of toil and the soother of disquietude.—*N. Y. Herald.*

De Baggs—Ponsonby, me boy, what do you do in this weather to keep cool? Ponsonby—Nothing. De Baggs—By Jove! I don't know but that's a good idea.—*Pittsburgh Dispatch.*

—They Were Both Shoers.—

Jones, he keeps a blacksmith shop,
His wife a poultry pen;
Jones, he shoes the horse,
And his wife she shoes the hen.
—*Whitehall Times.*

—Up in the choir the tenor was making love to the soprano in muffled voice, while the preacher was waxing eloquent in the pulpit below. "You're a dear!" the young man had whispered. "A doe, rather," the soprano smiled back. "Oh, yes," returned the tenor, "you're the do, fa mi." She killed him with a look.—*The Farmer and Manufacturer.*

—A Michigan girl while picking blackberries, met a black bear among the briers. She turned to run and tore her dress on a brier so as to expose her patent wire bustle. The bear, mistaking the bustle for a circus cage, struck for tall timber, leaving the girl to go without hugging until a dry goods clerk closed his store at nine o'clock the next evening.—*Newman Independent.*

—It is a great gift to be born rich in the eyes and ears. Some men have carried before them an endless procession of beauty. There are charms for them where others perceive barrenness. There is a concert in the air all the time for those whose ears are tuned aright. Trees harp for them, winds roll their tones musically, and birds and insects fill up the orchestra.—*Rural New-Yorker.*

AN INTERESTING CASE.

A Desperate Attack of Hydrophobia Cured With Chloroform.

Dr. V. G. Miller, an old army surgeon, and practicing physician of a quarter of a century's experience, said recently that he had never been called on to treat but one case of hydrophobia when it was beyond a doubt that it was a case of rabies. "This," he said, "was when I first began the practice of medicine. I was called one night to see a man who, the messenger said, was suffering with intense spasms, and nothing that could be done would relieve him. I took with me my medicine case, and also put into my sack bags a bottle of chloroform containing about three ounces. When I arrived I found the patient quiet, with a rapid, irregular pulse, but in a few minutes he was seized with a paroxysm which it took the combined strength of myself and the family to control. He frothed at the mouth, snapping and snarling like a dog. As soon as he was quiet I began to ask questions of the family, and soon found that a few days before he had been bitten by a strange dog that came into the cow lot one morning and was snapping at the cattle. He attempted to drive the animal out, but the dog turned on him and, jumping up, inflicted a slight wound on his left arm. It was nothing more than a scratch, had healed up in a day or so, and nothing more was thought of it. From the description of the dog I was confident that it was the same that a few days before had been killed in the neighborhood, undoubtedly mad, and I could no longer doubt what was the matter with my patient.

"His cries when he went into the spasms were terrible to hear. I gave him various remedies to quiet him, but they seemingly had no effect. At this time I happened to think of the bottle of chloroform. I had then been at work on the patient for over two hours and had not been able to give him any relief whatever, and I was pretty well assured that the man would die anyway. I was alone with him, expecting members of the family, who would not know the difference, and I determined to try an experiment, either to quiet the man or kill him with the chloroform. When his next spasm came on I saturated a cloth with the liquid and placed it to the patient's nose and mouth. He struggled for a long time, but at last the drug did its work, and he sank back insensible. He soon came to, the spasm still on him, and I again treated him the same way. This I continued during the remainder of the night and until nine o'clock the next morning, using up all the chloroform I had and sending for a new supply several times, using in all about three pounds. At nine o'clock the next morning the patient went to sleep. When he wakened up he acted like a person dazed or half foolish. A slimy, stringy secretion ran out of his mouth continually, and he seemed to have no desire for food, and for a long time would not swallow. He gradually grew better, and in about three weeks' time he was up and about. I knew the man afterward, doctored him and his family. He never had another attack, and some eight years afterward died with consumption."—*Kansas Cor. St. Louis Republican.*

INDIAN CLUB EXERCISE.

An Excellent Way of Developing the Physical Strength.

The frequent practice with Indian clubs, by students, clerks and others of sedentary habits, is worthy of careful attention. Although in the exercise itself, only that portion of the body from the hips up is brought into active motion, yet it indirectly affects the whole body.

For enlarging the capacity of the chest and strengthening the wrists and arms, Indian club exercise is one of the most beneficial of gymnastic performances known. There are no less than twenty different positions or exercises with the clubs. So natural and graceful are the manifestations that one kind of exercise promptly suggests another.

It is important, when using the clubs, to stand firm and square on the feet, toes turned slightly outward, the body erect, back drawn in and the breast thrown forward. The club should be grasped firmly but not too tightly, allowing free-and-easy play of the wrist. In swinging the clubs, always bear in mind the arc of a circle. This will not only make the movements more graceful but will also help to prevent injury from a sudden pitch of the club.

Beginners should not commence by using heavy clubs; light ones are more easily handled, and one is more likely to continue the exercise than if he tired himself by the use of heavy ones. A pair weighing from five to ten pounds each are sufficient to commence with. The object is not to become a professional, but to improve the health by judicial and proper exercise.

As to time of exercising, the best time is from fifteen to twenty minutes before breakfast and for about the same time before retiring at night. The clothing should be light and loose fitting, allowing full and easy play of of the muscles. The exercises should be practiced daily.—*Golden Rule.*

—An eloping Missouri woman left this touching epistle for her husband: —"Dear John—I am gone and you will never see me again. I hope that my leaving will not cause you any unnecessary sorrow, and after death claims you as a victim may the flowers bloom on your grave and emit their sweets and fragrance."

FAMILY MOURNING.

The Wearing of Black Apparel Not a Reliable Sign of Sorrow.

For one I believe that the custom of wearing mourning apparel in the way of a badge of sorrow and affliction is going out of use, and that the time will come—and possibly may not be far distant—when such a practice will have become obsolete. Various reasons may be offered why Christian people should discountenance such a custom altogether. It is said that in European countries black is employed generally, because it represents darkness, unto which death is like, as it is a privation of life. In China, on the contrary, white is used, because the people hope and believe their dead have gone to Heaven; the place of all-purity. In Egypt yellow is worn, because it represents the decaying of flowers and trees, which become yellow as they decay. In Ethiopia brown is used, since it denotes the color of the earth from whence we came and to which we return. In certain parts of Turkey blue is worn, because this color represents the sky, where the people trust their dead have gone; but in other portions of the empire blue and violet are adopted, since these colors, being a blending of black and blue, represent, from one point of view sorrow; from the other, hope. Now, in reality, to wear mourning signifies nothing and answers no valuable purpose. It is in truth no certain index to the state of the mind. To see an entire family clothed in black a person would naturally conclude that the family are true mourners, needing consolation in their sorrow. Yet what is the fact in a large majority of instances? Pope speaks of those who bear about the mockery of woe:

"To midnight dances and the public show."

And, alas! mourning apparel is but too often "the mockery of woe." The great expense incurred in providing mourning garments is also a consideration of weight which should not be overlooked. The clothing of an entire family, and especially where the family is large, in mourning garments is no trifling matter. Of course the wealthy and such as can afford the expense make no account of it, but to those who are poor or are in moderate circumstances it is a serious tax, and in fact proves nothing short of a most grievous pecuniary burden. And in many cases the custom of wearing mourning amounts to a prodigal waste of money. Many families are abundantly supplied with clothing, the wardrobe is filled with superfluous garments, and speedily, perhaps, the mourning apparel is laid aside so that it is the same as money thrown away. An estimate made of the amount of money expended in purchasing such apparel would astonish, I fancy, almost any community in the land. Besides, what is there in the good moral influence arising from such a custom to balance this vast expenditure?—*George Newell Lovejoy, in Good Housekeeping.*

ALL ABOUT GOLD.

Hints for Persons Who Are About to Purchase Mines in the Far West.

Auriferous gravels can of course only exist where auriferous quartz veins existed before them. Without a bank to draw upon in the first place, you can not possibly get your bullion. In California the materials that make up the gold-bearing gravel beds were washed down by streams and floods in the Pliocene period from the mountain tops above and deposited in the basins of ancient lakes and rivers now no more. But Pliocene gravel would, under natural circumstances, long since have been washed away. It has been preserved in California to the days of Bill Nye and Jones of Calaveras, by a peculiar accident which those amiable gentlemen would no doubt regard as "almost providential" for the mining interest. Toward the close of the genial Pliocene epoch, that usually well-conducted chain, the Sierra Nevada, suddenly burst forth "on the spree" into volcanic activity on a grand and generally Western American scale. Like the cowboys who "paint the town red" in their simple joy, it covered the auriferous gravels with showers of pumice, ashes and pebbles, and finally capped the entire mass with a broad sheet of solid basalt and lava. Not only did this great prehistoric eruption overwhelm the mastodons, Pliocene lamas and other extinct animals whose bones and teeth still pleasantly diversify the California diggings (giving incidental occasion to the celebrated society upon the Stanislaw), but it also buried beneath its ash and lava the famous and much-debated Cavaleras skull, which, if genuine, is the oldest fragment of a human body now known to exist anywhere. The capping of lava varies from one hundred to one hundred and fifty feet in thickness, and it has preserved from erosion the subjacent gravel which would otherwise have been swept away, and so rendered possible the very existence of the California diggings and the town of San Francisco.—*Cornhill Magazine.*

—A Fourth Warder, says the New York *Sun*, stopped a dignified man on the Bowery recently, saying: "Say, young feller, give me a light, will yer?" "I will give you a light," said the gentleman, "but I am not a young feller, and that is not the way to address me." The Fourth Warder got a light, and as he handed the cigar back, with his politest manner said: "Thank you, pop."

—The following sign adorns the front of a boot-blacking establishment on Blackstone street, Boston: "Pedal teguments artistically illuminated, lubricated and embellished for the infinitesimal compensation or remuneration of five cents per operation."

CARE OF THE SKIN.

A System of Diet and Exercise That Will Assure a Good Complexion.

Plenty of exercise, good, wholesome food, well digested, will do more for the complexion than all the toilet appliances in the world. Use the flesh brush with vigor, walk, ride, row, run, giving every muscle in the body something to do; eat beef, brown bread, cereals, fruit, vegetables and milk, and a good complexion must be the result.

Good, nourishing food must be eaten and well digested; the circulation equalized by plenty of exercise in the open air and frequent bathing. Each woman must be a law unto herself as to the number and temperature of the baths, as what strengthens and braces up one may be found to weaken and enervate another.

For those who have vitality enough to react, the cold sponge bath in the morning will be found a delightful tonic. Delicate women will find that by beginning them in the warm weather they will, in most cases, be able to continue during the entire year. A handful of sea salt dissolved in the water will do much to strengthen the weak chest or back. In many cases the hot bath at night quiets the nerves, refreshes the body, and induces sleep, but care should be taken not to remain in the water too long; otherwise it will be found debilitating.

Distilled water is, of course, the best, but as all can not—like Queen Victoria—afford so expensive a luxury, it will be found that clean rain water or any soft water will do nearly as well. Those who can not obtain either one of these may use a few drops of ammonia, which will make the hardest water soft and clean off all impurities. A box of powdered borax is also an indispensable article upon the toilet table; a pinch of this will soften the water and is said to whiten the skin.

Oat meal used externally and eaten frequently is very beneficial to the skin, as are also cracked wheat and other cereals. Put a handful of oat meal in a bowl and pour a cup of boiling water over it. When this is settled wash the hands and face in the starchy water that rises to the top of it. The continued use of this for a week and the wearing of gloves at night will soften and whiten the roughest and darkest skin.

Ladies with oily or greasy skins may use, sparingly, a few drops of camphor in the bath, or a few drops of diluted carbolic acid. The latter removes the odor of perspiration from the body and leaves a clean, wholesome smell. Care should be taken that it is not used too strong, as it is not only poisonous, but the odor is very offensive to some people. Borax and glycerine combined are used with good effect by some ladies, while thoroughly disagreeing with others. Glycerine alone softens and heals, but used too frequently will darken the skin and make it very sensitive; the borax obviates this and has a tendency to whiten.

To remove tan and sunburn use a preparation composed of equal parts of glycerine and rose-water, to which add the juice of two lemons after having strained it through fine muslin. More or less rose-water mey be used to make the preparation the required consistency, as it is rather disagreeable if sticky. Fresh freckles may frequently be removed by touching the discolorations with a tiny camel's hair brush dipped in lemon juice.

Finely powdered pumice-stone, which may be had at any druggist's, is very efficacious in removing all superfluous and roughened skin. Rub the hands and face thoroughly with it, dry, then wash off with tepid water and soap. The use of warm water is also very beneficial; some people go so far as to claim that the continued use of it will not only preserve the skin, but prevent wrinkles.

The proper toilet observances at night should be considered as a personal duty.—*Home Knowledge.*

SMALL BEGINNINGS.

The Delight Men Take in Relating the Story of Their Progress.

Man is made in the image of God, and his mind is peculiarly interested and impressed by this feature of the Divine handiwork. And when, on a far humbler scale, it characterizes his own works, he is greatly moved. Witness the delight of the school-boy when a handful of snow rolled patiently along the garden becomes a huge lump, taller than himself. Witness the satisfaction of some laborious writer, who for years upon years has been toiling at some dictionary, or a history of the world, or a philosophy of the universe, or some such task, and at last sees the slender first day's page multiplied into a work of a dozen enormous volumes. A successful man of the people who founded an institute in a provincial town in Scotland, placed in it a little green box, more interesting to him than to the public, because when he started in life it contained the whole of his earthly possessions. In the hall of a splendid mansion on the edge of Loch Lomond I have seen the picture of a little sailing vessel, which carried the owner and all his goods when he set out for the East to begin what proved a vast and most lucrative business. And how often at firesides, or dinner tables, in the course of friendly saunters by the way, do men who have acquired a position delight to rehearse the story of their progress; and how interested are most of us in hearing or reading how the gulf was spanned between the lawyer's first brief and the woolsack, or the doctor's first fee and the baronetcy, or, in the case of the American President, between the log cabin and the White House.—*Quiver.*

ENERGY REWARDED.

How Some Enterprising Men Have Made Fortunes on Trifles.

Colonel H. W. Pinckney, in a newspaper published at Atlanta, Ga., relates the following incidents, which came under the writer's own observation, where success trod closely on the heel of perseverance and industry: A man can make a living, and also money, in hundreds of different ways in this country, and it is a mighty good thing that this is so, else over-production would be the rule, not the exception. I know a man who is getting rich out of baby swings. It's a simple, cheap thing to make, and he started in a simple and cheap way to make them, his entire outfit of tools comprising two saws, two saw-benches, a draw shave, two hand-planes, a brace and some bits, a rough work-bench. He didn't stand around with hands in his pockets waiting for somebody with capital to come along and boost him. Not much. He thought these swings would sell so he made one and peddled it round until he found a purchaser. Then he made another and sold that, and thus he kept on until finally people began to think his swings were a good thing to have in the family and they began to inquire for them. He started eight years ago, and alone did all the work of making and selling them. Things with him are very different to-day. He has a shop two stories in height, and machinery for sawing, planing, boring, mortising, turning and sandpapering the material entering into the construction of these swings. In that shop forty men find constant employment, and, as I said before, the owner is getting rich out of it. Counting the wives and children of the workmen in that shop, there is a population of nearly or quite one hundred and fifty making a living out of one man's idea that a baby swing would sell. A baby swing is not a very big thing, but it in to this case big enough to keep quite a little village busy and comfortable. A step-ladder is a mighty handy thing to have around the house. Five years ago three men, by the closest kind of scraping, twisting and borrowing, managed to get together five hundred dollars. They bought some lumber, rigged up a circular, or buzz saw and started in to make step-ladders. For two years it was a struggle of the hardest kind. There came a change. A prominent house-furnishing goods firm one day wrote them for prices on five thousand ladders. The size of this possible order nearly took them off their feet. This was the turning point in their business career. Within a month from the delivery of these five thousand ladders they had contracted with the same house for a monthly supply of two thousand five hundred. They were on their feet now, and began to push things. About fifteen years ago, in one of the big planing-mills in Chicago, a strip of board catching, in some unaccountable manner, on a buzz saw, was hurled with violence against the leg of one of the workmen, breaking it and badly mangling the flesh. The injury resulted in incapacitating the man for performing the labor required of him in the mill, and he was compelled to seek other means of livelihood. He built, after his own ideas, a scroll or fret saw, foot power, and rigged up a seat on it, as he was unable to stand for any length of time, and began sawing out and putting together articles for household ornament and utility. After a time he added to his scroll saw a light boring attachment and then a little turning lathe. Then he bought a cheap set of carver's tools. Now, the point I wish to make is this: Capital, in large amounts, is not necessary in the founding of industrial enterprises. A good deal of pluck and energy, and unconquerable perseverance are better than money, because, having these, money becomes the result, not the means, of success. Don't wait for the establishment of big enterprises with heavy capital, but start little ones in a modest way, and then let them grow, as the majority of them surely will.—*Scientific American.*

—A young couple in Hardin County, Ky., wanted so much to get married, in spite of parental opposition, that they started from home on a recent Sunday afternoon, walked in the broiling hot sun twenty miles across the country to Upton station, where they caught a train late at night for Louisville. When they arrived in Jeffersonville they were so thickly covered with dust and coal soot that they were thought to be negroes, but they washed up and were married.

—While Mrs. Milton Yohn, of Carnarvon, Pa., was cooking beefsteak for dinner she heard a peculiar snapping and cracking sound proceeding from the stove. She turned and stood spellbound at what she saw. A snake was turning and twisting and frying in the pan with the beefsteak. It writhed and contorted itself for a moment and then sunk into the skillet dead. It is thought to be a warning to housewives not to fry steak.

—A party of Japanese have bought four hundred acres of land in the foothills near Campo Seco, Calaveras County, Cal., and they propose to irrigate through a mining ditch from the Mokelumne river and convert it into a tea farm. It is said that Japanese have experimented with tea in the vicinity and proved a success.

—A young man in Leominster caught a rat in a trap and then invited his friends in to see his dog kill it. The rat sought safety by running up the young man's trousers leg as soon as liberated and is still alive.

INYO INDEPENDENT.

County Official Paper.

C. Mulholland,
EDITOR & PROPRIETOR.
PUBLISHED EVERY SATURDAY.

INDEPENDENCE, CAL.

SATURDAY NOVEMBER 5 1887

The *Alta* is making a strong effort to have the next National Democratic Convention held in San Francisco. Since the Knights Templar Conclave was held in San Francisco four years ago it is the most popular city in the Union for large gatherings of strangers. Every such gathering serves to make better known the wonderful resources of our State and its incomparable climate. Doubtless there would be many men in the Convention intelligent enough to note and appreciate the great inducements California offers to settlers, and on their return to the East would make known to others what they had learned while here. The *Alta* deserves from all parties and all citizens a hearty support in its effort to have the Convention held in San Francisco.

An Old Hand.

Robert F. Morrow, the San Francisco jury briber; is no novice at that kind of work. Twenty four years ago he was exposed in open court in Virginia City as guilty of bribery. The Carson *Index-Union* says: In 1863 a case, wherein the Savage Mining Company were defendants, was tried in Nevada. R. F. Morrow was Superintendant of the Company.

While the trial was in progress a witness came upon the stand to testify, and, after being sworn turned to the Court and said: "Your Honor, before commencing my testimony, I would like to hand over $500 in gold that has been paid me by Mr. Morrow, the Superintendant of the Savage Company to leave town and not testify in this case."

R. F. Morrow sat in Court in front of the Judge and made no denial.

The Court made very severe comments upon the disgusting corruption that developed itself in this case, but neither the counsel nor Mr. Morrow made the slightest attempt to deny the statement of the witness. The money was counted out upon the Judge's desk, and he ordered the Clerk to take charge of it.

Morrow escaped the penetentiary then by further practice of the crime for which he ought to have been sent there.

A PLEASURE CITY BY THE SEA.

Where a Perpetual Picnic Prevails—Amusements Found at Brighton.

To-day finds me down at Coney Island, this magical city of pleasure by the sea. Here the world seems all holiday time. A perpetual picnic prevails, and it is difficult to conceive of care. In the first place, it is a perfect day. Nature never fluttered a fairer leaf from the folds of her book. The shadows on the sea are as varied as a Florentine mosaic. The purple of a pansy away off there where the sun is clouded, while here at our feet the breakers fringe the golden sands with silver. A gleam of sapphire, like the bluest break in a showery sky, has fallen athwart the main distance, and through it a white-winged boat, full-sailed, goes courtseying down the wind. A haze hangs over all, like the mist that rises from a meadow at dawn, and the shadowy domes and towers of far-off Rockaway breaks through like a city in the air.

It is inconceivable that New York should have been so slow to appropriate and use this beautiful island. For years and years this strip of sea-girt sand might as well have lain in mid ocean as here. A few roughs came down now and then and perpetrated dark deeds that gave a flavor of disrepute to the island. Nobody who thought anything either of reputation or pocket-book ever came here in those days. Now, half-hour boats and numerous lines of cars bring down all New York. Many come by private conveyance over the smooth and beautiful boulevard lead from the city to the very margin of the sea.

Brighton at its loveliest, in the full tide of the season, can not excel this wonderland of pleasure. There is everything of which folly ever dreamed of in the line of amusement here. Are you fond of riding the fleet-footed ostrich, the gentle cow, the domestic rooster, or the roaring lion of the desert, to say nothing of the stately giraffe, and the mettlesome swan? Here you have your chance in the "merry-go-round." Only 5 cents, and you can mount any one of these animals, richly caparisoned, and fly around a ring to the inspiring strains of a brass band.

If you want to spin like a rocket through the air; if you want to hold your hat while your back hair falls off and in your ears the elements of wind and fire make merry, ride down the "switch-back." You take a seat at the top of the inclined plane—you flash down the plane like a paper through a printing press; you skim up another like a swallow on the wing; you dart down again like a falling star and up again like a kerosene-fed flame, and your ride is accomplished. For another 5 cents you mount the elephant's back and indulge in light refreshments in different parts of the body. I believe they serve lemonade in one of his ears, and in the mysterious recesses of his inside you can buy caramels and sweet cakes. Should you care for milk, several stuffed cows stand about under gay canopies. Milk is surreptitiously introduced through a hole in the back, a little behind the ear, and a man draws it fresh from the udders and presents it with a wink of superhuman cunning. Donkeys and horses are on hire, whereon you can canter over the sands and into the sea if you like. Little children are playing all about, thicker than sand-fleas, and the whole scene is one of perfectly unalloyed rapture and content.—"Amber" in Chicago Journal.

The Appearance of a Famous Tree.

The famous cypress tree of Popotla, Mexico, known as the tree of the Noche Triste, has recently presented an appearance of unusual interest. Part of its conformation has assumed the outline, clearly defined, of the Mexican eagle. The proposition has been made to cut away such portion of the tree as represents this symbol for preservation in the National museum. El Partido Liberal protests against such a deed as sacrilegious, and says that the fine old tree should remain intact, hung as it is with memories of the past.—Mexico Letter.

Killed a Robber with Pills.

A western farmer who had run out of shot, loaded his gun with pills, and when a couple of burglars attempted to raid his premises, discharged the contents of his musket with such effect that one robber was killed and the other seriously wounded.—Chicago Times.

For Promotion of Social Purity.

An association of young men has been formed in New York for the promotion and practice of social purity. All ballets except operatic are tabooed.

MALAISE

You say the day is fair;
But my tired eyes, whose strength is lost in tears,
See but the hard bare
Unpitying brightness of the sky that hears,
With no soft shade of care,
Man's moan of dull despair.

You say the spring is here;
But why should I, who ne'er knew of joy of life,
Find in the May good-cheer,
Or heed that still earth's miracle is rife,
A bourgeoned sphere,
In the morning of the year.

You say my soul is blind;
It truly so may be; I only kno
That I for peace have pine
But years go by, and regnant pain and woe
My restless spirit bind;
You yet say Heaven is kind?

NEW ADVERTISEMENTS

PROBATE NOTICE.

IN THE SUPERIOR COURT OF THE COUNty of Inyo, State of California.

In the matter of the estate of John R. Hughes deceased.

Notice for publication of time appointed for probate of will.

Notice is hereby given that Monday, the 21st Day of November, A. D. 1887, at 10 o'clock a. m. of said day, and the Court-Room—Probate—of said Court, at the town of Independence, in the County of Inyo, State of California, have been appointed as the time and place for proving the will of said John R. Hughes, deceased, and for hearing the application of John W. P. Laird and W. L. Hunter for issuance to them of letters testamentary thereon.

P. H. MACK, Clerk.

JOHN W. P. LAIRD, Attorney for Petitioner

Dated November 2, 1887.

NOTICE OF ELECTION

FOR VOTING BONDS TO THE

Irrigation Dist. No. I.

Notice is hereby given to the electors of Irrigation District No. 1, of Inyo county, State of California, that in accordance with an Act of the General Assembly of the State of California, entitled "An Act to Provide for the Organization and Government of Irrigation Districts, and to provide for the Distribution of Water thereby for Irrigating purposes," approved March 7, 1887, as set forth in Section 15 of said Act, an election is hereby ordered and will be held at the several places within said District, as hereinafter set forth, on

TUESDAY, November 29, 1887.

At which time will be presented to the electors of said District the question of issuing the Bonds of said District and selling the same for the purpose of raising money to procure and purchase water and to build and construct an Irrigation Ditch, as provided for in said Act, within the boundaries provided for by the Board of Supervisors of said Inyo county in the formation of said District.

The amount of Bonds to be voted for and issued is Two Hundred Thousand Dollars. At such election the ballots shall contain the words: Bonds—YES, or Bonds—NO.

Said election will be held in conformity with the provisions of the Act of the General Assembly of the State of California above referred to.

For the purpose of holding said election, the following voting places are hereby established and officers appointed:

First Division—At the late residence of W. S. Morton. Inspector, Joseph Seely; Judges, M. Bush and David Hukill.

Second Division—At the residence of S. A. Densmore. Inspector, S. A. Densmore; Judges L. Baxter and L. A. Anger.

Third District—At the former residence of H. L. Clark. Inspector, H. L. Clark; Judges, J. W. Symmes and Arthur Tanner.

Fourth Division—At the Halfway House. Inspector, J. E. Shepherd; Judges, John Meyers and Thomas Hamilton.

Fifth Division—At the residence of A. C. Harvey. Inspector, A. C. Harvey; Judges, Timothy Richards and David Wells.

By order of the Board of Directors.

W. L. HUNTER, President.

A. R. Conklin, Secretary.

Dated November 1, 1887

NOTICE TO SHEEP MEN.

Notice is hereby given to all persons engaged in the business of raising, grazing, herding and pasturing sheep in the County of Inyo, and who have not procured the license required by Ordinance No. 29 of the Board of Supervisors of said Inyo county, are liable to a fine of two hundred and fifty dollars, or imprisonment in the proportion of one day for each dollar of said fine, and that they will be proceeded against as provided in said Ordinance.

S. G. GREGG,
Tax Collector.

DELINQUENT NOTICE

NEW COSO MINING COMPANY.—LOCATION of principal place of business, San Francisco, California; location of works, Darwin, Inyo county, California.

NOTICE IS HEREBY GIVEN, THAT AT a meeting of the Board of Directors, held on 19th day of Oct., 1887, an assessment (No. 20) of TEN CENTS per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the secretary, at the office of the Company, 808 Montgomery street, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 1st day of December, 1887, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Monday the 26th day of December, 1887, to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.

JOHN L. HUNT Secretary.

Office—808 Montgomery street, San Francisco California.

ORDINANCE NO. 19.

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows:

All persons doing business within the county of Inyo shall obtain licenses from the Tax Collector of said county as follows:

SEC. 1. Auctioneers are divided into two classes and must obtain licenses from the Tax Collector as follows:

First Class. Those whose average monthly sales amount to $2,500 and upward constitute the first class and must pay a license of $50 per quarter.

Second Class. Those whose average monthly sales are less than $2,500 constitute the second class and must pay a license of $10 per quarter.

SEC. 2. Persons engaged in banking, loaning money at interest, or in buying or selling notes, bonds, or other evidences of indebtedness of private persons, or in buying or selling State County or City stocks, or other evidences of State, County or City indebtedness, or stocks, notes, bonds, or other evidence of indebtedness of incorporated companies, or in buying or selling gold dust, gold or silver bullion, or gold or silver coin, are divided into two classes and must pay licenses as follows:

First Class. Those doing business in the aggregate to the amount of $10,000 per quarter, or over, constitute the first class and must pay a license of $25 per quarter.

Second Class. Those doing business in any amount less than $10,000 per quarter constitute the second class and must pay a license of $15 per quarter.

SEC. 3. From each proprietor of a billiard table not kept exclusively for family use, for each table, $5 per and for each bowling alley, $10 per quarter for each alley; but no license must be granted for a term of less than three months.

SEC. 4. For each exhibition for pay for a theatrical performance, a caravan or menagerie, or any collection of animals, circus or other acrobatic performance, $5. And for each show for pay of musicians, jugglers necromancers, mag cians, wire or rope dancing, and sleight of hand exhibitions, $5 for each performance. The provisions of this section do not apply to exhibitions given for the benefit of churches, school, or other charitable entertainments, by any amateur dramatic association or literary society of the town or district in which such exhibition or entertainment is given.

SEC. 5. Each pawn broker must pay a license of $25 per quarter.

SEC. 6. Each keeper of an intelligence office must pay a license of $10 per quarter.

SEC. 7. Every person who sells spirituous, malt or fermented liquors, or wine in quantities less than one gallon, must obtain a license therefor from the Tax Collector and make the following payment:

First Class. Those making sales to the amount of $1,000 or more as a monthly average constitute the first class and must pay a license of $35 per quarter.

Second Class. Those making sales or less than $1000 per month constitute the second class and must pay a license of $20 per quarter

SEC. 8. Every person who, at a fixed place of business sells any goods, wares or merchandise, wines or distilled liquors, drugs or medicines, jewelry or wares of precious metals, whether on commission or otherwise, (except Agricultural or viticultural productions, or the productions of any stock, dairy or poultry farm of this State, when sold by the producer thereof, and except such as are sold by auctioneers at public sale under license) and all persons who keep hacks or carriages for hire (except such as are used in the transportation of goods) must obtain from the Tax Collector, and for each branch of said business, license, and pay quarterly therefor an amount of money to be determined by the class in which such person is placed by the Tax Collector; such business to be classified and regulated by the amount of the average Monthly sales made or hiring done, and at the following rates:

First Class. Those who are estimated to make average monthly sales or hiring to the amount of $2,500 per month or more constitute the first class and must pay a license of $30 per quarter.

Second Class. Those who are estimated to make average monthly sales or hiring to the amount of $1,250 and less than $2,500 constitute the second class and must pay a license of $4 50 per quarter.

Third Class. Those who are estimated to make average monthly sales or hiring of less than $1,250 constitute the third class and must pay a license of $3 per quarter.

SEC. 9. The sales of liquors and wines by persons licensed under the preceding Section must not be in quantities of less than one gallon measure.

No license must be required of physicians, surgeons, apothecaries or chemists for any wines or spirituous liquors they may use in the preparation of medicines.

SEC. 10. Every traveling merchant, hawker, or peddler who carries a pack and vends goods, wares or merchandise other than the manufactures and productions of this state must pay for a license $5 per month; and every such traveling hawker, merchant or peddler who uses a wagon and one or more animals for the purpose of vending such goods, wares, or merchandise of any kind must pay for a license $10 per month.

SEC. 11. Every person who keeps a stallion, jack or bull and who permits the same to be used for the purpose of propagation for hire must annually obtain a license therefor from the Tax Collector and pay therefor as follows:

First. Horses that are hired for the purpose of propagation by the season at $100 or more constitute the first class and require a license of $75.

Second. At $50 and less than $100 constitute the second class and require a license of $50.

Third. At $20 and less than $50 constitute the third and require a license of $40.

Fourth. At $10 and less than $20 constitute the fourth class and require a license of $25.

Fifth. At $5 and less than $10 constitute the fifth class and require a license of $15.

Sixth. At less than $5 constitute the sixth class and require a license of $10.

Seventh. For each jack, $10.

Eighth. For each bull, $10.

A license for propagation obtained from the Tax Collector under the provisions of this ordinance shall entitle the holder thereof to the right to go into any county of this State for the purpose of propagation without any further license or expense.

SEC. 12. Every person who commences or carries on in the County of Inyo any business, trade, profession, or calling for the transaction of which a license is required by any ordinance of the Board of Supervisors of said county without taking out the license prescribed by such ordinance is guilty of a misdemeanor and shall be punished by a fine not exceeding $250 and unless said fine be paid shall be punished by imprisonment in the county jail of said county until such fine be satisfied, such imprisonment not to exceed one day for each dollar of the fine.

SEC. 13. The Tax Collector shall have the collection of the licenses provided for in this ordinance, and it is hereby made his duty to collect the same and he may enforce the collection as provided by Section 3.60 of the Political Code of California.

SEC. 14. This ordinance shall take effect and be in force on and after twenty days from its passage.

SEC. 15. This ordinance shall be published in the INYO INDEPENDENT, a newspaper printed and published in said county, at least two weeks.

The above ordinance was passed by the Board of Supervisors of Inyo county at a regular meeting of said Board October 4, 1887, by the following vote:

Ayes: Harper, Robinson and Edson.
Noes: None.
Absent: None.

J. D. HARPER, Chairman.

Attest: P. H. MACK, Clerk.

TAKE SIMMONS LIVER REGULATOR

For all Diseases of the Liver, Kidneys, Stomach and Spleen.

This **purely vegetable** preparation, now so celebrated as a Family Medicine, originated in the South in **1828.** It acts **gently** on the **Bowels** and **Kidneys** and **corrects** the action of the Liver, and is, therefore, the **best preparatory medicine,** whatever the sickness may prove to be. In all common diseases it will, **unassisted** by any other medicine, **effect a speedy cure.**

The **Regulator** is safe to administer in any condition of the system, and **under no circumstances can it do harm.** It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance; will **promote digestion, dissipate headache, and generally tone up the system.** The dose is small, **not unpleasant,** and its virtues undoubted.

No loss of time, no interruption or stoppage of business while taking the Regulator.

Children complaining of **Colic, Headache,** or **Sick Stomach,** a teaspoonful or more will give relief.

If taken occasionally by patients exposed to MALARIA, will expel the poison and protect them from attack.

A PHYSICIAN'S OPINION.

I have been practicing medicine for **twenty years,** and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system. L. M. HINTON, M. D., Washington, Ark.

KEPPLER—At Independence, November 1, 1887, Charles Keppler, a native of Germany, aged 88 years and 5 months.

MALONE—At Reno, Nevada, October 31, 1887 Mary E. Malone, aged nearly 19 years.

Mr. W. K. Miller was up from Lone Pine last Monday.

Mr. E. Crocker, of Big Pine, has been in town all the week.

Mr. R. Hessian of Big Pine was in town at the beginning of the week.

Mr. Thomas Williams of Round valley was in town during the week.

Mr. R. E. Barnes of Cottonwood was in town at the beginning of the week.

Mr. George White, of Hawthorne, was at Independence at the end of last week.

The sheep men in Mono county are paying the license tax without any trouble.

Col. A. C. Ellis has left Nevada and is gone with his family to live in San Francisco:

Doctor George and J. H. Stoutenborough of Bishop Creek were in town early in the week.

Mr. Charles Dale came in from Darwin at the beginning of the week and stayed in town till Friday.

E. Robinson was taken very ill at the end of last week: he has so far recovered as to be able to be around again.

Mr. W. Uhelemeyer and his sister Miss Minnie Uhelemeyer came down from Big Pine at the beginning of the week.

The members of California Post G. A. R. have issued invitations to an entertainment at Mair's hotel next Tuesday evening.

Mr. and Mrs. McMurry and Miss Emma McMurry of Big Pine have been in town all the week. Mr. McMurry is in very poor health.

Mr. A. O. Collins and Miss Minnie Collins and Mr. and Mrs. C. Collins, of Warm Spring, were at Independence at the end of last week.

From the Lucky Jim the usual amount of ore is shipped every week. The output from the Jim has been uniform for a long time past.

R. S. Miner Esq. arrived in town from Bodie last Monday. He has suits in the the Superior Court and will be here a week or two yet.

Charles Leman, sentenced to be hanged for a murder done at Genoa, Nevada, has had the sentence commuted to imprisonment for life.

Billy Brown and Felix Lecruits, two Comstock miners, have made a rich strike at Devil's Gate, The *Enterprise* says they have a fortune.

At present there are not teams enough to haul ore from Darwin to Keeler. At the New Coso and other mines ore is piled up waiting for transportation.

A new strike of rich ore is reported from the Georgene mine at Candelaria. The developments occurred in the east drift of the tunnel level and assays on an average $95 per ton.

Pat Keyes, Dick Whittaker and C. Walter made a shipment of ore from the White Hill last Thursday. The ore from White Hill usually averages about one hundred dollars per ton.

Mr. J. Crocker, Mrs. Crocker and their child arrived at Independence last Thursday evening from Kern county. The family stayed in town a few days before going to their new home at Big Pine.

Mr. E. Crocker says he intends making considerable improvements at the hotel at Big Pine. The house and surroundings will be put in such order as will make it second to no other in the county.

The Virginia *Enterprise* says there is a perfect epidemic of scarlet fever in the City. When the cold weather sets in there will be as perfect an epidemic of diptheria. Bad sewers are the cause of the sickness.

Another team has been put on the road hauling ore from the Defiance mine at Darwin. The ore body in the mine continues to develop well; the Defiance never was in better condition than at present.

William F. Roselle, husband of the woman who threw vitroil upon Charles F. Petrie at Los Angeles, has been sentenced to nine years in the penitentiary s aan accessory before the fact. The women is to have a second trial.

Last Monday Mr. George W. Parish, of George's Creek, died at his home after a brief illness. Mr. Parish was a good man in every relation of life; as a husband and father, neighbor and a citizen. The body was buried on Wednesday at the Odd Fellows cemetry at Independence. A large number of people attended the funeral.

Arrangements have been made for two daily railroad trains on the Central Pacific and Union Pacific railroads. At present the trip from Omaha to San Francisco is made in eighty five hours; by the new arrangements the time will be reduced to seventy one and a half hours, a saving in time of thirteen and a half hours. The new time table will go into effect on the thirteenth,

A number of Big Pine people were in town last Monday as witnesses in a lawsuit that did not come off. Doctor George sued J. H. Muller for services rendered. The case was first tried in Bishop Creek, and the Doctor was beaten because he did not have at hand proof that he had filed with the County Clerk his license to practice. An appeal was taken, and the Doctor was fully prepared next time, but Mr. Muller settled without going to trial.

A social dance and house-warming was given in Mr. Hall's new residence at Alvord last Friday evening. The entire surrounding country was represented and dancing was in order until 12 o'clock when the guests were invited to an elegant supper prepared by the hospitable hostess. After supper dancing was resumed and continued until the mountain tops were crowned with the dawn's pale halo when the company dispersed with many wishes of good will to host and hostess.

Food For Reflection.

San Francisco is kept in a whirl of excitement by a succession of mysterious crimes. The most skillful detectives; lawyers the most experienced in unraveling the plans of criminals, are as much perplexed as those who know least about such things. It is thought possible that a criminal who is confined in a cell, awaiting the day when he should leave it only to be hanged, has been able to plan another murder and get assassins to carry out his plans. On the oth r hand it is thought possible that the victim may have committed suicide under the terrors of a guilty conscience; he having murdered his own sister. The worst that history relates of ancient or modern times is paralleled by these tales of crime that are now told almost daily. Juries are bribed to acquit criminals, Judges and Sheriffs are selected by political leaders, who are leaders only because they are supported by organized bands of cut throats, robbers, perjurers, professional criminals. Even women are rivaling men in atrocity and cruel murder. The brutality of Bill Sykes in murdering Nancy is outdone by the girl Hattie Woolsteen in Los Angeles. What a monster of cruelty a young woman must be who could deliberately blow out the brains of a man, with a pistol; drive some distance with the bleeding body beside her; throw the dead carcass upon the ground and then drag it inside a barn; set the building on fire, then cooly drive several miles home and go to bed and sleep. The man was a thief, a liar, a seducer an adulterer; but all this does not prevent the horror which the deed of the woman inspires. We should pause long enough to inquire if our civilization civilizes, and if our methods of training the young and forming the characters of men and women are not susceptible of some improvement.

Property Created by Common Sense.

Last Christmas day Mr. R. E. Barnes, formerly of San Francisco, made a location at Cottonwood on the west side of Owens Lake. He gathered a crop of grain from part of the land this season. At present volunteer barley and wheat have made a growth of a foot high or more; a little fresh seed of both kinds has been scattered among the volunteer and there is a prospect of a good crop. Wire enough to stretch thirty miles is now on the way for fencing. A foundation is laid for a good residence and part of the lumber is on the ground. Three reservoirs are partly constructed that will together will hold a large body of water. At least two thousand acres will be brought under cultivation. A large part of this will be planted with raisin grapes; vine yards and orchards will also be planted. The whole tract is well suited to fruit growing and the production of wine and raisin grapes. It is also well suited to market gardening, and there is a good market for that kind of produce by sending the stuff across the lake to Keeler and supplying Cerro Gordo and Darwin. Judge La Mar of Los Angeles is interested with Mr. Barnes in the land and improvements. In three or four years a very valuable property will be created at Cottonwood. Up to the time these parties made their location no one in Owens valley could be induced to settle upon the Cottonwood tract. None so highly appreciate the lands, climate, markets and general resources and attraction of Owens valley as those who are most familiar with the best parts of the state at large.

Epidemics.

There are epidemics of crime, just as there are epidemics of cholera or yellow fever. At such times religious teachers improve the opportunity to urge that the only hope of humanity, in this world as well as in the next, is in joining the church and professing religion. Beecher once said that when he saw any of his congregation asleep he thought some one should come and wake him up. If religion be the only, or the best, cure for the sins of humanity, and we believe it is, then epidemics of crime are proof positive that religious teachers are incompetent for their high and holy office, through want of common sense, want of learning or want of piety; or want of all three. Secular education alone will never make men and women pure and noble in character. Some of the very worst men and women of our own and other times have been well educated, so far as schools and colleges are concerned. But while the intellect was trained the conscience was utterly neglected; and the education received only made them more dangerous to society; only enabled them to indulge their passions and their love of wickedness with more impunity and more excess. Training the conscience is the peculiar work of the church, and the ministry should not drowse and drawl over their great work.

Death of a Pioneer.

At midnight of last Tuesday, Carl Kepler, a pioneer of Owens valley, died at Independence. The deceased was a native of Germany and claimed to be a direct descendant of a brother of the illustrious astronomer Kepler, who died in 1630. In early life Mr. Kepler was in the naval service of Prussia, and his widow says he served twenty-five years. In 1862 he came with his wife to Owens valley and remained here till his death. He was aged 88 years last June. A son by a former wife lives in Germany, but his address is not known to Mrs. Kepler. The deceased had suffered from cancer in the mouth, and that terrible disease was the immediate cause of death. The body was buried in the Odd Fellows cemetry on Thursday. Mrs. Kepler, who is left a childless widow in her old age is a native of England.

Sudden Death Of an Amiable Girl.

For some weeks past Miss Mary Malone of Independence had been on a visit with her sister, Mrs. Nelligan, at Reno. Last Monday a letter came from Miss Malone, evidently written in a very cheerful mood; it told how much she was enjoying her visit, and that she was in perfect health, except a slight cold. About the same time that her parents got the letter a telegram came that she was dead. This awfully sudden death of their daughter has completely prostrated with grief the aged father and mother. Miss Malone was about nineteen years old; she was a very modest and unassuming girl, respected and much liked by all who knew her. The body was brought to Independence and buried here. It is believed that Miss Malone fell a victim to the bad drainage of Reno, that produces fevers, diptheria, and other malignant diseases.

The Monte Christo Mine.

For some time past work on the Monte Cristo mine in Mono county has been prevented by law suits. The suits are all settled; the *Chronicle-Union* says:—We are pleased at being able to state that Superintendant Revan this week paid all the Monte Cristo debts, and resumed work in the mine. At present the mill will be run only during the day. We congratulate our people upon the settlement of the financial troubles of the Company, and trust there will be no more drawbacks to the developments of the Monte Cristo property.

Irrigation in Colusa County.

An irrigation district has been formed in Colusa county and land owners make bitter complaint that many will be allowed to vote on the issuing of bonds who do not own any land in the district, and will not therefore be affected by taxation. A correspondent of the Colusa *Sun* says: "We believe we are only expressing the opinion of the majority of the most prominent farmers in Colusa county, when we say that no one should be allowed to vote at an election in an irrigation district whose name cannot be found upon the Assessment Roll of the county in which the district is situated. Poll tax receipt and ninety days residence in the district are not enough to place a man on a level with the man who owns and pays taxes on land. A man may labor faithfully ninety days for a farmer and at the expiration of that time go to the polls and cast his vote in direct opposition to his employers interest and welfare."

Death Of Mary Malone.

The following facts in connection with the death of Miss Mary E. Malone will be of interest. From childhood she had been subject to attacks of bleeding at the nose. Last Sunday she had been out walking with her sister, Mrs. Nelligan, and soon after returning home was taken with a severe fit of sneezing. A blood vessel was ruptured in the paroxysm and much blood was swallowed. Severe vomiting followed and it was midnight before the patient had any relief. After that time she rested quietly till morning; then vomiting set in again and continued till she was exhausted. About ten o'clock she passed away quietly, being in an unconscious condition and free from pain. These are all the facts in the case: there is nothing more to tell. It is some consolation to the aged father and mother that their daughter died respected and esteemed by all who knew her.

Irrigat on Meeting.

The Directors of the Irrigation District met last Tuesday. It was decided to submit a proposition to the people of the district to issue bonds to the amount of two hundred thousand dollars. The notice of election on the proposition will be found in another column. These bonds if issued and sold will be a mortgage on every acre of patented land in the district. Every one interested should give the matter careful study. The Directors ordered that a contract be entered into with J. Gilchrist to make a working survey of the ditch at a cost of three thousand five hundred dollars; to be paid in bonds of the district at par; Gilchrist to give a bond to the Directors in double the amount of the cost of the survey for the faithful performance of the work.

Generosity.

General Oglethorpe, the founder of the State of Georgia, was very fond ot tinkering. A poor man who lived near the General once went to him with a leaky teakettle, and asked him to mend it. The soldering tools and fire pot were promptly got and all unnecessry holes in the kettle were soon stopped. When the job was finished the man asked how much was to pay, and the General replied "nothing but the pleasure of mending your pot when it leaks again." Levy is more generous than General Oglethorpe; he is not only willing to put eyes in mourning free of cost, but he also cheerfully pays for the privilege.

"Handsome Dick" a Hero.

Dick Rule—our old time "Handsome Dick"—has now a man to his credit. During a revolt at the Arizona Penitentiary in Yuma on the 27th inst., Dick knocked one prisoner down with his pistol, killed another, and unfortunately missed a third. During the melee, which is reported as being very exciting and sanguinary, several attemps were made to "down" Richard, but each time his bravery and courage saved him, and he is now Arizona's popular hero. —*Reno Gazette.*

Real Estate Agents.

Grant & Crough, real estate agents, are a good, reliable firm. Mr. Crough has been County Recorder and is thoroughly familiar with land titles and records. Parties who may want to find homes in Owens valley or to invest in real estate will find satisfaction in corresponding with the firm. The Attorney for the firm is also Register of the U. S. Land Office at Independence, therefore reliable information can be had from the firm concerning government lands.

Will Be Appealed.

In the case of Broder and others against Conklin and others, Mr. Miner, attorney for the plaintiffs, has obtained a stay of proceedings on the judgment granted in favor of the defendants, and will appeal the case to the Supreme Court.

A good many members of the Masonic Lodge at Independence will attend the inauguration of the new Lodge at Bishop Creek this evening. Mr. A. R. Conklin, will be the representative of the Grand Master to install the offiers.

A few evenings ago a citizen of the town heard a noise at his hen roost. He went with a friend to investigate the cause of the commotion, and found a man near the roost with a chicken in his possession. The citizen claimed the chicken as his and took it from the man. Out of this has grown several criminal complaints and arrests. A nice pair of black eyes is also one of the results. What a great fire a little spark kindleth.

John L. Foster died at the mines of M. G. Gillette in the State of Chihuahua, Mexico on the 22nd of October. Up to about one year ago he was Secretary of the Northern Belle and Homles mines and the Belleville mill at Candelaria. The *Enterprise* says: "Five or six months ago he left for Chihuahua under engagement with M. G. Gillette to take a position in connection with that gentleman's mining operations in that State, where he remained until stricken down by the deadly fever."

History is repeating itself in London. Thousands of men assemble almost daily in the streets and demand bread. In such a vast city there are multitudes sunk in abject poverty, and before their eyes are others reveling in luxury the most profuse. Hunger drives men to madness, then the starving poor rush like wild beasts upon the haughty rich and destroy them and their splendor. It was so in ancient times in Rome and in modern days in Paris. There are strong indications that London will have a repetition of the terrible experience

By want of care in making inquiry into the merits of complaints before issuing warrants of arrests, Justices of the Peace may put a whole community to great trouble, cause expense and much ill feeling. Too much care cannot be taken to get at the real facts of the case before a warrant shall be issued for the arrest of any person. If frivolous and absurd complaints are taken as sufficient grounds for the issuing of warrants of arrests, a whole neighborhood might be kept in a continual broil. A Justice of the Peace has a good deal of ill defined authority, and he should use it for the promotion of harmony and good feeling among his neighbors; not to cause dissention and quarreling.

PROPOSALS FOR COUNTY PRINTING.

Notice is hereby given that sealed proposals will be received by the Board of Supervisors of the County of Inyo State of California at the office of the County Clerk, until Monday, November 7, 1887, at 11 o'clock a. m. for the purpose of letting a contract for county printing for the year beginning January 1, 1888 and ending January 1, 1889, as follows:

1st. Printing and publishing delinquent tax list.
2d. Reports of Auditor and Treasurer.
3d. Notices of contracts to let by Inyo county.
4th. Notices of special meetings of Board of Supervisors.
5th. Proceedings of Board of Supervisors.
6th. Notices of meetings of Board of Education.

And other legal notices required to be published by the county officers.

Proposals must be endorsed "Proposals for County Printing," and must be accompanied with a good and sufficient bond in the sum of $500. Said bids will be opened between the hours of 1 and 3 o'clock p m of said 1st Monday of Novembea, and the Board reserves the right to reject any and all bids submitted.

By order of Board of Supervisors of Inyo county, October 4, 1887.

P. H. MACK, Clerk.

DESERT LAND FINAL PROOF.

D. E. No. 216.

UNITED STATES LAND OFFICE, INDEPENDENCE, CAL. October 18, 1887.

Notice is hereby given that Josiah G. Dodge of Lone Pine, Inyo county, State of California, has filed notice of intention to make proof on his desert land claim No. 216, for the S E ¼ of S E ¼ of Sec 22 Tp 15 S, R 35 E, M D M, before the Register and Receiver at Independence, the 3rd day of December, 1887.

He names the following witnesses to prove the complete irrigation and reclamation of said land: Edward J. Reynolds, Charles Mates, Manuel Silva and Joseph Blaney, all of Lone Pine, Inyo county, Cal.

JOHN W. P. LAIRD, Register.

Notice to Tax-Payers

Notice is hereby given that I have received from the Auditor of the County of Inyo, State of California, the Assessment Roll for the year A D 1887, and that the taxes therein are now due and payable in gold and silver coin of the United States; that the taxes will become delinquent on the last Monday in December, 1887 at 6 o'clock p m, and that unless paid prior thereto five per cent. will be added to amount thereof; that for the purpose of receiving such taxes I will be and and attend at the following named places on the dates named, to wit:

Bishop Creek, November 9th.

Big Pine, November 10th.

Darwin, November 14th.

Keeler, November 15th.

Lone Pine, November 16th.

Independence, on and after November 17th.

S. G. GREGG, Tax Collector.

AGENTS WANTED for the MISSOURI STEAM Washer

Active, honest persons all over the country, with or without team.

JOHN C. EVANS, Stoutsann, Mo., writes: "I stand up and affirm that a Washer saves more hard labor and money in a large family than any Reaper and Mower that ever was put on any farm with less than 100 acres in cultivation. If you will get up any instrument that will take as much labor off of men as this Washer takes off the women, and save as much money as it does and cost no more, I could sell one at every house. If they had to take the feathers from under their wife and babies to pay for it."

JOHN R. DODGE, JR., jeweler, Nonsuch, Ill., writes: "You ask what I think of the Washer I bought last summer. Ist. It is the best machine ever invented by man. 2d. We have just as good dinners on Monday as on any other day. 3d. If you run short, you can not buy ours for $100."

I will ship a sample to thos. desiring an agency on a week's trial on liberal terms. A thousand per cent the best washer in the world for saving labor, clothes and soap. Pays capable agents big money. Write for particulars.

J. WORTH, 1710 Franklin Ave., St. Louis, Mo.

Who Spends Money

For advertising in newspapers in these hard times, without first obtaining an estimate of the cost from GEO. P. ROWELL & Co's Newspaper Advertising Bureau, No. 10 Spruce Street, New York, is likely to pay $10 for what might be obtained for $5. Such estimates are furnished to all applicants gratis. Send 10 cents for 176 page pamphlet with list of newspaper rates and references.

ORDINANCE NO. 20.

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows

Sec. 1. Every person engaged in the business of raising, grazing, herding, or pasturing sheep in the County of Inyo, State of California, must annually procure a license therefor from the Tax Collector, and make therefor the following payment:

1. Those owning or having in their possession and under their control 5,000 sheep or more shall constitute the first class and must pay $250 per annum for the first 5,000 sheep and for every additional 1,000 the sum of $50.

2. Those owning or having in their possession and under their control 4,000 sheep and less than 5,000 constitute the second class and must pay $200 per annum.

3. Those owning or having in their possession and under their control 3,000 sheep and less than 4,000 constitute the third class and must pay $150 per annum.

. Those owning or having in their possession and under their control 2,000 sheep and less than 3,000 constitute the fourth class and must pay $100 per annum.

5. Those owning or having in their possession and under the control 1,500 sheep and less than 2,000 constitute the fifth class and must pay $75 per annum.

6. Those owning or having in their possession or under their control 1,000 sheep and less than 1,500 constitute the sixth class and must pay $50 per annum.

7. Those owning or having in their possession or under their control less than 1,000 sheep constitute the seventh class and must pay $25 per annum.

8. Those owning or having in their possession or under their control less than 500 sheep constitute the eighth class and must pay $5 per annum.

Sec. 2. Every person who shall engage in the business of raising, grazing, herding or pasturing sheep, or who commences or carries on in the County of Inyo, State of California, any business, trade, profession, or calling, for the transaction of which a license is required by any Ordinance of the Board of Supervisors of said county, without taking out or procuring the license prescribed by such Ordinance is guilty of a misdemeanor and shall be punished by a fine not exceeding $250, and unless said fine be paid shall be imprisoned in the county jail of said county until such fine be satisfied, such imprisonment not to exceed one day for each dollar of the fine.

Sec. 3. The Tax Collector shall have the collection of the license provided for in this Ordinance, and it is hereby made his duty to collect the same, and he may enforce the collection as provided by Sction 3330 of the Political Code of the State of California.

Sec. 4. The County Auditor shall prepare and have printed suitable bank licenses for the Tax Collector to carry out the provisions of this Ordinance with blank receipts for the Tax Collector when sold.

Sec. 5. The Tax Collector shall collect a fee of one dollar for each license sold, which shall be paid into the Salary Fund of the county.

Sec. 6. All money collected for licenses under the provisions of this Ordinance shall be paid over to the County Treasurer as other moneys and placed to the credit of the Salary Fund of the county.

Sec. 7. This Ordinance shall take effect and be in force on and after 20 days from its passage, and all Ordinances, or parts of Ordinances in conflict herewith are hereby repealed.

Sec. 8. This Ordinance shall be published in the Inyo INDEPENDENT, a newspaper published in said Inyo County, at least four weeks, said publication to be made for a period of twenty days after the adoption thereof, and said Ordinance to take effect in twenty days from its adoption.

The above Ordinance was passed by the Board of Supervisors of Inyo County, State of California, at a regular meeting of said Board, October 4, 1887, by the following vote:

Ayes—Harger, Eldred and Robinson.
Noes—None.

J. D. HARGER, Chairman of the Board of Supervisors of Inyo County.

Attest: P. H. MACK, Clerk.

QUININE AND HEALTH.

A Valuable Medicine Which Should, However, Not Be Used at Random.

An urgent correspondent is anxious to know what we think of the bearing of quinine upon human health and longevity. We do not wonder that such a question is asked in many localities. Although we have never been able to verify the statement that in certain portions of the Western country it is the chief medium of exchange in place of silver, we fear that the idea has some foundation. It is certain that no other drug has such a large consumption, and that it has come to be regarded as a necessity of civilization. We almost wonder how our forefathers could have lived without it. To those going into new regions of country, it is a companion if they are wise. Scarcely any one now doubts its efficiency, not only in malarial seizures, but in warding off that most insidious miasm. It certainly fortifies the system, and acts as a prophylactic. So true is it, that those passing for the first time into a malarious region are the most liable to attack, that it almost seems rash to neglect it as a precaution. Not less indispensable is it in the treatment of intermittent and remittent fever.

It seems to have been provided as the great specific of Nature. Even to the physician who over and over again has witnessed its mastery, it is little less than miraculous how the shaking ague will yield to its control unless there are special complications, or unless a habit of malarial subjection has been established. It has even extended its domain far beyond this. In other forms of fever, and in certain conditions of innervation or want of general tonicity, it is largely available, although needing to be used with great discernment. There probably never was a time in which the use of some form of Peruvian bark, under the name of china, cinchona, quinidia, etc., has been so extensive as at present. It may be said in general that the use of bitters did not begin with this, and that it has substituted many of them only because of its greater convenience and its more concentrated and effective forms. It is well known that the most of the bitter herbs have allied powers. They will diminish the amount of mucus in the stomach, fortify the nervous system, and aid in giving tonicity to the tired and to the exhausted vitality.

There are some reasons why such bitters as dogwood, wormwood, hops, rue and some others should not be set aside. They have certain additional or modified effects which are recognized by those familiar with their use, and should be valued for their tonic effects. In the use of medication as well as in foods even a good medicine needs a change, and there is benefit in some other form, just as we change, with advantage, from one form of flesh to another. We believe that in this age of strain and stress there is no class of materials that are so often needed as some of the multiplied forms of bitter trees, vegetables or herbs. Indeed, they belong so closely to the vegetable world, and contain so much that is allied to foods, or convertible thereinto, that they should hardly be regarded as medicines. The depressions from exposure to long winters and to excessive heat undoubtedly respond to and are relieved by this kind of nurture. Enfeebled stomach digestion is often relieved thereby.

But may there not be over-use, and especially of the cinchona preparations? Undoubtedly, and for this reason skilled medical and dietetic advice is often needed. There are cases where the liver has become so engorged, or where by reason of some organic change either the power of quinine is suspended or made harmful. When the spleen has become enlarged by reason of severe or frequent attacks of malaria the absorbent or lymphatic system is so involved that the quinine when used has no effect, or may even irritate. It is admitted that its continuous or uninterrupted use tends to produce congestion of the minute vessels of organs. So what in many cases is a stimulus in the direction of cure may become, in an overtaxed organ, a congestant. The same might be true of a food. The effect on the nervous system and the circulation is shown by the sense of fulness in the head produced by large doses. We think that it can be asserted that it is one of the most valuable of medicines, and has more claim to be called an accessory food than alcohol. Surely it should not be used at random, and the medical adviser may need often to be consulted as to indications and contra-indications for its use. But it can safely be said that it is less abused than most medicines, and that we may easily rank it as among the most valuable of American discoveries. While there is no such danger of acquiring a quinine habit as a morphine habit, the abuse of the drug is not uncommon.—*N. Y. Independent.*

—James Preston, an active miner at Shenandoah, Pa., is ninety-two years old. His present wife is his third. He is the father of thirty-six children—eighteen by his second wife, eleven by his first, and seven by his last. Thirty-three of them are boys, each wife giving birth to one daughter only. Preston came to this country when he was twenty years old, and went to work as a miner, in which occupation he has been engaged ever since. He enjoys good health, and his senses are unimpaired.

—Little Sally came home from school full of indignation. She is only five years old, but she was full of "mad" as her little body would hold. "Mamma," she said, "I think that teacher was real rude to me." "Why, what has she done?" "She laughed at me—laughed right out loud." "I guess you did something to make her laugh." "No, I didn't do any thing." "Well, how did it happen?" "It was in the geography class, and she asked me what was the principal production of the Sandwich Islands, and I just said 'Sandwiches,' and she laughed."—*Golden Days.*

WHAT IS THE TROUBLE?

A Great Deal of It in the World, a Humorist Says.

THE trouble with a great many women is that they can't find some particular selected man who will appreciate them as they feel in their palpitating hearts that every woman should be appreciated.

The trouble with a good many girls is that they don't find out what they want until some time after they have had the sad conclusion forced upon them that what they want doesn't want them.

The trouble with a good many boys is that they think the red grapes that grow on a neighbor's vine, and that have to be picked after dark, are a good deal sweeter and better than the ripe black grapes that grow on their own vines, and can be gathered in the bright sunlight of publicity.

The trouble with a great many editors is that they don't think one-half as much as they write.

The trouble with a great many readers is that they don't understand how much easier it is to point out a tree in a magnificent landscape that is a hair's breadth out of perspective than it is to paint the magnificent landscape itself.

The trouble with a good many Vassar graduates is that they know more about expeditious ways of getting from the second story down to the lower hall than they do about making Christian bread.

The trouble with almost all the ministers is that they don't hear other ministers preach often enough to know what a really first class, bang up sermon is.—Somerville Journal.

One of the Crowd.

He returned to Detroit from a trip to Europe Saturday night. When he crossed the river and felt that he was home once more he stepped high. He expected a little crowd to meet him at the depot, and he was not disappointed. A score of people took him by the hand and welcomed him home. One of the score did more than that. He drew the retur aside and said:

"So you have been to Europe?" "Yes."

"Gone ninety days, eh?" "Yes, about ninety."

"Have a good time?" "Splendid!"

"Well, I am awful glad to see you back. So you had a good time?" "Indeed, sir, I did."

"Glad to get home, I s'pose?" "Yes."

"Did they treat you well over there?" "Oh, certainly. Let's see! You have the advantage of me. What is your name, please?"

"My name? Oh, I'm Green." "Green? Green?"

"Yes—used to run a feed store on Michigan avenue, you know? You went off owing me $1.65 for oats, but I haven't worried over it a bit. Just thought I'd drop down and welcome you, and if you had the change handy I'd receipt the bill!"—Detroit Free Press.

A Newspaper and a Book.

A newspaper and a book jostled each other on Broadway. Turning around angrily, the book was about to make a disagreeable remark, when, observing who the other was, its manner changed.

"We are both children of the press," said the book, "and there should be no animosity between us."

"On your side, at least," rejoined the newspaper, "there should be none, for I have as many readers in one day as you have in your life, and it is only through me that the breath of life can be puffed into your body. When you get a little reputation you snub your old friends and benefactors."

"You need not quarrel," said the book, "for when you have long been consigned to the oblivion of the ash barrel a chance allusion to you in my pages may be all that keeps your name alive."

So they went and took a bottle of ink together.

Moral—Don't ride your own hobby too hard. The universe won't stop its revolutions because your particular theory of existence is proved false or pernicious.—Judge.

Not a Stranger.

"Tommie," said a New Mexico lady, addressing her son, "you shouldn't make so free with the gentleman. You never saw him before."

"Yessum, I have. He's the man that shot pap."

"Oh, is he? I thought he was a stranger. Go back and talk to him if you want to."—Arkansaw Traveler.

A Bonanza.

Omaha Dame—What do you think? I have a girl who gets up in the morning without being called.

Chorus of Voices—Impossible!

"But it is true; she's in love with the milkman."—Omaha World.

Able to Bear Her Bereavement.

Delia—How is Mrs. Grenadine lately? Is she perfectly reconciled to the loss of her husband?

Belle—Yes, I think so. Her mourning fits beautifully.—Lowell Citizen.

The Hotel Clerk's Position.

First Guest—How many miles is it to Smith's farm?

Second Guest—Does the 9 o'clock train stop for water now at Jones' crossing?

Third Guest—What street car shall I take to get to Billy the Bootblack's peanut stand? I am a lawyer in search of heirs to some property.

Fourth Guest—Do you believe the spots on the sun have any effect on the weather?

Fifth Guest—What sort of building stone is that they are using on that new structure off there somewhere, don't know the street, but it's about half an hour's walk?

Sixth Guest—Say, my friend, if you were away from home, among strangers, without money, and wanted to commit suicide, what sort of a death would you choose?—Omaha World.

—"That is a rather shabby pair of trousers you have on for a man of your position." "Yes, sir; but clothes do not make the man. What if my trousers are shabby and worn? They cover a warm heart, sir."—*St. Louis Sunday Critic.*

—Clergyman—"How is your health this summer? I trust you have been well during the sultry weather." Undertaker—"Pretty well, thank you." Clergyman—"And how is business?" Undertaker—"Poor, poor. I haven't buried a living soul for weeks."—

AN ANSWER DEMANDED.

Is There a Hidden Cause for Most Suffering? A Careful Investigation.

The inhabitants of Boston and New England have been considerably awakened the past week over some important facts which have come out in articles in the papers as to the real cause of most modern diseases. Every one has known that there has been some mysterious cause for unexplained suffering that even the doctors could not account for. A hidden disease has been shown to be the real cause of most so called pneumonia, convulsions, apoplexy, etc. If this is true, it is of greatest importance that we understand it thoroughly. With this end in view, a representative of this paper has collected facts from various sources which are given herewith.

REPORTER AND DOCTOR.

Dr. J. H. Cutler, who resides at 20 Popular street, said: "I have, in common with all physicians, observed the alarming increase of kidney diseases leading to that fearful scourge, Bright's disease, and have been constantly seeking for the proper means of meeting it. I have been prescribing Hunt's Remedy for a great many of my patients with great success. I also administered it to my mother, and with much benefit."

Mr. Samuel Littlefield, 1482 Washington street, said: "I was troubled with kidney disease for years, which finally turned to gravel. I would be free from suffering for a long while, and then have the most terrible pains in my back. I also had inflammation of the worst kind in my bladder, and I was altogether in a fearful condition. I went to several physicians, but all to no purpose, and I found I was growing very feeble. A friend in Malden urged me to use Hunt's Remedy. He had been cured of gravel and liver complaint by its use, and believed it would help me. Well, its effect was wonderful, and I cannot too highly thank my friend for the timely recommendation he made. I wish I could make every one know and understand what a valuable medicine it is."

Mrs. Wm. Gray, 1416 Tremont street, said: "I was troubled with kidney disease for a number of years, at times being so bad from swollen limbs and pains in the back that I was completely under the doctor's care. I received only temporary benefit until I began using Hunt's Remedy, which cured me entirely, and I cannot say too much in its favor."

Captain Joseph L. Hayden, connected with the Walworth Manufacturing Company, residing at 924 East Fourth street, South Boston, spoke in the highest terms of Hunt's Remedy. "Many of my friends in Enfield, Mass., have used it with unusual results, and would not be without it, I employed it in my family when other remedies had proved wholly useless, and it was remarkable in its results. It completely cured my wife of pain in the back."

WELL WITHOUT; DYING WITHIN.

Mr. H. Burney, baggagemaster of the Eastern Railroad, declared that he had used Hunt's Remedy in his family for a long time, and would not be without it. He had not only found it good for kidney complaints (a trouble with which all railroad men are more or less afflicted) but his wife had used it successfully in a severe case of what was, apparently, dyspepsia.

The uniform testimony which was given to the worth of this Remedy in Boston was born out by equally strong statements from residents in the suburbs.

Mr. Joseph G. Bicknell of Cambridgeport asserted that he had been a great sufferer. The fluids he passed were thick with brick dust sediment, and were voided with the greatest pain. Within four days from the time he began using Hunt's Remedy he passed a gravel stone larger than a pea, followed by other smaller ones. A speedy cure was the result, and he cannot recommend the remedy too highly.

Mr. George P. Cox, proprietor of the last factory at Malden, had seen such wonderful effects of Hunt's Remedy among so many of his relatives and friends that he was enthusiastic in its favor. He had not only used it himself with the greatest benefit, but two cousins, William W. and John F. Cox, had experienced untold relief. He would not be without it if it cost $5 a bottle.

Such statements lead us to the inevitable conclusion that, while Bright's disease of the kidneys is the concealed and actual cause of many complaints which bear other names, it can be both met and cured. Let all readers look to their condition at once, and thoroughly convince themselves whether they are or are not in perfect health, and then use that means which has been proven, and is known to be both pure, efficient, and good

LITTLE LAUGHS.

The plumber is out of season, and everybody is glad of it.—Merchant Traveler.

The punsters have forgotten to say that the oldest woman on record is Aunty Diluvian.—Merchant Traveler.

It is whispered in a New York paper that certain ladies of that city are very fond of playing poker. It's an iron poker, of course, and their husbands are the ones who get beaten in the game.—Charleston Enterprise.

Smith—I hear Mrs. B. has returned from the country. Brown—Yes, "the melancholy days have come, the saddest of the year."—Boston Budget.

It is a singular thing that a man never begins to show his temper until he loses it.—Boston Courier.

"Yes, I'm tired of life. I've about made up my mind to commit suicide." "Good scheme, old fellow; have another cigarette."—Washington Critic.

Only the Children.

Applicant—I have had considerable experience with children, ma'am, and never have any trouble in making them like me.

Mistress—That is very important.

Applicant—And I am sure I would get on nicely with your little dog, ma'am.

Mistress (stroking the animal)—You would have nothing to do with Fido, dear little fellow! He is my especial charge.—*Puck.*

—Servant, to the parson, who is very ill indeed: "If you please, sir, the chorister is down stairs and, wants to know if you won't give him the hymns for next Sunday's service?" Parson, feebly: "Tell him there will be no service; I expect to be dead before next Sunday." Servant, exit and re-enter: "If you please, he says then will you be kind enough to send down the hymns you'd like sung at the funeral?" (Parson recovers much more rapidly than chorister.)—*Burdette.*

An Old Bachelor's Love.

Now, because you are young and romantic,
You wonder I have not a wife,
And you hint at an episode frantic,
A chapter of love in my life.

I have floated far down on time's river,
And yet I confess not a dart
Little Cupid let fly from his quiver
Has hit my phlegmatic old heart.

You incredulous being to doubt it!
Well, have it your way if you will.
You are right. Ask me no more about it.
Enough, that I loved—love her still.

No, she is not a beautiful creature,
But she has a beautiful soul,
And its grace, shining out in each feature,
Transforms and illumines the whole.

"Why not marry her then? It is clearly
Sheer folly such feeling to smother."
I shall love her forever sincerely,
But, man, can I marry—my mother?

—Judge.

Simple Enough.

Omaha Groom—Well, my dear, the wedding tour is finished and here we are in our new home.

Bride—But, George, the servant girl who was to be here has not arrived.

"I see. It's too late to hunt up another today. I suppose you can get supper, can't you?"

"Of course. Go out and buy some steak, not too rare, with mushrooms and French potatoes and iced cake and hot waffles, and I'll set the table while you're gone."—Omaha World.

Down on Maw.

A boy was shouting "Fire!" in a lusty manner in front of a house on Fourth avenue the other day when a pedestrian hurried up and asked where the fire was.

"Hain't any." "Then what are you yelling for?"

"To git maw to the door. She's just got her hair done up in curl papers, and when she sticks her head out and shows it to the neighbors she'll be mad 'nuff to cry."—Detroit Free Press.

The Example of Washington.

"Remember the example of George Washington, my boy," said the careful father.

"Who was George Washington, papa?" queried the hopeful.

"Why, he was the man who couldn't tell a lie, of course."

"What was the matter with him—couldn't he talk?"

There was much anxiety in the parental mind as to the youngster's future.—New York Mercury.

Words That Change Meaning.

Bagley—It is passing strange how so many words get twisted from their original meaning. For instance "let" used to mean "hinder."

Mrs. Bagley—I have a better example. "Collect" used to mean "to gather."

Bagley (surprised)—That's what it means now.

Mrs. Bagley (positively)—No, it doesn't. Ask the garbage collectors.—Philadelphia Call.

Lessons of Experience.

Omaha Editor—Anything startling today?

News Editor—No, not a single railroad catastrophe since yesterday.

"Humph!"

"Yes, things are dull now. You see it's between seasons."

"Between seasons?"

"Yes, the summer excursion season is about over and the car stove season hasn't opened yet."—Omaha World.

The Only Way Now.

Omaha Man—Of all persons! When did you cross the Atlantic, George?

English Lord—Hush! Harry, don't speak so loud. Call me Blinks.

"Blinks, eh? Say, George, what means this masquerading?"

"The fact is, Harry, I'm in love with an American girl and am trying to pass myself off for a respectable citizen."—Omaha World.

TWO OF FORTUNE'S FAVORITES.

Henry Helfrich and William Dowling Made Happy.

A *Call* reporter paid a visit yesterday to Mrs. Henry Helfrich, at 64 Shipley street, to ascertain whether it was true that her husband had won $2,000 in the Louisiana State Lottery in the drawing of the 9th ult.

"Yes, indeed it is true," said Mrs. Helfrich, "and we are both very glad of it. My husband has bought a nice little property on Turk street, where we intend to live in a short time."

Mr. Helfrich is foreman confectioner of Messrs. Schroth & Westerfeld, and is said to be one who will be likely to make a good use of his happy windfall. He confirmed his wife's statement, and also informed the reporter that about three years ago he had won $50 in the same lottery, but had never expected such a stroke of luck as this one.

The reporter also crossed the bay, and after considerable difficulty succeeded in finding William Dowling, a workman in the employ of the Oakland Gas Company. "Yes," said Mr. Dowling: "when the list was published I looked for my ticket and found it crumpled up into a ball in one corner of my vest pocket. I unrolled it and compared it with the list, when, for a moment, I thought I must be drunk or crazy, but when I looked again I found that I was right and my number had got me $2,000. I have bought twenty coupons this month, but I intend to invest my prize in real estate." Mr. Dowling is said by his employers and fellow-workmen to be an honest, hard-working man, and all seem to rejoice at his good fortune.—*San Francisco* (Cal.) *Call*, Sept. 9.

USING THEM FOR EVERYTHING.

Peter Magerus, residing at 251 Johnson Avenue, Brooklyn, E. D., N. Y., says:

During the last eighteen years I have been using over fifty ALLCOCK'S PLASTERS a year in my family. I have found them a most perfect external remedy. They have repeatedly cured me of rheumatism, to which I am subject every winter. They have cured me of pains in the sides and back three times. My wife, children and mother-in-law tell me ALLCOCK'S PLASTERS are the best remedy ever made, so agreeable, so certain. I know they have cured my wife of pains in the back and of a severe cough. My mother-in-law has been cured of a most severe cold, which threatened to turn into pneumonia, by ALLCOCK'S PLASTERS. PETER MAGERUS.

"CONSUMPTION CAN BE CURED."

Dr. J. S. Combs, Owensville, Ohio, says: "I have given SCOTT'S EMULSION of Cod Liver Oil with Hypophosphites to four patients with better results than seemed possible with any remedy. All were hereditary cases of Lung disease, and advanced to that stage when Coughs, pain in the chest, frequent breathing, frequent pulse, fever and Emaciation. All these cases have increased in weight from 16 to 28 lbs., and are not now needing any medicine."

People who are not acquainted with grief never saw a superior man show a woman how to sharpen a lead pencil.

Walking advertisements for Dr. Sage's Catarrh Remedy are the thousands it has cured.

One of the last week's lessons for railroads was that the air-brake should not be made for air alone.

Coughs and Hoarseness.—The irritation which induces coughing, immediately relieved by use of "*Brown's Bronchial Troches,*" Sold only in boxes."

A man may hide his sins and dye his mustache, but when he gets a cold in his head concealment is impossible.

DO NOT BE ALARMED

at the raising of blood from the lungs. It is one of the very earliest symptoms of consumption, and only shows the healthy efforts of the system to throw off the scrofulous impurities of the blood which have resulted in ulceration of the lungs. Dr. Pierce's "Golden Medical Discovery" is a positive remedy for consumption at this stage. If taken faithfully, it will cleanse the blood, heal the ulcers in the lungs, and build up and renovate the whole system.

The New York version, "The earth is the Lord's," but the down-town sidewalks belong to the wholesale trade.

WRETCHED, INDEED,

Are those whom a confirmed tendency to biliousness, subject to the various and changeful symptoms indicative of liver complaint. Nausea, sick headache, constipation, furred tongue, an unpleasant breath, a dull or sharp pain in the neighborhood of the affected organ, impurity of the blood and loss of appetite, signalize it as one of the most distressing, as it is one of the most common, of maladies. There is, however, a benign specific for the disease and all its unpleasant manifestations. It is the concurrent testimony of the public and the medical profession, that Hostetter's Stomach Bitters is a medicine which achieves results speedily felt, thorough and benign. Besides rectifying liver disorder, it invigorates the feeble, conquers kidney and bladder complaints, and hastens the convalescence of those recovering from enfeebling diseases. Moreover, it is the grand specific for fever and ague.

"Bright things fall from Bessie's lips" in Mrs. Holmes' last novel probably means that Bessie dropped the gold filling out of her teeth.

It was an old oriental doctrine that women have no souls. More enlightened philosophy concedes that they have purer, finer, more exalted souls than men. But they are too often contained in feeble, suffering bodies, which hamper and retard their full development. For all these painful ailments incident to the sex, Dr. Pierce's "Favorite Prescription" is the best specific in the world, and is sold under a positive guarantee that it will do all that is claimed for it. Price reduced to one dollar. By druggists.

The man who runs a faro-bank never finds any difficulty in associating with his betters.

If a cough disturbs your sleep, take Piso's Cure for Consumption and rest well.

Try Germea for Breakfast.

BEAUTY of Skin & Scalp RESTORED by the CUTICURA Remedies.

NOTHING IS KNOWN TO SCIENCE, AT ALL comparable to the CUTICURA REMEDIES in their marvelous properties of cleansing, purifying and beautifying the skin, and in curing torturing, disfiguring, itching, scaly and pimply diseases of the skin, scalp and blood, with loss of hair.

CUTICURA, the great Skin Cure, and CUTICURA SOAP, an exquisite Skin Beautifier, prepared from it, externally, and CUTICURA RESOLVENT, the new blood purifier, internally, are a positive cure for every form of skin and blood disease, from pimples to scrofula. CUTICURA REMEDIES are absolutely pure, and the only infallible skin beautifiers and blood purifiers.

Sold everywhere. Price: CUTICURA, 50c.; RESOLVENT, $1; SOAP, 25c. Prepared by the POTTER DRUG AND CHEMICAL CO., BOSTON, MASS.

☞ Send for "How to Cure Skin Diseases."

HANDS Soft as dove's down, and as white, by using CUTICURA MEDICATED SOAP.

HALL'S SARSAPARILLA

Cures all Diseases originating from a disordered state of the BLOOD or LIVER. Rheumatism, Neuralgia, Boils, Blotches, Pimples, Scrofula, Tumors, Salt Rheum and Mercurial Pains readily yield to its purifying properties. It leaves the Blood pure, the Liver and Kidneys healthy and the Complexion bright and clear.

THE BEST
FOR TABLE USE. FOR DAIRY USE.

It is more highly refined than any Salt. All harmful ingredients found in most Salt are removed: therefore it is the safest to use.

It is free from lime and pan scales, requires no sifting. It is the strongest and altogether the most economical.

It dissolves very easily, therefore does not spoil butter by the gritty particles, as often happens with other Salt.

Common Salt is too risky for anybody to use in making Butter. The poorest families use so little Salt on their table that they can afford to get that which is the most healthy and the best.

HOLMES' EXTRA SIFTED SALT is used by the best dairymen in California, and has never failed to please better than any other brand whenever tried.

Packed in 250, 100 and 50 pound Pure Linen Bags; also in 5 pound Cotton Bags and Cartons.

Insist on having this brand from your grocer.

SWAYNE'S PANACEA PURIFIES SYPHILITIC BLOOD.
LONDON HAIR RESTORER (ENGLISH) DR. SWAYNE & SON SOLE AGENT.
OINTMENT
THE GREAT CURE FOR ITCHING PILES & SKIN HUMOR
SYMPTOMS Moisture, intense itching and stinging, most at night—worse by scratching—very distressing. If allowed to continue tumors form which often bleed and ulcerate, becoming very sore.
SWAYNE'S OINTMENT Stops the itching and bleeding, heals ulceration, and in many cases removes the tumors. Sent by mail for 50 cts.
DR. SWAYNE'S MEDICINES OLDEST IN U. S.
PREPARED ONLY BY DR. SWAYNE & SON, PHILADELPHIA. SOLD BY Druggists

DUJARDIN'S LIFE ESSENCE
is a combination of Phosphorus, Albumen, Protogon, Lime, Soda and Iron, which act on the Brain, Nerves and Stomach, increasing the appetite, assisting Digestion, Curing Dyspepsia, in every form, Headache, Neuralgia, Insomnia, General Debility, Want of Vitality, Nervous Prostration and Impotence. In Hysteria and Epilepsy its effects are magical. In Consumption its nutritive qualities are beyond comparison with other preparations. Its action is shown by the increasing strength and weight of the patient, and the loss of cough and night sweats. It is a brain, nerve, and life giving tonic. Price, $1.50 per bottle.
☞ FOR SALE BY ALL DRUGGISTS.

Dr. PARDEE'S REMEDY is the Greatest Blood Cleanser.
Cures Spring Humors, Salt Rheum, Crofula, Ciatica, Rheumatism, Constipation AND Regulates The Kidneys & Liver.
One bottle taken according to directions will give better results than a gallon of Sarsaparilla, or any of the so-called Blood Purifiers with which the market is glutted. At Druggists, price $1.00 per bottle.
$500 REWARD
will be paid for any case of Rheumatism which Dr. Pardee's Remedy, properly administered, fails to relieve.

FLORIDA LANDS
Send for Description and Map of FLORIDA SOUTHERN R. R. LANDS. Four million acres, suitable for Oranges, Lemons, Olives, Pineapples, Bananas, Strawberries and early vegetables. For sale on long credit. $1.25 to $8.00 per acre.
Address M. SOLOMON, Gen. N. W. Ag't, 232 So. Clark St., Chicago, Ills.

This BELT or Regenerator is made expressly for the cure of derangements of the generative organs. The continuous stream of ELECTRICITY permeating through the parts must restore them to healthy action. Do not confound this with Electric Belts advertised to cure all ills from head to toe. It is for the ONE specific purpose.
For circulars giving full information, address Cheever Electric Belt Co., 103 Washington Street, Chicago, Ill.

YOUR CATARRH Can be Cured.
THE
Carbolic Smoke BALL
Is INFALLIBLE!
Ask Your Druggist For It!

ASTHMA Relieved in Five Minutes.
HAY FEVER. Cure Guaranteed if Taken in Time.
BRONCHITIS, Cure Warranted.
DEAFNESS Cured in Three to Six Months.
Diphtheria, Croup, Neuralgia, Headache, Sore Throat SPEEDILY CURED.
Invaluable Remedy! Patented April, 1886.
Price of Treatment, $3.00; (Smoke Ball, $2.00; Debellator, for Internal Use, $1.00.)
CARBOLIC SMOKE BALL CO.
652 Market St., San Francisco, Cal.
☞ Beware of Hurtful Imitations.

GOLDEN MEDICAL DISCOVERY
CURES ALL HUMORS, from a common Blotch, or Eruption, to the worst Scrofula. Salt-rheum, "Fever-sores," Scaly or Rough Skin, in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. Great Eating Ulcers rapidly heal under its benign influence. Especially has it manifested its potency in curing Tetter, Rose Rash, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hip-joint Disease, White Swellings, Goitre, or Thick Neck, and Enlarged Glands. Send ten cents in stamps for a large treatise, with colored plates, on Skin Diseases, or the same amount for a treatise on Scrofulous Affections.
"THE BLOOD IS THE LIFE." Thoroughly cleanse it by using Dr. Pierce's Golden Medical Discovery, and good digestion, a fair skin, buoyant spirits, and vital strength, will be established.
CONSUMPTION, which is Scrofula of the Lungs, is arrested and cured by this remedy, if taken before the last stages of the disease are reached. From its marvelous power over this terribly fatal disease, when first offering this now celebrated remedy to the public, Dr. PIERCE thought seriously of calling it his "Consumption Cure," but abandoned that name as too limited for a medicine which, from its wonderful combination of tonic, or strengthening, alterative, or blood-cleansing, anti-bilious, pectoral, and nutritive properties, is unequaled, not only as a remedy for consumption, but for all Chronic Diseases of the
Liver, Blood, and Lungs.
If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish-brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills, alternating with hot flushes, low spirits and gloomy forebodings, irregular appetite, and coated tongue, you are suffering from Indigestion, Dyspepsia, and Torpid Liver, or "Biliousness." In many cases only part of these symptoms are experienced. As a remedy for all such cases, Dr. Pierce's Golden Medical Discovery is unsurpassed.
For Weak Lungs, Spitting of Blood, Shortness of Breath, Bronchitis, Asthma, Severe Coughs, and kindred affections, it is an efficient remedy.
SOLD BY DRUGGISTS, at $1.00, or SIX BOTTLES for $5.00.
Send ten cents in stamps for Dr. Pierce's book on Consumption. Address, World's Dispensary Medical Association, 663 Main Street, BUFFALO, N. Y.

$500 REWARD
is offered by the proprietors of Dr. Sage's Catarrh Remedy for a case of catarrh which they cannot cure. If you have a discharge from the nose, offensive or otherwise, partial loss of smell, taste, or hearing, weak eyes, dull pain or pressure in head, you have Catarrh. Thousands of cases terminate in consumption.
Dr. Sage's CATARRH REMEDY cures the worst cases of Catarrh, "Cold in the Head," and Catarrhal Headache. 50 cents.

BIG G
Cures in 1 TO 5 DAYS. Guaranteed not to cause Stricture.
Mf'd only by the Evans Chemical Co. Cincinnati, O.
G has taken the lead in the sales of that class of remedies, and has given almost universal satisfaction. MURPHY BROS., Paris, Tex.
G has won the favor of the public and now ranks among the leading Medicines of the oldom. A. L. SMITH, Bradford, Pa.
Sold by Druggists. Price, $1.00.

BOLD RAILWAY THIEVES.

How Travelers in Italy Are Robbed of the Contents of Their Trunks.

English travelers in Italy have now and then had occasion to perceive that their luggage was not safe from depredations which could only be charged to the railway employes, but complaints have always been fruitless even to diminish the number of thefts except for a short period, some years since, when a lady of the diplomatic world had her jewels taken neatly out of her trunk, which caused official action and detection of the dishonest officials, when for a time the thefts were less common. The effect of the investigation which then took place, however, passed away, and now we have another Princess robbed and another inquisition, for railway robberies, like collisions, require victims in high positions to secure the attention of the authorities.

In the last ten years I have had my luggage rifled five times before I learned the way to treat it, which is, first, to put nothing in the luggage which can be of value to the thieves; and, secondly, to see that the locks are such as can not be tampered with without showing it when the luggage is delivered. Some cautious people carry leaden seals and pincers with cipher, and seal all the luggage as if it were going from Rome to Florence. This is effective.

The thieves have access to the luggage vans, and work while the train is in motion. They generally drive out the pin of the hasp of the lock or those of the hinges, go carefully through the contents, put them back as carefully, after having taken what they want, and put the pins of lock or hinges back in their place. The thefts are generally limited to luggage going through Italy or that which evidently belongs to foreigners. If a box has luggage tickets on it showing that it goes back and forth continually in Italy the thieves let it alone. The owner of the luggage thus does not discover the theft till too far from the thief to complain. Complaint is, however, of no use. In one personal experience, in which my wife's trunk had been delicately overlooked and £20 extracted from an envelope in a writing-case at the bottom, where it was put at Turin, every thing else having been carefully replaced, I made complaint to the station-master at Venice, as soon as we found that the money was missing, and the magnanimous official laughed at me, saying: "If you fear for your effects take them into the carriage with you," at which the whole staff hawhawed uproariously; it was so good a joke to propose to take a lady's trunk into the passenger carriage. In another case I found a portmanteau forced open, so that I was aware of the robbery before I took my luggage from the station, and at once called the attention of the officials to it, when they replied that as the luggage had passed over several roads it was impossible to say where it was done.—*Rome Cor. London Times.*

CHARACTER IN SHOES.

The Significant Stories Told by Old or Partly-Worn Foot-Gear.

"Do you know how much character there is to be read in a partly worn pair of boots or shoes?" said the cobbler to the reporter, as he hammered a last nail in among a double row of them on the outer border of the heel of a boot. "There might be a collection formed of shoes taken from the feet of a dozen wearers and the dullest comprehension would see some trait exhibited in looking them over. There is the cow-hide variety, coarse, made for work and not for ornament; its sole will be found evenly worn, denoting a phlegmatic, steady character, whose shoes bear him steadily and without nervousness to and from labor, which, not being his own, needs no rush or hurry. Then you may take the better grade of men's shoes; there's one with each heel worn away at the back, which denotes the brisk, energetic business man, and the pair near by, similar, but with the left heel worn at the back while the right one has kept its original shape. Why, if you work for that man and some day he looks up to the sky and says: "There goes a white crow," you say it is very white, or you will look for a new place, because he is a man of emphatic ideas, which he emphasis at every step as he pegs down that left heel.

"Look out for that pair of shoes all run down at the side, and have him for your good-natured, jolly, fun-loving friend, but not to look out for your interests, because he never did it for his own, and consequently will not for another. Then there is one pair with the toes 'stubbed out.' These are owned by a visionary man, whose thoughts and eyes are away up in the clouds, so far above earthly things as to make him an impractical man in all business matters. There are women's boots, too, but about the only difference lies in the radical changes that the last few years have brought about, for where once the woman of fashion wore only the narrow-toed, French-heel boot, and the lower class the sensible shoe, she of the haut ton now wears only the common sense style, and to the servant girl on her afternoon out, and to the lower class, the once favorite French shoe is relegated. What on earth holds more cause for pathos and anguish in inanimate form than the tiny, half-worn shoes of the little one whose footsteps were so few until they started back on their journey to the angels they left a little while ago? Many a broken-hearted mother will part with all her dead child's wardrobe for charity's sake, but the little shoes she will tenderly wrap up and keep through the years that pass between their parting and meeting."—*Providence Journal.*

MR. COLOROW'S GREAT SPEECH.

Bill Nye Reports It and Explains His Indian Policy.

My policy—one which, I regret to say, has never been adopted by the government—is to hire a sufficient number of armed herders to take the entire grand remnant sale of Indian tribes out on the plains and watch them all summer, rounding them up and counting them every morning and evening to see that they are all there. Through the day they might be kept busy pulling up the "pizen weed" which grows all over the grazing grounds of the west, and thus they would get plenty of fresh air and at the same time do good in a modest way. But this scheme for "Utelizing" the Utes is a hundred years ahead of the age, and so I do not expect that it will meet with the indorsement of the administration.

There are, however, two sides to the Indian question—viz., a right and a wrong side. That is why the Indian question wears so well.

One of the great wrongs incident to the matter is the great delay in officially reaching the war department in such a way as to attract the eye of the speaker. By the time a courier can get into a telegraph station and wire the governor of a state, who notifies the adjutant general to write a dictated letter with his trenchant typewriter, apprising the commander of the department, who is at Coney Island or Carlsbad, with no typewriter nearer than fifteen miles, who wires the governor to make active inquiries about the matter, and by the time the governor has sent a committee, who go to within fifty miles of the scene of hostilities, and return at the end of six weeks to report that they do not know whether there has been an outbreak or not, and then when a ranchman is really killed and reputable eyewitnesses who were personally acquainted with deceased, and will swear that they have no interest in the result of the outbreak, come in and make a written and grammatical request for troops, and the war department gets thoroughly rested, the Indians have gone home, washed the gore off their hands and resumed their quiet, humdrum life. Like trying to treat a man in Liverpool for softening of the brain by applying the mind cure per cable from New York, the remedy is too remote from the disease.

Indians are quick and impulsive in the matter of homicide. They are slow to grapple with anything of a humorous nature, and all the humorous lecturers who have been on the Ute lecture course have lost money, but in the holocaust line or general arson, torture and massacre business they act with astonishing rapidity. As a race, they regard this entire land as their own, just as the musquitoes claim New Jersey, simply because they were there first.

The Indians see that the property is improving and so they feel more and more wealthy and arrogant. They claim that they will never give up their rights unless they get hard up, and even then it will not count. They always have a mental reservation in these matters which they prefer to the reservation provided by the government.

Indians naturally dislike to see these lands in the possession of wealthy men whose sons earn a precarious livelihood by playing lawn tennis.

Colorow once made a short speech to his troops, which was taken down at the time by a gentleman who was present and who was collecting material for a new third reader for our common schools.

Colorow claimed that it was incorrect, and the notes were found afterward on the stenographer's body. It is about as ticklish business to report an Indian speech as it is to poultice a boil on the person of the ameer of Cabul.

In closing Colorow said: "Warriors, our sun is set. We are most of us on third base and we have no influence with the umpire.

"Once I could stand on the high ground and one shout would fill the forest with warriors. Now the wailing wind catches up my cry and bears it away like the echo of our former greatness, and I hear a low voice murmur, 'Rats.'

"Whisky and refinement have filled our land with sorrow. The white man crossed the dark waters in his large canoe and filled the forest with churches and railroad accidents.

"The Indian loves not to make money and own aldermen for which he has no use. He loves his wives and his children and intrusts them with the responsibility of doing all his work. The white man comes to us with honeyed words and says if we will divide our lands with him he will give us a present, and when we give him a county and a half he gives us a red collar button and a blue book, in which he has written in his strange and silent language, 'When this you see, remember me.' Our warriors are weak and have the hearts of women. They care not for the warpath or the chase. Most of them want to go on the stage. Once my warriors went with me at a moment's warning to clean out the foe. They slept in the swamps with the rattlesnakes at night and fought like wolves in the daytime. Now my warriors will not go on the warpath without a valise, and some of them want to carry their dinner.

"Some day, like the fall of a mighty oak in the forest, Colorow will fall to the earth and he will rise no more. You will be scattered to the four winds of heaven, and you will go no more to battle. Some of you will starve to death, while others will go to New York and wear a long linen duster, with the price of cut rate tickets down the back. Some of you will die with snakes in your moccasins, and others will go to Jerusalem to help rob the Deadwood coach.

"Warriors, I thank you for your kind attention and appreciation. The regular outbreak will begin to-morrow evening at early candle light. The massacre will open with a song and dance."

Colorow dresses plainly in a coat of paint and a gun.—New York World.

He Would Be a Cannoneer.

Recruit—If the request is not out of order, sir, I wish you would assign me to duty with the Gatling gun squad.

Captain—The squad is already full. Have you any special reason for the request?

Recruit—Only that I think I am qualified to make a good cannoneer, sir. I run the coffee grinder for Shark & Bilford when I'm in the city.—Judge.

Not an American.

Lawyer—Now, Mr. Redford, you say you have doubts as to whether the late Mr. Clark was an American citizen. Please state your reasons for that belief.

Witness—Well, I knew the deceased for three years and he didn't go to a ball game in the whole time.—Tid Bits.

Masquerade.

To the beach when he came
All our hearts grew aflame,
For he was an Apollo in feature;
And the gilding of birth
Brightly crowned all his worth,
And we vowed him an elegant creature.

But, alas! for the spell
From the gilded mark fell,
From our noble guest, handsome and witty,
And we learned with chagrin
We were all taken in
By a vender of fruit from the city.
—Boston Budget.

ALFALFA OR LUCERN.

The Plain Truth About the Much Talked-of Forage Plant.

There is considerable interest just now existing in regard to the forage plant commonly known as alfalfa. This is the Spanish name of lucern, a plant of the leguminous tribe closely resembling clover, and commonly cultivated in Europe for green fodder. It differs from clover, however, in having more woody stalks, slenderer leaves, a purplish flower, and a legume or pod, which is coiled spirally and contains several seeds. It is a native of Spain, and thrives best in hot, somewhat dry climates, and produces enormously when irrigated. In the northern Italian provinces it is commonly grown in this way, and is cut several times in a season, producing in the aggregate sixty to eighty inches of herbage in the growing season. It is perennial, and when kept free from weeds and manured occasionally it continues to yield abundantly for twenty years, never being permitted to seed, however.

It is not a good hay plant unless it is cut quite young and cured with little exposure to the sun, but as a green-fodder plant it is unexcelled. As compared with clover it is sixteen per cent. richer in albuminoids, thirty-three per cent. richer in fat, and eight or nine per cent. poorer in carbo-hydrates, and has twenty per cent. more woody fibre, to which it owes its inferiority as a hay plant. It is an excellent food when cut green for all farm animals, for which use it is extensively cultivated in California, and might be made very valuable in the Southern States.

As it has been made a subject for much discussion recently in the leading agricultural journals, and has been frequently written of with more favor, we think, than it deserves, it is perhaps desirable to mention its disadvantages as compared with the only crop with which it comes into competition, as well as to notice all its valuable characteristics. This we do from personal experience with it, having grown it more than twenty years ago as a forage crop and abandoned its culture as less profitable and convenient than that of red clover for ordinary farm purposes. It has never been extensively grown where clover flourishes, and in such localities has been sown more as an experiment than for use, and when so sown has always fallen into neglect and disuse. It is of no use as a temporary crop grown in rotation, because of its cost and the slowness with which it comes to maturity. It requires a special culture, must be sown alone and upon rich soil in the cleanest condition, for it is quite unable to resist weeds, and when in its first weak, slow growth is quickly smothered and stunted, consequently it is necessary to manure the soil well and to sow the seed in drills twelve or sixteen inches apart and to cultivate crop frequently until it covers the ground. The seed is costly, twenty pounds per acre is required, and the price is twenty-five cents per pound. It can not be grazed as clover may be nor is it more prolific than clover.

These are its disadvantages, and it is easily perceived that as a competitor with clover it can not be profitably substituted for it in ordinary farm culture where clover does its best. And when clover is plowed under after it has served its purpose so well for two or three years it furnishes to the soil a much larger quantity of valuable plant food than is contributed by alfalfa.

Alfalfa flourishes most luxuriantly upon the rich river bottoms of the California valleys, known as tule lands, and upon the rich dry lands of Colorado and other localities of the far West, where the climate is dry and irrigation is practiced. There it is at its best, but the conditions under which it luxuriates being so different from those prevailing elsewhere show plainly that it is not a suitable plan for ordinary farming where clover is at its best. Nevertheless, there are some localities in the eastern part of the continent where it may be found very useful. In Florida and most of the Southern States, for instance, it will find a congenial home and may be used most advantageously for summer feeding as green fodder; but its exacting character in regard to culture should not be lost sight of, for it will refuse to grow under the same conditions in which clover would yield a fair crop and would utterly fail under the common system of culture which prevails in the South.

The manner of preparing the soil for alfalfa is much the same as that for any other spring crop. The land should be deeply plowed, and if not rich enough to bring seventy-five bushels of corn or three tons of timothy and clover per acre it must be made so by liberal manuring. The land must also be cleared of weeds by previous summer fallowing, and this clean culture is indispensable. The soil is brought to a fine tilth by repeated harrowing, and the seed is then drilled in rows twelve to sixteen inches apart some time in May. The ground is repeatedly cultivated during the summer, and if the growth is good a crop of fodder may be mowed in the fall, but it is best to leave it uncut as a protection to the young roots the first winter. Pasturing by pigs is destructive of the crop.—*N. Y. Times.*

—Take care how you let any machine oil or lubricator come in contact with a cut or scratch on your hand or arm, or serious blood poison may result. In the manufacture of some of these machine oils fat from diseased and decomposed animals is used. All physicians know how poisonous such matter is. The only safeguard is not to let any spot where the skin is broken be touched by any machine oil or lubricator.—*The Farmer and Manufacturer.*

TWO VIEWS.

WAS at college first
I met him,
There competing
for a prize;
And he gave his deep
oration,
All his soul within
his eyes.

'Twas a masterpiece,
in Latin,
Full of feeling, fire
and thought,
Rich with wild poetic
fancies
Thro' the phrases
interwrought.

And his proud young face shone on me,
And his clear young voice rang loud,
Leaving in my ear an echo
O'er the plaudits of the crowd.

Thus I listened, thrilled, enraptured,
Hung on every ringing tone,
Till the heart within my bosom
Beat for him, and him alone!

On my breast I wore his colors,
Love's sweet tribute to his fame;
And while thinking of him ever
To my heart I called his name.

And we met again—'twas summer;
I had waited long and well.
I was down beside the seashore,
Stopping at the Grand hotel.

Seated all alone at dinner,
Wrapped in serious thought was I,
When a voice, so deep and tender,
Murmured, "Peach or lemon pie?"

Then I looked up, pale and trembling;
There "he" stood within my sight,
In a waiter's badge all shining,
And a waiter's apron white.

He had hired there for the summer,
And his wild, poetic heart
Now was struggling through the mazes
Of a dinner a la carte.

So I turned me coldly from him,
With a sad and sobbing sigh;
After all my weary waiting
All I said was "Lemon pie!" —Judge.

IN THE MINORITY.

A Tennessee Reformer Who Trusted the People Though They Slew Him.

The query as to what protection the minority of civilized persons can have against the corrupt majority recalls an amusing incident that happened in M—— county, Tenn., several years ago.

An enthusiastic young reformer became a candidate for the legislature. He was full of plans and theories for making the people happier, healthier and wealthier. The people, he said, were in the majority, and all they had to do was to vote for him and inaugurate an earthly Paradise, and everybody would vote for him, of course, for they had told him so.

When the ballots were counted, however, he had received about 250 out of a possible 3,000.

"Well," asked a friend next day, "well, John, what do you think of the people now?"

"I can never," replied the crank, "I can never, sir, cease to trust the people. But durn me if it don't begin to look like the people are in the minority."—Jacksonville News-Herald.

Perfectly.

He—Ain't that scenery over there pretty? She—Perfectly lovely.

He—That hill is—is—is—grand. She—Perfectly splendid.

He—The water is clear and—and—clear and—putty deep out there, I guess? She—Perfectly charming.

He—See that fish jump up? She—Wasn't it lovely?

He—The sky's red over yonder. She—Perfectly beautiful.

He—See those fellows cutting oats? She—Perfectly exquisite.

He—Look at that old fellow with the jug? She (with unconscious truth)—Perfectly natural.

He—I am going home to-morrow. She—I am so sorry. I have enjoyed your company so much. You are so original, and how few original men we meet in society.

He (thrilled)—I am delighted to hear you say so. I have never met a lady that interested me more than you have. You are so unaffected and original. Look, did you see that lady fall in the mud? She—Perfectly delightful.—Arkansaw Traveler.

Only Waiting.

"Boy!" exclaimed a Michigan avenue grocer, "you've been hanging around here for half an hour!"

"Yes, sir."

"Looking for a chance to steal something!"

"No, sir; waiting for another boy, who has gone home after two cents."

"Oh! And then you will buy something?"

"Yes, sir I agreed to wait for him here, and when he comes we're going in next door and buy candy!"—Detroit Free Press

A Lover's Heart.

Jessie—If that bull should attack us, what could you do?

Tom—I could reach that fence in less than two seconds.

Jessie—Yes, but what could I do?

Tom—You? Why, your parasol would keep his attention until I was safely over!—Life.

Caught in the Act.

"Have you any of Dr. Leed's patent cough syrup?" inquired a gentleman of a drug clerk.

"No, sir; but I have some of my own make, which is as good if not better. Can I give you a bottle?"

"No, I thank you; I am Dr. Leed."—Judge.

THE PROMINENT CITIZEN.

A Queer Character That Flourishes Wherever Man Does Congregate.

It is the ambition of some men to figure in the role of prominent citizen. They have an insatiable craving to see their names in print. They attend all meetings in which "our more prominent citizens" take part, and nothing pleases them more than to have their names appear in the morning papers in the long list of vice presidents.

The prominent citizen signs requests to a theatrical manager or star to accept a complimentary benefit, after scrutinizing the list of names to make sure that there is a preponderance of prominent citizens like himself, though it has been remarked that he rarely buys a ticket.

It is for the accommodation of the prominent citizen that chairs are placed on the stage on public occasions, and we have seen him swell up with the consciousness of his own importance as he marched proudly to his seat, looking as though the whole affair was arranged with the sole view to lifting him up for the admiration of the multitude of ordinary citizens seated below, who had no prominence to speak of.

So long as he maintains a dignified composure and discreetly holds his tongue, he is safe, but sometimes the prominent citizen—the kind we are writing about, of course—is betrayed into the weakness of making a speech, and the shallowness of his claim to any consideration above his fellows becomes painfully evident, leading simple people to inquire how he got to be a prominent citizen, anyhow. It is embarrassing to have a question of that sort put in motion, and no prominent citizen who feels at all insecure in his position should ever do any thing to arouse it.

There is rarely a procession without a carriage at the disposal of the prominent citizen. It would be extremely undignified for him to walk like common mortals; besides that, in a crowd he might be mistaken for one of the most insignificant in the procession, and no suspicion of his greatness. Seated in an open hack, with a flaming badge pinned on his coat, strangers on the sidewalk might be led to inquire: "Who is that man?" and he is in hard luck if there isn't some one at hand to reply: "That is Colonel Blank, one of our most prominent citizens."

No one enjoys being interviewed by the newspaper reporter like the prominent citizen we are describing. He is ready to give his opinion on any and all subjects, from a fracture in the sidewalk to a break in the Cabinet. If a series of interviews should appear in a newsaper headed, "What our prominent citizens think of it," without his name appearing it would make him sick, and he would probably call upon the editor demanding an explanation. Instances have been known of his writing out an interview with himself, unasked, and putting it in the reporter's hands.

It is on an excursion to some other city that the prominent citizen shines in his greatest glory. To have his coming announced in the papers; to be received at the depot by a delegation of prominent citizens, some of them as transparent humbugs as himself; to listen to speeches of welcome, and make a speech himself, if some friend is kind enough to write it for him; to be feasted and treated to free drinks, and taken around in a hack to see the prisons, poor-houses, public libraries and breweries, with a lunch and speeches at each stopping-place; to be stared at by barefoot boys; to have the band play "See the Conquering Hero Comes;" to be introduced to people as the man "who has given so much prominence to his city," the introducer not embarrassing himself or others by entering into any details—all these are what give the prominent citizen such exquisite joy. Then it is that he is in his perfect element.—*Texas Siftings.*

Driving Away Mosquitoes.

Various substances are used to drive mosquitoes away. In some parts people anoint their bodies with fish oil as a protection against them. The Chinese are said to be very clever in the use of such protective unguents. In India, mosquitoes are smoked out of a room by burning chips of wood and incense. A few sprigs of wormwood placed about the pillow sometimes protect the sleeper from their attack. A correspondent asserts that if a piece of raw meat is hung over the sleeper's head the mosquitoes will fasten greedily on to it, leaving the human being in peace. In the morning scores of the gorged creatures can be destroyed by dipping the meat into a bowl of boiling water. Dark, damp or ill-ventilated rooms are the favorite haunts of mosquitoes, which seldom molest you when you sleep in the veranda or on the house roof; or if you have the punkha going all night over you, with the doors and windows wide open, you are pretty safe.—*London Graphic.*

An Ancient Family.

There are more ways than one of calling a person an old goose. Perhaps the neatest is that adopted by Kosciusko Murphy. Miss Esmerelda Longcoffin is very proud of her relations to the Longcoffins of Virginia. Taking offence at some remark made by Kosciusko, he said, in a cold, haughty tone of voice:

"Sir, I wish you to understand that I belong to an ancient family."

"Yes," replied Kosciusko, yawning, "I've read of that family. They saved the Roman capital."—*Texas Siftings.*

—The small boy wishes some of those people who feel so shocked or grieved because he goes in swimming without clothing, would chip in liberally for a bathing suit.—*Boston Globe.*

AMERICAN WATCHES.

Some Valuable Suggestions in Regard to the Export Trade.

The capacity of our watch factories can not be brought into full play, simply because by so doing our market would be overstocked and competition would force prices ruinously low. As the case stands at present, a number of watch-factories have been called into existence, for which there really was no need. The earlier and larger factories were fully able to meet the demand; but the idea that manufacturing watches was one of the most profitable enterprises tempted quite a number of capitalists to take a hand in the business, and in many instances to their sorrow. Already the evil consequences of overdoing the thing shows itself in the effort to make cheap watches and before a great while we may see the manufacturers of watches reduced to the level of making cheap clocks.

Looking at the matter from another standpoint, we will soon come to the conclusion that our watch industry is only in its infancy. At the present moment, Switzerland makes watches in point of numbers far in excess of America, and the watches made in Switzerland are all exported, while the watches made in America are principally for the home market. As there is no question of a doubt that while America can produce better moderate-priced watches than Switzerland, and give more value for the money expended, the question presents itself, why not seek foreign markets more energetically than we have done? Some of our older watch factories are doing an export business, but it seems as though it is not done with that zeal and energy that characterize the Swiss export trade. In one particular the Swiss differ from us in their export trade; they study the wants and purchasing capacity of their foreign customers and make goods to suit them. As far as it is known to the uninitiated, our manufacturers have done these things but to a very limited extent. The writer, coming in contact some time ago with the chairman of the East India Navigation Company, was told that this gentleman would place a very large continuous order, if he could be supplied with watches which were fair time-keepers in metal cases at five dollars each. That such watches can be produced at a very fair profit, there is no shadow of a doubt, and we know whereof we speak. All we would have to do would be to find out the wants and furnish samples. Australia and Asia are now and will be excellent markets, and by expedition and energy we can secure the bulk of the trade of these. The watch wearing and purchasing capacity of the globe is enormous and can be developed in such a manner that we may at some future day wonder that we did not tap the mine sooner.—*Jewelry News.*

HE GOT A MEAL.

How a Tramp Managed an Uncharitably Disposed Woman.

"Madam," said a tramp as he called at the back door of a Sioux Falls residence, "gimme a bite!"

"No, sir, can't do it."

"Why not, madam?"

"You're able to work, sir—I don't believe in encouraging vagrancy. Go on away now, or I shall scream for help!"

"All, right, madam—don't holler. But I called on the woman next door last evening, and she gave me a very different answer, madam."

"She was just fool enough to go and give you something, I suppose?"

"Oh, no, madam, she didn't give me nothin' neither, but she give me a much different reason. Good-by, madam!"

"Hold on just a minute! What did she say?"

"She come to the door all dressed up in a new yaller dress, an' seemed very much excited, madam, an' when she opens the door I looks in an' sees a man in there sittin' in a cheer, madam."

"Mercy, has it come to this with her! I wouldn't hardly believe it. Here, don't go away—take this, my good man."

"Thankee, madam! Baker's bread? Yes, I gene'ally prefers it to ho'-made bread, 'specially where they aint none too good cooks. The butter is jes' a little tainted, madam. Haint got no jell to put on it, I s'pose? Oh, you have; all right, jell improves it powe'fully. No, thankee, I don't keer 'bout any fruit cake—better throw it in the slop-pail where the children won't get it, madam. Any pie? Ah, yes, correct, that cream pie is good, but this apple rather lays over it. I'll put this cold chicken in my pocket. That'll do, madam,—this is 'bout all I can carry!"

"But what was it that woman said to you?"

"Why, she seemed excited like, 'sif she was goin' some place, an' she says: 'Please go 'way, sir, we haint got nothin' in the house to eat!'"

"A pretty excuse to get you away! But that strange man—"

"He proved to be her husband, madam. He came out an' kicked me through the top of a shade tree an' then chased me two blocks! He's pizen on tramps, madam! Good-bye—put jes' a little more cream in yer pie-crust an' it'll improve it!"—*Dakota Bell.*

—The most flagrant case of professional discourtesy on record occurred on a Southern Pacific train the other day. Some highwaymen, after cleaning out the passengers of every dollar, went away without giving the sleeping-car porter a single cent.—*N. Y. Tribune.*

ON THE RIVER VOLGA.

Incidents of a Steamboat Voyage on Russia's Great Water-Way.

I went at once on deck, and there witnessed a spectacle which has remained deeply fixed upon my memory, and which, for weird sublimity, I have never seen equaled. The steamer lay in clear water, but ten yards ahead arose the jagged teeth of an immense ice block, stretching from shore to shore, more than half a mile in width, and running backwards for fully two thousand yards. The cause of the obstruction could be seen at a glance. Less than a mile ahead the river bent sharply to the left, and after describing almost a semicircle turned again into its old course. It was in this loop that the ice, at first merely hampered in its descent, had at last been caught as in a gorge, and the advance guard of the mass now lay before us, layer piled on layer, block welded to block, the whole frozen together in rugged shapes, rising out of the water like a fringe of rocks, just as pitiless, just as impenetrable. Far off, beyond the bend, the glimmer of open water could be perceived, but between it and us the ice-field stretched for more than a mile. One by one the passengers appeared above the stairway, and had soon aggregated themselves into groups, from which came the sound of eager, in some cases excited, conversation. By the majority, further advance was not to be thought of; a few were content to await the starting of the ice, which they thought might happen at any moment; one alone suggested the wisdom of a retrograde movement.

The captain evidently had a plan of his own, and as soon as day had fully lighted up the scene he took prompt measures for putting his scheme to the test. We heard him give an order to the engineer, and then, before any of us could anticipate what would follow, we found the Muravieff moving forward at full speed in the direction of the ice-barrier. A few moments later a loud crash was heard, as the steamer, shivering from stem to stern, buried herself in the obstruction. The engines were at once reversed, and the Muravieff retreated slowly from the cavity which her hull had left in the ice-field; but on reaching her former position she once more advanced to the attack, these movements being again and again repeated. At first it had seemed the captain's purpose to force his way through the barrier—a plan which, had it been entertained, would have abundantly deserved the epithet of foolhardy. Gradually we became aware of the more reasonable elements of the method of action resolved upon. In the first place, be it said, the Muravieff was in no danger; iron-sided, otherwise strongly built, she had nothing to fear from rough usage. Her battery of the ice-barrier, moreover, contemplated something much more easy of accomplishment than a downright destruction of the obstacle by dint of repeated blows. It was at least probable that, with fresh masses pressing against the upper side of the field, the ice might start, leaving the bend once again clear; and what would be more likely to aid such a movement than a series of persistent taps from the prow of the Muravieff.

The day grew slowly to noon, the afternoon succeeded; at sundown we were still struggling with our foe in front. Slice after slice had been cut from the ice mass, now to right and now to left; slice after slice, separated from the bank by the broad hull of the steamer, had first lingered near us, and then gone down with the lazy current southward; but after a day's work the block was as immovable as ever, while the Muravieff, judging by marks on shore, had not advanced sensibly from her first position. A night of rest followed, and then the Muravieff resumed her attack upon the barrier. Before noon a companion steamer, also laden heavily with merchandise, reached the scene of the block, and was for some time enabled to aid us, though but feebly, in our efforts to push forward. In the afternoon we had succeeded in reaching a patch of extremely thin ice, near the right bank of the river, and there found comparatively easy progress for a quarter of a mile. Then came the barrier again, more formidable than ever. Night at last fell redly, threatening new troubles, above all prophesying the direst enemy that we had encountered yet.

On the morning of the third day I rose just before sunrise, and found the scene transformed. The thermometer had fallen ten degrees; the Muravieff lay motionless, frozen to the barrier, of which she had now become almost part and parcel; all around, every thing not living, was stiff and stark. The natural desolateness of the spectacle had taken a new and forbidding aspect in the wan light and frosty air; right and left long stretches of steppe joined their deserts of brown with the sullen hues of the ice field, making a scape of land and river that looked bare as if swept by a hurricane. One seemed, in fine, to be gazing on a petrified world, timeless as well as motionless, when all of a sudden a bright ray shot across the scene from the southeastern horizon. A few minutes later a round red ball had climbed into sight, and was tipping with fire some of the landmarks now so familiar to us: the long, low building with a tower, to our right, not unlike a church; the river cliff above the bend in front; the bluff flanking the steppe-like plains on our left.—*Edmund Noble, in Atlantic.*

—From statistics in the hands of the Commissioner of Immigration, he reports the estimated population of Dakota, 600,000, not an exaggeration.

INDEPENDENCE, CAL

SATURDAY NOVEMBER 12 1887

The New Era Ditcher.

The ditching machine brought from Chicago for the east side canal was put in operation at the beginning of the week. It is all the makers promised or the buyers expected. The machine is simple in construction and easy of operation; it can be turned as easy as an ordinary hay wagon. Three men and sixteen horses work it; twelve horses are hitched in front and four behind; these are yoked to a pole that projects backward. Two of the three men drive; the third man stands on a platform on top of the machine and operates levers that control the plow and elevator. The plow is attached to a beam that is easily raised or lowered by the man on the platform above; it can be lifted entirely out of the ground in an instant, or lowered so as to make a furrow a foot or more in depth. Almost touching the mould-board of the plow is a rubber belt three feet wide; this belt is the elevator and projects at a right angle from the machine. The earth turned up by the plow falls upon this belt and is carried away and dropped upon the bank of the canal. Twenty-two feet is the greatest distance from the plow that the earth can be conveyed at one operation; six feet is the least distance. A canal forty-four feet wide can be made by one removal of the earth. Stones weighing fifteen pounds or less are ploughed up and carried away easily. The working parts of the machine are few, strong and simple. Any man accustomed to a mowing machine can readily operate one of these ditching machines. The manufacturers of the machine will sign contracts that their machine will excavate and place upon the bank of the canal one thousand cubic yards of earth in ten hours work. This to be done to the entire satisfaction of the buyer before the machine is paid for; the buyer to furnish the men and horses necessary to work the machine while the trial is being made. Estimate the daily wages of three men at seven and a half dolldrs; cost of feeding sixteen head of horses, sixteen dollars per day; total daily cost of operating the machine, twenty-three and a half dollars; quantity of earth moved one thousand yards; average cost per cubic yard, two and one third cents, nearly. By the usual appliances of plows and scrapers the average cost per cubic yard for moving earth is about ten cents; or *nearly four times* the cost of doing the work by this machine. This is an immense saving. Every one interested in irrigating and canal making, and this means every one in Owens valley, should go to Independence Station and see the machine at work. The operation of this machine has made it as certain as anything human can be, that the east side canal will be conveying water on to the lands in time for settlers to go to work next spring.

Railroad Extension.

A correspondent of the San Bernardino *Index* writing of the Salt Lake and Los Angeles railroad says:—With this road constructed from Salt Lake to Los Angeles it would open up timber belts unequaled by any other in the state except the redwood districts. The coal fields traversed by this line are over three hundred miles in length by 200 miles in width, so far explored. The mineral region consists of those famous mining districts that have made many men millionaires on this coast. We refer particularly to Pioche, Panamint, Darwin and Cerro Gordo; the great Death valley borax and soda deposit, owned and operated by W. T. Coleman & Co.; the great Resting Springs lead and silver district in which a number of our own citizens are interested; the Bullion district which Senator Jones of Nevada is now developing and which is proving a wonderful bonanza; the Oasis mines just north of the Bullion district, where gold and silver lies in abundance; the great Pahrump valley with its many thousands of acres excellient fruit lands. Not only the above developed properties will it traverse, but a country 700 miles in length sprinkled with valuable mineral indications on every hand. This country remains in a comparatively unexplored state owing to the great scarcity of fuel and the heavy cost of transportation. With such a line of railroad, which the Los Angeles & Salt Lake proposes to be, it stands to reason that this vast mineral belt and the many thousands of acres of coking coals will be brought together, and transportation brought to the minimum, thereby greatly augmenting the valuable mineral output.

Pioche alone produced $13,000,000 without cheap transportation or cheap fuel. Speculate for a moment on the amount this district could have given the world if it had a transcontinental road running through it.

The construction of the Los Angeles & Salt Lake railway means a great demand for farm produce, in fact it creates a demand for every conceivable thing our fair valley produces.

It means a demand for thousands of miners and laborers to carry on this great development, which will always be a source of revenue to us.

Most of the great mineral regions described above are in Inyo county.

Millions Of Acres Open To Settlement

The land department at Washington has given notice that millions of acres of railroad indemnity lands willbe open to settlement by homesteaders and preemptors within a few months. These lands are among the best lands ever offered west of the Mississippi river and in the Gulf States. Such an opportunity for the young people of this nation to acquire real estate for the mere taking will never occur again, as the public lands will by another year be practically exausted. Thereafter the struggle for homes and land will resemble Europe. All who are about to start for the West or locate on Southern railroad lands will find Copp's Settler's Guide of special service—published by Henry N. Copp, Washington D. C.; price, 25 cents.

It tells all about the homestead, preemption, timber culture and other land laws; how to decipher surveyed township, section, and quarte-section corners; how long residence must be continued; what settlement and improvements must be shown; how and on what grounds contests against abandoned and illegal entries can be commenced; location of government land offices and names of land officers, and it will doubless save many settlers from the loss of their land and improvements, as designing people often mislead uninformed settlers as to the requirements of the settlement laws.

ORDINANCE NO. 21.

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows:

SECTION 1. The regular meetings of the Board of Supervisors of Inyo County, State of California, must and shall be held at the town of Independence in the county and State aforesaid, being the County Seat of said Board, on the first Mondays in February, May, August and November of each year, and must continue from time to time until all the business before the said Board is disposed of. Such other meetings must be held as are otherwise provided for by law.

SECTION 2. This Ordinance shall take effect and be in force on and after fifteen (15) days from its passage, and Ordinance No. 2 of said Board of Supervisors, together with all ordinances or parts of ordinances in conflict herewith are each and all of them hereby repealed.

SECTION 3. This Ordinance shall be published in the "INYO INDEPENDENT" a newspaper published in said Inyo county, at least two weeks said publication to be made for said time and before the expiration of said fifteen days.

This Ordinance was passed by the Board of Supervisors of said Inyo County State aforesaid, at a regular meeting of said Board held on November 11th, 1887, by the following vote:

Ayes: J D Harger, J R Eldred, T C Boland, E Robinson, J C Eddy.
Noes:—
Attest: P. H. MACK, Clerk. J. D. HARGER, Chairman.
[SEAL]

[ENDORSED]
ORDINANCE NO. 21.

Filed and recorded November 11, 1887, in Ordinance Book B, on page 43.
P. H. MACK.
Clerk.

DESERT LAND FINAL PROOF.

D. E. No. 216.
UNITED STATES LAND OFFICE,
INDEPENDENCE, CAL.
October 18, 1887.

Notice is hereby given that Josiah G. Dodge of Lone Pine, Inyo county, State of California, has filed notice of intention to make proof on his desert land claim No. 216, for the S E ¼ of S E ¼ of Sec 22, Tp 15 S, R 36 E, M D M, before the Register and Receiver at Independence, the 3rd day of December, 1887.

He names the following witnesses to prove the complete irrigation and reclamation of said land: Edward J. Reynolds, Charles Mates, Manuel Silva and Joseph Blaney, all of Lone Pine, Inyo county, Cal.

JOHN W. P. LAIRD, Register.

Notice to Tax-Payers

Notice is hereby given that I have received from the Auditor of the County of Inyo, State of California, the Assessment Roll for the year A D 1887, and that the taxes therein are now due and payable in gold and silver coin of the United States; that the taxes will become delinquent on the last Monday in December, 1887 at 6 o'clock p m, and that unless paid prior thereto five per cent. will be added to amount thereof; that for the purpose of receiving such taxes I will be and and attend at the following named places on the dates named, to wit:

Bishop Creek, November 9th.

Big Pine, November 10th.

Darwin, November 14th.

Keeler, November 15th.

Lone Pine, November 16th.

Independence, on and after November 17th.

S. G. GREGG,
Tax Collector.

PROBATE NOTICE

IN THE SUPERIOR COURT OF THE COUNTY of Inyo, State of California.

In the matter of the estate of John R. Hughes deceased.

Notice for publication of time appointed for probate of will.

Notice is hereby given that Monday, the 21st Day of November, A. D. 1887, at 10 o'clock a. m. of said day, and the Court-Room—Probate—of said Court, at the town of Independence in the County of Inyo, State of California, have been appointed as the time and place for proving the will of said John R. Hughes, deceased, and for hearing the application of John W. P. Laird and W. L. Hunter for issuance to them of letters testamentary thereon.

P. H. MACK, Clerk.
JOHN W. P. LAIRD, Attorney for Petitioner
Dated November 2, 1887.

NOTICE OF ELECTION

FOR VOTING BONDS TO THE

Irrigation Dist. No. I.

Notice is hereby given to the electors of Irrigation District No. 1, of Inyo county, State of California, that in accordance with an Act of the General Assembly of the State of California, entitled "An Act to Provide for the Organization and Government of Irrigation Districts, and to provide for the Distribution of Water thereby for Irrigating purposes," approved March 7, 1887, as set forth in Section 15 of said Act, an election is hereby ordered and will be held at the several places within said District, as hereinafter set forth, on

TUESDAY, November 29, 1887.

At which time will be presented to the electors of said District the question of issuing the Bonds of said District and selling the same for the purpose of raising money to procure and purchase water and to build and construct an Irrigation Ditch, as provided for in said Act, within the boundaries provided for by the Board of Supervisors of said Inyo county in the formation of said District.

The amount of Bonds to be voted for and issued is Two Hundred Thousand Dollars. At such election the ballots shall contain the words: Bonds—YES, or Bonds—NO.

Said election will be held in conformity with the provisions of the Act of the General Assembly of the State of California above referred to.

For the purpose of holding said election, the following voting places are hereby established and officers appointed:

First Division—At the late residence of W S. Morton. Inspector, Joseph Seely; Judges, M. Bush and David Hukill.

Second Division—At the residence of S. A. Densmore. Inspector, S. A. Densmore; Judges L. Baxter and L. A. Anger.

Third District—At the former residence of H. L. Clark. Inspecter, H. L. Clark; Judges, J. W. Symmes and Arthur Tanner.

Fourth Division—At the Halfway House. Inspector, J. E. Shepherd; Judges, John Meyers and Thomas Hamilton.

Fifth Division—At the residence of A. C. Harvey. Inspector, A. C. Harvey; Judges, Timothy Richards and David Wells.

By order of the Board of Directors.
W. L. HUNTER, President.
A. R. Conklin, Secretary.
Dated November 1, 1887

NOTICE TO SHEEP MEN.

Notice is hereby given to all persons engaged in the business of raising, grazing, herding and pasturing sheep in the County of Inyo, and who have not procured the license required by Ordinance No. 29 of the Board of Supervisors of said Inyo county, are liable to a fine of two hundred and fifty dollars, or imprisonment in the proportion of one day for each dollar of said fine, and that they will be proceeded against as provided in said Ordinance.

S. G. GREGG,
Tax Collector.

DELINQUENT NOTICE

NEW COSO MINING COMPANY.—LOCATION of principal place of business, San Francisco, California; location of works, Darwin, Inyo county, California.

NOTICE IS HEREBY GIVEN, THAT AT a meeting of the Board of Directors, held on 19th day of Oct., 1887, an assessment (No. 21) of TEN CENTS per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary, at the office of the Company, 808 Montgomery street, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the 1st day of December, 1887, will be delinquent, and advertised for sale at public auction; and unless payment is made before, will be sold on Monday the 26th day of December, 1887, to pay the delinquent assessment together with costs of advertising and expenses of sale.

By order of the Board of Directors.
JOHN L HUNT Secretary.
Office—808 Montgomery street, San Francisco California.

ORDINANCE NO. 19.

The Board of Supervisors of the County of Inyo, State of California, do ordain as follows:

All persons doing business within the county of Inyo shall obtain licenses from the Tax Collector of said county as follows:

SEC. 1. Auctioneers are divided into two classes and must obtain licenses from the Tax Collector as follows

First class. Those whose average monthly sales amount to $2,500 and upward constitute the first class and must pay a license of $50 per quarter.

Second Class. Those who average monthly sales are less than $2,500 constitute the second class and must pay a license of $10 per quarter.

SEC. 2. Persons engaged in banking, loaning money at interest, or in buying or selling notes, bonds, or other evidences of indebtedness of private persons, or in buying or selling State County or City stocks, or other evidences of State, County or City indebtedness, or stocks, notes, bonds, or other evidence of indebtedness of incorporated companies, or in buying or selling gold dust, gold or silver bullion or gold or silver coin, are divided into two classes and must pay licenses as follows:

First class. Those doing business in the aggregate to the amount of $10,000 per quarter, or over, constitute the first class and must pay a license of $25 per quarter.

Second Class. Those doing business in any amount less than $10,000 per quarter constitute the second class and must pay a license of $10 per quarter.

SEC. 3. From each proprietor of a billiard table not kept exclusively for sale, use, for each table, $5 per and for each bowling alley, $15 per quarter for each alley; but no license must be granted for a term of less than three months.

SEC. 4 For each exhibition for pay for a theatrical performance, a caravan or menagerie, or any collection of animals, from or other acrobatic performance, $7. And for each show for pay of any figures, jugglers necromancers, magicians, wire or rope dancing, and sleight of hand exhibitions, $5 for each performance. The provisions of this section do not apply to exhibitions given for the benefit of churches, school, or other charitable esteemed objects, by any amateur dramatic association or literary society of the town or district in which such exhibition or entertainment is given.

SEC. 5. Each pawn broker must pay a license of $25 per quarter.

SEC. 6. Each keeper of an intelligence office must pay a license of $10 per quarter.

SEC. 7. Every person who sells spirituous, malt or fermented liquors, or wine in quantities less than one gallon, must obtain a license therefor from the Tax Collector and make the following payment:

First Class. Those making sales to the amount of $1,500 or more as a monthly average constitute the first class and must pay a license of $25 per quarter.

Second Class. Those making sales of less than $1000 per month constitute the second class and must pay a license of $20 per quarter.

SEC. 8 Every person who, at a fixed place of business sells any goods, wares or merchandise, wines or distilled liquors, drugs or medicines, jewelry or wares of precious metals, whether on commission or otherwise, (except Agricultural or mechanical productions, or the productions of any stock, dairy or poultry farm of this State, when sold by the producer thereof, and except such as are sold by auctioneers at public sale under license) and all persons who keep houses or carriages for hire (except such as are used in the transportation of goods) must obtain from the Tax Collector, and pay for each distinct and separate business, occupation, and pay quarterly therefor an amount of money to be determined by the class in which such person is placed by the Tax Collector, such business to be classified and regulated by the amount of the average Monthly sales made or hiring done, and at the following rates

First Class. Those who are estimated to make average monthly sales or hiring to the amount of $2,500 per month or more constitute the first class and must pay a license of $50 per quarter.

Second Class. Those who are estimated to make average monthly sales or hiring to the amount of $1,250 and less than $2,500 constitute the second class and must pay a license of $25 per quarter.

Third Class. Those who are estimated to make average monthly sales or hiring of less than $1,250 constitute the third class and must pay a license of $15 per quarter.

SEC. 9. The sales of liquors and wines by persons licensed under the preceding Section must not be in quantities of less than one gallon measure.

No license must be granted to physicians, surgeons, apothecaries or chemists for any wines or spirituous liquors they may use in the preparation of medicines.

SEC. 10. Every traveling merchant, hawker, or peddler who carries a pack and vends goods, wares or merchandise other than the manufactures and productions of this State must pay for a license $50 per month; and every such traveling hawker, merchant or peddler who uses a wagon and one or more animals for the purpose of vending such goods, wares, or merchandise of any kind must pay for a license $75 per month.

SEC. 11. Every person who keeps a stallion, jack or bull and who permits the same to be used for the purpose of propagation for hire must annually obtain a license therefor from the Tax Collector and pay therefor as follows:

First. Horses that are hired for the purpose of propagation by the season at $100 or more constitute the first class and require a license of $75.

Second. At $75 and less than $100 constitute the second class and require a license of $50.

Third. At $50 and less than $75 constitute the third and require a license of $40.

Fourth. At $25 and less than $50 constitute the fourth class and require a license of $25.

Fifth. At $15 and less than $25 constitute the fifth class and require a license of $15.

Sixth. At less than $15 constitute the sixth class and require a license of $10.

Seventh. For each jack, $20.

Eighth. For each bull, $20.

A license for propagation obtained from the Tax Collector under the provisions of this ordinance shall entitle the holder thereof to the right to go into any county of this State for the purpose of propagation without any further license or expense.

SEC. 12. Every person who commences or carries on in the County of Inyo any business, trade, profession, or calling to the transaction of which a license is required by any ordinance of the Board of Supervisors of said county without taking out the license prescribed by such ordinance is guilty of a misdemeanor and shall be punished by a fine not exceeding $500 and in lieu of the fine herein such as are used in the transportation of goods) must obtain from the Tax Collector, and pay for each distinct and separate business, occupation, and pay quarterly therefor an amount of money to be determined by the class in which such person is placed by the Tax Collector, such business to be classified and regulated by the amount of the average Monthly sales made or hiring done, and at the following rates

First Class. Those who are estimated to make average monthly sales or hiring to the amount of $2,500 per month or more constitute the first class and must pay a license of $50 per quarter.

Second Class. Those who are estimated to make average monthly sales or hiring to the amount of $1,250 and less than $2,500 constitute the second class and must pay a license of $25 per quarter.

Third Class. Those who are estimated to make average monthly sales or hiring of less than $1,250 constitute the third class and must pay a license of $15 per quarter.

SEC. 9. The sales of liquors and wines by persons licensed under the preceding Section must not be in quantities of less than one gallon measure.

No license must be granted to physicians, surgeons, apothecaries or chemists for any wines or spirituous liquors they may use in the preparation of medicines.

SEC. 10. Every traveling merchant, hawker, or peddler who carries a pack and vends goods, wares or merchandise other than the manufactures and productions of this State must pay for a license $50 per month; and every such traveling hawker, merchant or peddler who uses a wagon and one or more animals for the purpose of vending such goods, wares, or merchandise of any kind must pay for a license $75 per month.

SEC. 11. Every person who keeps a stallion, jack or bull and who permits the same to be used for the purpose of propagation for hire must annually obtain a license therefor from the Tax Collector and pay therefor as follows:

First. Horses that are hired for the purpose of propagation by the season at $100 or more constitute the first class and require a license of $75.

Second. At $75 and less than $100 constitute the second class and require a license of $50.

Third. At $50 and less than $75 constitute the third and require a license of $40.

Fourth. At $25 and less than $50 constitute the fourth class and require a license of $25.

Fifth. At $15 and less than $25 constitute the fifth class and require a license of $15.

Sixth. At less than $15 constitute the sixth class and require a license of $10.

Seventh. For each jack, $20.

Eighth. For each bull, $20.

A license for propagation obtained from the Tax Collector under the provisions of this ordinance shall entitle the holder thereof to the right to go into any county of this State for the purpose of propagation without any further license or expense.

SEC. 12. Every person who commences or carries on in the County of Inyo any business, trade, profession, or calling to the transaction of which a license is required by any ordinance of the Board of Supervisors of said county without taking out the license prescribed by such ordinance is guilty of a misdemeanor and shall be punished by a fine not exceeding $500 and in lieu of fine herein such as are used in the transportation of goods) must obtain from the Tax Collector, and pay for each distinct and separate business, occupation, and pay quarterly therefor an amount of money to be determined by the class in which such person is placed by the Tax Collector, such business to be classified and regulated by the amount of the average Monthly sales made or hiring done, and at the following rates

First Class. Those who are estimated to make average monthly sales or hiring to the amount of $2,500 per month or more constitute the first class and must pay a license of $50 per quarter.

Second Class. Those who are estimated to make average monthly sales or hiring to the amount of $1,250 and less than $2,500 constitute the second class and must pay a license of $25 per quarter.

Third Class. Those who are estimated to make average monthly sales or hiring of less than $1,250 constitute the third class and must pay a license of $15 per quarter.

SEC. 13. The Tax Collector shall have the collection of the license provided for in this ordinance, and it is his duty made his duty to collect the same and he may enforce the collection as provided by Section 3.80 of the Political Code of California.

SEC. 14. This ordinance shall take effect and be in force on and after twenty days from its passage.

SEC. 15. This ordinance shall be published in the INYO INDEPENDENT, a newspaper printed and published in said county, at least two weeks.

The above ordinance was passed by the Board of Supervisors of Inyo county at a regular meeting of said Board October 4, 1887, by the following vote:

Ayes: Harger, Robinson and Eldred.
Noes: None. J. D. HARGER,
Attest: P. H. MACK, Clerk. Chairman.

TAKE SIMMONS LIVER REGULATOR
For all Diseases of the
Liver, Kidneys, Stomach and Spleen.

This purely vegetable preparation, now so celebrated as a Family Medicine, originated in the South in 1828. It acts gently on the Bowels and Kidneys and corrects the action of the Liver, and is, therefore, the best preparatory medicine, whatever the sickness may prove to be. In all common diseases it will, unassisted by any other medicine, effect a speedy cure.

The Regulator is safe to administer in any condition of the system, and under no circumstances can it do harm. It will invigorate like a glass of wine, but is no intoxicating beverage to lead to intemperance; will promote digestion, dissipate headache, and generally tone up the system. The dose is small, not unpleasant, and its virtues undoubted.

No loss of time, no interruption or stoppage of business while taking the Regulator.

Children complaining of Colic, Headache, or Sick Stomach, a teaspoonful or more will give relief.

If taken occasionally by patients exposed to MALARIA, will expel the poison and protect them from attack.

A PHYSICIAN'S OPINION.

I have been practicing medicine for twenty years, and have never been able to put up a vegetable compound that would, like Simmons Liver Regulator, promptly and effectively move the Liver to action, and at the same time aid (instead of weakening) the digestive and assimilative powers of the system. L. M. HINTON, M. D., Washington, Ark.

SATURDAY, NOVEMBER 12 1887

MARRIED.

NICKERSON—BUELNA—At Darwin, November 6, 1887, by J. F. Hawley, J. P. Mr. Ralph Nickerson and Miss Lucy Buelna.

BORN.

LUBKEN—At Lone Pine, October 21, 1887, to Mr. and Mrs John Lubken, a son.

Jenny Lind, the famous singer, died recently in London aged 68 years.

Mr. W. S. Enos left for Yolo county this morning. He expects to be gone about three weeks.

Mr. N. G. Fairman came in from Panamint at the beginning of the week and stayed till Friday.

J. J. Stewart and E. H. Edwards, of Lone Pine were among the comrades at the G. A. R. party on Tuesday evcing.

A. J. Creaser, of Benton, was at Bishop and attended the inauguration ceremonies of the new Masonic Lodge last Saturday.

Rev. T. E. Sisson will preach at the M. E. Church tomorrow [Sunday] evening at 7.30 o'clock. Sunday school at 11 o'clock a. am.

Mrs. J. R. Eldred came down from Bishop Creek last Monday and has been visiting with friends in town and at Keeler all the week.

There will be preaching in the M. E. Church on Sunday evening. Sunday school at 11 a. m. All are cordially invited to attend.

C. Meysan presented a petition, asking for the repeal of the sheep license ordinance; the petition contained forty-five names.

All the business before the Supervisors being finished they have adjourned till Tuesday of week after next, November 29th.

Henry S. Egerton was found dead in the office of a friend in San Francisco on Friday of last week. He was one of the most eloquent men the State ever had.

Tom. Gormley, a big brute who made a criminal assault upon a little girl near Los Angeles, has been convicted and sentenced to the penitentiary for fifty years.

Pat Clinton, as a groomsman, looked almost as happy as if he was at his own wedding. Having taken the first degree Pat should continue to advance to the grand degree of matrimony.

A load of pipe for the town water works was brought in a few days ago by White Smith. There is now enough pipe on hand to supply nearly the whole town and it will all be laid in a short time.

The Supervisors of Mono county offer a a reward of $300 for the arrest and conviction of some person unknown for the murder of Jean Pratt on or about the 25th day of July last in said county,

R. S. Miner, Esq., has been engaged as special counsel to have charge of all cases that may arise under the Sheep License Ordinance, the Liquor License, or other ordinances passed by the Board.

Messrs Rollins and Fogg arrived at Independence at the end of last week. They are in the employ of the Chicago builders of the ditching machine lately shipped here for use on the east side canal, and came to put the machine in operation.

In the case of the Chicago anarchists, the Supreme Court denied the writ of error asked for; and unless the Governor of Illinois should interpose his authority nothity would prevent the execution of the condemned men yesterday.

The National Republican Committee is called to meet at Washington D. C. December 8th to fix the date and place of holding the National Convention, which must be fixed at least six months before the time of meeting of the Convention.

D. O. Adkinson, who came to Nevada in 1863 and located in Virginia City, died in San Francisco yesterday morning. His remains are exbected to pass through Reno to-morrow morning for Virginia City, where they will be interred.—*Reno Gazette.*

Mr. F. J. Wall and Mr. J. Wall, of New York, are at Panamint. The former is Secretary and Treasurer for the Surprise Mining and Milling Company, and is looking after the Company's interests at Panamint. The gentlemen are likely to stay a week or two yet.

W. P. George, Esq., appeared before the Supervisors on Thursday and made an elaborate argument in support of a petition for the repeal of the sheep license ordinance. A. R. Conklin, Esq., appeared and argued in favor of maintaining the ordinance as passsed.

A good many men are like Tom. Sawyer's cat, that cried for the pain killer, but cried worse after she got it. The Supervisors were urged and importuned to pass the sheep license ordinance; they did pass it; and now there is nearly, if not quite as strong a demand for its repeal.

Bishop Creek is to have another hotel. The Bodie *Miner* says: "O. H. Hill, of the Bodie House, had this week a force of carpenters tearning down the large building adjoining Miners Union Hall on the south. It was shipped to Bishop Creek, where it will it be put up and run as a hotel."
